The fifth anniversary festival service of the London Gregorian Choral Association was celebrated at St. Paul's Cathedral last week, and the progress of the society may be inferred from the fact that between a thousand and eleven hundred choristers defiled slowly along the nave into the choir during the singing of the processional hymn, "Coelestis Urbs Jerusalem," with which the service commenced, the singers having been aided by the brass instruments of members of the band of the association, some of whom took part in the procession. The effect of the alternate unison singing by the boys and men as they passed to their seats was very imposing. The large congregation, in answer to an earnest request, took part in the alternate verses of the Psalms, and also responses and metrical hymns. The anthem, "Fear not, O Land," was the composition of Mr. C. Warwick Jordan, Mus. Bac. Oxon, the honorary organist of the society. A sermon was preached by the Rev. Canon

Ashwell from the 21st chapter of St. Matthew, 16th verse:—"And Jesus said unto them, Yea, have ye never read: Out of the mouths of babes and sucklings Thou has perfected praise?" in which the claims of the Gregorian services were eloquently advocated.

Mr. John Child, a rising young artist, gave a concert on Wednesday evening at Exeter Hall. He was ably supported—the vocalists being Miss Banks, Madame Clara Suter, Miss Emily Mott, Mr. Alfred Calkin, and Mr. Lewis Thomas. Mr. Edward Howell played a solo on the violoncello, and Mr. W. Henry Thomas on the pianoforte. Mr. Frank Lewis was the accompanist.

The Sacred Harmonic Society closed its forty-fifth season yesterday (Friday) evening with performances of Spohr's "Last Judgment" and Mendelssohn's music to "Athalie." Our notice is unavoidably reserved for next week.

The fourth New Philharmonic Concert of the season is announced for this (Saturday) afternoon, at St. James's Hall; and in the evening the third concert of the Royal Albert Hall Amateur Orchestral Society is to take place there in aid of the funds of the Shipwrecked Mariners' Royal Benevolent Society.

The seventh concert of the Philharmonic Society will be given on Monday evening at St. James's Hall—the programme including Spohr's symphony known as "The Power of Sound," and a violin concerto by Professor Macfarren, to be played by Herr Straus. At Exeter Hall on the same evening the anniversary of the birthday of Thomas Moore is to be celebrated by a concert consisting of his songs and melodies.

The detailed programme of the Festival of the Three Choirs, to be held at Gloucester on Sept. 4, 5, 6, and 7, is now arranged. There is to be, as usual, full choral service on the morning of the first day, preceding the performance of "Elijah." On Wednesday morning Bach's "Passion Music" (St. Matthew) and Beethoven's "Egredi" ("The Mount of Olives") will be given; and in the evening "The Creation" and "St. Paul." For Thursday morning Brahms's "Requiem," Wesley's "Wilderness," and Mendelssohn's "Hymn of Praise" are set down; the festival closing, as usual, on Friday, with Handel's "Messiah." There will be two secular concerts (at the Shirehall) on Tuesday and Thursday, when, among other pieces, Gade's "Crusaders" and Schumann's "Paradise and the Peri" will be given. The principal vocalists engaged are Mdlle. Titiens, Miss Löwe, Miss B. Griffith, Madame Patey, and Messrs. Lloyd, Cummings, Maybrick, and Santley.

THEATRES.

At White-tide dramatic affairs show themselves in a state of transition; managements are scarcely in a condition to discard the old, and have not acquired courage enough to initiate the new.

The Lyceum finds itself in this position, and falls back on Mr. Charles Reade's revised version of "The Courier of Lyons," in which the dual hero was most effectively sustained by the late Mr. Charles Kean. Mr. Henry Irving seeks, too, to improve his reputation by adopting the rôle, a reasonable thing enough to do, seeing that he made his mark originally as an actor of character-parts. The play was primarily produced at the Gaité, Paris, under the title we have above recorded. Mr. C. Reade has given the new version a new title, that of "The Lyons Mail." The reader will perhaps remember that the old title was founded upon a trial in France under the Directory, and turned upon the resemblance between two persons, a respectable citizen and a rogue, so strong that it misled alike Judge and witnesses, and occasioned an innocent man to be convicted of a crime committed by a ruffian. The play is made to end happily, but the actual fact reversed that much-wished-for solution. For, although a chain of events enabled the unfortunate Joseph Lesurques at the last moment to prove an *alibi*, the decision of the Court was final, and so the real culprit escaped, and his innocent double was executed. The descendants of the latter were pleased that a play had been produced on the subject, and expressed their thankfulness to the author and management, begging that the real name of their grandfather, Joseph Lesurques, might be used, that posterity, through the instrumentality of the drama, might be certified of his innocence. The play itself is simple to a degree in its outline, nor is any attempt made to fill it up with ambitious dialogue or sentimental characterisation. There is altogether an absence of ambition in its structure and treatment; in fact, we have nothing but a bare melodrama, the skeleton of a dramatic work minus the flesh and blood of poetry, needful to give a decent covering to the naked anatomy. Nevertheless, the piece is not without vitality; skill is shown in the drawing of character, and in one instance to this end the aid of costume is secured. One of the robber-gang affects the dandy, and is dressed in coloured silks, by the name of Courriel, admirably interpreted by Mr. R. G. Lyons. This part is quite as essential to the success of the performance as the dual rôles of Lesurques and Dubosc themselves. Another character also stands out, that of Jerome, the father of the victim, ably acted by Mr. T. Mead. He is supplied, moreover, with an extra scene, added by Mr. C. Reade to the second act, which brings down the curtain with increased applause. We were much pleased with Mr. Tyar's impersonation (for it was no less) of the police magistrate. Miss Virginia Francis as Julie, the daughter of Lesurques, was remarkably effective; and Jeannette, one of Dubosc's female victims, found a good representative in Miss Isabel Bateman. The scenery was appropriate and picturesque, and, with the accessories, cannot fail to increase the attractions of the revived melodrama.

The Adelphi follows suit by reviving one of Mr. Boucicault's dramas, entitled "The Streets of London," which we need scarcely say was founded on a French melodrama called "Les Pauvres de Paris," in seven acts, and played at the Ambigu Comique. There have been several versions of this attractive play, but the palm must be rendered to the present. It is adequately represented on this occasion, and the scenery, by Messrs. F. Lloyds and S. Hall, is superb, particularly the set of Charing-cross and Northumberland House on a snowy night. Mr. McIntyre as Crawley, and Mr. J. G. Shore as Mark Livingstone, especially command our admiration; while Mr. S. Emery as Badger sustained his well-merited reputation as a realistic actor. From Miss Hudspeth as Lucy, Miss E. Stuart as Alida Crawley, and Miss C. Nott as Mrs. Puffy, we naturally expected good representative acting of the several parts; nor were we disappointed.

At the Globe (now under the management of Mr. Edward Righton) the revival of another of Mr. Boucicault's adaptations was effected on Monday. It is called "After Dark," and was founded on a Porte St. Martin drama entitled "Les Oiseaux de Proie," written by MM. d'Ennery and Grange. Mr. Boucicault much improved this piece, and added to its effect by the introduction of a railway accident in a tunnel, by which a man is nearly run over by a train passing along at full speed. Mr. Ryder sustains the principal rôle, that of Old Tom, who rescues his daughter from dangerous associations and restores her to her husband; and Mr. Righton himself that of Dicey Morris, the Jew gambling-house keeper. The scenery is illustrative of London localities, and is capably painted by Messrs.

G. Gordon and W. Harford. The performance appeared to suit exactly the taste of the audience.

At the Gaiety Mr. Hollingshead has made great preparation for the performance of French dramas, taking place every night and Saturday afternoon. His programme is very extensive; but, as it is conditional on the permission of time, it would be premature to state yet awhile its contents. On Monday was produced a three-act comedy of MM. Erckmann-Chatrian, entitled "L'Ami Fritz," in which M. Frederic Febvre appeared in his original character of Fritz Kobus, and Mdlle. Alice Lody in that of Suzel. The play might be called three scenes rather than three acts; in which we are presented with a triad of domestic pictures, charmingly grouped, but uncommonly free from anything that can be called a casual occurrence or a striking situation. Story there is none; but there is plenty of conversation, and about nine sketches of character, all of them more or less interesting, and most of them very respectably sustained. The two principal ones by M. F. Febvre and Mdlle. A. Lody were both eminently satisfactory. For the materials and *personelle* of the action there are a lover and his friend and an ingenuous heroine, who together compose a sort of domestic idyl, which might gently move a sympathetic sentimentalist. Sometimes also they say things which provoke a hearty laugh from the more robust auditor, and occasionally exhibit many phases of histrionic capacity, here and there pathetic, and sometimes witty; forming altogether an intellectual entertainment which can be readily enjoyed, but not easily described. Recorded as a great Parisian success, it is nevertheless not likely to prove exceedingly attractive to a London audience, which requires a certain amount of bustle and some complexity of motive and incident. The writing, however, is throughout good and lively, aiming at an elegance of diction sufficient to commend the production to a refined judgment. This surely merits cultivation. And perhaps it would be well on other accounts for English audiences to learn to appreciate dialogue better and the business of the play less than they are accustomed to do. They would then concentrate their attention more on artistic acting and less on the adjuncts of the drama. They have now an opportunity of learning to do this. They may watch M. Febvre at his hospitable board, his selfish hilarity, and unconscious benevolence, ere long to be awakened by his love for the Alsatian maiden who forms one of the party, and has ministered by her quiet manners to his delight. Afterwards it will be pleasing to see him at his neighbour's farm, listening to the music prepared for him by his lovely tenant, or partaking of the ripe cherries which she plucks for this living tree. Nor will it be less instructive to watch his moods on his return home, and while suffering from the first mysterious motions of incipient love. It will also be well to study the doings and sayings of his friend Rabbi David Sichel, as presented by M. Libert, who does all the justice he can to the sage man's eloquence in favour of marriage; and then, perceiving that Fritz and Suzel are already in love, takes measures to foster the flame and bring about their desirable union. Above all, the serene, placid, and yet wonderfully effective acting of Mdlle. Alice Lody cannot fail of teaching a lesson by which the taste both of our histrionic artists may be improved and that of our ruder English audiences at the same time. We therefore wish success to these foreign efforts.

Monday being Bank holiday, the Crystal and Alexandra Palaces were well attended. At the former the pantomime of "Goody Two Shoes," performed by children, and a grand vocal and military concert, supported by popular artistes, such as Madame Lemmens-Sherrington, Madame Patey, Mr. Patey, and Mr. Edward Lloyd, gave entire satisfaction to an overwhelming audience. At the latter a great variety of amusements delighted the crowds which found their way to the building, to the number of 50,000 or 70,000 persons. Of the performers, perhaps the Clown Cricketers were the most favoured; but credit must also be given to Mr. Howard Paul for his entertainment, to Mr. Weldon for his Circus, to Lulu for his or her feats, and also to Joe Brown's Minstrels, together with the band of the Coldstream Guards and that of the Royal Artillery. We trust that the public will encourage both these institutions by increasing patronage. The outline of arrangements for the Alexandra Palace season 1877-8 has been issued. It includes Saturday popular summer evening concerts, English operas, dramatic performances, a variety of shows, four race meetings, an American trotting meeting, and a long list of other attractions.

A farewell benefit was given to Mr. Creswick at the Gaiety Theatre on Wednesday afternoon, prior to his departure for Australia. "Macbeth" was performed, Mr. Creswick sustaining the principal part. Next Monday Mr. Creswick is to be entertained at dinner at the Freemasons' Tavern.

Mr. Gladstone will address a great meeting at Bingley Hall, Birmingham, next Thursday, the 31st inst.; and has accepted an invitation to a banquet to be given by the Mayor on the following day.

As a boat's crew in charge of a midshipman was returning last Saturday evening to H.M.S. Urgent, lying at Spithead, a gust of wind caught the sail and capsized the boat. The occupants were left struggling in the water, and before assistance could arrive from the Urgent, whence the accident was witnessed, two seamen had been drowned, and a third had received such injuries in the overturning of the boat as to necessitate his removal to Haslar Royal Naval Hospital.

The inquiry respecting the death of the five miners who lost their lives by the flooding of the Tynewydd Colliery has been concluded. Mr. Wales, the Government inspector, said he believed that the neglect of proper precautions to prevent the irruption of water from the old workings was the cause of the accident. The jury returned a verdict of manslaughter against Mr. Thomas, the manager, the death of the five men being attributed to culpable negligence on his part. They added, however, that they thought the accident arose from a mistake he made in inspecting a fault. He was admitted to bail.

The United Presbyterian Synod held its annual May meetings during the past week in Glasgow. The principal subject under consideration was a proposal to subject the subordinate standards of the Church, including the Confession of Faith, to revision. This question came before the Synod in connection with three overtures from the Presbyteries of Glasgow and Perth and the Session of Gourack, all acknowledging the right of the Church to revise its subordinate standards, and recommending in more or less definite terms that the Court should now proceed to take up this work of amendment. There was a lengthened debate on the subject, the leaders of the Church—such as Principal Harper and Dr. Cairns—taking part in it. Ultimately a large committee, representing the extreme as well as the moderate parties in the Church, was appointed to consider the subject and report to the meeting of Synod next year. The Disestablishment question was also discussed, of course on the lines of securing the speedy disestablishment and disendowment of the State Churches of England and Scotland, and the committee was reappointed for another year.

MUSICAL PUBLICATIONS.

Messrs. Boosey and Co. have just published a complete edition of Beethoven's pianoforte sonatas, comprising not only the well-known thirty-two, but also six additional works (one unfinished) belonging to the composer's youthful period, and therefore interesting as showing the rapid progress of his genius. Mr. W. Dorrell has acted as editor of the publication, and is to be commended for having put at the head of every page the opus number of the respective sonatas, thereby often obviating the necessity of referring to the index which is prefixed to the work. The volume is handsomely got up, in quarto size, and the engraving and printing are neat and clear.

Two other valuable publications have recently been issued by Messrs. Boosey, in the same form and shape—Bach's St. Matthew "Passion Music" and Beethoven's oratorio, "The Mount of Olives." Specialties in each of these are the admirable, and almost literal, English translations of the original German text by the late Mr. John Oxenford, these being among the latest of his literary labours. Notwithstanding the difficulty of the task, the close adaptation of the words has not been effected at a sacrifice of the rhythm of the composition. The musical portion of these volumes has been carefully and judiciously edited by Mr. J. Pittman, a gentleman who is in every way qualified for the office. The musical public can scarcely fail to accord an extensive welcome to these editions, in which the originals are so closely followed.

The chorales so plentifully introduced in the Passion Music are published separately—words and music—in a neat octavo edition, for sixpence.

A new and enlarged edition of Logier's "System of the Science of Music, Harmony, and Composition" has just been published by Messrs. Boosey and Co., prefaced by "A Bird's-Eye View of the Elements of Music, and an Explanation of Musical Characters, by John Green." It is now upwards of half a century since Logier achieved a rapid and wide renown, in London and abroad, by his system of class instruction in practical and theoretical music, and his invention of the "chiroplast," a mechanical contrivance for facilitating the acquirement of the independence and power of the fingers in pianoforte-playing. Logier was a musical instructor of great merit, and his system contains much that is worthy of study.

"Vacca's Singing Method" is a valuable compendium of instruction in Italian singing (*da camera*), without the use of solfeggi, by a master whose name is a guarantee for the soundness of the work. The verbal text to the exercises is given in Italian and English. This publication is also issued by Messrs. Boosey and Co.

From Messrs. Novello and Co. we have various new publications of pianoforte music. "Five Pieces, Op. 13," by C. Mackenzie, are full of interest and character: "Gloriette, Souvenir de Schonbrunn," by E. Roedel, has much grace of style; the "Air de Danse de la Régence," by the same, being well impressed with the quaint stateliness implied by its title.

"Six Romances sans paroles," by Lefebure-Wely, each with a suggestive title, are very melodious and pleasing pieces, in a form that has been much imitated since it was originated by Mendelssohn.

"Impromptu Caprice" and "Légende," both by Oliver A. King, are very effective movements, the first in the brilliant, the other in the expressive style, each containing much clever passage-writing that will be found interesting and improving in practice.

"Album Leaves," by R. F. Dale, are pleasing bagatelles, with much contrast of style and expression. "Polonaise," by Edward Hecht, is a brilliant and showy piece, based on the dance rhythm implied by the title. All these are published by Messrs. Novello, Ewer, and Co., as is a reprint of Liszt's transcription of Spohr's romance, "Rose softly blooming" (from the opera of "Azor and Zemira")—the adaptation is charmingly made, and is free from those difficulties which usually characterise Liszt's pianoforte arrangements.

Schumann's music to "Faust" has just been published by Messrs. Novello and Co. in a handy, cheap, octavo edition, with a cleverly executed English version of the words by Miss Louisa Vance, who has also supplied some interesting prefatory notes. As the music ranks among the most important of the composer's works, and as it was recently given by the Philharmonic Society for the first time in London, the publication can scarcely fail to be widely acceptable.

"English Glee and Madrigal Writers," by W. A. Barrett, Mus. Bac., Oxon (W. Reeves, Fleet-street). This pamphlet consists of two lectures which were successfully delivered by the author, at the London Institution, in January and February last. Mr. Barrett is not only a practical musician, but is thoroughly well read in the history and literature of his art, with a special knowledge of our national music, secular and sacred; and the lectures now referred to are an excellent digest of the subject, valuable for the information they contain, and interesting from the fluent and clear style of treatment.

Messrs. Augener and Co. have recently made some very valuable additions to their already large collection of classical publications. Specially welcome to pianoforte students will be their handsome reprint (in full library size) of Carl Tausig's selection from the admirable series of studies by Clementi, entitled "Gradus ad Parnassum"—somewhat of a misnomer, since the exercises in their original shape are scarcely in a progressive order of difficulty. The late Herr Tausig has placed the selected numbers so as to remedy this objection, and has added copious indications of the fingering, besides a supplementary study of scale passages of thirds for both hands, in the major and minor keys. While on the subject of pianoforte studies, we mention Messrs. Augener and Co.'s reprint of Carl Mayer's set of six charming pieces of this kind, op. 31.

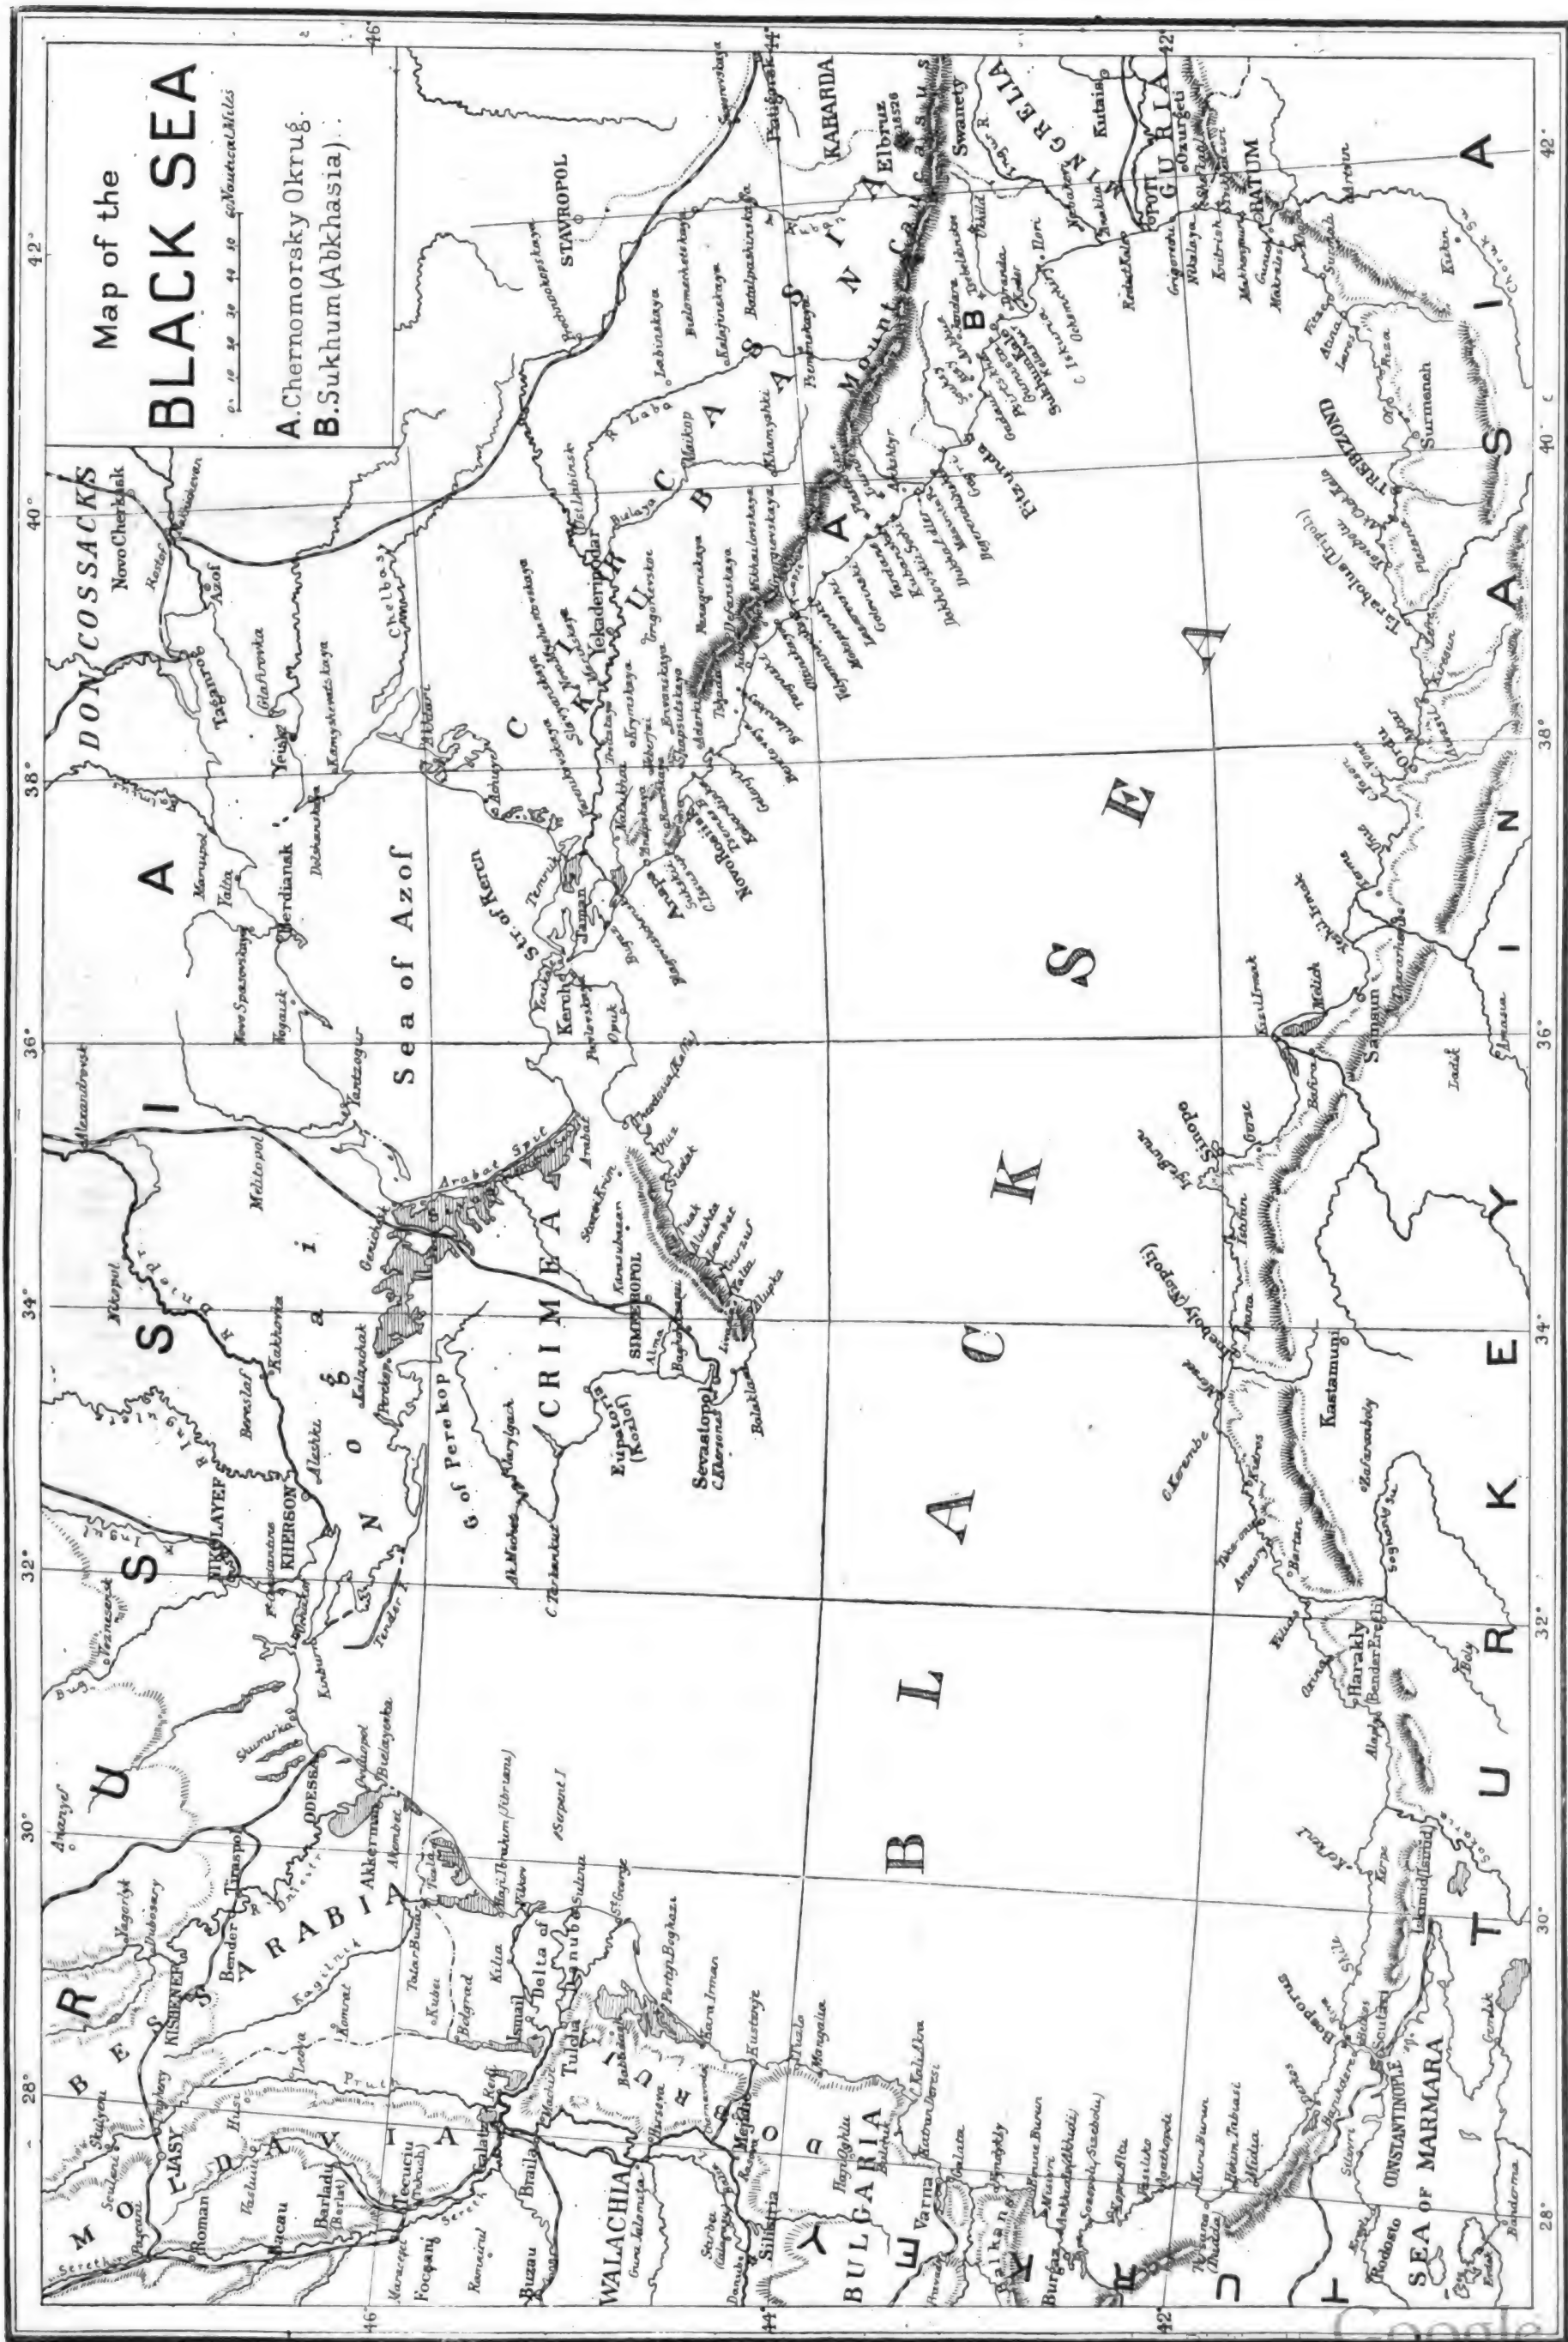

The same publishers have extended their comprehensive series of cheap octavo editions of pianoforte classics, edited by Herr Pauer, by a volume containing fifty of the best Harpsichord Lessons of Domenico Scarlatti, the charm and grace of which still remain, notwithstanding the antique style.

We have previously spoken in commendation of Hemy's "Royal Modern Tutor for the Pianoforte," a cheap and compendious instruction book published by Messrs. Metzler and Co. That it has found large acceptance is proved by the recent issue of the 600th edition. "Kaiser-I-Hind" is the title of a song of national homage to the Queen of England, composed by Ethel Harraden. The music is bold and effective in its rhythm, and expresses well the patriotic sentiment of the words, which are by O. C. Dutt, of Calcutta. Prefixed to the song is a very characteristic melody to the same words, by Rajah S. M. Tagore, Mus. Doc., Calcutta, where the piece is published, the London publishers being Messrs. Boosey and Co.

The barque Scottish Bard, 815 tons, Captain D. Kerr, has sailed from Gravesend, bound for Townsville and Rockhampton, Queensland, having on board 252 souls, equal to 225 adults, consisting of ninety single men, sixty-one single women, fifty-four married people, forty children between the ages of twelve and one, and seven infants.

THE WAR: SOUKHOUM KALEH, RUSSIAN FORTIFIED PORT ON THE BLACK SEA, LATELY CAPTURED BY THE TURKS.

ROYAL INSTITUTION LECTURES.

CHEMISTRY OF THE STARS AND NEBULÆ.

Dr. J. H. Gladstone, in his fifth and concluding lecture, given on Tuesday, the 15th inst., described some of the results obtained by the application of spectrum analysis to the light of the fixed stars and nebulae by Dr. Huggins, Mr. Norman Lockyer, Dr. W. A. Miller, Father Secchi, and other philosophers, many of the beautiful spectra being thrown upon the screen, and photographs of others exhibited. Secchi divides the fixed stars into four groups. The first, comprising about half of those visible to the naked eye (of which Sirius and Vega may be taken as examples) are white, with a somewhat bluish tinge, and exhibit a continuous spectrum with four marked dark lines, indicating hydrogen, with fainter indications of magnesium, sodium, iron, and other elements. About a third of the stars are comprehended in the second group, Arcturus and Capella being examples. They are of a somewhat yellow colour, and their spectra indicate the presence of many of the same elements which have been recognised in the sun; but, in addition to these, mercury, antimony, bismuth, and tellurium have been noticed in the atmosphere of Aldebaran. The stars of the third group (of which Alpha in Orion may be taken as an instance) are of a reddish colour, and their spectra are marked by a large amount of absorption, the bands frequently appearing like grooved spaces. These stars, which somewhat resemble the light of the sun-spots, are probably low in temperature. The fourth group contains some very faint stars, their spectra being characterised by three bright bands of green and blue. To these a fifth group may be added, in which the hydrogen lines of their spectra are bright instead of dark; and in star Eta of Argo, magnesium, sodium, and nitrogen are also luminous gases. The strongly contrasted colours in double stars Dr. Gladstone ascribed to the different absorption of their atmospheres. Variable stars, he said, generally belong to the third group, but exhibit at different periods great changes in their dark bands as well as in their brilliancy; the latter having been observed by Tycho Brahe and Kepler. The great outburst of light in Tau of Corona Borealis, in May, 1866, was attended with brilliant hydrogen lines and great luminosity in the body of the star; and similar phenomena were observed in a new star in Cygnus in December last. Dr. Huggins, by means of the spectroscopic, has been enabled to determine the rate of motion of many of these stars to or from the earth; he calculated that Sirius moves from the earth at the rate of twenty-six miles per second. The nebulae were next considered. Some are clusters of stars, others merely luminous mists or gases, with spectra containing three bright lines—hydrogen, nitrogen, and one line yet undetermined. They generally have a central nucleus with a continuous spectrum. In conclusion, Dr. Gladstone referred to the general analogy in the chemical constitution of the whole of the heavenly bodies, together with strongly marked diversities, our knowledge of which is wholly due to the discovery of spectrum analysis by Kirchhoff and Bunsen in 1860.

EFFECTS OF LIQUEFACTION AND VAPORISATION.

Professor Tyndall, in his sixth lecture on Heat, given on Thursday, the 17th inst., resumed his illustrations of the evolution of cold by the liquefaction of solids, shown in a slight degree by common salt, and still more by saltpetre, which chilled warm water. Different substances consume different amounts of heat in changing their state of aggregation, or doing interior work—that required by sugar being very small. The production of cold by vaporisation was next explained and demonstrated by means of the thermo-pile—firstly, by the evaporation of alcohol and sulphuric ether, and afterwards it was shown by Dr. Wollaston's apparatus, termed the "cryophorus," that water may be frozen by the abstraction of heat by its own vapour. This was explained to be the principle of some ice-making machines, and one of Siebe's was exhibited. In regard to the formation of water by the mechanical combination of its elementary gases, hydrogen and oxygen, Professor Tyndall said that it had been proved by calculation that the combustion of 1 lb. of hydrogen in 8 lb. of oxygen, forming 9 lb. of watery vapour, liberated 34,600 units of heat, which possess the power of lifting 47,000,000 lb. one foot from the ground (foot-pounds); that the liquefaction of this vapour liberates heat having the mechanical equivalent of 6,720,000 foot-pounds; and that the conversion of this water into ice liberates heat the mechanical equivalent of which is 993,564 foot-pounds. After noticing Faraday's success in liquefying chlorine and some other gases in strong iron bottles by enormous pressure, while oxygen, hydrogen, nitrogen, and others resisted all his efforts, Dr. Tyndall exhibited some of the results—first freezing mercury by the cold produced by the vaporisation of nitrous oxide, now employed as an anæsthetic. When some liquefied carbonic acid gas was let out of the iron bottle it rushed from the aperture, immediately boiled, and, as it were, flashed into gas, producing a cold so intense as to make part of the gas assume the form of snow. This snow, which froze mercury, vaporised slowly, and cannot be dissolved by water, but may be by ether. Among other striking illustrations of the chilling effects of vaporisation, Professor Tyndall plunged a piece of the frozen mercury attached to a wire into a glass jar containing water. The metal liquefied and showered downwards through the water, freezing that with which it came in contact, thus forming a tube of ice, through which the mercury descended. He also alluded to the elaborate researches of Professor Andrews, of Belfast, on the compression of carbonic acid, in which the gas appeared to behave in a manner analogous to that of a spring, gradually yielding, but recovering its power of resistance when liquefied.

CAUSES OF INDIAN FAMINES.

Lieutenant-General R. Strachey, C.E., F.R.S., began his discourse at the evening meeting on Friday, the 18th inst., by observing that life, whatever shape it takes, is passed in a continued struggle between the forces that tend to preserve it and to destroy it. This is peculiarly the case in India. He combated the notion that the famines render the financial condition of the country hopeless, since there is, on the whole, a sufficient food supply for the population. Referring to a large map, he described the chief geographical features and the peculiarities of certain districts, especially those now suffering from the effects of drought. The chief rainfall is during the south-west monsoon, from May to October, the rest of the year being comparatively dry. In the north there is a distinct season of winter rain, its maximum corresponding with that of cold in January and February. The source of the summer rains is the continued stream of air, highly charged with vapour from the Indian Ocean, by the south-west monsoon. The General pointed out the localities of the periodical rainy seasons, and suggested the causes of the diminished or increased rainfall in certain districts, such as Bengal and Madras. Agriculture may be said to be impossible without irrigation where the rainfall is below fifteen or twenty inches, and in such districts the population are generally independent of rainfall; but where the rainfall exceeds forty or fifty inches, as is the case in Bengal, serious scarcity may be caused; and where it is between twenty-five and thirty-five inches, as in the north-west provinces, north-west Rajpootana, the Deccan, and a small part

of Madras, the greatest suffering from drought occurs through the frequent fluctuations. The calamity is likely to be greater where there is a good average rainfall than where it is scanty, and where the population is less dense, and more fitted to seek subsistence elsewhere. As the people mostly subsist on vegetable food, with milk and butter, the grain crops are of unusually great importance. The rice-eating people is altogether a minority; the chief food grains being the khureef or rubbee, the jowar, and the bajra, which vary in their dependence upon rainfall and irrigation. No physical connection, it was said, has hitherto been established between the local rainfall at any place and the temperature or pressure of the surrounding area, and no step has been taken to foretell the character of the seasons. The supposed connection between sun-spot cycles of eleven years and periodical rainfalls advanced by Dr. Hunter has not been proved; and our knowledge of the immediate physical causes of rainfall is very rudimentary. The only way to combat the worst results of drought is by enlarged provision of artificial irrigation to increase production generally, and by improved modes of transport, both which require the application of capital. The people of India have to bear heavy burdens, but they have unusual aid in their climate and the great reproductive powers of their soil. The only possible mode of escape is labour; and the fruits of industry in years of plenty must be made to meet the want in years of scarcity. A system of public relief in time of distress, not guarded by the sense of specific local responsibility, is a source of grievous abuse, misery, and demoralisation.

ALFRED DE MUSSET.

Mr. Walter Herries Pollock began his second lecture on Modern French Poetry by quoting Théophile Gautier's fantastic story "Le Chevalier Double," as illustrating the twofold character and life of Alfred de Musset, who, on the one hand, was tender, gentle, quick to feel every impression of outward circumstances and to grieve at harshness, ingratitude, or malice; and, on the other hand, could be hard, suspicious, treating life as only tolerable by reckless abandonment of all belief in or striving after high aims, and by the possession of a wit ready to jest at scars, with a heart prepared to deny the possibility of feeling a wound. He would have been a greater poet if he had possessed strength to reduce to order these conflicting elements, but neither ever gained a decisive victory. In his "Confessions d'un Enfant du Siècle" he describes the effect which the career of Napoleon had upon his sensitive mind, like that of Béranger, and how he became one of the reckless youth of the Restoration, which, through the influence of the poetry of Goethe and Byron, formed themselves into two camps; the one imbued alternately with exultation and suffering, like frail reeds floating on a sea of bitterness; the other impassive amid their material joys, free from any care but that of counting their money, giving up religion and all hope of the future, without desiring love or glory, and saying, "To eat, to drink, and to sleep: this is to live." Alfred de Musset's works show that at times he belonged to both of these camps, and they contain his inner history. After stating that he was born, the son of an old and noble race, at Paris, Nov. 11, 1810, Mr. Pollock related several characteristic anecdotes of De Musset's childhood and youth: such as his falling in love, when four years old, with a grown-up cousin, his extreme enchantment by romances, and his deliverance by reading "Don Quixote." He produced his first poems in 1828; and the successful publication of others led Sainte Beuve to say, "Il y a parmi nous un enfant plein de génie," and to his warm reception at Victor Hugo's "cénacle." He now lived at times gaily, like a butterfly, or in rags and despair; at times working hard, the fruits being his "Contes d'Espagne et d'Italie." His fine drama, "La Nuit Vénitienne," failed on its production, Dec. 1, 1830, partly through a ridiculous accident and the want of appreciation. Of his "Caprices de Marianne," which was successful, and displayed his great dramatic power, Mr. Pollock gave a brief analysis, with extracts. In 1832 De Musset published another volume of poetry to decide his career, as he wished, at his father's death, to give up his business for the benefit of the family. It was praised by Sainte Beuve, but generally neglected. However, he was put on the staff of the "Revue des Deux Mondes." Of his life at this time Mr. Pollock gave some interesting details, referring to the works "Lui et Elle" and "Elle et Lui," his love history, to "La Nuit de Décembre," and to his early recognition of the great powers of Rachel and Pauline Garcia. After stating that it was not till after De Musset's death, by disease of the heart, May 2, 1857, that his works received full justice, Mr. Pollock concluded by reading extracts from his charming poem, "La Nuit d'Octobre."

Mr. Oscar Browning will give a discourse on the History of Education at the next Friday evening meeting, June 1. On Saturday next Mr. Charles T. Newton, C.B., will give the first of two lectures on the Recent Discoveries at Mycenæ.

Mr. Walter Mahew, the Mayor of Wigan, on Monday opened the first market hall erected in the borough. The day was observed as a general holiday, and the streets and market hall were profusely decorated. After the opening ceremony the Mayor entertained to luncheon the leading gentlemen of the town and district.

Previous to the departure of her Majesty for Scotland yesterday week, a gentleman of medium stature, rather inclined to stoutness, and fresh complexion, arrived at Windsor Castle, and, announcing that he was King of England, desired to be shown to his apartments in the palace. He was informed that as he had not sent notice of his coming these were not ready, and was requested to take a seat. A doctor pronounced him insane, and he was consigned to the custody of Chief Superintendent Hayes, who took him to the Windsor Union.

There have been enormous icebergs in the Atlantic. Intelligence has been received in Liverpool, dated Quebec, May 5, to the effect that Captain Campbell, of the ship Glenbervie, which had arrived at that port from Glasgow, encountered large fields of ice and a number of bergs, some of which were very lofty, on approaching L'Islet, and was detained several days in consequence. The Una McKenzie, which had arrived from Leith, reports passing through eighty miles of ice before reaching the south point of Anticosti. Amongst the ice, and apparently hemmed in, were three large vessels, one of them being the Royalist. The St. Bernard, which had also arrived at Quebec, had great difficulty in working through the fields of ice and icebergs which she met with. About half-way between the Bird Rocks and the south-east coast of Anticosti she passed through about twenty miles of ice, after leaving which she fell in with and worked through 120 miles of very heavy ice, together with a number of large icebergs, some of which were between 200 ft. and 300 ft. in height. The steamer Yeddo, on her outward voyage from Hull to New York, fell in with several immense icebergs, many of them being over 300 ft. above the water. It was feared at Quebec that some of the Liverpool and Glasgow spring fleet of Quebec ships would run great risk among the ice, which was unusually heavy this year.

OBITUARY OF EMINENT PERSONS.

THE EARL OF ORKNEY.

The Right Hon. Thomas John Hamilton Fitzmaurice, Earl of Orkney, Viscount Kirkwall and Baron Dechmont, in the county of Linlithgow, in the Peerage of Scotland, a representative peer, died at Glen App, on the 16th inst. His Lordship was born Aug. 3, 1803, the elder son of John, Viscount Kirkwall, by Anna Maria, his wife, eldest daughter of John, first Lord de Blaquiere, and succeeded to the Peerage at the decease of his grandmother, Mary, Countess of Orkney in her own right, the family honours being inheritable by the "heirs whatsoever" of the first Earl of Orkney, the distinguished military commander of the time of William III. and Queen Anne. The Earl whose demise we record was formerly in the 9th Lancers. He married, March 14, 1826, Charlotte Isabella, daughter of George, third Lord Boston, and had five sons and three daughters. He is succeeded by his eldest son, George William Hamilton, Viscount Kirkwall, K.C.M.G., who was born in 1827, and married, in 1872, Amelia, Baroness de Samuel, widow of Baron de Samuel, a noble of Portugal.

LORD ERSKINE.

The Right Hon. Thomas Americus Erskine, Baron Erskine, of Restormel Castle, Cornwall, died on the 10th inst. His Lordship was born May 3, 1802, the eldest son of David Montagu, second Lord Erskine, by Fanny, his wife, daughter of General John Cadwallader, of Philadelphia, and was grandson of the celebrated Lord Erskine, Lord Chancellor. He was educated at Harrow, and at Edinburgh University, and was for a few years in the diplomatic service. The title devolved on him at his father's death, in 1855. Lord Erskine married, in 1830, Louisa (who died in 1867), daughter of G. Newnham, Esq., and widow of Thomas Legh, Esq., of Adlington, Cheshire, but had no issue. He is, consequently, succeeded by his next brother, the Hon. John Cadwallader Erskine, late H.E.I.C.S., now fourth Lord Erskine.

SIR W. R. CROSBIE, BART.

Sir William Richard Crosbie, seventh Baronet, of Maryborough, Queen's County, died at Bedford on the 6th inst. He was born Sept. 30, 1820, the son of Edward Crosbie, Esq., by Jane, his wife, youngest daughter of James Henry, Esq., of the county of Kildare, and succeeded his cousin, Sir William Crosbie, sixth Baronet, in 1860. He married, April 11, 1854, Catherine, only daughter of the Rev. Samuel Madden and niece of Sir William Gordon-Cumming, Bart., and leaves three sons and one daughter, of whom the eldest son, now Sir William Edward Douglas, was born Oct. 13, 1855.

MRS. GRENVILLE BERKELEY.

Mrs. Grenville Berkeley (Augusta Elizabeth), who died on the 4th inst., at her residence, 7, Wilton-crescent, was the youngest daughter of James Henry Leigh, Esq., of Adlestrop, in the county of Gloucester, and of Stoneleigh Abbey, Warwickshire, by the Hon. Julia Judith Twisleton, his wife, daughter of Thomas, tenth Lord Saye and Sele, and was thus sister of Chandos, late Lord Leigh, and aunt of the present Peer. She was married, in 1828, to Charles Lennox Grenville Berkeley, Esq. (grandson of Augustus, fourth Earl Berkeley, K.T.), and leaves two daughters, the youngest of whom, Georgina, was recently married to Sydney K. B. Atherley, Esq.

The following deaths are also announced:—

Sir J. S. Cowell-Stepney, Bart., of Llanelly, on the 15th inst. His memoir will be given next week.

Mr. Alderman Allen, suddenly, on the 22nd inst. He was Lord Mayor in 1869, having been elected Alderman in 1858.

Mr. John Baskervyle Glegg, J.P., of Withington Hall and Geyton Hall, Cheshire, at the age of thirty-three.

Mr. Charles Shapland Whitmore, Q.C., Judge of the Southwark County Court and Recorder of Gloucester, aged seventy-one.

Mr. John Richardson Jackson, the distinguished mezzotint engraver, at Southsea, on the 10th inst., after repeated attacks of relapsing fever, in his fifty-eighth year.

Commander Joseph William Crabb, R.N., one of the oldest officers in the Navy, on the 15th inst., at Heavitree, near Exeter, in his eighty-ninth year.

The Most Hon. Cecil, Dowager Marchioness of Lothian, daughter of Charles Chetwynd, second Earl Talbot, and widow of John William Robert, seventh Marquis of Lothian, on the 13th inst., at Rome, in her seventieth year.

Lady Eleanor Cathcart, wife of Sir John Andrew Cathcart, Bart., of Carleton, Ayrshire, only daughter of Archibald Earl of Cassilis, and sister of Archibald, late Marquis of Ailsa, on the 8th inst., at Norbiton, Surrey, in her sixty-third year.

Lady Emily Charlotte Drummond, daughter of the first Earl of Beverley, and widow of Mr. Andrew Mortimer Drummond, on the 22nd inst., at Tile House, Denham, Bucks, having attained the great age of ninety-one.

Lieutenant-General Thomas Tapp, C.B., formerly of the 103rd Regiment, on the 17th inst., at Fairfield, Bradford-on-Avon. He obtained his first commission as Ensign in January, 1822, and had seen much active service.

John Peirse Kennard, Esq., of Hordle Cliff, Hants, and of the city of London, banker, eldest son of John Kennard, Esq., of London, banker, on the 3rd inst., in his seventy-ninth year. He married Sophia, eldest daughter of Sir John Chapman, of Windsor, and leaves several children.

The Right Hon. Lucy Elizabeth, Countess of Home, wife of Csespatrick Alexander, present Earl of Home, and eldest daughter and heiress of the late Lord Henry James Scott, afterwards Lord Montagu, by Jane Margaret, his wife, daughter of Archibald, Lord Douglas, at The Hersel, near Coldstream, on the 15th inst., in her seventy-second year.

Denis Henry Kelly, Esq., of Araghty Grange, in the county of Roscommon, late of Castle Kelly, in that county, a Celtic and antiquarian scholar, J.P. and D.L., High Sheriff for the county of Galway in 1819, and for the county of Roscommon in

1820-1, on the 7th inst., in his eightieth year. Mr. Kelly was a descendant of the Kellys or O'Kellys of Screen, one of the lines of the great Irish family of O'Kelly, chief of Hy-Many.

Mr. T. J. Arnold, F.R.S., the senior metropolitan police magistrate, on Sunday last. He was called to the Bar at Lincoln's Inn on Nov. 24, 1829, was appointed to the Worship-street Police Court in January, 1847, and was thence removed to that of Westminster on Aug. 9, 1851. He was the author of works on Municipal Corporations, the Office of Justice of the Peace, the Labour Laws, and other subjects.

Sir William Hackett, the Chief Justice of Ceylon, the intelligence of whose death from cholera has been telegraphed from Colombo, was born in 1824. He graduated as B.A. at Trinity College, Dublin; and, after joining the Irish Bar, was called to the Bar at Lincoln's Inn in 1851. Since 1861, when he was appointed Lieutenant-Governor of the Gold Coast, he has filled various important colonial offices.

John Pemberton Heywood, Esq., head of the firm of Arthur Heywood, Sons, and Co., of Liverpool, and Heywood, Kennard, and Co., of London, in his seventy-seventh year. He was second son of John Pemberton Heywood, Esq., of Wakefield, barrister-at-law, and grandson of Arthur Heywood, banker, of Liverpool, elder brother of Benjamin Heywood, banker, of Manchester, grandfather of Sir Benjamin Heywood, first Baronet, of Clermont.

Sir Digby Wyatt, after a long illness, on the 21st inst. He was the youngest son of Mr. Matthew Wyatt, late metropolitan police magistrate, and was created a Knight in 1869. Sir Digby, who was born in the year 1820, was educated as an architect, in which profession he greatly distinguished himself. In 1849 he reported on French industrial expositions for the Society of Arts; and, with others, was authorised by the Prince Consort to organise the Great Exhibition of 1851. Subsequently he became secretary to the executive committee of the Royal Commission.

ASTRONOMICAL OCCURRENCES IN JUNE.

(From the "Illustrated London Almanack.")

The Moon will be situated a little to the east of Mars during the morning hours of the 3rd, near Saturn on the morning of the 5th, near Mercury on the morning of the 10th, near Venus during the morning and evening hours of the 12th, and near Jupiter during the night common to the 24th and 25th. Her phases or times of change are:—

Last Quarter on the 4th at 11 minutes after 5h in the morning.	
New Moon " 11th " 32 " 2h " afternoon.	
First Quarter " 18th " 34 " 6h " morning.	
Full Moon " 25th " 58 " 4h " afternoon.	

She is nearest the Earth at about midnight on the 13th, and furthest from it on the morning of the 2nd, and again on the afternoon of the 29th.

Mercury is a morning star, rising on the 5th at 3h. 33m. a.m., or 16m. before the Sun; on the 10th at 3h. 15m. a.m., or 31m. before sunrise; on the 15th at 3h. 0m. a.m., or 44m. before sunrise; on the 20th at 2h. 46m. a.m., or 58m. before the Sun; on the 25th at 2h. 38m. a.m., or 1h. 8m. before the Sun; and on the last day at 2h. 36m. a.m., or 1h. 13m. before sunrise. He is stationary among the stars on the 7th; near the Moon on the 10th; and at his greatest western elongation (22 deg. 20 min.) on the 21st.

Venus is an evening star. The following are the times of setting of this planet at intervals of ten days throughout the month:—1st at 8h. 42m. p.m., 10th at 9h. 2m. p.m., 20th at 9h. 15m. p.m., and the last day at 9h. 18m. p.m., or 1h. after the Sun has set. She is near the Moon on the 12th, and in perihelion on the 27th. She is due south on the 1st at 0h. 27m. p.m., and on the last day at 1h. 8m. p.m.

Mars rises on the 1st at 0h. 36m. a.m., on the 10th at 0h. 13m. a.m., on the 14th at midnight, on the 19th at 1h. 45m. p.m., and on the 29th at 1h. 17m. p.m. He is near the Moon on the 2nd. He is due south on the 1st at 5h. 21m. a.m., on the 15th at 4h. 55m. a.m., and on the last day at 4h. 22m. a.m.

Jupiter rises on the 1st at 9h. 27m. p.m.; on the 9th at 8h. 51m. p.m., or 33m. after sunset. On the 17th the planet rises at nearly the same time as the Sun sets, and from the 18th of June till the end of the year he rises in daylight. He sets at nearly the time of sunrise on the 22nd, and at about 30m. before sunrise at the end of the month. He is in opposition to the Sun on the 19th (at midnight), and near the Moon on the 24th. He is due south on the 1st at 1h. 26m. a.m.; on the 15th at 0h. 24m. a.m.; and on the last day at 1h. 12m. p.m.

Saturn. The following are the times of rising of this planet on every ten days throughout the month:—1st at 1h. 12m. a.m., 10th at 0h. 38m. a.m., 19th at 1h. 59m. p.m., and 29th at 1h. 20m. p.m. He is near the Moon on the 4th, and in quadrature with the Sun on the 10th. He is due south on the 1st at 6h. 45m. a.m.; on the 15th at 5h. 52m. a.m.; and on the last day at 4h. 54m. a.m.

The Devon County Agricultural Association opened a three-days' exhibition at Tavistock on Monday with gratifying success, the weather being fine and the attendance large. Every department of the show was well filled. The show of Devons was excellent, Lord Falmouth taking first prizes in both classes of bulls. Mrs. Langdon, Mr. Farthing, Sir John Amory, Mr. Samuel Kidner, and Mr. William Perry also took prizes. There was a large show of short-horns—the principal winners being Mr. Bult, of Taunton; Mr. Askers, of Gloucester; Messrs. Hosken and Son, of Hayle; and Mr. Hewett, of Norton Court. Mr. Eva, of Camborne, and Mr. Baker, Exeter, were the most successful exhibitors of Channel Island cattle. In a very large show of sheep Earl Fortescue, Sir John Amory, Lord Poltimore, and Mr. Herbert Farthing won the majority of prizes; and Lord Portsmouth, the Earl of Morton, Mr. W. F. Collier, and Mr. Duckering, of Kerton Lindsay, were the largest exhibitors of pigs. There was also a large butter and cream competition.

The thirty-ninth annual report of the Commissioners of the Loan Fund Board of Ireland has been issued. It appears that the falling off in the circulation of loan funds in the course of thirty-three years from the commencement of the institution in 1843 to the end of 1876 amounts to no less than £1,164,831. The most remarkable diminution in the circulation of loan funds was from the year 1845, when it amounted to £1,870,337, to the year 1847, when it fell to £867,115, so that a falling off of upwards of one million sterling may be fairly attributed to the famine year in 1845 and its results—largely increased mortality and extensive emigration in the two succeeding years. The diminution in the circulation of loan funds in the last quarter of a century to the lowest amount it reached, in 1876, which was £517,010, may be attributed partly to alteration for the better in the circumstances of that portion of the agricultural poor of Ireland which constituted the borrowing class of loan funds; but largely it must be ascribed to the practice which has been adopted by the branch banks throughout the country to a large extent—issuing loans so low as £10, and even £5, to borrowers of the class of small farmers and dealers on a small scale, who could only heretofore get loans of such small amounts from loan funds.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

L.A.R. (Bath).—The solution of the problem from "Chess Nuts" commences with 1. K to B 4th. Your own problem shall have early attention.
N.R. (Freckenham).—Problem No. 1739 cannot be solved in the way you propose, and there is no other solution than that published. See the note referring to this problem in our issue of the 12th inst.
H.N.S. (Cambridge).—The same moves in the same order on both sides have occurred in actual play throughout a game, and frequently, indeed, where one side is much weaker than the other in the openings. Here is a short game from Mr. Boden's "Popular Introduction to Chess," that has occurred to scores of players. Remove the first player's K Kt.

1. P to K 4th P to K 4th
2. B to B 4th Kt to K B 3rd
3. P to Q 4th Kt takes P
4. P takes P Kt takes B P
5. Castles Kt takes Q
6. B takes P (ch) K to K 2nd
7. B to K 5th. Mate.

CLARUS (Market Weighton).—The analysis is perfectly accurate. Thanks.

J.M.C. (Taunton).—Conditional problems have no general interest, and yours embodies an idea that has become hackneyed. Compare your composition with the following from Deblano:—White: K at K sq, R's at K B 3rd and Q 3rd, Kt's K B 5th and Q 5th. Black: K at K 5th. White to play and mate in four moves.

CONCISE SOLUTIONS OF PROBLEM No. 1732 received from C.P.D. H. Stebbing, C. Skinner, E. Lawson, Arty, and S.T. Wilson.

CONCISE SOLUTIONS OF PROBLEM No. 1734 received from C.Wood, H.B. Oakley, Only Joe, Triton, W.V.G.D., W.E. Whitehead, Simplex, B. Roughswell, Spalding, C.P.D. Maggie Irwin, J. Williams, B.R. Stone, W. Alston, Tally-ho, E. Fran, S.L. Jan, R.T. King, E. Worsley, N.E.D., C. Skinner, Trial, E.L.G. L.I.C., Mechanic, Scot, J.S.W., H. Burgher, Black Knight, J. Wintons, Sunnyside, Llansey, J. PROBLEM No. 1736.

By C. CALLANDER.

BLACK.

WHITE.
White to play, and mate in three moves.

CHESS IN LONDON.

An amusing Partie, in which Mr. Boden contends against two Amateurs in consultation, played a few days ago at Simpson's Divan.

(King's Gambit declined.)

WHITE (Messrs. M. and N.)	BLACK (Mr. Boden.)	WHITE (Messrs. M. and N.)	BLACK (Mr. Boden.)
1. P to K 4th	P to K 4th	17. K to K 4th	Kt to K 4th
2. P to K B 4th	P to B 4th	18. K Kt takes Kt	P takes Kt
3. Kt to K B 3rd	P to Q 3rd	19. Kt takes R P	Kt to K 5th
4. B to B 4th	Kt to K B 3rd	20. Q to Kt 3rd	B to Kt 3rd
5. P to Q 3rd	Kt to Q B 3rd	21. Kt to B 4th	Kt to B 7th
6. P to Q B 3rd	B to Kt 3rd	22. K to B 2nd	Kt takes B
7. Q to Kt 3rd			

We think 7. Q to K 2nd, with the view of moving the B to K 3rd and casting, a safer line of play than that adopted here.

Much better than taking the Rook, which would have afforded White time to get up a strong attack, by 23. P to B 5th, &c.

23. K takes Kt Q to B 4th
24. R to Q R sq P to K B 4th
25. P to R 4th P takes P (ch)
26. K takes P

Retreating the King would have been better, although it is doubtful if that course would have affected the result. The move in the text gives Mr. Boden an opportunity of finishing the game in masterly style.

26. Q takes P (ch) B to B 3rd.
27. K takes Q Mate.

CHESS IN SCOTLAND.

A Game played in the annual competition between the members of the Edinburgh Chess Club.—(Scotch Gambit.)

WHITE (Mr. Meikle).	BLACK (Mr. Fraser).	WHITE (Mr. Meikle).	BLACK (Mr. Fraser).
1. P to K 4th	P to K 4th	26. Q to Q 7th	Q to Kt 2nd
2. Kt to K B 3rd	Kt to Q B 3rd	27. Q to Q 3rd	Q to Kt 4th
3. P to Q 4th	P takes P		
4. B to Q 4th	B to B 4th		
5. P to Q B 3rd	Kt to B 3rd		
6. B to K Kt 5th	P to K B 3rd		
7. B to K R 4th	P to Q 3rd		
8. Castles	P takes P		
9. Kt takes P	P to K Kt 4th		
10. B to K Kt 3rd	B to K 3rd		
11. B takes B	P takes B		
12. Q to Kt 3rd	Q to B sq		

Black might have safely played the Q to Q 2nd, because he can regain the Pawn at once by R to Kt sq should White capture the Kt's Pawn with the Queen.

13. P to K 5th Kt to K R 4th
14. P takes P Kt takes B
15. R P takes Kt P takes P
16. Kt to K 4th K to Q 2nd
17. Q R to B sq Q to Kt 3rd
18. K R to Q sq K to B 2nd
19. Kt takes B Kt's P takes Kt
20. Q to Q 3rd Q to K B sq
21. R takes P

A very ingenious and daring sacrifice.

22. Q to Q 7th (ch) K to Kt 3rd
23. Kt to Q 2nd Q to B sq
24. Kt to B 4th (ch) K to R 3rd
25. Q to Q 3rd Q to Q Kt sq

44. Q to Q 5th appears decisive. If red we can see no satisfactory reply to that move.

45. R to Q B 7th Resigns.

CHESS INTELLIGENCE.

A chess fête, attended by a large number of the leading metropolitan amateurs, was held on Whit Monday at the residence of Mr. H. F. Gastineau, the president of the City of London Chess Club. In the course of the afternoon Mr. Blackburne contested six games simultaneously *versus* *voir*, and defeated all his adversaries in the brief space of an hour and a half. After dinner several toasts were proposed and duly honoured, including the St. George's Chess Club, the City Chess Club, and the Literature of Chess, &c. A very pleasant day was spent, and the visitors did not separate until a late hour.

WILLS AND BEQUESTS.

The will, dated Nov. 11, 1874, of Sir Thomas Tilson, late of South-road House, Clapham Park, who died on the 9th ult., was proved on the 8th inst. by Tilson Lee and Frederick Lee, the nephews of the deceased, the acting executors, the personal estate being sworn under £180,000. The testator gives to his wife, Dame Maria Tilson, £1000, and his leasehold residence, with the furniture, plate, pictures, household effects, horses, and carriages; and, subject to some legacies, the rest of his property, real and personal, is to be held upon trust for her life, then for his sister, Mrs. Maria Matilda Lee, for life, and then for his said sister's children.

The will, dated Dec. 30, 1876, of Mr. Benjamin Nicholls, late of York House, Oxford-road, Manchester, who died on March 1 last, was proved at the Manchester district registry on the 23rd ult. by Mr. John Pender, M.P., and Mr. Edmund Crompton Potter, the acting executors, the personal estate being sworn under £120,000. Power is reserved to Sir Thomas Bazley, Bart., the other executor named in the will, to prove hereafter, should he desire to do so. The testator bequeaths to his wife, Mrs. Sarah Nicholls, £500, and all his household furniture, plate, pictures, and effects; to his executors £100 each; and all his property which he cannot by law give to charitable purposes he leaves upon trust for his wife for life, and at her death as she shall by deed or will appoint. Such part of his property as he may legally dispose of for charitable purposes he leaves upon trust, in the first place, to make up out of the annual interest and dividends his wife's income to £1500 per annum for life, and subject thereto upon the trusts of a certain deed, by which he gave a piece of ground at Ardwick, Lancashire, and founded a hospital for the maintenance and education of boys; and he empowers the trustees to apply part of the income to educate any of the boys at the Manchester Grammar School or Owens College.

The will and two codicils, dated Feb. 12, 1868, and March 10 and May 25, 1874, of Mr. Charles Woodward, late of Compton-terrace, Islington, who died on the 16th ult., were proved on the 4th inst. by the Rev. Alfred Francis Boucher, Charles Lamb, and George Lamb, the executors, the personal estate being sworn under £60,000. The testator leaves to the Royal Institution of Great Britain his gas and table polariscope and microscope, together with the tourmalines, double image prisms, crystals, and all the apparatus and objects connected therewith, or as may be worth their acceptance, free of duty; and there are legacies to his executors and servants, and some complementary legacies. The residue of his property is left upon various trusts for his son-in-law, the Rev. A. F. Boucher, and the children of his late daughter Ann, and for his daughter, Mrs. Elizabeth Bryant and her children.

The will and four codicils, dated Oct. 19, 1871, Oct. 12, 1872, May 18, 1874, Aug. 28, 1875, and June 22, 1876, of Miss Louisa Banks, late of No. 135, Clapham-road, who died on March 23 last, were proved on the 1st inst. by Charles William Stevens, Alfred Stevens, and Richard Bradshaw, the executors, the personal estate being sworn under £50,000. The testatrix, after giving many legacies, gives one fourth of the residue of her personalty to the London City Mission, Red Lion-square, Holborn; one fourth to the Poor Clergy Relief Society, Southampton-street, Strand; one fourth to the National Benevolent Institution, Southampton-row, Holborn; and the remaining one fourth to the said Charles William and Alfred Stevens.

The will, with two codicils, dated May 11, 1875, and Feb. 26, 1877, of Mr. Joseph Fetherstonhaugh, late of Hopton Court, near Worcester, who died on the 9th ult., was proved on the 27th ult. by Frederic Weatherall and John Swinton Isaac, the executors, the personal estate being sworn under £50,000. The testator leaves to his wife, Mrs. Anne Elizabeth Margaret Fetherstonhaugh, £250 and a residence, with the furniture, and £1200 per annum for life or widowhood; to George Johnson and Frederic Weatherall, £1000 each; to John Swinton Isaac, £500; and the residue of his personal estate to Shirley Arthur Stephenson. The testator also devises all his own real estate, and appoints all the real estate under the will of his late brother, Alexander Stephenson Fetherstonhaugh to the use of the said Shirley Arthur Stephenson for life, with remainder to his first and every other son, according to their seniorities in tail.

The will, dated Feb. 15, 1877, of Dame Eliza Susanna Hinrich, late of the Manor House, Hallaton, Leicestershire, who died on the 1st ult., was proved on the 1st inst. by Henry Dent Hinrich, the son, Charles John Bulivant Parker, and George James Robinson, the executors, the personal estate being sworn under £35,000. The testatrix makes provision for her four daughters, and gives some other legacies; and the remainder of her property she leaves to her said son.

The will, dated Dec. 26, 1876, of Mr. David Groucutt, late of Tottenhall, and of Bradley Field Ironworks, near Bilton, Staffordshire, ironmaster, who died on Jan. 1 last, at Coseley, Staffordshire, was proved at the district registry, Lichfield, on the 16th ult. by Daniel Groucutt, the brother, Joseph Jeavons, and David Jeavons, the executors, the personal estate being sworn under £16,000. The testator leaves some legacies and annuities, and the residue of his real and personal estate to his said brother.

The *Liverpool Post* states that the will of the late Mr. J. P. Heywood, the head of the banking firm of Arthur Heywood, Sons, and Co., who died on the 9th inst., will be proved under two millions and a half sterling. Mr. Heywood had no children, and he leaves to his widow a handsome legacy, together with a life interest in the property at Norris Green, West Derby, as well as in his estate at Cloverley, Shropshire, and his London house. To Mr. Arthur Lonsdale, his nephew, he bequeaths the sum of £1,000,000, besides making him his residuary legatee, and giving him the reversion of the Cloverley Hall estate. To Mr. Arthur Heywood, his cousin, and a partner in the bank, he bequeaths a sum of £50,000 and the bank premises; and to Mr. Robertson Gladstone, another partner, he has bequeathed a sum of money and the reversion of his estate, Norris Green, on the death of Mrs. Heywood.

Joseph Greenough, of St. Helen's, Lancashire, who was undergoing a sentence of twelve months' imprisonment passed upon him at the last assizes in Liverpool by Baron Huddleston for rioting, died last week in Kirkdale gaol. The deceased, who was a member of the town council of St. Helen's, was over eighty years of age. His will has been proved, the personality being sworn under £180,000. It is stated that his real and personal estate, which he had accumulated entirely by his own efforts, will reach in value the sum of £250,000.

On Monday the nineteenth annual delegation of the Order of Druids was opened at Warrington, 60,000 members being represented at the gathering. In his address the Grand Master referred to the progress made by those districts which had adopted the principles of equalisation and graduation, and argued that the financial success of any order depended solely on the adoption of such equitable laws. Friendly societies saved poor rates in this country to the extent of three millions yearly, and on that ground alone deserved the protection of the Legislature.

NOTICE.—OLEOPATRA TOILET

MRS. S. A. ALLEN'S

WORLD'S HAIR RESTORER.

AMONG THE CULTIVATED AND REFINED
THROUGHOUT THE WORLD, THIS RE-
OWNED PREPARATION IS THE ACKNO-
LEDGED FAVORITE WITH BOTH SEXES.

MRS. S. A. ALLEN'S

WORLD'S HAIR RESTORER.

IT CANNOT FAIL TO RESTORE
GREY HAIR TO ITS YOUTHFUL COLOUR,
GLOSS, AND BEAUTY. WHEN THE HAIR
TURNS GREY, LOSES ITS LUSTRE, AND
FALLS OUT, IT SIMPLY REQUIRES NOURISH-
MENT. MRS. S. A. ALLEN'S WORLD'S HAIR
RESTORER, BY ITS GENTLE TONIC ACTION,
STRENGTHENS AND INVIGORATES THE
HAIR, AND, BY THE OPERATION OF
NATURAL CAUSES, GREY OR WHITE HAIR
IS QUICKLY RESTORED TO ITS YOUTHFUL
COLOUR, GLOSS, AND BEAUTY. IT WILL
STOP ITS FALLING, AND INDUCE A
HEALTHY AND MOST LUXURIOUS GROWTH.
USE NO OTHER PREPARATION WITH IT.
NOT EVEN OIL OR POMADE, OR ZYLO-
BALSAMUM.

CAUTION!—The Genuine only in Pink Wrappers.

Sold by all Chemists, Perfumers, and Dealers in Toilet Articles.

Mrs. S. A. ALLEN
manufactures two entirely distinct
Preparations for the Hair. One or the
other is suited to every condition of the Human
Hair. Both are never required at one time. For details as
to each preparation, kindly read above and below this paragraph.
Readers can easily determine which of the two they
require. These preparations have a world-wide
reputation. Enormous and increasing sale
throughout every year. Every Chemist
and Dealer in Toilet Articles
has both preparations.

MRS. S. A. ALLEN'S

ZYLO-BALSAMUM,

For the
Growth and Preservation
of the Hair.

A cooling transparent liquid,
entirely vegetable,
without sediment.

A SIMPLE TONIC and DRESSING

OF INESTIMABLE VALUE TO BOTH SEXES.
THE FAVORITE WITH THE YOUNG AND
ALL THOSE WHO HAVE NO GREY HAIR.
ZYLO-BALSAMUM MAY BE USED BY THE
MOST YOUTHFUL AND THE MOST ELDERLY.
NEVER FAILING TO ESTABLISH ITSELF IN
FAVOUR WITH EACH. IT WILL NOT
CHANGE THE COLOUR OF THE HAIR, BUT
BY EARLY USE IT WILL PREVENT THE
HAIR FROM TURNING GREY OR FALLING
OUT. IT CLEANSSES THE HAIR, GIVES TO
IT A HEALTHY VIGOUR AND GROWTH,
REMOVES ALL DANDRUFF, AND IMPARTS
A MOST DELICIOUS FRAGRANCE. USE
NO OIL OR POMADE.

CAUTION!—The Genuine only in Blush Grey Wrappers.

Sold by all Chemists, Perfumers, and Dealers in Toilet Articles.

FLORILINE.—For the Teeth and Breath.

It is the best Liquid Dentifrice in the world; it thoroughly
cleanses, partially decays, teeth from all parasites or living
"animalcules," leaving them pearly white, imparting a deli-
cious fragrance to the breath. Price 3s. 6d. per Bottle. The
Fragrant Floriline removes instantly all odours arising from a
foul stomach or tobacco smoke, being partly composed of honey,
soda, and extracts of sweet herbs and plants. It is perfectly
harmless and delicious as cherry. Prepared by HENRY G.
GALLUP, 488, Oxford-street, London. Retailers everywhere.

VALUABLE DISCOVERY for the HAIR.

If your hair is turning grey, or white, or falling off, use
"The Mexican Hair Renewer." For it will positively restore in
every case Grey or White Hair to its original colour, without
leaving the disagreeable smell of most "Restorers." It makes
the hair charmingly beautiful, as well as promoting the growth
of the hair on bald spots where the glands are not decayed. Ask
any Chemist for "The Mexican Hair Renewer," price 3s. 6d.
Prepared by HENRY G. GALLUP, 488, Oxford-street, London.

WHISKERS, MOUSTACHIOS,

BALDNESS.—Bennie's World-famed WHISKERINE
produces Hair in rapid luxuriant growth, quick, certain, harm-
less. Never disappoints, as over 50,000 in Army, Constabulary,
Clerks, Workmen, &c., gratefully testify. Full Packets, ready
for use, 12 stamps, post-free. Test one. Marvellously successful
in obstinate cases.

TO DESTROY SUPERFLUOUS HAIR

On Face, Arms, &c., without injuring skin.—Bennie's
World-famed DESTROYING instantly effectual. One Lady
writes:—"I am enthusiastic in recommending it; it always suc-
ceeds." Full Packets, plain envelope, post-free 12 stamps.
J. BENNIE, Laboratory, 12, Angelsea-street, Dublin.

KINAHAN'S LL WHISKY.

UNIVERSALLY RECOMMENDED BY THE MEDICAL
PROFESSION. A pure old spirit, mild, mellow, delicious, and
most wholesome. Dr. Hassall says:—"The samples were soft
and mellow to the taste, aromatic and ethereal to the smell.
The whisky is pure, well matured, and of very excellent quality."

LEA and PERRINS' SAUCE,

which are calculated to deceive the Public, Lea and Perrins
have adopted a NEW LABEL, bearing their signature, "LEA
and PERRINS," which signature is placed on every bottle of
WORCESTERSHIRE SAUCE, and without which none is
genuine. Sold wholesale by the Proprietors, Worcester; Cross
and Blackwell, London; and Export Officers generally. Retail
by Dealers in Sauce throughout the World.

COCKS'S READING SAUCE

is the best and most economical Sauce ever manufactured
FOR FISH, ENRICHING SOUPS, GRAVIES, &c.
It only requires a trial to convince the purchaser of its
excellence.

CAUTION.—The genuine is protected by Trade Mark—viz.,
CHARLES COCKS'S Signature on a white ground across the
Reading Arms.

LIEBIG COMPANY'S EXTRACT OF

MEAT.—Finest Meat-flavouring Stock for Soups, Made
Dishes, and Sauces. Caution.—Genuine ONLY with
Facsimile of Baron Liebig's Signature across Label.

AMERICAN CENTENNIAL

PRIZE MEDAL.

THE MOORE and BURGESS NEW ENTERTAINMENT.

THE GREAT SUCCESS OF THE SEASON will be repeated EVERY NIGHT at EIGHT, MONDAY, WEDNESDAY, and SATURDAY, at THREE and EIGHT.

Patience, &c.; 20s. Balls, 3s. and 2s. Gallery, 1s. No fees. Doors open at 2.30 for Day Performances, and at 7.15 for the Evening ditto. Places may be secured, without extra charge, at Austin's Office, St. James's Hall, any day from Nine till Six.

ST. JAMES'S HALL.—Signal Success of the MOORE

and BURGESS Easter Entertainment on THE MARVELLOUS GIRARDS, which will be repeated EVERY NIGHT at EIGHT, MONDAY, WEDNESDAY, and SATURDAY, at THREE and EIGHT.

"A burlesque performance entitled 'The Marvellous Girlards,' Messrs. T. Sully, Albert Maynard, and Rene emulated the eccentric gymnastics of the well-known 'Girards,' with absolute accuracy in the minutest particulars of action and expression, doing everything that the clever originals do, and as neatly as possible in the very same style and manner. A new 'Interlocutor' appeared for the first time in the person of a gentleman bearing the illustrious name of J. F. Kemble, who, being gifted with a fine voice and a keen sense of humour, is likely to prove an acquisition."

MOORE and BURGESS MINSTRELS.

In pursuance of the policy long since instituted by the Directors of this Company to elevate the character of the entertainment with which their names are now so intimately associated, they have just introduced

AN ENTIRELY NEW AND MOST DELIGHTFUL FEATURE IN THE SECOND PART OF THEIR PROGRAMME, in the form of an

OPERATIC MELANGE,

the whole of the music of which is new and strictly original, having been composed expressly for Messrs. Moore and Burgess by that highly-gifted and rapidly-rising Composer,

MR. JOHN HOBSON.

THEATRE ROYAL, LYCEUM.—Lessee and Manager, Mrs. Bateman.—EVERY EVENING, at 8.30, a Drama arranged by Mr. Charles Reade, from "Le Comte de Lyon," entitled THE LYONS MAIL, in which Mr. HENRY IRVING will sustain the dual characters of Lescaurques and Dubosc; Messrs. Maude, Brooke, Archer, Lyons, Tyars, Huntley, &c.; Misses Virginia Frances, Lydia Howard, and Isabel Bateman. Scenery by Hawes Craven; Music by E. Stoezel. At 7.30, a Farce.

OLYMPIC.—THE SCUTTLED SHIP. By CHARLES READE. EVERY EVENING, at 7.30. Powerful Company and Effects. Box-office hours Eleven to Five. No booking fees.

QUEEN'S THEATRE, Long-acre.—RIVIERE'S

PROMENADE CONCERTS. Change of Programme Every Evening. First Vocalists and Instrumentalists of the day. Grand Orchestra, the best in London. Conductor, M. Riviere; Assistant Conductor, Mr. Alfred Collier. Luxurious Lounge and smoking saloon. New and Commodious Super-rooms are now open. Magnificent Decorations. Admission, Grand Promenade (including use of Amphitheatre, Smoking Saloon, and Super Rooms), 1s.; Upper Circle, 2s.; Balcony Stalls, 2s. 6d.; Private Boxes, 10s. to 50s. Box-Office open daily, Eleven to Five. Commence at Eight.

MR. and Mrs. GERMAN REED'S ENTERTAINMENT.

TWO FOSTER BROTHERS (last week); EDWIN AND ANGELINA; and "No. 24," 19 F. C. Burnand. EVERY EVENING, except Thursday and Saturday, at Eight. Every Thursday and Saturday at Three. Admission, 1s., 2s.; Stalls, 3s. and 6s. ST. GEORGE'S HALL, Lambham-place, Oxford-circuit.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, JUNE 2, 1877.

The celebration of Queen Victoria's Birthday in Virginia, United States, on May 24, and the arrival at Liverpool of ex-President Grant on Monday last, are facts which melt into the same genial topic, and ask to be dealt with in the same column and in the same sympathetic spirit. They are both interesting, on this as on the other side of the Atlantic; both are calculated to excite a warm sentiment of confraternity; both tend to draw together more closely the ties of friendship which happily subsist between the people of the United Kingdom and those of the United States. It is pleasant in these days of war and retro-action on the Continent to be able to turn from scenes of violence and self-will, moral, political, and physical, to which public attention has been almost uninterruptedly called for several weeks past, to look, through the medium of the facts to which we have adverted, upon a page of chancier meaning and brighter promise in the world's history. We have no desire to overstate those facts, or the influence they may possibly exert upon the two English-speaking peoples. We are content to take them as they stand—significant types of national amity, at a moment when Continental affairs are shrouded in gloom. We are thankful to Americans, whether native-born or adopted, who have paid a tribute of affectionate esteem to our beloved Sovereign Queen Victoria; and we cordially welcome the Ex-President of the United States, whose policy has done so much during his double term of office to evince neighbourly regard to this country, to which he is now paying a visit.

Although, doubtless, there is a wide difference between the political constitutions of the two countries, that difference has far more respect to forms than to essential principles. The government of the people by the will of the people lies at the basis of both. The machinery constructed for the purpose of giving effect to the national will is in each case varied by the circumstances under which it is brought to bear. Here we have an hereditary Monarch, surrounded by popular institutions. There they have an elected Chief Magistrate, whose term of office is limited, but whose official power is during that term far more extensive. But the vast majority of the people of both countries not merely acquiesce in, but really prefer the constitution under which they were born; and we cannot but observe that, in substantial matters, they grow up with much the same contour of character and customs. In manner, it may be, there is considerable diversity between the one and the other. In almost all the great essentials of social life they are nearly at one. The younger branch of what is called the "Anglo-Saxon family" differs from the elder only as youth differs from maturity of age. Each may boast of its special advantages; each is open, in some respects, to adverse criticism; but, each is beginning to make due allowance for these variations and to throw off the prejudice which aforesaid interrupted the flow of sympathy between them. We do not say that there will be no disturbance in future of the kindly feeling which at present links the American Republic with the United Kingdom. But it is certain that any rupture of friendly relations between the two would have to surmount a moral barrier of incredible strength on both sides of the ocean.

The virtues of her Majesty the Queen command the reverential regard of all parties in America. They admire her thoroughly womanly qualities. They can fully appreciate the unvarying respect which she pays to Constitutional law. They have not, it is true, all the reasons which we have to be grateful for the moral influence of her example upon their nation. Their personal sympathies must necessarily be somewhat less susceptible in regard to the incidents of palace life than are those of our own people. But, as "one touch of nature makes the whole world kin," so the purity of the Queen's Court, the simplicity of her bearing, the manner in which she has conducted herself in all domestic relations, her indefatigable attention to the duties of her political office, her wisdom, now enriched by a long experience, in presiding over the public affairs of this kingdom, and her thorough acceptance of the principles of civil and religious liberty within the limits prescribed to her by the Constitution, are neither unknown in the United States nor unappreciated by the vast number of families proud of their English or Scotch descent. They are well able and quite willing to

cultivate a lively sympathy with what, although it does not touch their personal interests, tends, to a certain extent, to shed a lustre on humanity. They can respect it for its own sake; they can even love it; and the celebration at Petersburg, on May 24, was but a spontaneous and affectionate recognition of virtues which it is not necessary to profit by in order to admire.

The arrival of ex-President Grant in this country invites us to respond to the kind feelings displayed by our American cousins. We need not go into the particulars of his history, whether as a military or a political chief. That is not our business; and the Citizens of America are alone entitled to give a verdict in such matters. That he has retained his hold upon their esteem (as was abundantly testified by the manner in which they sped him on his excursion) is enough for us. But, beyond this, we cannot but recall to mind the friendliness which he usually showed himself forward to display towards Great Britain. So far as we are concerned, his policy has been one of peace. At any rate, under his term of Presidency a conciliatory spirit has expanded into no little strength. We see in him the representative of a great people whose institutions embody objects akin to our own. We are flattered by his selection of these isles as the first scene of his recreation after having laid aside the heavy responsibilities of his office. No doubt, he will see much here that will deeply interest him, foremost of which things will be the hearty welcome which all classes will accord to him.

THE COURT.

The Queen attained her fifty-eighth year on Thursday week. The auspicious morning was celebrated at Balmoral by the Crathie choir singing in the corridor various national ballads, after which the members of the choir breakfasted at the castle. The usual birthday presents of tea, sugar, and articles of clothing were distributed to the cottagers and poor people on the Royal estates. At Windsor the usual loyal demonstrations were made. At Gibraltar his Excellency Lord Napier of Magdala invited the whole of the soldiers' children above the age of six to tea in the Alameda: 750 were present. The official celebration of the birthday takes place to-day (Saturday).

Yesterday week was the thirty-first anniversary of the birthday of Princess Christian of Schleswig-Holstein (Princess Helena of Great Britain). The day was celebrated with due honours. The Queen continues to receive most favourable accounts of her Royal Highness's recovery.

The Right Hon. Sir Michael Hicks-Beach, Bart., arrived on Saturday last as Minister in attendance on her Majesty. The Very Rev. Principal Caird also arrived at the castle.

The Queen, Princess Beatrice, Prince Leopold, and Princes Albert Victor and George of Wales attended Divine service on Sunday at Crathie church. The Very Rev. Dr. Caird, Principal of the University of Glasgow, officiated. Dr. Caird dined with her Majesty.

Prince Leopold left the castle on Monday for London, Oxford, and Boyton.

The Queen, with Princess Beatrice and Princes Albert Victor and George of Wales, has made various excursions on Dreeide, driving by Clachinturn, Aberfeldie, Birkhall, and Ballater. The Rev. Archibald A. Campbell has dined with her Majesty, and Sir Michael Hicks-Beach generally dines with the Royal family.

The Queen has appointed Field Marshal the Prince of Wales to be an extra member of the first class, or Knights Grand Cross of St. Michael and St. George, and has reappointed the Duke of Cambridge to be Grand Master and First Knight Grand Cross of the said order. About fifty other appointments to the order have also been made.

The Queen has appointed the Earl of Coventry to be Captain of her Majesty's Honourable Corps of Gentlemen-at-Arms, in the room of the Earl of Shrewsbury, deceased.

Her Majesty has appointed the Rev. Henry Montague Butler, D.D., Honorary Chaplain to the Queen, to be one of the Chaplains in Ordinary to her Majesty; and the Rev. William Dalrymple MacLagan, M.A., Vicar of Kensington, Middlesex, to be one of her Honorary Chaplains.

The first state concert of the season will take place at Buckingham Palace on Wednesday next. The Prince of Wales will, by command of the Queen, hold a Levée at St. James's Palace, on behalf of her Majesty, on Thursday next.

The Queen has presented Herr Rubinstein with a magnificent pair of china vases for the eminent musician's villa at Peterhof, St. Petersburg.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales visited Prince and Princess Christian at Cumberland Lodge, Windsor Park, yesterday week, and remained to luncheon. His Royal Highness dined with Baron and Baroness Lionel de Rothschild at their residence in Piccadilly. On Saturday last the Prince, accompanied by his daughters Princesses Louise Victoria and Maud of Wales, was present at the military concert at the Royal Albert Hall, given in aid of the funds of the Royal Cambridge Asylum for Soldiers' Widows. His Royal Highness dined at the Orleans Club, Twickenham, on Monday. Dinner was laid for twenty of the Prince's party and about eighty visitors. A ball followed. Prince Christian arrived at Marlborough House on Tuesday on a visit to the Prince. Their Royal Highnesses dined with the Earl and Countess of Wilton, at their residence in Grosvenor-square. The Prince and Princess Christian have attended the races at Epsom this week. The Prince has been elected a member of the Orleans Club, Twickenham.

The Princess of Wales left Athens on Tuesday on her return to England. The King and Queen of the Hellenes accompanied her in the Royal yacht as far as Corinth, whence the Princess embarked in the Osborne for Brindisi. Her Royal Highness is in good health. The Prince has signified his intention of being present at the Handel Festival at the Crystal Palace, and he will be accompanied by the Princess.

The Duchess of Edinburgh, with her children, arrived at the Duke's Palace, Coburg, on Saturday last from visiting the Queen at Windsor Castle.

The Duke of Cambridge, as Colonel, presided at the annual regimental dinner of the Royal Artillery, at Willis's Rooms, yesterday week; and on Thursday, as Colonel, he presided at a dinner at the same rooms given by the members of the 1st or Grenadier Guards' Club to celebrate the 217th anniversary of the formation of this distinguished regiment.

The Duchess of Teck, accompanied by the Duke and Princess Mary and Princes Adolphus and Francis of Teck, formally opened the flower-show given last week by the Orleans

Club, Twickenham. The Duchess dined with Dowager Lady Henniker on Tuesday at her house in Grafton-street.

His Excellency the Marquis d'Harcourt has returned to Albert-gate House from Paris.

General Grant, with Mrs. and Miss Grant, has arrived in town, and is the guest of the American Minister and Mrs. Pierrepont.

FASHIONABLE MARRIAGES.

The marriage of Mr. Walter Randolph Farquhar, second son of Sir Walter Rockliff and Lady Mary Farquhar, with Miss Kathleen Mary, youngest daughter of Sir Thomas Bateson, Bart., M.P., and the Hon. Lady Bateson, was solemnised on Tuesday, at St. Peter's, Eaton-square. Owing to the Hon. Lady Bateson's recent serious accident the wedding was quite private. The bride, who was given away by her father, was attended to the altar by Miss Sybil Ker and Miss Winifred Ker, nieces of the bride; Miss Blanche Farquhar, sister of the bridegroom; Miss Katherine Farquhar, niece of the bridegroom; Lady Beatrice Grosvenor, Miss Parsons, Miss Selina Wingfield, and Miss Bateson de Yarburgh. The bride's princess dress was of white brocade, trimmed with white satin and Brussels lace; a veil of the same fabric, over a wreath of orange-blossoms, was fastened to the hair by five diamond stars, the gift of her father. Her other jewels were diamonds and pearls. The bridesmaids wore princess dresses of white brocade and mob caps. Each lady wore a gold locket, set with pearls, the joint gift of the bride and bridegroom. Mr. Alpin McGregor acted as best man. The religious ceremony was performed by the Rev. Lord Dynevor. At one o'clock the newly-married couple left Grosvenor-place for Polesden Lacey, Sir Walter Farquhar's seat, near Dorking, where they purpose spending the honeymoon. The wedding presents numbered about 300.

Marriages are arranged to take place between the Hon. Henry Fitzwilliam, second son of Earl Fitzwilliam, and Lady Mary Butler, sister of the Marquis of Ormonde; and between the Hon. Eustace Vesey (9th Lancers) and the Hon. Constance Lawley, third daughter of Lord and Lady Wenlock.

THE CHURCH.

The church of Little Chart, Kent, was reopened last Saturday, after extensive restoration.

St. Mary's Church, Tadcaster, was reopened on Tuesday by the Archbishop of York. The church has been restored at a cost of about £8000.

The Bishop of Lichfield has written in censure of some clergymen who, on invitation of the trustees, attended a dedicatory service at a new Wesleyan chapel at Walsall.

The Rev. Gilbert Innes Wallas, late Vicar of Barnstaple, has been presented with a purse of 175 sovereigns, besides his portrait for Mrs. Wallas, as announced last week.

The Bishop of Chichester visited Lewes on Monday, and performed the ceremony of inducting two new Rectors—the Rev. E. Cross to St. Michael's, and the Rev. C. Calvert to St. Thomas à Becket's, Cliffe.

Speaking at Mansfield on Tuesday, Mr. Morley, M.P., said he had not a word to utter in antagonism to the Established Church. He knew many earnest workers in connection with that Church, but was prepared to say that they were most powerful when most free from the influence of the State.

The first public meeting of the Church League for the Separation of Church and State was held on Tuesday evening at the St. Alban's Schools, Holborn, under the presidency of the Rev. A. H. Mackonochie. Resolutions in conformity with the objects of the League were adopted.

Lord Shaftesbury laid the foundation-stone of the tower of Holy Trinity Church on Thursday week. In his address the noble Earl said he remembered the time when there were only eight or nine houses in Bournemouth, when he and the inhabitants had to attend worship at Christchurch or Poole.

The fourteenth annual festival of the Doncaster and South Yorkshire Church Choral Union took place in Doncaster parish church on Thursday week. Altogether twenty-five choirs were present, numbering 580 voices. There were two services, the preachers being the Rev. Henry White, Chaplain in Ordinary to the Queen, and the Dean of Manchester.

After restoration works, costing nearly £7000, Haddenham church, near Ely, was reopened on Monday by the Bishop of that diocese. The tower has been rebuilt as a memorial to the late Earl of Hardwicke, several members of whose family were present at the ceremony. At a luncheon held subsequently, speeches of a congratulatory character were made by the Bishop, the Lord Lieutenant of Cambridgeshire, the Hon. Eliot Yorke, M.P., and Mr. Rodwell, M.P.

Last Sunday being Trinity Sunday most of the Bishops held ordinations. In the diocese of Rochester thirteen deacons and two of the priests were ordained upon titles within the vacant diocese of St. Alban's, under a commission from the Archbishop of Canterbury, as guardian of the spiritualities of that see. Dr. Benson, recently appointed Bishop of Truro, held his first ordination service in the Pro-Cathedral, Truro. Much interest was manifested, as this was the first Cornish ordination for upwards of 800 years.

The Archbishop of Canterbury presided at two days' sittings of the Canterbury diocesan conference. On the first day his Grace spoke on the subject of the Education Act, and a resolution was passed declaring it desirable for the clergy and the laity to co-operate in carrying out the provisions of that statute. The establishment of a diocesan theological training college and missions to seamen and to hop-pickers formed the subjects of discussion on the second day, and resolutions respecting them were agreed to.

A congregation of 1700 children assembled in the nave of Westminster Abbey last Saturday afternoon in reply to an invitation from the Dean to attend a "special Sunday school service." This juvenile congregation, composed of the Sunday school scholars of Westminster and the neighbourhood, joined heartily in the special hymns and psalms appointed for the occasion, and sang some of the best known children's hymns. A suitable sermon, addressed directly to the little ones, was preached by the Rev. T. Teignmouth Shore, M.A., Incumbent of Berkeley chapel.—A special thanksgiving service will be held in the nave this (Saturday) afternoon. The sermon will be preached by the Dean; and the music will include Mendelssohn's "Hymn of Praise" ("Lobgesang"), to be performed with full band and chorus. Collections will be made at the doors in aid of the objects of the Caxton Celebration Fund.

The governors of the corporation of the Sons of the Clergy met last Saturday at their house, 2, Bloomsbury-place, for the election of clergy widows and single daughters to life pensions. The applications of 161 widows and daughters having been considered, thirty-three ladies, whose comparative merits and necessities presented the strongest claims, were elected to pensions of £20 per annum to fill vacancies which had occurred in the pension list during the past year, and among 116 of the other candidates the sum of £1190 was distributed. Appli-

cations were also received in behalf of twenty-six children of clergymen, and the sum of £350 was granted towards their education, outfits, and starts in life. Mr. Baker, the registrar, informed the governors that at their next meeting in June he should have to lay before them about 150 applications from clergymen in need of help from bad health, the expense of large families, and other causes. In July the governors will make grants to clergymen, widows, daughters, and children applying too late for the May and June meetings, and also raise the pensions of some of the more aged and necessitous widows and daughters from £20 to £30 a year.

The Rev. C. J. Ridsdale officiated on Sunday, at St. Peter's, Folkestone. The forbidden vestments were worn, water was mixed with the wine, wafer bread was used, and two lighted candles were on the altar. Mr. Ridsdale, in the course of his sermon, said he was aware of the grave responsibility he incurred in resisting the expressed opinion of the officers of the State. He counted it a very serious and very grievous matter to have to resist any order of the State, and he could only do so when that order bade him to violate an express command of God or His Church which he was in conscience bound to obey and uphold. He resisted the monition which he had received because it was contrary to a plain order of the Church. He was convinced that the law of the Church commanded the use of vestments, and the two lights on the altar were likewise sanctioned by the Rubric. On some points as to which there was no rubrical direction he would yield. His reason for pleading in the court was, if possible, to secure peace for the Church, in the hope that the law of the Church would be legalised by the civil law, but, having failed, he was bound to obey the Church. A meeting to express sympathy with Mr. Ridsdale was held after the service, and sermons were preached in the parish church and in St. Michael's in support of his action.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

The withdrawal of Messrs. Palgrave, Symonds, and Courthope from the contest for the Professorship of Poetry in Oxford left the field clear for Principal Shairp, who has been appointed. The Professorship is tenable for five years only, but its holder may be re-elected once. The Ellerton Theological Prize has been adjudged to Mr. J. E. Denison, B.A., Christ Church. Mr. Heberden, M.A., Fellow of Brasenose College; Mr. George Wood, M.A., Fellow of Pembroke College, and Mr. Edwin Wallace, M.A., Fellow of Worcester College, have been nominated masters of the schools for the year beginning in Michaelmas Term next. The Chancellor's prize for Latin verse has been awarded to A. D. Godley, scholar of Balliol; and the prize for a Latin essay to C. P. Lucas, exhibitioner of Balliol. The Commemoration, which is fixed for June 13, will, it is understood, be held in the Sheldonian Theatre, although no official notice to that effect has appeared. There will be the usual round of festivities attendant on the event.

At Cambridge, the Tyrwhitt Hebrew Scholarships have been awarded to Alfred Townsend Warren, B.A., Magdalene College, and Charles Robert Bingham, B.A., scholar of Trinity College. The Tancred Studentships were adjudged as under:—In Divinity, at Christ's College, Cambridge: Julian Llewellyn Dove, John Alfred Robinson. In Physic, at Gonville and Caius College, Cambridge: John Bruce Payne. In Law, at Lincoln's Inn, London: Charles Alexander Harris, Samuel Henry Leonard. The Sheepshanks Astronomical Exhibition at Trinity has been adjudged to John Edward Aloysius Steggall, scholar.

Mr. George Francis Fitzgerald, son of the Bishop of Killaloe, has been declared the successful candidate for the Trinity College Fellowship, at Dublin, vacated by the death of the Vice-Provost, Dr. Moore. Mr. Frederick Purser obtained the Madden prize, and next to him came Mr. Maguire, a Professor in Galway College, who, if successful, would have been the first Roman Catholic Fellow of Trinity.

Mr. Gladstone addressed a large meeting in Bingley Hall, Birmingham, on Thursday evening—too late for the briefest report of his speech to appear in our early edition. Accommodation had been provided for 20,000 persons, and all the tickets for the reserved seats had been sold at five shillings each. A conference of delegates from Liberal associations in all parts of the country was held on Thursday morning, Mr. Chamberlain, M.P., presiding. There were about 300 delegates present, representing nearly one hundred Liberal associations formed on the basis of the Birmingham Liberal Association.

The Lord President of the Council has presented, through Sir Herbert Sandford, to the directors of the Anglo-American Telegraph Company, on the part of her Majesty's Government, a silver inkstand, specially designed and manufactured by Messrs. Elkington, as a mark of appreciation of the exceptional facilities afforded by the company to the British Executive Commission in the transmission of messages throughout the whole term of the Philadelphia Exhibition work.

At a meeting of the Council of the National Rifle Association held on Thursday it was decided that Sir Henry Halford be authorised to get up a United Team from Great Britain and Ireland to shoot for the International Long-Range Match in America in September next. Any gentlemen able and willing to take part in the contest are requested to communicate at once with Sir Henry Halford, Bart., Wistow, Leicester.

Mr. Samuel Morley, M.P., addressed a number of working men at Nottingham on Wednesday night, the occasion being the opening of a coffee tavern. He said that he took the ground of total abstinence. He had tried it himself for twenty-five years with excellent results, and therefore he wished to point out to working men the extreme folly of wasting their means in intoxicating drink.

Upon the arrival of the Inman steamer City of Brussels in the Mersey last Tuesday, an immense crowd hastened to the landing-stage and piers at Liverpool, and numerous congratulations poured in upon the captain, officers, and passengers upon their safety. The steamer was a month overdue; she left New York on April 21, but two days after her departure her screw-shaft broke, and Captain Watkins decided to proceed under canvas. All the passengers are in excellent health, and speak in the warmest terms of Captain Watkins, to whom addresses acknowledging his services have been presented.

At the Gates of Hope Schools, Heneage-lane, on Sunday—Mr. N. Montefiore, president, in the chair—the Rev. Dr. Artom, Chief Rabbi of the Spanish and Portuguese Jews' congregations, distributed the prizes which were awarded at the April examinations to the children of the above-named and also the Villareal and National and Infant Schools. The prize-list includes the Montefiore Scholarships in Hebrew and English, given by Sir A. D. Sassoon, C.S.I.; and in the competition for these and for prizes of lower grade a remarkable degree of general intelligence among the pupils was disclosed.

THE WAR: THE TURKISH FORTRESS OF SILISTRIA, ON THE DANUBE.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

OLTENITZA, NORTH BANK OF THE DANUBE.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE WAR: RUSSIAN OFFICERS TAKING DOWN THE OTTOMAN FLAG FROM THE LUTFI DJELIL, TURKISH GUN-BOAT, SUNK NEAR BRAILA.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE WAR.

Our Special Artists who attend the movements of the Russian army on the Danube, and the defensive preparations in Turkey, continue to provide an abundance of Sketches both of the places and the actions, becoming more and more important every week, in the great military struggle now fairly commenced.

The Turkish fortified towns of Rustchuk and Silistria, and that of Oltienitza, situated between those towns, but on the Roumanian bank of the Danube, are shown in three of these Illustrations. The passage of the river at Silistria is commanded, it will be observed, by the fortress surrounding the town, and forming a semicircle of which the diameter, 2000 paces in length, is turned towards the Danube. The town is built on a point which runs out towards the river, narrowing it so much that, at the ferry, the crossing is only 800 yards; but above and below the town the river is much wider, and below the town is studded with islands. In the war of 1828-9 the Russian army which attacked Silistria crossed at Hirsova, about fifty-five miles lower, and marched up the right bank. The position of this town, though very important in a strategical point of view, is rather unfortunate, for the table land of Bulgaria, which here approaches close to the Danube, and is 200 ft. high and perfectly flat, overlooks the town at a distance of 1200 yards from the old walls. Where, however, the Russians constructed their batteries fifty years ago, there are now some admirably constructed outworks of a formidable description; the principal of which, on Akbar's hill, immediately south of the town, is said to be one of the most remarkable works lately constructed. The resolute and successful defence of Silistria in 1854, mainly owing to the courage and skill of Captain Butler and Lieutenant Nasmyth of our Army, is not to be forgotten. The Russians would probably not attempt its reduction, but leave a force to prevent their communications being cut by the Silistria garrison.

Silistria was the residence in ancient times of the Patriarch of the independent Bulgarian Church, and later, after the destruction of the first Bulgarian Empire, of the metropolitan of the bishoprics lying between the Danube and the Balkan. In the wars between the Bulgarians and Greeks and the Bulgarians and Magyars the possession of Silistria was often disputed; but its most important part was played in the bold march of Svyatoslav, the Prince of the Russians, who in 967 conquered the town, and then, by the same route that General Diebitch took in 1829, penetrated across the Balkan, stormed Adrianople, and caused a dreadful massacre there. But the Greek Emperor, Joannes Tzimisches, an Armenian, was not, like the Sultan Mahmud, induced to conclude a hasty peace; he attacked and defeated Svyatoslav, forced him back to the Danube, besieged him here, and compelled him to capitulate. In 1388 this town was taken by the Sultan Murad: in 1392 it fell into the hands of the Wallachian Prince Mircha, but was soon incorporated, like all the rest of Bulgaria, into the Turkish Empire by the Sultan Bajazet. About the year 1418 it came into the possession of a communistic sect, formed of Christians and Mahomedans, which, however, was soon destroyed. The town now flourished, and had a rich colony from Ragusa. In 1810 it was taken by the Russian General Count Nicholas Kamenski; in 1812 his successor, Count Kutuzow, razed the fortress to the ground. In 1828 Silistria was besieged, first by the Russian General Count Benkendorf, then by General Roth, later by Generals Scherbatow and Langeron, and finally by Prince Wittgenstein. As the Russians had crossed the Danube elsewhere the town was besieged from the Bulgarian side, but all efforts to take it, from July 21 to Nov. 10 being unsuccessful, the siege was then raised, and during the winter a corps encamped at Kalarasch was charged to keep watch over it. On May 8, 1829, the Russians again crossed the Danube at Hirsova; but the roads being partially destroyed by inundations they only reached Silistria on the 17th, and threw a bridge of boats across the stream below the town. Although the siege was carried on with extraordinary energy by General Krasowski, the town only capitulated on June 30. How, in 1854, the fame of the conqueror of Erivan suffered before the walls of Silistria is still fresh in the memory of all.

The swamps on the left bank of the Danube which, opposite or below Silistria, are twelve miles broad, become gradually narrower up the stream, and at Oltienitza, at the mouth of the Arschik, they cease entirely. Opposite Oltienitza lies the little Turkish town of Turtukai. Here, at a distance of only thirty-five miles from Bucharest, is the most vulnerable point of the Turkish Danube line. Turtukai lies on the lowest ledge of the terrace-like Bulgarian mountains; the ledge is here 60 ft. high and close to the river, while the Roumanian bank is flat; but the town is small, only protected by a few redoubts. It is further from Rustchuk and Silistria than from Bucharest, and is only connected with Schumla by a miserable country road. Opposite the town, but rather above it, lies a Roumanian island, and this would greatly facilitate the crossing of the river. The Russians might occupy the island in the night, throw up fortifications, and then with heavy guns lay Turtukai in ruins; and, having conquered it, they would be able to attack Silistria and Rustchuk in the rear. In 1809 the Russians crossed the Danube here, and in 1853 both Prince Gortschakoff and Omar Pasha recognised the importance of this point. Gortschakoff advanced his centre from Bucharest on the roads to Giurgevo and Oltienitza, and on Nov. 1 and 2 the Turks attempted the passage of the river at both these places. At Oltienitza the passage succeeded, the Turks entrenched themselves, and were attacked on Nov. 4 by Gortschakoff with a great superiority of numbers; Omar Pasha, however, defeated the attack successfully. On Nov. 12 the Turks left the right bank of the river, after having destroyed the bridge over the Arschik, the quarantine building, and their own fortifications; and in the spring of 1854 Omar Pasha withdrew to Schumla, and left the passage across the Danube open to Russia.

A few years ago Rustchuk had no more importance than any other fortified post on the Danube; but railways have made it the key to the passage of the river. It is the terminus of the railway from Varna to the Danube; and on the opposite bank of the river lies Giurgevo, the terminus of the Roumanian line, by which communication is assured with Moldavia, and with Russia through Jassy, and with all Western Wallachia. If the Russians succeed in crossing the river at Rustchuk, or, crossing anywhere near, can seize the fortress of Rustchuk, they will have gained the greatest possible advantage. They will then have kept up their supply by railway not only to the Danube, but to a point within comparatively easy striking distance of the centre of the Balkans. The information at our disposal goes to prove that the fortifications at Rustchuk are in a feeble condition, though the Turks have recently been at work strengthening them, and some heavy guns have been moved here by rail from Varna. Still here, as all along the river, except near Galatz, the Turks have the advantage in the fact that their high right bank commands the left bank of the river. It is scarcely conceivable that the Turks will not defend this point to the utmost; and it is probable that the Russians will go all in their power to secure a passage near their railway terminus, Giurgevo, and to capture Rustchuk and gain the use

of the railway leading on Schumla. The river on the left bank here is comparatively free from marshes; the stream is little more than half a mile in width. It is not likely that the Russians would try to force a passage right under the guns of Rustchuk itself; but rather above or below, and that they would then besiege the place. Our view of Rustchuk was sketched by one of our Special Artists from the Tahaouss Tabia, or Sergeant's Redoubt, on the hill above the town.

The subject of more than one of our Special Artists' sketches, in this week's Number, as well as in our last, is the blowing up and consequent sinking of the Turkish monitor or turreted gun-boat, Lutfi Djellil, by the fire of a Russian battery on the Danube, at the entrance to the Matchin canal, not far from Braila. The crew and officers of the Lutfi Djellil are said to have numbered about two hundred men, and nearly all perished, though some efforts to save them were made by the Russian steam-launches, as is shown in our Illustration, representing the scene only ten minutes after the explosion. The mast of the Turkish gun-boat appears above water, with the Ottoman flag of the Crescent and Star, which the Russian officer, Colonel Straukoff, adjutant to General Saloff, is in the act of taking down. We give another Illustration of the Lutfi Djellil, a vessel built with two revolving turrets, each carrying two large guns; she was one of four gun-boats constructed for the Turkish Government by a Bordeaux firm, and had given much trouble to the Russians between Galatz or Reni and Braila, since the opening of this campaign.

A second Turkish gun-boat was destroyed by the Russians on Saturday morning last. A detachment of forty Russian soldiers, commanded by Lieutenant Dubascheff, accompanied by the commander of the Roumanian flotilla, Major Murgescu, left the northern shore of the Danube in three or four small boats, and proceeded towards the point Petra Fetei, below Matchin and opposite Braila, at which point there was stationed a large Turkish monitor. The night was very dark, and they managed to surround the monitor before being discovered by the Turkish look-outs. When finally observed by the sentries on board they were challenged, and "Who goes there?" rang out on the night air. Major Murgescu replied in Turkish, "Friends." The Turks, evidently not satisfied, commenced firing in the direction of Matchin, not knowing where these boats came from. The shots flew wide of their mark, and did no damage to the daring men in the boats. During the firing several of the Russian soldiers, under the direction of Lieutenant Dubascheff, plunged into the water, swam silently to the hull of the ironclad vessel, and placed the deadly torpedo in close contact with the bottom of the monitor. After the destructive machine had been securely fastened and the wires of an electric battery accurately adjusted, the men retired to the neighbouring shore of the river, and at half-past three in the morning the monitor was blown into the air, with all the officers and crew. The explosion was terrific, and, as nothing is said of the crew being saved, it is supposed that all on board perished with the vessel. The Grand Duke Nicholas has decorated Lieutenant Dubascheff and Chestakoff with the order of St. George. The Roumanian officer, Major Murgescu, is also honoured with a decoration.

The Turkish efforts and reinforcements for strengthening Varna, on the Black Sea coast, are the subject of two Illustrations. It is the opinion of some European visitors that the fortified port of Varna will prove, if only decently defended, impregnable. The old line of bastioned wall has been put in a thorough state of repair. The embrasures have been opened and richly riveted, and guns of heavy calibre put in position, principally in the batteries looking seaward. The six lunettes constructed as advanced works during the memorable defence of 1828-9 are fitted up anew; and, in consonance with the necessities accruing from modern long-range artillery, fourteen forts and redoubts have been constructed on the heights dominating the town at some three miles distance. Turks have always fought well behind fortifications; and, masters of the Black Sea littoral for the moment, thus securing water communications with the base of supply, they will probably give a warm reception to any force attempting the capture or investment of Varna. At this moment seventeen battalions are camped in and about the town. Of these six are of the Egyptian contingent, which latter is accompanied by two batteries of Krupp eight-centimetre field-guns. The various forts and lines mount over three hundred guns varying from ten to fifteen centimetres calibre, and all of the latest model. The supply of ammunition seems unlimited; and all day long the troops toil unloading the barges crammed with shell and cartridge boxes brought up by the transports. The general military command is in the hands of Ruchdi Pasha, an Egyptian by birth. The artillery is directed by a Prussian officer, named Blum, who entered the Turkish service many years ago. The defensive preparations may be said to be completed. We can well understand the importance the Turks attach to Varna. It is the true base of operations in the defence of the Danube.

Our Special Artist with the Turks writes as follows:—

"I was at Varna the other day, just when the spirits of the people were at the lowest ebb; and then, by order of the commandant, everyone from six to sixty years of age, so went the proclamation, had to lend a hand in the construction of those fortifications or additional earthworks which were to defend the land approaches to the town. It was a most picturesque sight to see this general turn-out of the people—willy-nilly, they were all in for it—the lounging Circassian, the peaceable sweetstuff vender, the portly merchant, the agile chimney-sweep, and the grand old Turk, who, having retired years ago from the busy world, thought his remaining days would be spent in Oriental dignity and repose. These were all alike compelled to shoulder mattock and axe, or shovel and spade, and, at least for once in their lives, to serve their country with downright hard labour. Indeed, after their long indulgence of more tedious laziness, it was really astonishing with what zest some of the more able-bodied would enter into their common task of working in the trenches. It is true there were some stout family men who would have given much to be at home; but a spirit of true Republicanism at this moment pervades the Sultan's subjects, and rich and poor have been alike called to the field of action."

With reference, again, to landing the Syrian troops and munitions of war at Varna, our Special Artist writes:—"Imagine the excitement at a place in a state of semi-siege on the arrival of a troop-ship full of bronzed soldiers, who crowd up on to the quay and stare about them with a sort of blank wonder at the fresh scenes and new faces by which they are surrounded. This is the scene which has formed the subject of my sketch; the moment having been chosen when a fleet of boats in the harbour is bringing in the Syrian reinforcements from the troop-ship which is lying off the landing-stage. The officers' luggage is being taken to their quarters by burly carriers. The popular excitement is great; even the veiled fair ones cannot curb their curiosity, and come out to feast their eyes (we only know them by their eyes) on these strange visitors. In the whole crowd of people who have come down to watch the soldiers landing, the only one who seems thoroughly unconcerned is the Arab vender of "lumps of delight," who is arguing deliberately with an old Turkish

purchaser as to the current value of a curious little bit of dingy tin, supposed to be money."

The movement of the Russian forces westward from Bucharest, extending the centre and right wing of their army up the Danube, is still continued, while their left wing serves as a pivot for this grand movement, resting on the positions already taken at Galatz and Braila. Our Special Artist, lately in the great camp of the Cossacks at Barboschi, near Galatz, supplies a couple more sketches of the scenes he beheld there; the one is a trumpeter sounding the call to "boot and saddle," as our old-fashioned cavalry used to have it; but the Cossacks, though wonderful horsemen when mounted, are very slow in getting their horses, their arms, and themselves into marching order. Three quarters of an hour, we are told, is usually required to rouse and set in motion a body of these wild-looking irregular cavalry; but we should think there must be some exaggeration in the statement. They are tall and stalwart men, some with fair hair and white moustaches, not of the Tartar type in face, but more like north-country people of Europe. Their uniform is a dirty blue tunic and breeches, with very clumsy boots, and a peaked cap of oilskin, stuck rather sideways upon the head, which is covered with long matted hair, cut straight and square behind. The arms of the Cossacks are a long lance, with triangular blade, a heavy sword, and a carbine, and sometimes a revolver. They ride the roughest-looking but hardiest ponies, sitting almost on the animal's shoulders, and with the shortest possible stirrups, raising the horseman's knees very high. The saddle is hung round with sacks containing rations or fodder, a cask of water, a long wisp of hay or straw for bedding, portions of a rude tent, and other matters, having a very unmilitary appearance. Each section, battalion, or company marches under its own flag, dedicated to its patron saint, and is accompanied by its own pipers and singers of wild barbaric music. There were ten thousand of these cavalry in the camp near Galatz. It was difficult at first to keep their horses properly watered at a distance from the river; and one of our Artist's sketches shows the primitive sort of rustic machinery erected at the country wells, by the use of which it is customary to draw water, as in many parts of the East.

We hope soon to get some Illustrations of the actual doings in the Asiatic campaign, from another Special Artist who has been dispatched to that quarter. There are numerous Russian telegrams from the Caucasus which show that the Russians have something to do to prevent the Circassians and Turks who have been landed, and with whom the population of Alkhazia has united, from crossing the mountains and carrying the insurrection among the highland tribes dwelling about the Elburz, or eventually into the two Kabardas. With this object General Krawtchenko holds the position of Oligin, above Soukhom Kaleh, and Colonel Shelkowlkoff Toltscha, on the mountain road up from Cape Adler, where, according to the Russians, 3000 Circassians have been landed; while on the River Kodor, to the south of Soukhom Kaleh, a detachment is concentrated under General Alchassoff to prevent the Turco-Circassian force moving along the shore into the plains of Mingrelia. If they did so now the positions of the Russians in the rear of Soukhom Kaleh and Cape Adler would soon become untenable. As yet the descent of the Turks and Circassians on the shore of the Black Sea is only an inconvenience; should, however, the movement spread to the mountain tribes further inland, then the Turkish descent might become a real danger to the Russian lines of communication in the Caucasus.

While Kars and Batoum are kept in check by besieging forces of adequate strength, the Russian main armies in Asia are penetrating into the interior. The right wing is turning the Sogdian Hills, where Mukhtar Pasha is lying, awaiting their arrival. If the movement succeeds, the Russians will proceed by Olti to Hassan Kale, where the Turks may compel a battle before abandoning the road to Erzeroum. Meanwhile, the left wing is marching south in the Valley of the Euphrates, while the extreme left is proceeding from Bayazid to the Lake of Van. The continuation of these movements must sensibly curtail the resources of the Turkish Government.

The notable Turkish city and seaport of Trebizond, on the Black Sea coast of Asia Minor, about a hundred miles from Erzeroum, and somewhat more distant from Kars, has been repeatedly mentioned. We are indebted to an officer of H.M.S. Antelope, which was lately there, having conveyed Sir Arnold Kemball, the British military Commissioner, from Constantinople, for the sketches of various groups of people, including a reinforcement of Turkish soldiery brought about the same time by two transports, under escort of two Ottoman ships of war. The troops were Syrians from the district of Aleppo, some of them almost black in complexion, and not equal to the average of the Turkish army. Many of them were seafick, and required tender nursing or helping along by their comrades. The townspeople showed intense curiosity, but some anxiety respecting the behaviour of these military guests, part of whom were billeted on the householders of Trebizond. Every shop and stall was closed, with shutters fast padlocked; the bazaar was quite deserted. The women, all dressed alike in blue and white checked cotton, sat eagerly watching the soldiers as they arrived. The troops were armed with new Martini-Henry rifles, carefully covered with canvas. A number of large Krupp guns were also landed from a steamer. The Antelope, having left Sir Arnold Kemball and Lieutenant Maitland Dougall, R.N., at Trebizond on Sunday week, returned the same day to the Bosphorus. The British Embassy is at its summer residence of Therapia.

It appears that there has been more fighting in Asia Minor. The *Daily Telegraph's* correspondent at Batoum reports another considerable battle there, resulting in another repulse of the Russians. The fight began on Tuesday morning, when the Russians advanced in great force, and attempted to place artillery on the heights between Konsetan and that portion of the Turkish camp commanded by Ali Pasha. With the object of covering their infantry attack, the enemy opened a heavy cannonade; an artillery fight ensued, which lasted for some time. Presently the Russians began, in great masses, to descend the face of the hills, with the view of turning the Turkish fortifications by attacking the position. Ali Pasha, seeing the intention of the Russian commander, made a forward movement, under cover of the fire of the Turkish batteries. A sanguinary battle ensued. The Turkish guns, says the correspondent, played furiously and effectively upon the Russian infantry as they descended the hill, making great havoc in their ranks. The Turkish infantry fought admirably, their fire being very destructive. Notwithstanding the large force which the Russians brought to the attack, and the persistency with which it was made, against the galling fire of the Ottoman artillery and infantry combined, they were ultimately repulsed, leaving great numbers of the dead and wounded on the ground. The engagement lasted ten hours, during which several close combats took place.

The recapture of Ardahan by the Turks, and other Russian defeats or repulses in Asia, are announced in the official telegrams to Constantinople.

The Emperor of Russia will set out from St. Petersburg this day (Saturday) for a second visit to his army on the Danube; he is expected to be at its head-quarters on Wednesday next, and the whole army will move forward about the end of next week. There are strange rumours of peace to be negotiated in a few days, but these seem to rest upon no solid foundation.

The Sheikh-ul-Islam, or ecclesiastical head of the Mohammedan religion at Constantinople, has decreed the Jihad, or Holy War, to be maintained by the Sultan against Russia.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Marshal MacMahon has been vindicating his recent stroke of State policy. The *Moniteur* has published some words which it says were used by the Marshal at his reception on Thursday week. They are these:—"I have the consciousness of having performed a great duty. I have remained and shall remain strictly within the law. It is because I am the guardian of the Constitution that I have acted as I have done, and it is mistaking my character to impute to me any intention of issuing out of the situation by striking a blow at the Constitution. I doubt not that the country will soon perceive that the sole object of what I have done is the safety of France and of the Government she has given herself." Taking advantage of a visit which he paid yesterday week to the works for the Exhibition of 1878, he made a little speech explaining the motives of his recent procedure. He said:—"I have come to put an end to the uneasiness sought to be spread for political ends respecting a national enterprise. I add that the Exhibition is neither postponed nor disturbed. What I have desired—what I firmly desire—is to ensure the security of labour, which alone can make this great enterprise succeed." He attended an agricultural show at Compiègne last Saturday, and, in reply to the Mayor's address, said:—"I am glad to take the opportunity of declaring to all, and particularly to those engaged in labour, that the political act which I have just accomplished should reassure and tranquillise them. It has no other object than to give my Government the strength which it needs to secure stability at home and peace abroad. You may henceforward count upon these advantages. France will not take part in any foreign complication. No one in Europe doubts my word, and of this I receive daily assurance."

The Duke de Broglie has issued a circular to the Procurators-General throughout France on the subject of the present crisis. He remarks that if the Marshal has interfered in the march of politics it is to stop the invasion of Radical theories, which he considers to be incompatible with the peace of society and the greatness of France. He asks them to show firmness and vigilance in the exercise of all their duties. He adds nothing to their existing instructions, but remarks that the insults and coarseness of the press exceed all limits, and tells them they must remind the press by firm repression of the respect due to itself and its readers, and thereby avenge the outraged conscience of the public. Some other points, he adds, demand their special attention, notably the attempt made to justify the civil war of 1871. They must not suffer anything of the kind, nor permit any weakening of the salutary horror which that sinister epoch has left in the memory of the people. The manoeuvre of disturbing the public mind by false news must be repressed.

The *Moniteur* denies that the President has ever had an idea of resigning his office, and declares that he is firmly resolved to retain his powers until their expiration in 1880.

M. Jules Simon has addressed a letter to a Paris paper in defence of the late Administration. He announces the determination of his party to defend the Republic against the coalition of Monarchists to upset the existing Constitution, and he exclaims against the pretension to impose Ministers on the Chambers, and against the reviving of idiotic superstitions in the religious world in order to dupe ignorant people.

M. de Fourtou, Minister of the Interior, received last Saturday the heads of various administrative departments. He complimented the officials of his own office on their spirit of duty and justice and on keeping intact their professional honour amid political vicissitudes.

Fresh changes, in which 270 officials are comprised, are being made in the administrative staff. The nomination of three new prefects was gazetted on Monday, as well as of sixty-nine subordinate functionaries. Of the latter twenty-five have been dismissed and thirty transferred to other posts.

The Commission of Pardons was reconstituted on Wednesday. The Duc de Broglie, who presided at the sitting, stated that the President of the Republic was always ready to show clemency towards the misguided person who had taken part in the Commune if they became repentant.

M. Léon Riant, a former member of the National Assembly, has been appointed Director-General of the Post Office, in place of M. Libon, who shot himself a few days ago.

The race for the Prix du Jockey Club—the French Derby—attracted a large and brilliant assemblage of spectators to the racecourse at Chantilly. Count de Juigné's *Jongleur* won by half a length; Count de Lagrange's *Verneuil* being second; and Baron de Rothschild's *Strachino* third.

The first and second class medals awarded at the Salon are as follows:—

Painting.—First class: Lucien Meline, Alfred Philippe Roll, and Edmond Louis Dupain. Second class: Jules Joseph Meynier, Aimé Nicolas Morot, Alexandre Rapin, Edouard Toudouze, Denis Pierre Bergeret, and Joseph Wencker.

Sculpture.—First class: Just Bequet and Louis Alphonse Eude. Second class: Maximilian Bourgeois, Jean Antonin Injalbert, Edmond Cougny, and Jules Desbois.

Architecture.—First class: Alphonse Paul Simil. Second class: Pierre Louis Benouville, Albert Ballu, and Emile Umann.

Engraving and Lithography.—First class: Henri Dedlich. Second class: Frederic Auguste Laguillermie and Jules Gabriel Levasseur.

ITALY.

The Senate adopted on Tuesday the bill augmenting the Civil List.

The Chamber of Deputies on Saturday passed a vote of confidence in the Government by 275 votes against 120. The subject of debate was the Sugar Duty Bill (which has been passed by 232 votes against 109), and Signor Depretis, in explaining why the Government could not agree to any reduction of revenue, made some remarks on the foreign policy of Italy. The Minister said Italy's relations with all the Powers were of a friendly character, and she had entered into no engagement with any Power whatever. He added "No one has a right to suspect the Ministry of wishing to undertake an adventurous policy, but circumstances might arise such as would render it necessary for the honour and interests of the country to appeal to the loyalty of the King and the valour of the army. Consequently, the Ministry cannot agree to any reduction of the revenue."

The address of the Irish members of Parliament was presented to the Pope on Thursday week by Captain Nolan, Captain O'Beirne, and Mr. O'Clery, who were received with remarkable cordiality. The Pope, in reply, spoke warmly of the devotion of Ireland to the Roman Catholic faith. The American pilgrims were also received by the Pope, to whom addresses were read by the Archbishop of Philadelphia and

another prelate. This was followed by the presentation to the Pope of the offerings from nine dioceses, amounting to upwards of £20,000. The Pope, in reply, spoke at some length on the progress of Catholicism in the United States. His Holiness has received a party of pilgrims from Austria. In addressing them he deplored the change which had come over the behaviour of Austria towards the Holy See, whose rights she had formerly defended even by force of arms. He at the same time praised the zeal of the Austrian Catholics. On Wednesday the Croatian pilgrims were received.

HOLLAND.

The Queen is seriously ill, and the Prince of Orange has been summoned home from Paris.

GERMANY.

The Crown Prince and Princess gave a state dinner on Thursday week at the new palace at Potsdam in honour of Queen Victoria's birthday. The Emperor, the members of the Imperial family, the principal Court dignitaries, Lord and Lady Odo Russell, and the members of the British Embassy and several distinguished Generals were present. The Emperor proposed Queen Victoria's health.

An Imperial order designating the troops ordered to reinforce the German garrisons in Alsace and Lorraine, which the Emperor William considers to be inadequate to the requirements of the service in time of peace, was on Wednesday officially published at Berlin.

Cardinal Ledochowski, the Archbishop of Posen, who was deposed by the Prussian authorities, and took refuge at Rome, has been condemned by default to twelve months' imprisonment for libelling Prince Bismarck, and to 3000 marks fine, or seven months' imprisonment, for continued use of his title and functions. A gentleman named Von Diest has been sentenced to three months' imprisonment for libelling Prince Bismarck.

AUSTRO-HUNGARY.

With the Commercial and Customs Treaty of 1867 between Austria and Hungary, an arrangement about the quota to be paid by each side towards common expenses for army, navy, and foreign affairs, was likewise concluded for ten years, and has therefore to be renewed this year. An agreement has been come to on this point, and each Legislature has elected a committee of fifteen members to examine the bill prepared by the two Ministries, which leaves the proportion of thirty-two to sixty-eight, as it was before. The discussions begin at once.

GREECE.

On the assembling of the Chamber on Monday M. Deligeorgis read the Royal decree convening an extraordinary Session of the Legislature. Almost the first act was in opposition to the Ministers, who thereupon resigned. M. Coumoudouros has been summoned by the King to form a new Ministry.

The new Ministry has been constituted as follows:—M. Coumoudouros, President of the Council and Minister for Foreign Affairs; M. Papamishalopoulos, Minister of the Interior; M. Condostavlos, Minister of Justice; M. Sotiroupolos, Minister of Finance; M. Notaras, Minister of Public Worship and Instruction; Bouboulis, Minister of Marine; and M. Petmazas, Minister of War.

There appears to be a great deal of warlike enthusiasm at Athens. A large crowd assembled before the Royal Palace at Athens on Monday evening, and the King appeared on the balcony and consented to receive a deputation. Subsequently his Majesty addressed the people, expressing his thanks for their patriotic sentiments, and assuring them that he was always watchful of the national interests and solicitous for the country's future.

AMERICA.

As announced last week, Queen Victoria's birthday has been celebrated at Petersburg, Virginia, with special religious services and public festivity. A military parade was held and artillery salutes fired; and on Thursday week a banquet in honour of the event was given, the Governor of Virginia presiding. In the course of the dinner a telegram was received from President Hayes expressing his hope that peace would still continue between England and the United States. In harbour of New York the shipping was decorated with flags.

President Hayes has written to Mr. Sherman, the Secretary of the Treasury, enjoining retrenchment and a necessity for a reform of the Customs service on a business basis free from partisan control or interference with politics. Mr. Sherman has accordingly issued orders applying these principles immediately to the New York Custom House.

The Cabinet has determined that Mr. Evarts, the Secretary of State, shall address a letter to the Mexican Government notifying that it must take immediate steps to prevent raids across the Rio Grand into Texas, or otherwise the military commander in Texas will be instructed to follow marauders into Mexican territory and punish them there.

A meeting of the leading merchants of New York has been held, and a committee appointed to urge the Government to participate in the Paris Exhibition of 1878.

There has been a fight between the Indians and the United States troops, in which a number of the former were killed. One American officer and seven soldiers were wounded and four soldiers killed.

CANADA.

Her Majesty's birthday has been celebrated with great loyalty throughout the Dominion.

INDIA.

The Calcutta correspondent of the *Times*, in a telegram of Sunday's date, says that there is little change to report in the condition or prospects of the famine districts. There has been a cyclone at Guntur, and some heavy rain in Madras town, but it did not penetrate very far inland. Reports from Pershaw state that the Amcer of Cabul has released his son Yakob Khan, and it is added that Yakob Khan immediately started for Herat in command of troops. Another rumour states that Persian troops are being massed apparently for a demonstration against Herat. Indian papers lately asserted that Mr. Shaw had been appointed British Resident at Kashgar, but nothing is yet definitely settled. The first distribution of the new orders of knighthood of the Indian empire, the creation of which was announced at the Imperial assemblage, has been postponed to the first anniversary of the assumption of the Imperial title. The Bengal Government is preparing a scheme for establishing courts of intermediate appeal throughout the country, each court to consist of one civilian and one native judge.

AUSTRALIA.

A telegram from Melbourne, dated May 29, states that the Parliament of Victoria has been opened, Sir Charles Gavan Duffy being elected Speaker. A new Ministry has been formed, composed as follows:—Premier and Colonial Treasurer, Mr. Berry; Secretary for Lands, Mr. Longmore; Postmaster-General and Commissioner of Customs, Mr. Lalor; Commissioner of Railways, Mr. Woods.

The mail from New South Wales has arrived with news to April 6. The principal political event reported in the papers is the resignation of the Robertson Ministry, and the formation of a new Cabinet under Mr. Parkes. The late Ministry, after being defeated, advised the Governor to dissolve Parliament;

but his Excellency declined; and it was stated that the advice was accepted by the Governor on the condition that the Ministry were able to obtain supplies necessary to carry on the various departments of the public service, pending an appeal being made to the constituencies. On March 14 the Colonial Treasurer moved the House into Committee of Supply; but was met by an amendment, moved by Mr. Piddington, the leader of the Opposition, declining to grant supplies to a defeated Government under circumstances which would, in all probability, result in two general elections within a short period of time. The Government were outvoted in the division by thirty-three to twenty-seven, and the Governor having declined to grant a dissolution, Mr. Robertson and his colleagues resigned. Mr. Parkes was then intrusted by his Excellency with the task of forming a new Administration, and on March 22 the names of the new Ministers were announced in both Houses. Mr. Parkes takes the office of Premier and Colonial Secretary, and Mr. Piddington that of Colonial Treasurer. At the time the mail left nearly all the members of the new Ministry had been re-elected.

METROPOLITAN NEWS.

Sir Charles Reed, the chairman of the London School Board, formally opened the new schools erected by the board in Hanover-street, City-road, on Monday evening.

Mr. Stephenson, President of the Institution of Civil Engineers, and Mrs. Stephenson, held a *Conversazione* on Thursday at the South Kensington Museum.

Mr. Creswick, the actor, was entertained at a dinner at the Freemasons' Tavern on Monday, previous to his departure for Australia. Dr. Doran presided.

Messrs. Christie sold yesterday week a relic of the Indian Mutiny—a Sevres vase given by Louis XVI. to Tippoo Sahib and taken by the English at the siege of Seringapatam. It realised £425.

Monday being Trinity Monday a special general court was held at the Trinity House on Tower-hill, at which the Duke of Edinburgh was re-elected Master, and Admiral Sir Richard Collinson Deputy Master, for the ensuing year.

A meeting of the Social Science Association took place on Monday night—the Rev. William Rogers, M.A., in the chair—at which Miss Emily Shirreff read a paper on Trained Teachers for Secondary Schools.

Last Saturday the annual conference of the Society of Friends upon their schools was held in Devonshire House, Bishopsgate-street, and most numerously attended. A tabular statement was furnished respecting twelve public schools of the society.

The discussion on a paper read last week at the Royal United Institution, by Captain Colomb, on Russian Development and our Naval and Military Position in the North Pacific, was concluded at a meeting held last Tuesday, under the presidency of General Collinson. Among the speakers were Captain Pim, M.P., Lord Dunsany, and Sir Henry Codrington.

The weekly return of metropolitan pauperism states that the total number of paupers at the end of last week (the third week of May) was 81,046, of whom 37,223 were in work-houses and 43,823 received outdoor relief. Compared with the corresponding week in last year there was a total increase of 996, but a decrease of 6226 and 15,684 compared with the corresponding weeks in 1875 and 1874 respectively. The number of vagrants relieved on the last day of the week was 711, of whom 455 were men, 214 women, and 42 children under sixteen.

Meetings on the subject of spelling reform were held on Tuesday at the Society of Arts. The conference in the morning was presided over by the Rev. A. H. Sayce, Deputy Professor of Comparative Philology at Oxford University; and the Rev. R. Morris, LL.D., was chairman in the evening. Among the speakers were Dr. Gladstone, Dr. Angus, Dr. Murray, Sir C. Reed, Mr. A. J. Ellis, Mr. Isaac Pitman, and Mr. Washington Moon. Letters in support of the movement from the Bishop of Exeter and Mr. Lowe were read. The object of the meetings was to support the resolution of the School Board for London in favour of a Royal Commission of Inquiry on the subject. Resolutions were passed, and a deputation—consisting of Professor Max Müller, Mr. Sayce, Dr. Morris, Dr. Murray, Mr. Sweet, Mr. Ellis, Mr. Pitman, Mr. Moon, Mr. Arding, with power to add to their number—was appointed to lay them before the Education Department.

The Lord Mayor presided on Tuesday evening at the Townhall, Stratford, for the purpose of considering what course should be taken for the raising of funds for the Essex Industrial Schools. The amount required for the schools is £12,000. Of this the county has contributed £5000, and £3000 has already been subscribed, which leaves the sum of £4000 to be raised. Sir H. Selwin-Ibbetson, M.P., moved a resolution to the effect that the meeting approved of the proposals to provide the school with such suitable buildings as will enable it to continue an efficient instrument for the rescue of neglected children and the prevention of crime. The resolution was seconded by Mr. Freeman and adopted. Mr. Baring, M.P., then moved the following resolution:—"That the vast and rapidly increasing population makes the question of an industrial school specially pressing for this portion of the county, and this meeting therefore strongly recommends the Essex Industrial School to the support of the inhabitants." This was adopted, and a committee thereupon appointed to carry out the resolutions.

There were 2158 births and 1392 deaths registered in London last week. Allowing for increase of population, the births were 115 below, whereas the deaths exceeded by 19, the average numbers in the corresponding week of the last ten years. The deaths included 69 from smallpox, 56 from measles, 21 from scarlet fever, 3 from diphtheria, 34 from whooping-cough, 24 from different forms of fever, and 13 from diarrhoea. Thus to the seven principal diseases of the zymotic class 220 deaths were referred against 245 and 246 in the two preceding weeks. These deaths were 7 below the corrected average number from the same diseases in the corresponding week of the last ten years. The fatal cases of smallpox, which in the two preceding weeks had been 78 and 70, were 69 last week; 28 were certified as unvaccinated, 17 as vaccinated, and in the remaining 24 cases nothing was stated as to vaccination in the medical certificates. The deaths referred to diseases of the respiratory organs were 303 last week, against 355 and 338 in the two previous weeks, but exceeded the corrected weekly average by 78. In Greater London 2607 births and 1643 deaths were registered, equal to annual rates of 31.1 and 19.6 per 1000 of the population. The mean temperature was 49.1 deg., and 5.3 deg. below the average. The mean was below the average on each day of the week, and on Wednesday was so low as 45.2 deg., showing a deficiency of 9.1 deg. The duration of registered sunshine in the week was 13.5 hours, out of 111.4 hours that the sun was above the horizon.

THE WAR: CAMP OF COSSACKS NEAR GALATZ—TRUMPETER SOUNDING
FROM A SKETCH BY ONE OF

OOT AND SADDLE"—DOBRUDSCHA HILLS IN THE BACKGROUND.

: SPECIAL ARTISTS.

The Extra Supplement.

"DOCTORING OLD TIME."

This humorous notion of a careful old fellow employing his leisure hour in an attempt to correct the paces of a crazy old clock and to clear its internal machinery of dust by a few puffs of air from the cottage bellows is well enough shown in the picture, by Mr. H. B. Roberts, which we have engraved. "Old Time" may be imagined to be diseased in the chest, and grievously scant of breath, or to have his air-passages in a state of congestion, requiring some kind of surgery to set him to rights; and here is the simple process of ventilating and cleansing, which is expected to have a beneficial result. We have heard of a spider's web, formed in the interior of a clock which had been left many days without winding up, materially disturbing its movement when it was once more set a-going.

PARLIAMENT.

The House of Commons, after an unusually long Whitsuntide recess, reassembled on Thursday; but the attendance was very thin, and the business on the Agenda Paper of rather an unattractive and uninteresting character so far as the general public was concerned. The fact of Mr. Gladstone having changed to Birmingham for the nonce the venue for the prosecution of his case against Turkey and his arraignment of the foreign policy of her Majesty's Government had the effect of imparting a feeling of apathy and indifference to the few independent representatives who had put in an appearance—and who seemed to regard the business before them as "weary, stale, flat, and unprofitable." Sir E. Watkin gave notice that on Thursday he would ask the Attorney-General whether his attention had been called to the reported observations of the Lord Chief Justice during the trial of the case "Twycross v. Grant" in respect to certain practices prevalent on the Stock Exchange. Dr. Playfair intimated his intention on Monday to question the First Lord of the Admiralty with reference to the outbreak of scurvy during the late Arctic Expedition. Mr. Cowen likewise notified that on the same day he would ask the Home Secretary to place on the table a detailed list of the privileges enjoyed by the inhabitants of the Channel Islands, as referred to by the right hon. gentleman in his speech of May 4. Mr. Sandford called attention to the omission from the bluebooks on Turkey of all mention of the conversations between Lord Salisbury and the Duke Decazes at Paris, and between Lord Salisbury and Prince Bismarck at Berlin; to the proceedings of the Conference at Constantinople; and moved for the production of copies of any minutes of the aforesaid conversations at Paris and Berlin. Mr. Bourke, who was very imperfectly heard in the gallery, observed that neither Russia nor any other Power had reason to suppose that the terms of peace could be other than those which Europe generally would assent to. As to the despatches relating to the conversations alluded to, all he had to say was that those conversations were of the most confidential character, and therefore her Majesty's Government felt that they would be extremely blameable if they had made them public. They had received no communication from the Russian Government on the subject of the localisation of the war. After a few words from Lord Elcho expressive of his satisfaction at hearing that the terms of peace would be made a matter of European arrangement, Mr. Sandford withdrew his motion. Lord Elcho, subsequently recurring to the Eastern Question, strongly urged her Majesty's Government to be prompt and even lavish in making every necessary preparation for such eventualities as might be anticipated in regard to the present war, and expressed a hope that the House would receive an assurance to that effect. Mr. G. Hardy said that though the forces were maintained on a peace footing, he had not overlooked what might be a possible, but he hoped not a probable, contingency. The House then resolved itself into Committee on the Civil Service Estimates, when several votes were taken.

About 5000 miners engaged at the Fife and Clackmannan Collieries were "locked out" last Saturday, in consequence of a refusal to submit to a reduction of wages.

News has been received from the senior naval officer at Zanzibar of the capture, by the boats of the *dépôt-ship* London, of three slave-dhows, having on board 160 slaves.

June 4 is now named as the date for the meeting of the international conference on the question of resuming the works on the St. Gothard Tunnel; and the meeting will be held at Lucerne, instead of at Berne.

Mr. Serjeant Cox will preside at the festival of the News-vendors' Institution at Willis's Rooms on July 10, when the Lord Mayor and Lady Mayoress and a large number of the friends and supporters will be present.

A new railway connecting the fishing port of St. Ives with the West Cornwall line, now in possession of the Great Western Company, was opened last week. The new line is only four miles and a half long, but is very picturesque.

A Liverpool merchant on Tuesday received six casks of Canadian ale from a celebrated brewer in Toronto, made from Canadian malt and hops. It is intended to introduce Canadian beer into England upon a large scale. 1620 quarters of Canadian beef were landed by the same steamer.

At an early hour on Tuesday morning St. John's Church, Nottingham, was broken into, entrance having been effected through one of the chancel windows; an altar candle was used as a light. The poor-box was rifled and some of the communion plate taken. The thieves have not been arrested.

Mr. T. Brassey, M.P., with Mrs. Brassey and family, arrived in his yacht Sunbeam off Hastings last Saturday evening, having accomplished a trip round the world, and having travelled 36,000 miles under steam and canvas during forty-six weeks.

The inspection of the East Kent Yeomanry took place on Monday at Dover, under Colonel Tower, C.B. During the week the regiment displayed great aptitude in outpost duty. A ball, at which the leading families of the county were present, was also given.

It is announced that Commodore Sullivan, C.B., who has arrived on the West Coast of Africa from the Cape, has been instructed to open negotiations with the King of Dahomey and to ascertain if it be true that he is ready to comply with the demands made by England if the blockade of his coast be withdrawn.

A portrait of Mr. Weekes, R.A., recently deceased (whose memoir appears in the Obituary column, at page 526), was given in the Number of this Journal for July 25, 1863; one of the Hon. Mr. Motley (of whom an Obituary notice also appears) was given on May 29, 1869; and one of the Rev. G. T. Perks, Wesleyan Minister, who died on Monday, appeared in our Number for Aug. 16, 1873, on the occasion of his being made President of the Wesleyan Conference.

THE ROYAL ACADEMY EXHIBITION.

[FIFTH NOTICE.]

Mr. H. Stacy Marks, R.A.'s, "Bit of Blue" (246) may be accepted as one of the artist's happiest studies of the manners and customs of the antiquarian race. The archaeologist, the osteologist, and the ornithologist have already been most successfully delineated by Mr. Marks; and in this very unpretending but eminently pleasing and skilfully executed work we have the "keramicologist" or china-maniac in his fullest bloom. The dementia of the old gentleman who gloats over his choice sample of blue and white pottery is not by any means of the violent kind. It is mild, placid, and benign; and we suspect, moreover, that there is a good deal of method in the venerable collector's madness, and that, on the whole, he is much more the kind of old gentleman to pick up "a bit of blue" for half-a-crown in some old woman's cottage down in Staffordshire than to pay a hundred guineas for it at Christie's. A more ambitious effort of Mr. Marks's pencil is "The Spider and the Fly" (313). Here we have Graniteheart Trapbois, Esq., of the City of London, money scrivener and moneylender at home, transacting business with a client; that is to say, a bloated human spider in his den devouring at his leisure a gay young fly of a cavalier, for whom post obits have no terror, and who thinks sixty per cent quite a normal rate of usance. The figures of the scrivener and his victim are admirable studies, in Mr. Marks's best manner; the expression of craft, astuteness, and implacability on the one hand, and of rollicking recklessness on the other, being most subtly conveyed. The usurer's den is one of those seventeenth century interiors in the delineation of which this artist is well-nigh unrivalled; and the books and papers, the gold, the seals and musty parchments are all most dexterously rendered. Let us, in passing, renew our acquaintance with Miss M. Brooks's extremely charming "Little Wisdom" (253), the full-length portrait of a little maiden in the Vandyck costume and the crimson rash. This picture has met with deserved success; and it is everywhere talked of as one of the best "fancy" portraits in the Academy—natural, unaffected, and easy, but full of vigour and expression. There is something so prettily sober, so delightfully demure about this precociously sapient little lady that the spectator can scarcely help fancying that in after life she will develop into the most notable of notable housewives—the mightiest of potentates in the kitchen, the pantry, and the still-room, and great alike in pickling and preserving, or ordaining the collaring of lampreys (one of Mrs. Delany's brightest accomplishments) and the making of "quaking puddings": in which last, it may not be generally known, the exemplary Rachel Lady Russell was an accomplished proficient. Our books of cookery and household recipes owe, indeed, a very large debt of gratitude to the widows of the nobility and gentry who had been beleaguered for high treason; and it is not difficult to imagine these bereaved ladies endeavouring to solace their long and dreary widowhood by now and again devising a new mode of making "a brau tart of several sweetmeats," or of concocting a "rare conserve of gilliflowers," or a "syrup of hyasop-water for the chine-cough." Lady Russell was really an adept in such matters, and she was only surpassed by Anne Duchess of Buccleuch and Monmouth. It was but natural. The poor noble dames could not be continually writing edifying letters to Bishops, or listening to the Lay of the Last Minstrel.

There is a great deal to admire in Mr. J. Aumonier's "Eastern Broad, Suffolk" (265), a simple, unobtrusive work, but carefully and appropriately painted, and not by any means devoid of a touch of poetic spirit in the true "chill October" vein. Our Norfolk and Suffolk "broads" are, graphically, not half so well known as they deserve to be: yet they constitute a thoroughly characteristic feature of English inland scenery, and, properly treated, may be made as pictorial, although perhaps they are not so picturesque, as the lakes of Cumberland and Westmorland. Another modest and meritorious production is Mr. J. R. Reid's "Country Butcher's Shop" (71). We admire the clever drawing and the skilful apportionment of light and shade in Mr. C. W. Cope, R.A.'s, "Bianca's Lovers" (280), but we are scarcely so much enamoured with the colour, which is opaque and brickdusty. Mr. E. Benson's "Last Worshipper" (289), described in the catalogue as "an Egyptian in whom has survived some tradition of the ancient religion of the land prostrating himself in adoration before a head of the Sphinx," is commendable on the score of its serious intent and careful execution; nor does it lack matter for reflection in raising the curious question as to the precise period at which the Egyptians of old abandoned the worship of Isis and Osiris, of the Sphinx, and of the innumerable cow, cat, ape, and serpent divinities of the Nile. We learn from the historians that so late as the seventh century there were Italian peasants—*pagani*—who were still pagans, and who worshipped Pan, Bacchus, and Maia; but the Egyptian Pantheon was probably stamped out three or four centuries earlier—in all likelihood by the hermits of the Thebaid. Mr. E. Benson has evidently an eclectic and speculative mind; and in these days of clever and vivacious vulgarity it is something, even, to be serious.

Mr. Walter C. Stacey's "Back Again" (298)—a young sailor, just come home, narrating his experiences of a seafaring life to his delighted family—is one of those pictures for which a certain amount of popularity may safely be predicted, but the production of which does not require the expenditure of any very exhausting amount of inventiveness. It is very well modelled and very smoothly painted, and the listening expression in the countenance of the sailor's auditors is cleverly conveyed. Mr. T. Armstrong's "Feeding Pigeons" (301) is one of the most strongly-pronounced *Præ-Rafaelite* works in the Academy; and we confess that we should be able to appreciate its merits far better were "Feeding Pigeons" hung at the Grosvenor Gallery instead of at Burlington House. It is as out of place in Piccadilly (under Piccadilly's actual art-conditions) as a Trappist would be on the Ladies' Lawn at Goodwood. We say this without intending the slightest disrespect to Mr. Armstrong, whose work is full of estimable qualities—thoughtfulness and refinement pre-eminent among them. Still, those qualities are here, virtually, as caviar to the general. A similar remark will apply to the elaborate and studious productions of Mr. T. M. Rooke—the triad of pictures numbered 573, 574, and 575, and purporting to illustrate the story of Ruth. That these studies display a vast amount of conceptive and executive talent is undeniable; nor is it unlikely that a great many critics may claim for Mr. T. M. Rooke the possession of positive genius. It is a talent or a genius, however, which may be held to be, to most intents and purposes, esoteric on these walls. Academy visitors are, generally, too miscellaneous a class to comprehend the meaning and significance of the angular figures, the abnormal attitudes, the wan faces, the elfin tresses, and, in particular, the amazingly "crinkled" and corrugated draperies, the secret of manufacturing which both Mr. Armstrong and Mr. Rooke seemed to have learned from Mr. E. Burne Jones. We do not for a moment dispute the claim of such studious and capable professors of a peculiarly recondite school of art to adequate representation in public; but, for their own sakes,

perhaps it would be better if they availed themselves of the wider platform and the more congenial audience which might be found under Sir Coutts Lindsay's hospitable roof in New Bond-street.

There is nothing whatever abstruse or esoteric about Mr. E. Croft's "Ironsides Returning from Sacking a Cavalier's House" (528). Very grim and plain sailing realism indeed is apparent in the cavalcade of Roundheads, led, no doubt, by Captain Bind-their-Kings-in-Chains or Lieutenant Hew-Agag-in-pieces; and in the lurid glare of the burning manor-house in the distance. The picture is a very valuable specimen of historical *genre* treated in a solid downright fashion. In another picture, "Oliver Cromwell at Marston Moor" (497), Mr. E. Croft has scarcely, to our thinking, been so successful as in his "Ironsides." The composition is bisected (and not agreeably so) into an upper and a lower storey; and Cromwell, who is in the topmost half, does not seem the principal personage in the assemblage. Otherwise the work is full of Mr. Croft's ordinary vigour and decision: going straight to the point, and of that point making the most that can be made.

Mr. Val. Prinsep, in a freak, presumably of daring caprice, essayed to extract some poetic sentiment from the apparently prosaic topic of a tribe of brawny young washerwomen drying their laundry-work on the slopes of a breezy down. Mr. Prinsep might have justified his audacity, had he so chosen, by pointing out that the washing of the heroes of the Iliad was always "done" at home; and that the Iphigenias and Electras did not disdain the labours of the wash-tub. "Mangling," it must be admitted, was an operation performed, not by the Grecian princesses, but by their papas, abroad. Now the class of subjects taken up by Mr. Prinsep, casually, and seemingly for a frolic, has been adopted systematically and with deliberation by that very capable and constantly improving painter Mr. R. W. Macbeth. "Potato Harvest in the Fens" (1031), must be taken as substantially a sequel and pendant to the "Agricultural Gang" of last year. The work before us is throughout distinguished for good work and intensity of purpose. Potatoes are certainly not poetical things abstractedly considered, although in the city of Metz or of Nancy (we forget which) there is a very beautiful bronze statue erected to the memory of Parmentier, "L'Introduit de la Pomme-de-terre en France." Nor, æsthetically considered, are the strong-limbed ladies whose duty it is to gather in the potato crop very interesting beings. There is, nevertheless, a pleasing amount of really poetical feeling in Mr. Macbeth's powerfully-drawn, well-grouped composition, in which, in addition to undeniable firmness and vigour, we distinctly recognise the existence of that refinement and of that subtle and delicate truth which some critics have failed to find in the "Potato Harvest." Its prominent faults are, to our thinking, an occasional inclination on the part of the painter to overstrain his attitudes, merely for the purpose of manifesting his mastery over the difficulties of draughtsmanship; and, next, a tendency in certain tones of the colour to an unhealthy looking lividness. For the rest, Mr. Macbeth will assuredly achieve great things if he adheres to his arduous enterprise of interpreting the Poetry of Common Life. The late admirable Mason, the lamented Frederic Walker, made bright steps in this long neglected branch of art; but in the exquisite productions of both artists there are signs of manual feebleness and indecision. Mr. Macbeth possesses strength as well as refinement, and, with unremitting study and practice, he should go far. We could wish, on the other hand, to Mr. Hubert Herkomer, another most meritorious and improving painter, the possession of a little less strength and a little more subtlety. "Der Bittgang: peasants praying for a successful harvest" (916) is almost overwhelmingly bold and dashing. You like a friend to shake hands with you; still, you are apt to wince when he grips your fingers, as it were, in an iron vice. When Mr. Herkomer pictorially salutes us, he seems to be inclined to wring our hand off at the wrist; and his colour is as uncompromising as his handling. In 417, a portrait of "Mr. Henry Mason" the artist is more subdued, and not at all the less pleasing on that account. A very thoughtful and suggestive "fancy" portrait is Mr. William Chappell's "Bavarian Schoolgirl" (433), a very graceful composition, full of sweetness and modesty of expression.

MUSIC.

ROYAL ITALIAN OPERA.

"Tannhäuser" was given on Friday, for the first time this season, with a cast nearly identical with that of past performances. Again the Elisabeth of Mdle. Albani displayed that ideal grace and tenderness and special musical charm which were so conspicuous on the production of the Italian version of the opera here last season, and on its repetitions.

The cast included, also as before, Mdle. Cottino as the Shepherd, Signor Carpi as Tannhäuser, M. Maurel as Wolfram, Signor Pavani as Walther, Signor Capponi as the Landgrave, and Signori Sabater, Scolara, and Raguer respectively as Heinrich, Bitterolf, and Reinmar; the part of Venus having been transferred to Mdle. Smeroschi.

Since our last notice Madame Adelina Patti has repeated her performances as Dinorah, and as Zerlina, in "Don Giovanni;" and on Tuesday appeared, for the first time this season, as Caterina, in "L'Etoile du Nord."

The third of the Floral Hall concerts, on Saturday afternoon, included brilliant vocal performances by Madame Adelina Patti, Mdles. Albani and Marimon, and other eminent members of the Royal Italian Opera Company.

HER MAJESTY'S THEATRE.

The specialty last week was the production on Thursday of "Robert le Diable," the first of Meyerbeer's three great historico-legendary operas, "Les Huguenots" and "Le Prophète" being the others. Most of the important features of the cast were identical with those of past performances by Mr. Mapleson's company, when occupying Drury-Lane Theatre. The chief exception was the character of Alice, the peasant-girl, whose benign influence foils the spells of the fiend Bertram exercised over her foster-brother, Robert of Normandy. In the part referred to Mdle. Salla sang with much grace, and was particularly successful in the aria "Vanne, vanne," the couplets "Nel lasclar," in the scene with Bertram at the cross, and in the two trios with that character and Roberto.

As the Princess Isabelle Mdle. Alwina Valleria sang the brilliant music of the character with much fluency, and gained great applause, especially in the air "In vano il Fato," in prominent passages of the second finale, in the duet with Roberto, and the cavatina, "Roberto, o tu che adoro."

Signor Fancelli, as Robert, sang effectively, as did Signor Foli as Bertram. Each of these two performances, however, would have been the better for a little more animation in acting. Signor Rinaldini was, as formerly, an efficient Ram-baldo, and other characters were filled by M. Gounet and Signor Brocolini and Grazi.

The scenery, by Messrs. Grieve and Fox, includes a beautiful view of the Sicilian seashore and a picturesque representation of the ruined cloisters by moonlight. In this latter there

is some excellent ballet-action, with the very clever solo dancing of Mdlle. Kattie Lanner as Elena, the principal of the resuscitated nuns.

The important orchestral and choral effects were forcibly rendered, Sir M. Costa having occupied his usual place as conductor.

"Faust" was given on Saturday, with the important specialties of Madame Christine Nilsson's fine performance as Margherita, and that of M. Faure as Mephistophiles. Signor Fancelli, as Faust, sang effectively, as did Mdlle. Justine Macvitz as Siebel. Signor del Puente was a very satisfactory Valentine; the small part of Marta was well filled by Madame Lablache, as was that of Wagner by Signor Franceschi.

On Tuesday Mdlle. Chiomi made her first appearance here, as Lucia, in "Lucia di Lammermoor," and met with a favourable reception. For Thursday "Faust" was announced, and for Saturday "Robert le Diable." On Tuesday next Signor Talbo is to make his first appearance as the Duke in "Rigoletto."

Rossini's "Otello" is announced as in preparation, with Madame Christine Nilsson as Desdemona, M. Faure as Iago, and Signor Tamberlik as Otello.

THE WAGNER FESTIVAL.

The performances at the Royal Albert Hall came to a close this week with two supplemental concerts—one on Monday afternoon and another on Tuesday evening. The programme on the first occasion comprised the "Kaiser Marsch" and selections from "Die Meistersinger," "Siegfried," "Das Rheingold," and "Die Walküre;" the principal singers having been Madame Materna, Frau von Sadler-Grün, Herr Unger, and Herr Carl Hill.

On Tuesday the "Huldigungs Marsch" and extracts from "Tristan und Isolde," "Siegfried," and "Götterdämmerung" were given. The principal singers were again Madame Materna, Herr Unger, and Herr Hill. At the close of the performance Herr Wagner addressed the orchestral players in German, expressing his gratification at their exertions.

The larger share of conducting has devolved on Herr Richter, whose skill in this respect appears to surpass that of Wagner himself.

It is unquestionable that the chief effects throughout the Festival were produced by the orchestral pieces, especially those selected from the operas which preceded the "Nibelungen" series in composition. The performances in this respect, and in the case of the principal vocalists, especially Madame Materna and Herr Carl Hill, have been generally excellent. Whether the result of the festival will be to enhance, or to weaken, the general desire to hear Wagner's latest works in stage performance here is open to question. The sanction given by himself to a hearing of music detached from those accessories of scenery and stage action which he had heretofore pronounced to be indispensable to its comprehension, is calculated to lead to the inference either that his theories are not sound or that his practice is elastic.

The Sacred Harmonic Society closed its forty-fifth season yesterday (Friday) week with performances of Spohr's oratorio "The Last Judgment," and Mendelssohn's music to "Athalie." The solo singers in the first were Mesdames Sinico and Poole, Mr. H. Guy, and Mr. L. Thomas; in the other work Miss A. Larkcom, Madame Clara Suter, and Madame Poole. Among the most effective pieces during the evening were the trio, "Hearts feel that love Thee," sung by the ladies just named, and the overture and war march, also from "Athalie." Sir M. Costa conducted, as usual.

The first of a series of opera concerts was given at the Royal Aquarium on Saturday evening, when a varied programme was contributed to by Mdlles. Valleria and Rodani, and Signori Carrion and Brocolini, besides orchestral performances, and the solo pianoforte playing of Mdlle. Debillent.

The last but one of this season's New Philharmonic concerts took place on Saturday afternoon, when the programme was of strong and varied interest, having comprised Beethoven's symphony in B flat; Sir J. Benedict's overture to "The Tempest," and Auber's to "La Sirène;" a pianoforte concerto by Liszt, executed by M. Joseph Wieniawski; and a concerto of Corelli, played by that successful young violinist M. Paul Viardot. The vocalists were Mdlle. Rosavella and Herr Arnim von Boehme.

The seventh concert of the Philharmonic Society on Monday evening included performances of Spohr's great symphony known as "The Power of Sound," Beethoven's overture to "Egmont," that by Wagner to "Tannhäuser," and Professor G. A. Macfarren's violin concerto, finely played by Herr Straus. Madame Campobello-Sinico and Signor Campobello were the vocalists.

The concert given on Monday night, at Exeter Hall, in commemoration of the anniversary of the birthday of Thomas Moore, consisted chiefly of songs and ballads with which his name is associated both poetically and musically. Misses Helen D'Alton and Robertson, Madame Antoinette Sterling, Mr. Sims Reeves, Mr. E. Lloyd, and Mr. Santley, were the solo singers—some glees having been contributed by the London Glee and Madrigal Union.

Concerts begin to crowd upon us fast, if not furious. Among the most important ones held this week was Madame Puzzi's annual concert, which took place at St. George's Hall on Monday morning; a chamber concert was given by Mr. Alfred Gilbert and Madame Gilbert, at Langham Hall, on Wednesday; Mr. and Madame Frank Elmore's complimentary benefit concert took place at St. James's Hall on Thursday; Miss Kate Westrop gave an evening concert on the same day at the Royal Academy of Music; and yesterday (Friday) evening, in the same place, Mr. C. H. Couldery was to give a performance of a sacred cantata, "Christ's Entry into Jerusalem," composed by himself; followed by a miscellaneous selection.

A series of performances of operas in English, under the direction of Mr. George Perren, was begun at the Alexandra Palace on Tuesday, when "Il Trovatore" was given, with Miss Arabella Smythe as Leonora. For Thursday "Maritana" was announced, with Miss Edith Wynne as the heroine.

The fourth matinée of the Musical Union, directed by Mr. John Ella, took place on Tuesday, when the programme included Mozart's string quartet in D minor, and Beethoven's in D major, and a trio by M. Saint-Saens, who was the pianist, Signor Papini having been the leading violinist.

The last subscription concert of the season of Mr. Henry Leslie's Choir took place on Thursday evening, when a selection of sacred and secular music was performed. An extra concert is to be given on June 28.

The fifth of Mr. Charles Hallé's Pianoforte Recitals was to take place yesterday (Friday) afternoon, with a programme comprising important works by Brahms, Beethoven, Schumann, and Clementi.

This (Saturday) afternoon "Elijah" is to be performed for

the benefit of Mr. William Carter, who will conduct, and whose excellent choir will render the important choral music of the work.

Herr Rubinstein's extraordinary pianoforte performances have proved even more attractive and successful this year than they were last, great as the result then was. His recitals are to close this (Saturday) afternoon; and next Monday he is to give a grand farewell concert at the Crystal Palace.

Madame Christine Nilsson will give a morning concert at St. James's Hall next Wednesday, in aid of the Westminster Training School and Home for Nurses. In addition to her own performances those of several other eminent artists are announced.

Preparations are making by the International Mozart Society for a grand festival in honour of that composer, to be held during the latter part of July at Salzburg, his native town. It is proposed that two evening performances and one morning performance shall be given in the college hall. Herr Desseoff is to have the direction of the festival; and nearly the whole of the orchestra of the Vienna Court Opera House have promised to assist. Besides the musical proceedings, there are to be entertainments of a varied character, such as assemblies, regattas, and performances in the theatre. Should the festival be a success, it is proposed to repeat it periodically.

Mdlle. Titens has been seriously ill; but she is, we are glad to hear, sufficiently improved to give good ground for hope of her ultimate recovery.

NATIONAL SPORTS.

THE DERBY.

As is almost invariably the case, the present week has been the most important in the sporting calendar; for not only has the greatest race of the year taken place, but on Monday last there were two contests for the title of champion in other branches of our "national sports." The weather on Monday was very cold and windy; but there was considerable improvement on the following day, and our great annual holiday was rendered additionally pleasant by one of the first real summer days of the season. The meeting opened auspiciously on Tuesday, as there were large fields for every event, and the Woodcote Stakes fully maintained its prestige as one of the most important of the early two-year-old races. The Craven Stakes was certainly a match between Dalham and Controversy; and though the latter was decidedly the better of the two last season, he does not appear to have retained his form, so the great race that the Duke of Westminster's horse ran with Umpire at Manchester last week naturally made him a strong favourite, and, leaving Controversy just as he liked at the distance, he won very easily indeed. In the Egmont Plate, Tripplet showed that he retained all his brilliant speed, and successfully conceded 17 lb. to the much-improved Pluton. No less than sixteen ran for a Maiden Plate for two-year-olds, for which Hackthorpe, a colt of Lord Lonsdale's, reported to be 7 lb. in front of Birdie, was at once made a very hot favourite, and had no trouble in winning. The absence of any performer of note appeared to make the Woodcote Stakes an unusually open race, and of the thirteen starters only Thurio and Chevalon had ever previously carried silk. Anything of Mr. Peck's is invariably heavily supported by the public, and as Cyprus, by Lord Clifden—Idalia, had very good looks to recommend him, he was by far the most heavily supported of the lot. Colifichet, an own brother to Punch, in Count Lagrange's stable, has also good looks to recommend him; but King David and Precursor, the latter being an own brother to Forerunner, did not create a favourable impression, as they were both small and deficient in bone and power. Cyprus ran somewhat green, and, a hundred yards from home, appeared to be in trouble; but he came again with great gameness, and finally won by half a length from Centenary, a very nice half-brother to Rosicrucian and The Palmer, by Blair Athol—Madame Eglantine.

The one heavy shower which fell on Wednesday morning scarcely served to lay the dust; yet, though the weather was all that could be wished, the road appears to be less and less patronised each year, and on our arrival on the course it was apparent that the attendance fell far short of what we have been accustomed to see of late years. On entering the paddock, immediately after the decision of the Bentinck Welter Handicap, the first of the Derby horses we encountered was Orleans. He is a light, leggy colt, rather short in his barrel, and will be more at home in a five-furlong spin than he was in the race of Wednesday. The most conflicting rumours were afloat respecting Chamant. We heard that he had retired to 100 to 8, that he was scratched, that he was a hot favourite again, &c., and at last a simultaneous rush to one part of the paddock announced the appearance of the once mighty Frenchman. Jennings walked at his head, looking more than usually serious; still, as the colt moved quickly round, utterly regardless of being the object of such general attention, we could not discover anything wrong with him. "The most beautiful pony I ever saw in my life," was one gentleman's verdict on Altire, and we can thoroughly endorse it, as it exactly describes him. He is wonderfully compact and full of muscle and power, and with about two inches more height and corresponding length he would be the model of a Derby winner. The American candidate, Brown Prince, presented a complete contrast to him in every respect. He is a big, powerful, rough-and-ready sort of colt, with a plain head and rugged hips, and, though he had evidently done plenty of work since his meritorious race for the Two Thousand, he gave us the idea of having undergone a somewhat hurried preparation. The same remark applies to Plunger, who has grown considerably in height since last season, but has not thickened and let down as he should have done. The comic element was supplied by Lady Miller, a filly in the Cockney Boy stable, who cut just about the same figure that the latter did some years ago. She ran in a gigantic pair of light-coloured blinkers, while her jockey's get-up did not compare favourably with that of Cannon or Archer. We must candidly admit that we only bestowed a cursory glance on Glen Arthur, who was destined to play such an important part in the race; but Silvio, one of the few bay Blair Athols, struck us as being especially fit, and a very nice colt, though a little on the small side. Rob Roy was far more taking to the eye; and was, perhaps, the best-looking of the sixteen; indeed, he was almost too handsome, and scarcely gave the idea of a genuine stayer, though those identified with him had no doubt of his stamina. In his canter he moved with the greatest dash and resolution; and Silvio, Brown Prince, and Altire also pleased their supporters; but Chamant seemed afraid to extend himself, and we are surprised that he did not recede considerably further in the betting. A good start was effected at the first attempt—though, of course, Lady Miller could not keep with her field for fifty yards; and, being soon stopped by the crowd, which swarmed into the course, she arrived at the winning-post about a quarter of an hour after Silvio

had weighed in. Orleans, who refused to gallop at the finish, was also beaten off. As they turned Tattenham Corner Lord Falmouth's colours were very prominent, and Glen Arthur, Touchet, and Grey Friar were also well in front, Chamant being in trouble thus early. Approaching the distance, Rob Roy went to the front, and loud shouts announced his victory; but a few strides further on Archer brought Silvio with a great rush on the lower ground, and, overthrowing Mr. Mackenzie's colt at every stride, passed him about one hundred yards from home, and won by half a length from Glen Arthur, who also caught Rob Roy and beat him by about the same distance for second place. Rhidorroch was only a head behind Rob Roy; and then came Brown Prince, Touchet, Thunderstone, Grey Friar, and Chamant, in the order named. Though few backers can have profited by the victory of Silvio, Lord Falmouth's success was very warmly received, and Archer, who has never ridden a finer race, will become more popular than ever. The result curiously resembles that of the Derby of 1870, when Kingcraft, who, like Silvio, carried Lord Falmouth's colours into third place for the Guineas, beat a tremendous favourite in Macgregor, and Palmerston, a rank outsider, was second. The only other noteworthy feature of the Derby Day was the runaway victory of Lady Lumley in the Stanley Stakes, those speedy fillies, Grace and Ersilia, never being able to go the pace with her.

A remarkable race for the sculling championship of England took place from Putney to Mortlake on Monday last. The competitors were John Higgins, of Shadwell, and Robert Watson Boyd, of Newcastle, and, on the previous Saturday, odds of 2 to 1 were laid on the former, though, when it was found that the race would have to be rowed in a perfect hurricane, even money was accepted by the supporters of the northerner, who is far the more powerful of the two. He got off with an advantage of nearly two lengths, and Higgins, who seemed utterly helpless among the waves, was beaten by fully 300 yards.

The New Thames Yacht Club sailed its cutter-matches yesterday week, in three classes, the course for the first two being from Gravesend round the Mouse and back, and for the third-class yachts, round the West Oaze buoy and back. Mr. Bowick's Neva won the first prize, Mr. Macmaster's Myosotis and Sir F. Gocch's Corah took the first and second prizes in the second-class, and Mr. Williams's Butterfly and Mr. Burnett's Dachshund were the winners in the 20-ton class.

On Saturday the annual cricket-match between Cambridge University and the Surrey Club closed in favour of the former by seven wickets; the match between Derbyshire and Hampshire ended to the advantage of the first-mentioned county by 192 runs; and the match at Lord's between the Marylebone Club and the Derbyshire team ended in a victory for the former by 40 runs.

On Monday John Roberts, jun., and W. Cook played 1000 up, even, at the Gaiety Restaurant, for the championship of billiards. Owing to the fact that, with half a dozen exceptions, no tickets were issued to members of the press, we are unable to give details, and can only state that Roberts won by 223 points.

There was a great gathering of bicycle riders last Saturday at Hampton Court, the occasion being the third annual meet of the clubs of the Home Circuit. Between 1500 and 2000 members of these clubs assembled on their bicycles between the Lion Gates at Hampton Court and Kingston Bridge.

The second meeting of picked athletes of the sister countries (England and Ireland) took place last Saturday at the Stamford Bridge athletic grounds. England gained the day by carrying off 11 prizes out of 13.

Earl Cowper has made a present to the infirmary at Hertford of the freehold of the site on which the institution stands. In doing so, his Lordship states that the institution is so useful that he was glad to be able to give it this assistance. The infirmary has hitherto been held on a lease for ninety-nine years, and nearly the half of that period had expired.

In preiding at the opening of the Nursing Home and Children's Association at Stratford-on-Avon last Saturday afternoon the Marquis of Hertford announced the bequest of £400 to the funds of the charity from Mr. Gibbins, of Elington. There was a large and most influential gathering, and the ceremony concluded with an open-air concert.

The trustees of the Prince Consort Memorial Fund have transferred to the Royal Hibernian Academy of Arts and the Royal Irish Academy of Music each the sum of £940 Government Stock, the accumulation of interest on the fund invested by the trustees pending the completion of the Memorial. There are to form prize funds, to be called "Prince Albert Prize Funds," in memory of the late Prince Consort.

Sir Charles Reed addressed several thousand persons assembled at Newport last week with reference to the South Wales Sunday School Conference, which had just held two important sittings. He said he was working on the lines laid down by Mr. Forster, and provision for the secular teaching of 150,000 children in London was made by the School Board. The Sunday school must come in and take these children a step higher. He contended that Sunday school work had conducted to loyalty, and asserted that the great spirit of endurance in Lancashire at the time of the cotton famine was attributable to Sunday school influence.

A statue which has been erected in West Princes-street-gardens, Edinburgh, to the memory of the late Professor Sir James Simpson, was unveiled by Lady Galloway, last Saturday, in presence of the Lord High Commissioner (Lord Galloway), the Lord Provost, magistrates, members of the Town Council, and a large assemblage of people. Dr. Alexander Wood, chairman of the memorial committee, formally handed over the statue to the Lord Provost, as representing the city. His Lordship, in appropriate terms, acknowledged the compliment. The statue, of bronze, represents Sir James in a sitting posture, and is a striking likeness. Mr. Brodie is the sculptor.

Highway robbers with masks on their faces are not altogether things of the past. About ten o'clock on Monday evening Mr. W. H. Hodgson, assistant solicitor to the Treasury, residing at Lewisham, was returning home in a carriage, with his sister and niece, from a visit to his brother on Woolwich-common. While they were passing a dark and lonely spot on Blackheath near the gravel-pits, two men rushed to the horse's head from the side of the road, seized the reins with such violence that the horse was thrown back on its haunches, and, each presenting a pistol at the head of the driver, threatened to blow out his brains if he spoke or moved. Mr. Hodgson, opening the carriage window to inquire the cause of the delay, was confronted by one of the highwaymen, while the other thrust in his head at the opposite window. The two robbers, who were masked, presented their pistols, demanding "Your money or your life!" Mr. Hodgson handed them the loose silver (about 5s.) which he had in his pocket. This, however, did not satisfy them, and they asked for his purse, which he delivered, with its contents, two £5 Bank of England notes and about £7 in gold. The thieves then ran off.

THE WAR: TOWN AND FORTRESS OF RUSTCHUK, ON THE DANUBE.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE LATE SIR M. DIGBY WYATT, ARCHITECT.

THE WAR: THE TURKISH GUN-BOAT LUTFI DJELLIL, SUNK BY THE RUSSIAN BATTERIES NEAR BRAILA.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE LATE SIR MATTHEW DIGBY WYATT.

This eminent member of the profession of architects, whose death was lately announced, was about fifty-seven years of age. He was the younger son of a former metropolitan police magistrate at Lambeth. Having been trained in the office of his elder brother, Mr. Thomas Wyatt, architect, and having travelled and studied his art on the Continent, Matthew Digby Wyatt, from 1848 to 1850, bore an active part in several public undertakings, to which he was introduced through the Society of Arts. He assisted, under Sir Joseph Paxton, Sir Charles Fox, Sir W. Cubitt, and Mr. Owen Jones, in the erection of the Crystal Palace in Hyde Park for the Great Exhibition of 1851; and, during two or three years afterwards, in the arrangement and decoration of the Crystal Palace at Sydenham. He was again and again employed in the British Department of the Paris and other foreign Exhibitions. As an architect, since 1855, his most important work has been done for the Government of India and the old East India Company; he was associated with Sir Gilbert Scott as joint architect of the new India Government Office at Westminster. He received the honour of knighthood in 1869. Sir M. Digby Wyatt also designed and superintended the building of many grand private mansions in town and country. He was the author of some valuable published treatises on the different arts and styles of ornamentation, and in 1870 held the Slade Professorship of Fine Arts, besides which he produced a variety of lectures, essays, and official reports. The portrait is from a photograph by the London Stereoscopic Company.

LAW AND POLICE.

Vice-Chancellor Malins had before him on Thursday the case of "Turner v. Tepper," which was an action by representatives and next of kin of the late Mr. Turner, R.A., against the executors of the late Mr. Jabez Tepper, who had acted as the solicitor to the plaintiffs. It appeared that he induced them to sell to him, at the price of £2500, engravings and plates of the pictures of the late Mr. Turner, although Mr. Gambart, who was accustomed to value works of fine art, had before offered him £8000, which was gradually increased to £10,000. The plates and engravings were sold by Mr. Tepper's executors for about £40,000. The plaintiffs sought to set aside the sale to the late Mr. Tepper on the ground of fraud. His Lordship held that fraud vitiated the sale to the late Mr. Tepper, and gave judgment accordingly.

Colonel Grant having brought an action against the Secretary of State for India for having been improperly retired from the service, on the ground that he entered under a special contract with the East India Company, Mr. Justice Grove decided on Tuesday that, in the interests of the public service, the Secretary of State has absolute power of dismissal, which could not be waived by contract.

The extraordinary suit by which it was sought to establish the will of the late Mr. Charles Frederick Ker in favour of Mrs. Georgina Baker was concluded in Dublin on Saturday. The further evidence showed that the testator had an attack of delirium tremens at the time he committed suicide, and that on the night before the will was made he was labouring under delusions. The jury were discharged without agreeing upon a verdict.

At the Central Criminal Court on Monday James Sandford Scott, who was convicted in April last of having committed wilful and corrupt perjury, but judgment upon whom was postponed until a question as to the state of his mind had been inquired into, was sentenced to twelve months' hard labour. During the hearing of a charge of conspiracy and fraud against two men named Atkinson and Edgington on Tuesday one of the jurors fell dead in the box. The cause of the death was said to be heart disease. The two prisoners were sentenced to five years' penal servitude. Alexander H. Westaway, formerly a member of the London Stock Exchange, was found guilty of having unlawfully appropriated to his own use securities to the value of £2160, and sentence upon him was postponed till next session. John Wicks, who was committed on a charge of having murdered his wife at Kensal New Town, and against whom the grand jury returned a bill for manslaughter only, was acquitted on Wednesday. Thomas S. Raven was, for obtaining money by false pretences, sent to penal servitude for seven years.

The full penalty of £20, with three months' hard labour in default, was inflicted by Mr. Newton, at Marlborough-street, on Herbert French, for attempting to obtain a situation as butler by means of a false character. The prisoner could not pay, and was sent to gaol.

Eleven persons, principally colliers, were convicted at Chesterfield on Tuesday of cruelty to cocks by setting them to fight. It was proved that steel spurs were taken out of the side of one of the dying cocks. The three principals were fined £3 each, the remaining nine offenders being fined £1 each. The prosecution was instituted by the Society for the Prevention of Cruelty to Animals.

The East Riding magistrates at Hull on Tuesday fined Thomas Archer, of Newington, £9 for placing poisoned bread on land belonging to a neighbour, by which several fowls were poisoned.

Dr. Selmann was an honoured guest at a dinner given on Tuesday by the Grocers' Company in their corporate hall in the Poultry.

NEW BOOKS AND PUBLICATIONS.

NEW AND POPULAR NOVELS.
Now ready, at all the Libraries, in 3 vols.,
MRS. ARTHUR. By Mrs. OLIPHANT,
Author of "Chronicles of Carlingford," &c.
THE BURTHEN OF REUBEN. By Mrs. RANDOLPH.

SECONDHAND HARMONIUMS.

Three Guineas and Upwards.
NO. 50, NEW BOND-STREET.

CHAPPELL'S ENGLISH 20-GUINEA or SCHOOL-ROOM PIANOFORTE, with Check Action, in Canadian Walnut or Mahogany. This instrument combines good quality of tone and excellence of workmanship. Capable of enduring hard practice without pointing out of order. In Solid Oak or White Ash, 22s. 6d.; Rosewood or Walnut Case, 27s. 6d.

CHAPPELL and CO'S ORIENTAL MODEL PIANOFORTE, Iron Frame, Trichord throughout, Check Action, Seras Octaves, Solid Walnut Case. FIFTY-FIVE GUINEAS; or in Solid Mahogany or Black Walnut Case, and Check Action, FORTY-TWO GUINEAS; with Plain Action, THIRTY EIGHT GUINEAS.
Made expressly to withstand the heat and moisture of extreme climates. Every part that is glued is also secured with screws. The felt on the hammer, &c., is fastened with pins. The back and the silk frame are lined with perforated zinc to keep out damp and insects; and every precaution taken that has been suggested by persons who have had many years' experience in the care of musical instruments in India and China.
Testimonials of the durability of these instruments can be seen at 50, New Bond-street.
The price includes—1. Packing-cases of tin and wood; 2. A suitable tuning hammer or key; 3. A tuning fork; 4. Some additional strings; 5. A Book on Tuning and Preserving the Instrument; 6. And the Carriage to the Door.
Show-Rooms, 50, New Bond-street.
Factory, Chalk Farm-road.

CHAPPELL and CO'S MIGNON IRON GRANDS, with Transverse-String Bass, 25s. 6d. to 35s. 6d. The smallest Horizontal Piano made; length only 5ft. 9in.

L'HARPE EOLIENNE, ORGUE DE SALON, with eighteen stops, fourteen half sets of reeds, personal action, double or triple action, &c., of the finest workmanship. This model has been commended highly by all musicians who have tried it. Price 50s. CHAPPELL and CO., 50, New Bond-street.

METZLER and CO., 37, Great Marlborough-street, London, W.

NELL GWYNNE. New Opera. By H. B. FARNIE and ALFRED CELLIER. SONGS (now ready).
IF I WERE BUT THE MORNING LIGHT.
THE BROWN TERN.
O, CUPID IS A MADCAP!
HER HEART.
WELL I KNOW MY LOVE LOVE ME!
Price 2s. each net, post-free.
METZLER and CO., 37, Great Marlborough-street, W.

LOVED AND LOST. The Popular Song by LOUISA GRAY. In two keys, Soprano and Contralto. Post-free, 2s. stamps.
THE BLIND MAN'S GUIDE, by same Composer, just published.
METZLER and CO., 37, Great Marlborough-street, W.

LADY FAIR. New Song, by Mrs. ARTHUR GOODEVE. Just published. Also, by the same Composer, HIDDEN TREASURES. MUST I FORGET THEE? 2s. each, post-free.
METZLER and CO., 37, Great Marlborough-street, W.

A ROVING LIFE. Sung by Mr. Maybrick. Price 4s.
London: METZLER and CO., 37, Great Marlborough-street, W.

HAMILTON'S MODERN INSTRUCTIONS FOR THE PIANOFORTE. 112nd Edition, 64 pages, 4s.; post-free 3s. stamps. The number of editions this Work has passed through sufficiently guarantees its well-deserved and world-wide popularity.
London: ROBERT COOKS and CO., New Burlington-street.

ROBERT COOKS and CO'S NEW SONGS.
The Cuckoo's Concert. 2s.
The Sick Stag. G. Fox. 2s.
Golden Sun. F. Abt. 3s.
The Skylark. H. F. Limpus. 2s.
Love Never Dies. A. S. Gatty. 2s.
The Sailor Boy. S. Adams. 4s.
Spring Morning. F. Abt. 3s.
The Knight's Shield. C. Fin. 4s.
Sunset on the River. C. Fin. 4s.
Two Little Fighting Cocks. G. Fox. 2s.
Still is the Night. In B flat and G. F. Abt. 3s. each.
My Boyhood's Dream. J. L. Hutton. 4s.
All post-free at half price in stamps.
London: ROBERT COOKS and CO., New Burlington-street.

W. T. BEST'S POPULAR MUSIC for
the ORGAN. Modern School, in four parts, complete in one vol., 31s. 6d. Pedal Exercises, composed for the use of Students, 12s. Scale Exercises in all the major and minor keys, 5s. God Save the Queen, 4s. 24 Studies, 10s. 6d. The Organ Student, with pedal obligato, in 24 numbers, 2s. 6d. each; 7 in two vols., 21s. 6d. Collection of Organ Compositions, Ancient and Modern, 24 books, 2s. each; or in two vols., 21s. each.
London: ROBERT COOKS and CO.

W. T. BEST'S CHORUSES OF HANDEL.
150, from all his Oratorios and Anthems. Arranged from the scores for Pedal Organs. In cloth boards, £3 12s. 6d.; or in Twenty-four Parts, at various prices. List of Contents gratis and post-free. The most valuable Collection extant. Also, gratis and post-free, a Catalogue of Organ Music and Church Music.—London: Sole Publishers, ROBERT COOKS and CO., New Burlington-street.

A LIST of ROBERT COOKS and CO'S
POPULAR EDUCATIONAL WORKS on MUSIC (invaluable to Teachers and Amateurs) may be had, gratis and post-free, on application to 6, New Burlington-street.

ROBERT STANLEY.—DEAR LITTLE

SKETCHES AT TREBIZOND, BY AN ENGLISH NAVAL OFFICER.

ELYSIAN FIELDS.

When that I was and a tiny little boy
(Sing hey ho, the wind and the rain)
A foolish thing was but a toy—
And the rain it raineth every day!

Every day!—from the beginning of September till the end of May. And we grumble, not seeing the poetry of the thing: which has its poetry nevertheless. Children, whose principal occupation is (if I remember right) to stand on chairs and look out of the window, see perfectly well what I mean; and the great poet of small everyday things—Hans Christian Andersen—has expressed it, charmingly as ever: more than once, I think, though I am not sure in which of his tales. (But there is one beginning, "How it did rain, to be sure!"—and then the Elder Witch opens with an account of the way a little schoolboy caught cold, by standing in a puddle up to his ankles; which is poetry, though it does not sound like it.)

But when we were tiny boys, and stood on chairs, and watched the rain a-raining every day, we saw the poetry of everything. The dim slanting lines, the water dashing against the window and splashing in the pools, the drops forming and falling from the sill, the gutters foaming furiously downhill—rivers along which our fleets of walnut-shells would sail, when it was fine enough to go out!—all, all were full of a meaning which we could not fathom; but there was a meaning, and that is everything. For, if there is a meaning underlying all, does not that answer the question constantly asked, from the beginning of the world; answered as constantly, with a vehemence which somehow does not seem quite satisfactory?

The old quotation comes in, from Wordsworth's ode. He was right. The glory and freshness have faded; only their memory gives a poignancy which is even painful to every sweet scent of spring—to the smell of the fresh leaves, of the first strawberries, of the flowers—and to that odour of the "tedded earth" after rain which Milton, Addison, every poet—even the dumbest—has felt so keenly. These joys are generally little more than the eastern reflection of the sun after he has set; we cannot now be satisfied with the everyday delights of childhood—we go afar for pleasure, and consult Baedeker and Bradshaw for our poetry, finding none in the daily downfall of the steady rain.

And it is true that this last-named species of delight is not that which one most naturally associates with the thought of May. Rather one imagines a bright, warm day, when it is possible to lie upon a sloping mossy bank in the sunshine—perhaps just outside the trees of a little wood, in a clearing of a few acres, where the buttercups give a glory to the grass, over which by moonlight the "merry brown hares" leap on the way to their Walpurgis meeting, around which hundreds of the earliest birds (proud of secured worms, and of the houses in eligible localities which they have just obtained for the season) make themselves heard in animated and ceaseless discussions of family matters. In the true May weather such a field of Elysium would indeed be the happiest of resting-places; one might dream there of past dreams, hear songs of spring again which dead voices had sung, linger in a melancholy more sweet than joy.

This was the heaven of the ancients—the blissful part of their Hades, whither came Achilles, and all other heroes and mighty men and women, and wandered for ever, in a misty light, tall and slender forms, amid high green grass, with crimson poppy-flowers for sleep, and yellow daffodils for remembered fame. From older poets' descriptions of such a place, Tennyson borrowed the splendid imagery he has used more than once or twice—the lines which occur, not, I think, greatly varied, in the "Lotus Eaters," in "Lucretius," in the "Morte d'Arthur," where is described that island-valley of Avilion, "where never falls the least white spot of snow;" and a monkish writer—one of those whose writings first stirred the ambition of the great Columbus—imitates the same passage when he tries to paint the Garden of the World, that "land beyond the sunset" which was sought and found by the Genoese sailor, and whose name now carries with it associations hardly of repose and poetry. From this Elysium, too, our latest bards, whose mission, they tell us, is only to be idle singers of an empty day, derive their inspiration: the creation of the clear-spirited Greeks lives again in the mystic and shadowy writings of Britons of to-day.

And it deserved to live, this beautiful ideal; it is the most deeply poetic of all mythological conceptions of heaven. Look at the others. Walhalla is rich with the clang of beakers, the shout of carousing warriors: it touches the imagination at once, brings a vivid picture before the eyes; but how utterly it falls to pieces, translated into literal prose! A heaven of eating and drinking! It reminds me of a ghastly misprint I saw once in a quotation from "In Memoriam," which represented us as, after death, sitting at a

Continual feast
Enjoying each the other's food!

The "happy hunting-grounds" of the Indian, less poetic at first sight, are perhaps truer and finer in reality; there is something clear and bracing about them, at all events—but the ideal is hardly a high one. Of the sensuous and cloying beauty of Mohammed's paradise one need not say much; those dark-skinned houri, with eyes alight with strange amorous fire, can enter into no conception of heaven except that formed in a land where women are looked upon and treated merely as animals—and consequently become very much what the men try to make of them.

Infinitely higher and purer is the wistful Greek imagination of a gracious communion of heroes and sages; saddened and dreamy indeed, but noble, beautiful, and chaste. The wide and quiet meadows of Elysium, vague, without bound or landmark, wisely undefined, are perhaps the only conception of such a resting-place which has no absurd side. No caricaturist could find anything grotesque in the tender melancholy of this conception: which seems at first sight strange, when one recollects the havoc which has been made by innumerable satirists, from Aristophanes downwards, of the Greek Olympus, with its amorous, quarrelsome, pig-headed bevy of deities. But it is a long step from Olympus to Hades (which does not mean "from heaven to hell," as some ill-informed novelist has imagined)—a step, in some sense, from the ridiculous to the sublime. Why it should be a question I have never seen asked—why the abode of the Greek gods, and, equally, the abode of their wicked after death, should have been filled with vulgar pleasures and vulgar miseries, while their ideal Elysium is, in its way, so perfect and so pure. May not the reason be that while the dwelling-place of the deities and the tortures of the damned were absolute inventions, made with an effort, and rendered in every way as striking as possible, the place of eternal rest appeared only the natural satisfaction of weary spirits—the home which poets and philosophers might honestly believe that they should find, the repose they would fairly deserve after the hard struggle of a conscientious life? In other words, was not one an ideal of what might be—of things entirely beyond the range of human thought—while the other was a guess at what naturally would be: a sad place, with all its beauty; for the

Greek could not imagine that it was ever a gain to part from life?

But what a way we have come from the dreary rain we started in! And there is absolutely a hope that the rain has gone away from us; there is bright sky overhead, not cloudless, but made almost brighter by the intense white of the clouds which move slowly along it. With the rain—which with all its poetry is horribly depressing—there pass away the melancholy thoughts that made even our joys seem sad; with the first real day of summer comes a buoyant air, a glow and an inspiration, that makes us feel that a real and brilliant happiness is possible even to those who are no longer little boys. Let us walk—whither we before intended to go, when the supreme powers of Jupiter Pluvius stopped us—into those Elysian Fields which extend along the banks, not of the gloomy Styx, but of the bright and quivering Seine, on whose waters in the sunshine innumerable merry Charons dart from shore to shore in ferry-boats so light and graceful that they have been named *Les Hirondelles*. Parties of pleasure start for St. Cloud or for Sèvres; others pass only from one pier to another, and disembark close to the pleasant promenade which the French, with their customary tendency to a quaint little classicism, have called the *Champs Elysées*.

Who does not know them, these brilliant "fields" which form such an absolute contrast to their namesake? A mile and more in length—though they do not look it—their whole extent, from the obelisk in the Place de la Concorde to the massive Arc de Triomphe is crowded with the people in all the world most unlike one's ideal Homeric heroes (if not quite so unlike the reality), who have come to enjoy their more or less well-earned repose in the pleasure-ground of all nations. A flashing beauty, as wanting in poetry as beauty can well be, distinguishes them; the restlessness of an ant-hill without its industry, the bustle of a fair, and, at night, almost its vulgarity. Vanity Fair should be its name: not a title which recalls the country and heaven.

Yet here there are youth, children, flowers, pleasure. In the year's first real sunshine one must not be too hard upon anything which can give us these—nor upon an enjoyment which, with all its faults, is real and living. Looking upon it, one cannot wonder that the Greeks, with their eager and intense appetite for life, found chiefly a sadness (however sweet) in the contemplation of the loveliest meadows of the Elysium hereafter.

ROYAL INSTITUTION LECTURES.

DAVY'S ELECTRO-CHEMICAL RESEARCHES.

Professor James Dewar, M.A., of Cambridge, the new Fullerian Professor of Chemistry, gave the first of a course of three lectures on the Chemical Philosophy of Sir Humphry Davy on Tuesday, May 22. He began by briefly noticing some of Davy's earliest experimental work, such as the fusion of ice by the heat produced by the friction of two pieces; and the production of very perfect vacua by means of the absorptive powers of caustic potash and other substances in most ingenious and suggestive methods, in which very much time and patience were expended, and which have been adopted by Gassiot and other recent investigators. After illustrating some of these processes, the Professor adverted to and repeated some of Davy's first experiments with the voltaic pile in 1800, when, taking up the researches of Nicholson and Carlisle, who by its means had decomposed water into its elementary gases, oxygen and hydrogen, he effected the electrolysis of the water in vessels several inches apart when even his own body was made part of the circuit, his hands being placed in the glasses containing the liquid. Similar results were obtained when animal or vegetable fibre was employed in the circuit. Davy's researches with regard to the source of the power of the voltaic battery were next considered. Volta attributed the electric power to the mere contact of different metals; but Davy, by a long series of crucial experiments, demonstrated that this power is due to chemical action, and accumulated proofs in support of his theory. These were fully illustrated by Professor Dewar, who showed how the same results might be obtained by employing different liquids as well as by different metals, and that batteries may be constructed with one metal only. The latter part of the lecture was devoted to an illustrated account of the way in which Davy demonstrated that perfectly pure water is composed of nothing but oxygen and hydrogen; by showing that the alkali or acid which was evolved at the poles of the battery during the electrolysis of water were derived either from the vessels used or from the atmosphere. When he employed the purest distilled water in gold cups, connected by threads of asbestos, in the exhausted receiver of an air-pump, no volatile alkali appeared, but a minute trace of acid was detected; but when the receiver had been filled with hydrogen gas, re-exhausted, and refilled with hydrogen, the electrolysis of the water was unaccompanied with either acid or alkali. The account of these laborious experiments, with the application of electrolysis to fruitful chemical research, is to be found in Davy's celebrated Bakerian lecture, read before the Royal Society Nov. 20, 1806.

PHENOMENA OF HEAT.

Professor Tyndall began his seventh lecture on Heat, given on Thursday, May 24, by stating that in a bottle of seltzer or soda water the carbonic acid gas is acted upon by two forces—one external, the pressure on the surface of the liquid; the other internal, the pressure being aided by the powerful intermolecular suction which draws the gas together, in a manner resembling porous charcoal. When the pressure is removed the liquefied gas recovers its gaseous form, with great absorption of heat. In the iron bottle containing the liquefied gas which he produced he said that one force only was exerted. When that was removed part of the gas was converted into snow, with some of which, aided by a little ether, he froze successively water and mercury in a red-hot crucible. He then explained that ordinary water exists under the atmospheric pressure of fifteen pounds to the square inch, and showed that when this pressure is removed a very little heat suffices to make the water boil. He next placed in hot water a glass bulb containing water deprived of air by boiling. When lifted out the water in the bulb boiled through the cooling of the upper part of the bulb; and when this boiling had ceased the ebullition was renewed through the application of icy cold water by means of a syringe. After describing how the cohesion of the molecules of water is greatly increased by the removal of the air, the Professor exhibited the "water-hammer," a V-shaped tube containing water deprived of air by long-continued boiling, which not only rattled like a solid body when shaken, but, after a little time, adhered to the side of the tube, and refused to obey the law of gravity. Donny, of Ghent, discovered that airless water may be raised from 60 deg. to 80 deg. above the ordinary boiling point without ebullition, which at last takes place with explosive force. The Professor defined the boiling point of a liquid as that temperature at which the tension of its vapour exactly balances the pressure of the atmosphere. The conduction of heat was illustrated by several ingenious experiments, showing that different bodies possess this property in different degrees: thus, silver being 100;

copper is 74; gold, 53; brass, 24; tin, 15; iron, 12; and bismuth, 2. The radiation of heat was next considered, and to it was attributed the temperature of the handle of a red-hot poker being stationary—part of the heat being absorbed by the air and part radiated. After referring to the researches of Sir William Herschel, Pictet, and others, in respect to the analogies and differences in the phenomena of light and radiant heat, the Professor proved their similarity in regard to reflection by an experiment of Pictet. A red-hot ball was placed between two concave mirrors, one of which was suspended from the ceiling: some gunpowder was ignited when placed in the focus. Leslie's differential thermometer was next exhibited. It was then shown how the successive discoveries of (Ersted, Seebeck, and Nobili culminated in Melloni's constructing his thermo-electropile, whereby our knowledge of radiant heat has been so much enlarged. Even by merely looking at it the warmth of the Professor's face caused a deflection of the galvanic needle. The Professor next demonstrated that bodies which are good radiators of heat are also good absorbers; and he also showed that bodies which are transparent to light may be opaque to heat. Glass does not permit heat to pass through it, but becomes warm; while rock-salt transmits heat and remains cool, because it possesses the property termed diathermancy.

EVOLUTION OF NERVES AND NERVE-SYSTEMS.

Mr. G. J. Romanes, M.A., began his discourse at the Friday evening meeting, May 25, by describing, with the aid of fine large diagrams, the structure and functions of fully-evolved nerve-tissue of various animals, showing that, in its essential elements of cells and fibres, this tissue presents much the same microscopical appearances wherever it is met with. The function of the cells is to accumulate nervous energy, and at fitting times to discharge it into the attached nerve-fibres; while the function of the fibres is to conduct this energy to the muscles, which contract on receiving the stimulus. Nerve-fibres will conduct any stimulus; and nerve-tissue differs from muscle-tissue and protoplasm, in that, while they can only conduct a stimulus by means of a visible wave of contraction, nerve-tissue can do so by an invisible or molecular wave of stimulation. Mr. Romanes next explained Mr. Herbert Spencer's theory as to the mode in which nerve-tissue is differentiated from protoplasm—viz., by waves of contraction, and with them waves of stimulation, proceeding more frequently from the more exposed parts of the specific-shaped masses than they do from the less exposed parts. This causes a polar arrangement of the protoplasmic molecules lying in the lines of most frequent passage, and so converts these lines into tracts offering less and less resistance to the waves of stimulation, as distinguished from the waves of contraction. By constant use, therefore, these tracts begin to perform the essentially nervous function of conveying impressions or stimuli to a distance, irrespective of the passage of a contractile wave. When such a tract is fully established it is distinguishable as a nerve-fibre by the microscope, being previously termed a "line of discharge." The rest of the lecture was devoted to a detailed account of the results of a vast number of experiments recently made by Mr. Romanes upon *Medusa* or jelly-fish, which he has discovered to be the lowest animals known to possess a nervous system. All the facts brought forward tended to support Mr. Spencer's theory of nerve-evolution, which, it was said, possesses an indefinitely great bearing, not only on biology, but also on psychology; and in it we have a physical explanation of the saying that "practice makes perfect." In the cells and fibres of our own brain we have the physical aspect of all those relations which, on their psychical aspect, we know as thoughts and feelings; so that, as the theory explains the formation of nerve-fibres in the contractile tissue of *Medusa*, it no less certainly explains the formation of intellectual habits in man. "And here," said the speaker, "we perceive the uniformity of Nature; since there can be little doubt that in the stimulus nerves of the *Medusa*—now passing freely, now stopped by an excess of resistance, and now again forcing a passage—we observe, on the lowest plane of nerve-genesis, that very same play and counter-play of forces which, on the very highest plane of nerve-genesis, invariably accompanies, if it does not cause, every thought and feeling of which we ourselves are conscious."

VICTOR HUGO.

Mr. Walter Herries Pollock gave his third and concluding lecture on Modern French Poetry on Saturday last, May 26. In his introductory remarks he expressed his opinion that in the power of creation Victor Hugo came next to Shakespeare, and that no poet of modern times has been gifted with so vast a power of imagination, of grasp of character, of dramatic force, and of command over verse. Playfulness, irony, and satire of that kind called the "esprit Gaulois," he dealt with at will; but he possesses none of the comic force which produced such a character as Falstaff or such a play as "Twelfth Night." Among other defects, there is in him a want of the logical faculty, which betrays him often into inconsistencies, with an appearance of affectation. But in noticing his faults we must recollect the enormous quantity and great variety of his work. Mr. Pollock then described the low state of literature and art in the time of Louis XVIII., giving interesting details of Hugo's preparation of his "Cromwell," and of his interview with Talma, who, wearied with the lifeless dramas of the classical school, warmly urged the young poet to proceed with his work, hoped to act in it, but died in 1826, before its publication. The play was severely condemned by the classical critics as an audacious innovation: and they termed the introduction of "such stuff" as Shakespeare's plays upon the French stage shortly after as hurtful to public morals. Hugo's "Marion de Lorme" was forbidden by the censorship; and "Hernani," after many difficulties in the rehearsal, was at first successful on Feb. 25, 1830, but afterwards failed, through virulent opposition. Its revival eight years after was greatly applauded; the audience had changed. An amusing account was then given of the production of "Notre Dame de Paris," long after the time it had been promised, with a characteristic letter from Béranger, begging a copy. Mr. Pollock next described one of Hugo's greatest plays, "Le Roi s'amuse," and read an English version of a powerful scene, by Mr. J. Willis Clark. Other plays by Hugo were noticed, in which he struggled for the cause of the romantic school, and finally conquered. Some biographical details were then given. The poet was born Feb. 26, 1802, at Besançon, where his father commanded a demi-brigade; and some of the military experience of the family is put into fiery verse in "La Légende des Siècles." His warlike instincts and poetic genius appeared in childhood; and at the age of fourteen he composed a tragedy, called "Iñez de Castro," and forwarded verses to the Academy. His "Bug Jargal" is an astonishing performance for a boy of sixteen; and "Hans of Iceland" was produced when he was eighteen. He acknowledged his obligations to Walter Scott, whose writings certainly had great influence in originating the French romantic school of poetry. After relating several incidents of Hugo's life, Mr. Pollock concluded by reading several extracts, including one from the recently published "L'Art d'être Grandpère," which, he said, gives a fresh proof that he has lost nothing of that vigour

of imagination and expression from which we may hope yet more additions to the immense quantities of beautiful things which he has in the course of a long life given to the world.

Mr. Edward Dannreuther on Thursday next, the 7th inst., will lecture on Liszt, with many illustrations on the pianoforte, in which he will have the assistance of Mr. Walter Bruce. On Friday next, the last of the evening meetings, Professor Tyndall will give a discourse on Putrefactive and Infective Organisms from a Physical Point of View.

NEW BOOKS.

Illustrations have quite as much right and almost as much capacity as written narratives to be thrilling, although the epithet is more seldom applied to the former than the latter; but a single glance at the illustrations to be found in *The Cradle of the Blue Nile*, by E. A. de Cosson, F.R.G.S. (John Murray), will suffice to prove that the epithet, in their case, is perfectly justifiable. And, for the sake of justification, attention may be especially directed to the engravings facing the thirty-seventh, seventy-eighth, and two hundred and eighty-third pages of the first volume, and the eighty-eighth and one hundred and sixty-second page of the second. For two volumes contain the author's extremely interesting and well-written record of "a visit to the Court of King John of Ethiopia." And here it may be remarked, by way of preliminary explanation, that the author, though perfectly aware, of course, of all that geographical hypercriticism might urge against him, finds it most convenient to "use the names Ethiopia and Abyssinia as synonymous." The visit described, together with its concomitant incidents, by the author was paid in the year 1873; and the only objection a reader is likely to make to the account will most probably take the form of good-humoured reproach against the author for delaying so long the publication of so charming a narrative. In interest it may compare with the travels of Mungo Park and Bruce; in point of literary graces it beats them out of the field. At least that is the verdict which memory does not traverse, whilst the mind is under the influence of the more recent, very pleasant impression. A map there is, appended to the second volume; and on that map, by means of a thin red line, it is easy to follow the course which was taken, through Abyssinia and the Soudan, as soon as Massowah has been reached from Cairo. Great, indeed, is the debt of gratitude which readers owe to the sportsman, who will travel over sea and land in search of something to kill, if only he will make notes of what he sees, and hears, and does, and suffers, and will print them in a book. To a love of sport may be traced the primal cause of these two delightful volumes; for it was "with the intention of making a shooting expedition along the banks of the Atbara, a river which rises in the highlands of Abyssinia, and, flowing through the plains of the Soudan, or country of the blacks, eventually joins the Nile near Berber, in Upper Nubia," that the author and his brother started on their adventurous expedition from Grand Cairo. Hence it is that we have the pleasure of reading as picturesque a description of people, places, and things as ever was put with pen upon paper; and hence it is that there is brought within the cognisance of persons whom they greatly concern a collection of facts, important and authentic, touching such a state of affairs in Egypt and Abyssinia as Englishmen cannot regard with indifference. In the appendix will be found some statements relating to Egypt and the slave trade; and those statements deserve the earnest attention of all who have any part in the direction of our dealings with our excellent ally the Khedive. The picture which the author draws of King John of Abyssinia, previously known as Prince Kassa of Tigre, certainly does not bear out the description given of the Prince by Markham, who is understood to have dubbed him "a poor weak creature." As regards the King's personal appearance, the author says that he has rarely "seen a more intelligent countenance, or one that a physiognomist like Lavater would have examined with greater interest. The brow was beautifully moulded; though small and slightly retreating; the nose aquiline, with very delicately formed nostrils; the eyes deep set and not very large, but singularly courageous and penetrating; the cheek-bones high for an Ethiopian; the mouth and chin sharply chiselled; and the ears almost as tiny and shell-like as a woman's. His Majesty's age was about thirty-five, and his stature somewhat under the middle height, but his figure was perfectly proportioned, and he seemed possessed of great strength and endurance, though his hands and feet were exceedingly small and delicately shaped." As for the King's mental qualities, he is considered to have exhibited those of "an astute diplomatist" by the "masterly manner in which he has placed himself at the head of the large and turbulent empire, which, at the death of Theodoros, was left to be disputed for by several great and warlike chiefs, some of whom were not less powerful than Kassa himself, and yet Prince Kassa obtained his present supremacy with comparatively little bloodshed." Nor is he deficient in physical courage: "he is a hardy and fearless soldier, prompt in action, and ever to the fore-front in battle. Indeed, his personal attendants said that they very often had hard work to keep up with their Royal master when once he was on his war horse, so recklessly and furiously would he ride through the ranks of the foe." As a soldier and as a statesman he is represented to be equally admirable; he is, moreover, "of a studious disposition, and well read in the laws and history of Ethiopia. Nor is his outward sobriety and piety of life less remarkable." Surely this is a character of which any monarch in the world might be proud; but the author takes a little of the gilt off by ingeniously confessing that he has not been "judging the King by a European standard," so that a grain or two of salt must, apparently, be mixed with the dish of transcendent qualities, physical, moral, and mental. The author took the opportunity of questioning the King's head interpreter, one Murcher, about the truth of "Bruce's story, that the Abyssinians feasted off live cow," and was assured that "the oldest men in the country had no recollection of such a custom ever having prevailed," though the author himself had ocular evidence of the fondness displayed by the Abyssinians for raw meat, liking "the flesh fresh and smoking from the carcass," a liking which certainly tells rather for than against the probability of what Bruce asserted. But this is not an attractive subject to dwell upon; nor will time and space allow of any longer lingering over pages in which information and amusement are combined with a liberal hand and in the most agreeable style, and in which grim realities are relieved by mere hearsay or an occasional piece of pure romance, such as the pretty little tale of "Leila and the Woodpecker."

The late Sir Arthur Helps must be held responsible for the form adopted in *The New Republic* (Chatto and Windus), two volumes in which an anonymous author puts forward certain views by means of an imaginary conversation between a circle of friends who discuss points of "culture, faith, and philosophy in an English country house." There is one original idea, at any rate, in the introductory portion of the two volumes, where a gentleman who is about to give a dinner party is discovered, as the language of the stage has it, puzzling his brains over the

composition of a bill of fare, or, as people prefer to call it, *menu*, upon which are to be inscribed not only the names of the various edibles, but also the topics of conversation which are to be handled during each successive course. Ingenious as the notion is, an objection offers itself at the very outset; for it must be acknowledged that the time usually occupied in disposing of one's soup would be rather short, even in these days of electric rapidity, for disposing, in addition to the soup, of such questions as the existence or non-existence of a Supreme Being. And that is a subject upon which the friends assembled at the English country house have a very general tendency to bandy words, whether they have the authority of a bill of fare for doing so or not. The circle of friends is supposed to consist chiefly of the owner of the country house, a rich young epicure, who has a vague feeling of dissatisfaction with things in general; of a young gentleman who is, or is called, a cynic; of a Broad-Church divine, who has no objection to go to a dinner given in honour of the winner of the Derby; of two members of the Royal Society, one of whom "is great on the physical basis of life and the imaginative basis of God," and the other of whom is great in explaining a microscope to a dark-haired girl in a recess by a window; of a "supercilious-looking man," described as "the great critic and apostle of culture;" of another critic, "the pre-Raphaelite," of whom it is predicated that "he always speaks in an undertone, and his two topics are self-indulgence and art;" of a live lord, of whom it is remarked (and the phenomenon is, no doubt, remarkable) that "he has come early into an immense property, and he yet is conscious that he has duties in life;" and of a "red-headed youth," ticketed "from Oxford," who is "supposed to be very clever and advanced," and whose atheism and blasphemy are rendered extremely amusing, instead of intolerably offensive, by the author's somewhat humorous manner of treating him. There is, however, among the company a considerable leaven of ladies, of whom the most striking in appearance is "a sort of fashionable London Sappho," a writer of poems, "a lovely creature, with a dress like a red azalea," with "speaking eyes," and with "deep dead black" hair, having "white starry blossoms in it." But the "great gun" is evidently, so far as the author's intention goes, one Herbert, who is represented as lecturing at the Royal Institution, as speaking under inspiration, and as possessing a voice which seems to come "from a disconsolate spirit, hovering over the waters of Babylon, and remembering Sion." This goodly company talk probably as much sense and as little nonsense as was to be expected under the circumstances, which, it must be admitted, is not saying much for them; and they talk with a freedom, both of thought and expression, at which some weak brethren and sisters may be more than a little scandalised. Nor do they seem to throw out any very practical hints, or to make it at all clear what their "New Republic" is to be, or should be, like; one of their number is understood to condemn it as being "the Brocken-phantom of the present, projected on the mists of the impracticable." Whatever that may mean and however that may be, it is likely that the ordinary reader will prefer the scraps of poetry, some of them charming, scattered about the volumes to even the most eloquent prose of the plaintive Herbert. And of that poetry, though part is Wordsworth and part is Tennyson, yet a great part, there is reason to believe, is original.

Travellers in the secluded Himalayan countries, the provinces of Cashmere, Ladak, and Thibet, inclosed by lofty mountains, beyond the northern frontier of the Empress Victoria's Indian dominion, have something fresh to tell us, if they know how to tell it. Mr. Cowley Lambert is a gentleman who went to India, about three years ago, for a holiday sporting trip, accompanied by three of his friends, Messrs. Barclay, Crosswell, and Lydekker. Having arrived at Bombay, they lost no time, but at once took Lahore for their starting-point, and there procured camp equipage and servants, to supply the needful accommodation during a six or seven months' campaign. Srinagar, the capital of Cashmere, which has often been described and illustrated in our own pages, is made the subject of an interesting chapter in Mr. Cowley Lambert's book. This book, as we should have mentioned before, is a small volume, entitled *A Trip to Cashmere and Ladak*, which is published by Messrs. H. S. King and Co. It is written in an agreeable, lively, unaffected style, and is furnished with several engravings, from the photographs taken by Mr. Hugh Barclay. The party divided into two separate pairs, for more extensive and complete sporting operations. Mr. Cowley Lambert and Mr. Lydekker were in the Tilail Valley, shooting bears, ibex, barasing (the stag of Cashmere), and musk-deer, throughout the months of May and June. They enjoyed themselves highly, and we dare say all those animals were equally gratified by their presence in the neighbourhood. But even the reader who is no sportsman may feel a hearty sympathy with Mr. Lambert's account of their free and healthy life, while rambling amidst the grand scenery that surrounds the elevated sources of the Kishen Gunga, quaffing the pure waters and breathing the pure air of that region. They met, in the Tilail Valley, an English lady and her husband, Colonel and Mrs. Molyneux, from Muttra, in the Mofussil plains, whose society was a great addition to their pleasure; they also fell in with Major Blake, a fellow-sportsman, and with Colonel Gordon and Captain Biddulph, travellers returning from Central Asia. Having got to Lé, or Leh, an important Thibetan town on the Upper Indus, where they were kindly welcomed by the British Resident, Captain Molloy, the author and his companions found a great deal that was novel, strange, and curious, of which he gives us a sufficient description. The Lamas, or monkish priests of the Buddhist religion, which absorbs more than half the manhood, industry, and wealth of Thibet, are particularly noticed, with their grotesque masquerade dances, their "praying-wheels," or rotatory cylinders, containing parchment inscribed with sacred phrases, their vast temples and costly idols of gorgeous barbaric art, and the unmitigated dirtiness of their reverend persons. But we have read in other books of travel much of these and other Thibetan peculiarities, as well as of the city of Srinagar and the rest of Cashmere, to which Mr. Lambert brings us back again in a later chapter. His narrative ends with a visit to Jeypore, south of Agra, a place now familiar to those who followed the recent Indian tour of the Prince of Wales.

Characteristic humour, ingenuity, dash, and descriptive power, whether daring youths with their manly attractions or gentle maidens with their softer graces form the more prominent figures in the most striking scenes, will carry the reader pleasantly and easily through the pages of *What He Cost Her*, by James Payn (Chatto and Windus), even though memory may not permit the three volumes to be classed amongst the very best novels which have been produced from time to time by the prolific author of "Lost Sir Masingberd." The marvel is that, under the circumstances, he should invariably exhibit so much of spirit, vigour, freshness, inventiveness. The novel commences with a very brightly and there is good reason to believe, faithful description of life, as it once was, if it be not still, at the Royal Military Academy, Woolwich; and from the number of "gentlemen cadets" there are singled out two,

who, we at once perceive, are to play conspicuous parts in the coming drama, and who, very early in the narrative, achieve such heroic feats on behalf of two lovely damsels in distress that interest is at once excited and hopes are raised of a most romantic issue. Nor are those hopes altogether disappointed, though they may not be realised in the manner most satisfactory to the sympathetic soul. About half way through the story the black shadow of bigamy falls upon the pages, and apprehensions of a tragic conclusion are aroused. Whether these apprehensions are justified, whether the foreshadowed bigamy becomes an accomplished fact, and whether a fearful retaliation follows—all this it would be unjust to the author to carelessly unfold. It may be mentioned, however, that with that question, or those questions, is closely connected the meaning of the title, which might, otherwise, lead sordid minds to suspect some kind of pecuniary difficulties, and, judging from personal experience, to doubt whether the author had not made a mistake in the demonstrative pronouns, seeing that "what she costs him" is generally considered to be the cause of contention among married couples, the topic of conversation among their friends, and the stumbling-block among bachelors who have half a mind to wipe away their reproach among women. A heavy sacrifice, indeed, is made; but it is of a social and a moral sort, and it is so heavy that it will probably appear to many a reader utterly impossible for any woman, even "one in a million," to make. It is sufficient, of course, for the author to reply that he ought to know best, inasmuch as he created his own heroine and ordered all her ways, and that she did make it. Controversy may, perhaps, arise touching the grounds on which the author represents a marriage to be, or to have been at the date of his story, invalid. According to him, a fair spinster has been for years living with her uncle, who knows all about it, and signs the register of her marriage, under her mother's and not her father's name; and she, under that name, marries a gay young bachelor, who may or may not be privy to her little weakness; but, if he is, the marriage is *ipso facto* void, and he may forthwith proceed to marry somebody else without any fear of bigamy before his eyes. This appears very extraordinary. One could understand that a marriage between two persons sharing the secret of an alias between them might be voidable; but that is a very different thing from being void; and one would imagine that whoever should proceed to a second marriage, without having taken the proper steps to have the voidable marriage set aside, would stand in very uncomfortable shoes. However, there is good reason to believe that the author, such is his credit for founding his most debatable incidents upon fact, may have pressed into his service a case actually decided; and, if so, one is reduced to an expression of astonishment that such things should be, that the mere assumption of an alias, without any sinister object and in a fit of anger, as a few questions would elicit, should invalidate so solemn an engagement as marriage, entered into without the slightest disguise, in the regular way, with more than ordinary affection on both sides, and before the usual witnesses. The uncle, to whom allusion has been made, a military personage, is handled so as to yield great sport; and the same may be said of another military, or semi-military, character in the commissariat department, though, as regards the latter, the drollery is tempered by a double portion of that pathos which is one of the author's chiefest charms.

Blessed is the man who is a Conservative and a Protestant, for of such is the kingdom of Heaven, if, at any rate, the legitimate conclusion be drawn for what is insinuated rather than plainly stated in *Recollections of the Irish Church*, by Richard Sinclair Brooke, D.D. (Macmillan and Co.), a volume which it is impossible to peruse without a feeling of sympathy with the author and of astonishment, from his point of view, that sons of Belial should have dared to lay sacrilegious hands upon an establishment upheld and adorned by such excellent Christians, whether ministers or congregations, as those of whom he had experience during his connection with it. To him it may well appear monstrous that Lord Russell should have denounced the Established Church of Ireland as a scarecrow, and Lord Macaulay as an absurdity, and that "her existence as a State institution" should have been terminated by the agency of Mr. Gladstone; but it is only a proof that we do not see ourselves as others see us, and that the personal virtues of ourselves and our friends may not appear to all the world sufficient reason for perpetuating that which, dear as it may be to ourselves and our friends, has come to be very widely regarded as an abuse. Still, it was but natural that the author in his old age should have his heart wrung by the treatment accorded to that Church which was the love and pride of his youth and of his prime, and should be moved to put on record his best recollections of her and of her faithful servants. This record he has composed, as he himself is confessedly conscious, after an "unsystematised and inconsequential" manner, and with something of that unbridled garrulity for which the ancient days have been celebrated ever since the time of Homer. He is, nevertheless, wonderfully bright sometimes as well as chatty; and his gossip is seasoned with quotations and jokes which will be found extremely acceptable to readers who have a hankering after the dead languages, especially Greek. In anecdote he, of course, abounds; and he deals in many kinds: the amusing, the impressive, the illustrative, the admonitory, the pathetic. There will probably be a difference of opinion about the category to which some of them should be referred. There is a story, for instance, about two gentlemen who were engaged in an argument touching ecclesiastical matters, one of whom became heated, whereupon the other proposed that they should "go upon their knees and pray." The proposition was accepted; but the excited disputant, when he rose from his knees after the other's prayer, "was all bathed in tears," and declined to resume the discussion. It does not appear which of the twain was getting the better of the argument; but it is fair to presume, from experience, that the heated disputant was being worsted. There is another story about the way in which one "Oliver, an Englishman, tall and bony," behaved under an attack of cholera. He would neither see the doctors nor take any physic, though he was, in his own words, "as blue as a washerwoman's bag;" but there stood continually by his bedside "a tall pitcher of cold water from a famous spring near his cottage," and from that pitcher he drank copious draughts. "This," we are told, "was his medicine; and his cure is a fact for the teetotallers;" but any teetotaler who might be disposed to follow his example would do well to take care that the water came from that particular spring. Water in general, and especially the water of the London pumps, has a character for producing rather than repelling cholera.

A good-service pension of £150 a year, vacant by the promotion of Colonel Penrose, has been conferred upon Colonel Commandant J. H. Stewart, Royal Marines.

Miss King, formerly a schoolmistress, who completed her 101st year on the 10th ult., died at Tunbridge Wells on Monday.

THE COURT.

The Queen gave a ball at Balmoral Castle on Wednesday week to the servants, tenantry, and gillies of the Royal Highland estates, in celebration of her birthday. Her Majesty and Princess Beatrice and Prince Albert Victor and George of Wales were present; also the Rev. Archibald and Mrs. Campbell, of Crathie. The next day the Queen and Princess Beatrice drove to Castleton and round by the Lion's Face.

Princess Albert Victor and George of Wales left Balmoral yesterday week on their return to Marlborough House.

On Saturday last the Queen and Princess Beatrice drove to the Glassalt Shiel. The Right Hon. Sir Michael Hicks-Beach dined with her Majesty.

The Queen and the Princess attended Divine service on Sunday at Crathie church. The Rev. Archibald Campbell officiated.

Her Majesty and Princess Beatrice visited the parish school of Crathie on Monday. Sir Michael Hicks-Beach left the castle.

The Queen and Princess Beatrice have made various excursions during the week.

The state concert announced for Wednesday evening at Buckingham Palace did not take place, in consequence of the death of the Queen of the Netherlands.

The following were the orders for the Court going into mourning for the late Queen on Thursday last—viz., the ladies to wear black dresses, white gloves, black or white shoes, feathers, and fans, pearls, diamonds, or plain gold or silver ornaments. The gentlemen to wear black Court dress, with black swords and buckles. The Court to change the mourning on Thursday, the 21st inst., and on Thursday, the 28th inst., to go out of mourning.

The Prince of Wales held a Levée on behalf of the Queen on Thursday at St. James's Palace.

THE QUEEN'S BIRTHDAY.

Her Majesty's birthday was officially celebrated on Saturday last in the usual loyal manner in the metropolis and at the naval and military stations. The church bells were rung and salutes fired; the annual guard-mounting parade took place at the Horse Guards, at which the Prince of Wales and other members of the Royal family were present. In the evening the illuminations were very general. At the Ministerial banquets the Duke of Cambridge and Prince Edward of Saxe-Weimar dined with the Secretary of State for War, Prince Christian with the Secretary of State for the Home Department, and the Duke of Teck with the Master of the Horse. Banquets were also given by the Premier, the Secretaries of State for Foreign Affairs, for the Colonies, and for India; the Chancellor of the Exchequer, the First Lord of the Admiralty, the Lord Chamberlain, the Treasurer and the Comptroller of her Majesty's Household, the Vice-Chamberlain, the Attorney-General, the Archbishop of York, the Duchess of Wellington, the Corps of Gentlemen at Arms, and by the Royal Naval Club of 1765. Receptions were given at the Foreign Office, Lady Constance Stanley presiding in the absence of the Countess of Derby, and by the Marchioness of Hertford.

A number of promotions in the Army and of appointments to the Order of the Bath and the Star of India, consequent upon the celebration of her Majesty's birthday, are announced.

THE PRINCE AND PRINCESS OF WALES.

The Prince of Wales presided at the annual dinner of the 10th Royal Hussars, held at the Pall Mall, Regent-street, on Thursday week. His Royal Highness dined with Sir George and Lady Wombwell, at their residence in Portman-square, the next day. The Prince was present on Saturday last at the annual guard mounting parade at the Horse Guards, in honour of her Majesty's birthday; his Royal Highness's children witnessed the ceremony from the Horse Guards. The Duke of Cambridge and the Duchess of Teck dined with the Prince at Marlborough House. In the evening his Royal Highness left town for Paris, to meet the Princess of Wales on her return from Athens. Her Royal Highness arrived at the Hôtel Bristol the same evening in good health. On Monday the Prince, as President of the British Commission for the Paris Exhibition, received, at the Hôtel Bristol, Commissioner-General Krantz, and M. Berger, Director of Foreign Sections, with reference to details connected with various parts of the British section of the Exhibition. The Prince and Princess left Paris at 12.15 a.m. on Thursday, and travelled via Boulogne and Folkestone, to Charing-cross, whence they drove to Marlborough House.

An official notification has been made at the Admiralty that Prince Albert Victor and Prince George Frederick of Wales have received appointments as supernumerary naval cadets to H.M.S. Britannia.

Prince Leopold, the Provincial Grand Master, presided yesterday week at the annual meeting of the Provincial Grand Lodge of Oxfordshire Freemasons, which was held in the hall of the Apollo University Lodge. On Saturday last the Prince opened at Oxford a new children's ward at the Radcliffe Infirmary, which has been erected by the munificence of Mrs. Coombe, widow of Mr. Thomas Coombe, of the University Press. The proceedings took place at the University Museum. The new wards were named the "Victoria" and "Alexandra" wards, after the Queen and the Princess of Wales. His Royal Highness afterwards performed the ceremony of presenting to the Rev. J. Slater, the treasurer of the institution, a purse of one hundred guineas and a silver salver, in recognition of his long and gratuitous services. The Prince dined with the Vice-Chancellor in New College Hall.

The Grand Duke of Mecklenburg-Strelitz arrived at St. James's Palace on Wednesday from the Continent.

The United States Minister and Mrs. Pierpont welcomed a number of distinguished visitors and leading American citizens at their residence in Cavendish-square on Tuesday evening, expressly invited to meet General Ulysses S. Grant (late President of the United States) and Mrs. Grant.

The Lord-Lieutenant of Ireland and the Duchess of Marlborough, the Marchioness of Blandford, and Lady Rosemond Spencer Churchill have arrived at the Pulteney Hotel from Dublin.

The Duke of Abercorn and Lady Georgiana Hamilton have left town for Biarritz, to join the Duchess.

The Duke and Duchess of Leinster and the Ladies Fitzgerald have arrived at the family residence on Carlton House-terrace from Carton, Maynooth.

The Duke and Duchess of Roxburghe have arrived at the Pulteney Hotel from Floors Castle.

The Duchess of Bedford and the Ladies Russell have arrived in town from Endsleigh, Tavistock.

FASHIONABLE MARRIAGES.

The marriage of Colonel the Hon. Lewis Payn Dawney (Coldstream Guards), second son of the late and brother of the present Viscount Downe, with Miss Victoria Alexandrina Elizabeth Grey, third daughter of the late General the Hon. Charles Grey, was solemnised on Wednesday at St. James's Church, Piccadilly. The wedding presents, numbering upwards of 300, included:—From her Majesty, an Indian shawl,

and a locket, set with brilliants, having in the centre a medallion of the Queen in dull gold; from Princess Louise of Lorne, a pair of Sevres vases; from the Duke of Connaught and Prince Leopold, a case of gilt plate, comprising tea-pot, cream-jug, and sugar-basin.

The marriage of Sir Henry Hawley, Bart., of Leybourne Grange, Kent, with Maria Selina, eldest daughter of Edward J. Morant Gale, Esq., was celebrated on Tuesday, at St. Nicholas Church, Brighton.

The marriage of Lord Kilmaine with Alice Emily, daughter of Colonel C. F. Shute, of Dorking, and niece of Major-General Shute, C.B., M.P., was celebrated on Wednesday at the parish church of Brighton.

FINE ARTS.

MISS ELIZABETH THOMPSON'S "INKERMAN."

When Nelson, in the outset of his fame, was smarting under what he deemed to be undeserved neglect in the Admiralty despatches of the time, he consoled himself by remarking that he would one day have a Gazette of his own. Substituting Exhibition for Gazette, Miss Elizabeth Thompson is actually in the enjoyment of that which the Hero of the Nile and Trafalgar only possessed in anticipation. She has a gallery "all to herself" at the rooms of the Fine Art Society in New Bond-street; and the innumerable admirers of her three noble pictures—the "Roll Call," "Quatre Bras," and "Balaclava"—have been recently overjoyed by the accession of a fourth work to the productions of the gifted artist's pencil. Every day fresh crowds, in which the military element is very pronounced indeed, gather round the picture of "Inkerman," which may be accepted as completing Miss Thompson's survey of the Crimean War. It would be well if she likewise extended to the dimensions of a trilogy those episodes of the Waterloo Campaign which she commenced so splendidly in the portrayal of the gallant Twenty-Eighth Regiment, "Hougoumont" and "La Belle Alliance," might form magnificent pendants to "Quatre Bras." In the picture now claiming our attention the spectator is supposed to be standing, on Nov. 5, 1854, on the inner slope of the hill called the Home Ridge, over which come slowly toiling scattered groups of soldiers returning from the Field of Battle at Inkerman. Fighting has ceased all along the line, from the Sand Bag Battery to the Wall Way of the Carenage; and the wounded British are being carried or are slowly creeping towards the camp of the Second Division. We gaze upon a long struggling column of "fours," principally composed of privates of the Coldstream Guards and the Twentieth Regiment; while in the centre of the group are three Russian prisoners—one of them, apparently, a sailor from the Naval Brigade organised by the besieged in Sebastopol, who has an unmistakably Calmuck physiognomy. On the right two drummers and two privates carry a wounded British officer; and slightly in advance of this group rides a very youthful Staff officer, whose figure forms the nucleus round which the whole interest of the drama is concentrated. By his side a bugler is toiling wearily along, catching for support, in sheer faintness, with his unwounded hand at the stirrup leather of the mounted officer. On the brow of the hill are seen stretchers bearing more wounded; and in the rear a French ambulance is moving off; the wounded French soldiers raising themselves on their litters to cheer their British comrades as the paths diverge. In the extreme background, looming through the gathering fog, are the Heights of Inkerman, from which, early in the day, the Russian guns played on the artillery of our Second Division as it struggled up the ridge over which the procession of wounded are now passing. All this is pictorially narrated by Miss Thompson with wonderful skill and with infinite pathos. We believe that the lady's resolute standpoint is in "her resolution to paint things as they really are, or were, and not as they might be politically fancied to be;" and, taking "political" in the sense of "conventional," it must at once be granted that Miss Thompson has treated the Battle of Inkerman in a wholly unconventional spirit. Some very close observer must have told her that a victory is, in reality, as sorry a sight as a defeat; and so utterly wretched, dejected, and dispirited do the conquering heroes in this picture of "Inkerman" appear to be, that a spectator unversed in the history of the Crimean War might be excused for imagining for an instant that it was the British and not the Russian army that was so soundly beaten on the Fifth of November, 1854. This beautiful picture may perhaps lose slightly in immediate popularity through the excessive dullness in tone and expression by which it is pervaded. Still, the Truth is above all things precious; and if Miss Thompson has satisfied herself by studious and appreciative hearsay that the victors of Inkerman really looked as miserable as she has made them look in her pathetic composition, she cannot be blamed for sacrificing a little ephemeral prestige for the much more valuable guerdon of permanent acceptance and applause. Artistically considered, "Inkerman" presents many marked differences from the artist's former style of treatment. Miss Thompson's key of colour seems to have become entirely changed, and for the better. The landscape portions of her work have, again, manifestly been studied with a keen remembrance of Mr. Ruskin's bygone panegyric on her capacity as an interpreter of natural effects; while the free grouping and somewhat vaporous handling of her figures present a significant contrast to the solid modelling and almost rigid literalness of the figures and faces in the "Roll Call" and "Quatre Bras." Of characteristic and emotional attitude and expression Miss Thompson approves herself to be in "Inkerman" as unsurpassed a mistress as ever.

MR. T. JONES BARKER'S "BALACLAVA."

According to a recent honourable speaker in the debate on the Women's Suffrage Bill, the existing epoch is one pre-eminently of "force, power, and strength." The fact, if such it be, is scarcely of a comforting nature to the friends of peace; still, in any case, it seems undeniable that wars and rumours of war are audible on every side; that the air is malodorous with the fumes of villainous saltpetre; and that certain moral rockings and heavings awaken unpleasant suspicions that "the old Dragon underground"—the Dragon of War—is "swindling the scaly horrors of his folded tail," and preparing to approve himself as devouring a dragon as ever. Looking at things, then, from the "force, power, and strength" point of view, it is not astonishing to find battle pictures on the largest scale becoming popular; and it is quite in the nature of things (as things are at present) that, while one section of the public patronises Miss Thompson's "Inkerman," another should flock to see Mr. T. Jones Barker's new painting representing the "Taking the Russian Guns at Balaclava," as exhibited at Mr. Borgen's Danish Galleries in New Bond-street. This large and powerfully executed work is conspicuous as presenting a graphic glorification of the military capacity of the late Earl of Cardigan—one of the best-abused noblemen, but likewise one of the most gallant cavalry officers of his generation. The renowned Colonel of the 11th Hussars and commandant of the Six Hundred at Balaclava is represented in the splendid

uniform of his regiment, and, mounted on a fiery charger, galloping down the Valley of Death at a pace which has been estimated at seventeen miles an hour. "Already he had come to within some two or three horses' lengths of the mouth of one of the guns—a gun believed to have been a twelve pounder—but the piece was discharged, and its torrents of flame seemed to gush in the direction of his chestnut's off fore-arm, the horse was so governed by the impetus he had gathered, and by the hand and heel of his rider as to be able to shy only a little at the blaze and the roar of the gun. But Lord Cardigan being presently enwrapped in the new column of smoke now all at once piled up around him, some imagined him slain. He had not been struck. In the next moment, and being still some two horses' length in advance of his squadrons, he attained to the long-sought battery and shot in between its guns."

Thus Mr. Kinglake, in his "History of the Crimean War," and on this very eloquent text Mr. T. Jones Barker has composed a most stirring picture. Lord Cardigan, with uplifted sabre, is, of course, the central personage and the *point de mire* of the entire drama. For the rest, the artist shows us the First Line of the force which charged the Russian guns, composed of the 13th Light Dragoons and the 17th Lancers. In the second line are the 4th Dragoons and the 8th and 11th Hussars; while in the background loom the undulations of the "Fedioukine Hills." Painted in the fine old dashing style of Horace Vernet, lifelike in the attitude both of men and horses, and backed by a very nobly painted landscape, Mr. T. Jones Barker's "Balaclava" may be estimated not only as a masterly example of warlike art, but as a work eminently suitable to interpretation by the burin; and it is intended, we believe, to engrave the picture forthwith.

A notice of Mr. Frank Dillon's Japanese sketches is unavoidably deferred till next week.

A private view of the Byron Memorial Loan Collection, the chief features of which are models for the proposed Byron monument, took place at the Albert Hall on Wednesday. It is now open to the public. The work selected is by a sculptor whose pseudonym is "Richard Belt," and it depicts the poet sitting on a rock, musing on Nature and contemplating her grandeur. There were seventy-one entries in the competition.

The Turner drawings and vignettes of the Novar collection, so called from the name of the late Mr. Munro's seat in Scotland, more than realised the anticipations formed during the exhibition of them; and the sale, last Saturday, proved to be the most spirited and interesting one of the season. A total of £20,753 was realised.

The death of Mr. William Edward Frost, R.A., in his sixty-seventh year, is announced. His portrait was given in this Paper, Jan. 2, 1871, on the occasion of his being made a Royal Academician.

Baroness Burdett-Coutts has sent £500 to the National Society for the Fund in Aid of the Sick and Wounded in the War in the East.

The Channel Squadron has left Plymouth Sound on its annual cruise, which will only extend at present round the British and Irish coasts.

A thunderstorm of exceptional severity passed over the north and east of Scotland early on Tuesday morning, and serious damage by lightning and flood is reported.

Lord Edward Cavendish on Wednesday laid the cornerstone of a new institution in course of erection in Abbey Dale Valley, near Sheffield, by the Sheffield and Rotherham Licensed Victuallers' Association, for the accommodation of their poor and indigent members. The institution will consist of twelve houses and a board-room, at a cost of £12,000.

A public meeting in support of the claim of Wakefield to be the seat of the new bishopric was held at Barnsley on Tuesday. The Vicar of Wakefield contended that that borough was on many grounds the most desirable place for the proposed see, and drew attention to the fact that £23,000 had just been expended in restoring the parish church. A resolution in favour of Wakefield was passed.

The Ely Diocesan Conference held its first sitting on Tuesday, and opened with an address from the Bishop on the value of synodal action in the Church. A paper on the burials question, by Mr. Marten, M.P., was read, and after a considerable discussion, a resolution, moved by Archdeacon Chapman, objecting to any persons other than ministers of the Church of England officiating in churchyards, was carried by a large majority.

Under the title "Dust to Dust; Sanitary Modes of Burial" Mr. Samuel Phillips Day has issued a small work, in which he treats of the burial rites and mourning customs of various nations, discusses the chief objections to cremation, advocates Mr. Haden's wicker-coffin plan of burial, and has a few words to say, in conclusion, for and against certain cemeteries near London. The pamphlet is published by J. Hodges, King William-street, Strand.

The annual meeting of the National Society was held at the Sanctuary, Westminster, on Wednesday, under the presidency of the Archbishop of York. A most encouraging report was presented, and it was stated that at the present moment there are many more children attending the church schools than all the elementary schools of the country together. Both the numbers on the rolls and the voluntary subscriptions in support of the schools have increased since the passing of the Education Act.

The Archbishop of Canterbury yesterday week visited the General Assembly of the Established Church of Scotland, sitting in Edinburgh. He was present about two hours during the discussion on education, and the compensation payable to patrons in consequence of the recent abolition of patronage. On the Archbishop entering the throne gallery and taking his seat on the right of the Lord High Commissioner, the Moderator and members of the assembly rose. On leaving, the Archbishop had a short interview with the Moderator, and expressed the gratification he had felt at being present.

Yesterday week the annual meeting of the British and Foreign Anti-Slavery Society was held at the City Terminus Hotel, under the presidency of Mr. Henry Pease, of Darlington. Mr. Edward Young, R.N., in moving the adoption of the report, said that he was glad to state that the mission had been planted on the shores of Lake Nyassa, and he had had considerable experience of the slave trade. The traffic, he regretted to say, was still carried out in Arab and Portuguese possessions in all its enormities, and as many as 20,000 slaves, as Livingstone stated, yearly reached the coast that came from the Lake Nyassa district. He fully believed that the mission sent out by the Free Church of Scotland to Nyassa had done a great deal to put down slavery. Livingstone had become quite a city of refuge for the slaves, who were coming into the district by thousands, many of them starving and without a vestige of clothing. The report was adopted.

THE WAR.

Since the date of our last week's news from the Danube and from Armenia there has been little to report either of the Russian or of the Turkish military operations. The Emperor Alexander, having left his palace near St. Petersburg on Saturday, arrived on Wednesday at Ploesti, near Bucharest, the headquarters of his brother, the Grand Duke Nicholas, Commander-in-Chief of the army in Roumania. It is believed that he will at first be occupied with diplomatic negotiations, on which the destinies of Roumania and Serbia will, perhaps, depend; and it may be found expedient for Russia to come to an understanding with Austria before crossing the Danube. There is a rumour to the effect that Serbia has concluded with Russia, through the instrumentality of General Fadaeff, a convention by which the Russian army will be permitted to cross the Danube between Turnu-Severin and Gladova, in case they should not succeed in forcing a passage elsewhere.

Journals inspired by the Vienna Government say that the promise made by Russia to England and Austro-Hungary not to interfere with the interests of these two countries localises the war for a time, but that for the future England and Austro-Hungary have preserved full liberty of action.

We learn from Rustchuk that the waters of the Danube have fallen; and a belief has been gaining ground for the last three days that the Russians will very shortly endeavour to cross the river at three different points, making Rustchuk the object of their chief attack. All women have left the town, and the foreign Consuls, with the exception of the English Consul, will leave in a few days. The Russians are much stronger in cavalry than the Turks. There is just now a great movement of Turkish troops from the Turkish camp at Rustchuk to the bank of the Danube. After keeping up a musketry fire for some time with the Cossacks on the other side of the river, part of the Turkish troops withdrew in a southerly direction. The Turkish bombardment of Kalafat was stopped on Tuesday by a hurricane of wind and rain.

The renewal of the Turkish attack on Montenegro has met with something like defeat at more than one point. The principal column, under Suleiman Pasha, advanced from Gatchko, to the north of Montenegro, with a view to relieve Nicsitch, while at the same time a column under Ali Sahib entered the Principality on the southern side at Spush. The latter was repulsed by the Montenegrin chief Petrovitch. The former gained a victory on Monday last, but is said to have fought and lost a battle on Tuesday. It is impossible as yet to verify the conflicting statements. The besieged Turkish fortress of Nicsitch, in Herzegovina, is closely pressed by the Montenegrins, and must surrender unless relieved in a few days.

In Armenia the Russians have made a general advance, and have succeeded in investing Kars and cutting the Turkish telegraphic communication. Several engagements are reported, in which the Russians got the advantage; and one night attack by them upon a bivouac of Circassian cavalry, though hotly fought, was a thorough defeat for the latter, who were almost destroyed to a man. The latest news from Asia Minor is that the Turkish head-quarters are at Koprikoy, where nine battalions and a battery of artillery are stationed. The Turkish right wing, consisting of twenty battalions and two batteries, is at Delibaba, and the left at Gurdji and Bogaze, about six hours' march from Erzeroum. The left wing is composed of sixteen battalions and a battery of artillery. The Russian left wing has suspended its forward march. The bulk of the right wing is at Olti, and its advanced guard has arrived before Nariman. A column detached from the centre of the Russian army before Kars has taken up a position on the Soghauli Dag. A Russian column is also operating in the direction of Van. We still hear of Mukhtar Pasha falling back toward Erzeroum, his present position being at Hassan Kaleb, some twenty-five miles in front of the entrenched camp. Here he is secure against the turning of his flanks either from Olti or by way of Kara Kilissa, but it would still be possible for the Russians to move a force down the valley of the Tchouruk Su from Ardahan or Batoum to attack the left flank of the Turkish army. A report even comes from Erzeroum that Cossacks have already appeared at Ispir, in the Tchouruk Su valley, immediately to the north of the entrenched camp and a little to the rear of the position at Hassan Kaleb. Should this news prove true, and should these irregulars be the advanced guard of a substantial force, Mukhtar Pasha will necessarily have to fall back upon the capital itself for fear of being attacked in front and rear at the same time. We hesitate, however, to accept the news until fully corroborated.

M. de Lesseps having submitted to the Earl of Derby a project for regulating the passage of ships-of-war through the Suez Canal, the Foreign Secretary has addressed a despatch to our Ambassador in Russia. In this Lord Derby states that her Majesty's Government are firmly determined not to allow the Canal to be made the scene of any combat or other warlike operation, and that any such step on the part of either belligerent would be incompatible with the maintenance by Great Britain of an attitude of passive neutrality. A similar warning has been addressed to the Governments of Turkey and of Egypt, as it appears that the Khedive of Egypt had asked for some Turkish ships-of-war to defend the entrances of the Suez Canal, while refusing to allow the passage of Russian ships-of-war. The Suez Canal Company held its annual meeting at Paris on Wednesday, and received from M. de Lesseps an account of his communications with the British Government. This was hailed by the meeting with the greatest satisfaction, as was also the assurance that the English Government would be happy to find itself in accord with the French Cabinet in everything concerning the Canal.

The Russian squadron lately on the coast of North America, consisting of the frigates Svetlana and Petropaulovski, commanded by Admiral Boutakoff, with the Grand Duke Alexis on board, arrived at Brest on Wednesday last.

The Oaklands, 955 tons, Captain W. Lawrance, chartered by Sir Arthur Blyth, K.C.M.G., Agent-General for South Australia, left Plymouth on the 1st inst. for Port Adelaide, with 338 emigrants, among whom were sixty-two single female domestic servants.

A telegram received at the Admiralty states that two of her Majesty's vessels have had an engagement off the coast of Peru with a rebel turret-ship, which had committed piratical acts against British subjects. She escaped after dark, but so damaged as to be obliged to surrender to a Peruvian squadron. There were no casualties on the English side.

Six hundred persons are reported to have lost their lives in the earthquake which destroyed the town of Iquique, and by the tidal wave which swept the Peruvian coast on May 10. Simultaneously with the earthquake at Iquique, Peru, a tidal wave struck the Sandwich Islands. All the houses in Waikiki within one hundred yards of the shore were destroyed. Five persons were drowned, and great damage was done at the harbour of Hilo, where the wharves and stores in the lower part of the town were swept away. An eruption of Kilanea volcano began simultaneously with this oceanic disturbance.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Prince and Princess of Wales were received with enthusiasm during their brief stay in Paris.

The Duc de Broglie received on Monday morning the members of the Paris Tribunal of Commerce. He took occasion to say that the act of May 16 was, as Marshal MacMahon had already declared at Compiègne, solely intended to reassure Conservative interests and to guarantee internal stability. With regard to peace, the Government would spare no effort to secure it.

A circular has been sent to the prefects by M. Fourton, the Minister of the Interior, with respect to the hawking and distribution of newspapers, books, and pamphlets. The Minister, "wishing to defend fundamental social principles against the flood of subversive literature," instructs the prefects to revise all the hawking licenses hitherto granted, and only to issue licenses to fit agents, who offer proper guarantees.

M. Bonnet-Duverdier, the President of the Paris Municipal Council, who recently paid an official visit to London, has been arrested on a charge of using insulting expressions in reference to Marshal MacMahon, and for inciting to civil war.

More press prosecutions are reported.

M. Gambetta has been presented with an address bearing a thousand signatures by the students of Paris thanking him for his efforts on behalf of the Republican cause, liberty of conscience, and free thought. In his reply M. Gambetta spoke eulogistically of M. Thiers as a statesman well fitted to again become a Constitutional President in the event of the resignation of Marshal MacMahon.

The charge of libel and defamation of character brought by the Comte de Lambert against the *Figaro*, the *Evénement*, and the *Marseillais* was decided on Wednesday before the Tenth Chamber of the Police Correctionnelle. M. Gaston Vassay, the editor of the *Evénement*, was condemned to fifteen days' imprisonment. Each of the journals was condemned to a fine of 1000*fr.*, the *Figaro* and *Evénement* to pay 5000*fr.* damages, and the *Marseillais* 3000*fr.*

During the transit of an express-train from Calais to Paris a robbery of scrip, valued at more than £40,000 was effected.

ITALY.

Sunday being the anniversary of the declaration of Italian liberty King Victor Emmanuel held a review of troops at Rome. His Majesty was accompanied by the Crown Prince Humbert, the Minister of War, Herr von Kendorff, the German Ambassador, the foreign military Attachés, and a brilliant staff. There was an enormous crowd of spectators. The King was enthusiastically cheered on his arrival and departure. The camp and the town were profusely decorated with flags.

After the review the King received the Ministers, senators, and deputies, and the members of the municipal and provincial councils. Replying to their addresses, his Majesty thanked them for their testimonies of affection, and said he should always be ready to defend the freedom and greatness of Italy.

A street demonstration in honour of the King was attempted on Sunday night, but the police interposed, and a procession which had set out for the Quirinal was compelled to turn back. In the Chamber of Deputies on Monday Baron Nicotera, the Minister of the Interior, explained that this course had been adopted because there was reason to believe that, although most of the persons in the procession were actuated by loyal motives, others were simply intent upon provoking a breach of the peace.

The Sugar Duties have been adopted in the Senate; and in the Chamber of Deputies the convention concluded by the Government with the Sardinian Railway Company has been agreed to.

The Pope received yesterday week a large number of pilgrims and other persons. Among the gifts presented to his Holiness was a magnificent cross set in diamonds, the offering of the Catholics of Calcutta, who also sent some richly-bound volumes containing the signatures of all the members of the Roman Church in that city. His Holiness expressed himself much gratified at their devotion to the Holy See. In receiving the congratulations of the Sacred College last Saturday the Pope referred in eulogistic terms to the devotion of the Cardinals to the Church in very difficult times. His Holiness afterwards received a number of deputations. Rome was divided into two camps on Sunday. While at the Quirinal King Victor Emmanuel was receiving addresses of congratulation on the thirtieth anniversary of the declaration of Italian independence, at the Vatican the Pope was welcoming the pilgrims who have come to celebrate his episcopal jubilee. He received on Sunday about 5000 pilgrims, mostly Italians. He also gave a special audience to Count Larisch, who was sent by the Emperor of Austria to congratulate his Holiness, and who brought numerous presents from the Imperial family. At the reception given on Wednesday to the Polish pilgrims, Cardinal Ledochowski read an address alluding to the solicitude ever evinced by the Pope in regard to Poland. In reply, the Pope said this pilgrimage was a source of great gratification to him on account of the difficulties which had had to be surmounted to accomplish it—difficulties caused by the persecution to which Catholics are at the present time subjected. The Pope has named Marshal MacMahon to the grand cross of the Order of Pius IX. His Holiness has received 20,000*fr.* sent by the Count and Countess de Chambord. With great ceremonial the Pope's episcopal jubilee has been celebrated in the Catholic churches in other countries.

A band of brigands was surrounded in Sicily a few days ago; and, as they resisted, Leone (the captain) and two of his followers were killed. The affair was alluded to in the Italian Parliament on Saturday in congratulatory terms.

BELGIUM.

The annual fêtes of Liège were celebrated last Sunday, and were attended by the Royal family. At a reception held by the King his Majesty told the delegates of the Corporation that the situation of Europe was grave; but expressed his firm conviction that Belgium would courageously surmount the difficulties of the industrial crisis and other difficulties, should they arise. The utmost enthusiasm prevailed.

HOLLAND.

Queen Sophie, the consort of William III., died on Sunday morning, at The Hague, in her fifty-ninth year. All the members of the Royal family were at the bedside when she breathed her last. Her Majesty's funeral is fixed for June 20.

GERMANY.

The Emperor William and the Crown Prince left Berlin on Tuesday for Liegnitz, in order to be present at the anniversary festival of the King's Own Regiment of Grenadiers. His Majesty's departure for Ems has been fixed for the 14th inst.

GREECE.

A Special Envoy has been sent by the King to pay his respects to the Czar.

The Ministry formed last week has given place to another including all the party leaders, as follows:—Admiral Kanaris, President and Minister of Marine; M. Koumoundouros, Minister of the Interior and of Public Instruction; M. Deligeorgis,

Minister of Foreign Affairs and of War; M. Zaimis, Minister of Justice; and M. Tricoupis, Minister of Finance. All are ex-Ministers, and the first five ex-Premiers. The step, which was demanded by the people and Chamber, shows that the Greeks are in earnest, and desire internal order and energetic military preparation, so that they may act effectually on any emergency. Greece has made a loan of 8,000,000 drachmas from the National Bank for the purchase of arms.

AMERICA.

The Philadelphia correspondent of the *Times* telegraphs the particulars of an extraordinary attempt to wreck and rob a railway train. Last Sunday night, on the St. Louis and San Francisco Railway, 156 miles west of the former place, a band of robbers unjointed the rails, replacing them in such a way that the approaching train would run down the embankment. The night was dark and the rain falling. An express-train approached about 8.30, and the driver, seeing obstructions, applied the brakes, but too late. The engine and baggage-car plunged down the embankment, a distance of forty feet. The driver, stoker, and one passenger were killed. The thieves fired their pistols into the train; and then, seeing that it was not sufficiently wrecked for their purpose, decamped.

On Monday afternoon a tornado partially destroyed Mount Carmel, a flourishing town of 3000 inhabitants on the Wabash river, South-Eastern Illinois. It struck the town on the southern quarter and passed north, destroying almost everything in its path. Three churches, two newspaper offices, two schools, the Court-house, and 120 buildings were demolished. The ruins caught fire, burning almost till midnight before the flames were extinguished. The *Times*' correspondent at Philadelphia states that twenty-two persons were killed or burnt to death, and forty were injured, many fatally.

CANADA.

Mr. Davies has been appointed Provincial Secretary and Minister of Mines in British Columbia.

Lieutenant-Colonel Labranche has received a letter of thanks from the Horse Guards for his offer to raise a regiment for service in the East. Gentlemen from all parts of the province had signified their willingness to join him.

BRAZIL.

The last session of the Brazilian Chambers was closed and the second session opened on the 1st inst. by Commission, in the absence of the Princess Regent, who is indisposed. The Speech from the Throne says that the state of public health is good. The drought in the northern provinces of the empire was, it was pointed out, productive of great misery, but the Government had taken measures to relieve the suffering population. The conclusion of a treaty with the Berne Postal Union and of a Consular convention with Italy is announced.

THE CAPE COLONIES.

We have news from Cape Town by telegram from Madeira May 15. The British troops arrived at Pretoria, the capital of the Transvaal, on the 4th, and were cordially received by the population. A congratulatory address to Sir Theophilus Shepstone has been signed by a large number of the inhabitants. The deputation sent to protest against the annexation of the Transvaal left on May 9 for England. The despatch adds that everything is quiet, and property has risen in value since the Transvaal became British territory.

AUSTRALIA.

The political news from Melbourne brought by the mail chiefly relates to the preparations for the general elections, the results of which have been already telegraphed. The revenue returns for the quarter ending March 31 had been published. The total revenue for the quarter was £1,161,908, as compared with £1,115,535 for the same period in the previous year.

INDIA.

The Calcutta correspondent of the *Times*, in a telegram dated Monday, says that it is stated, apparently on good authority, that the Government is trying to raise a portion of the loan estimated for in the Budget by asking the native chiefs to subscribe, and that it has succeeded in getting the promise of over three-quarters of a million pounds in this way. The Calcutta Mohammedans are taking steps to call a meeting for the purpose of showing their sympathy with Turkey. There seems to be but little excitement among them on the subject; but this, it is said, is not owing to any want of interest, but to the desire to avoid the appearance of disloyalty to the British Government. With regard to the famine, the correspondent says that the latest news from the famine districts is much more cheerful, a general rainfall having greatly improved the prospects. The south-west monsoon burst at Colombo on May 14, and may therefore be expected to reach the Bombay coast early in June. If it come in good time, and bring sufficient rain, there will probably be a large diminution in the numbers on the relief works, and the Government will be able to congratulate itself on having safely passed the crisis of the famine.

CHINA.

The China papers received by the overland mail state that there is still great suffering in the province of Shantung in consequence of the famine. It is asserted that the Woosung Railway is to be extended to Soochow. A proclamation has been posted at Wuhu expressing the strongest satisfaction at the advent of foreigners to the port.

Baboo Romeah Chunder Mitter has been appointed a Judge of the High Court of Judicature at Fort William, in Bengal, in the room of Mr. F. A. B. Glover, deceased.

Peace has been concluded between Egypt and Abyssinia, King John having accepted the conditions proposed by Gordon Pasha (Colonel Gordon).

A score of Greek brigands have made a descent on Turkey and carried off a wealthy inhabitant, for whose ransom they demand a large sum.

Vesuvius has been unusually agitated for some days, showing at night the reverberation of fire at the mouth. A new crater has recently opened, above which a cone was formed.

A telegram from Alexandria states that the exhumation of the obelisk Cleopatra's Needle was completed on Wednesday. Eighteen inches of the apex are gone and the corners are damaged, but otherwise the obelisk is in fair condition.

News has been received in London of the death of Kido, one of the leading members of the Japanese Government. He died suddenly at Kioto on May 27. Kido was a member of the Iwakura Embassy to Europe a few years ago.

After two days' animated discussion, the Jersey States, by twenty-one to sixteen votes, have resolved to suspend all further operations at present with the new harbour works, on which about £170,000 has been expended.

At a meeting of the Central Society for the completion of the Cathedral of Cologne it was stated that during 1876 the sum of 1,190,090 marks was employed in the work. From 1864 to 1876 the total sum spent for the completion of the towers amounted to 7,661,177 marks.

THE CHURCH.

Corrcombe Church, near Beaminster, was reopened on Tuesday week, after undergoing a complete restoration.

The Bishop of Ely has reopened the parish church of Trumpington, near Cambridge, after restoration.

A series of lectures on the Classic Preachers of the Church of England, at St. James's, Piccadilly, was begun on Sunday afternoon by the Rev. Dr. Farrar, Canon of Westminster, who treated of Bishop Wilson, the Sainly Preacher.

The Rev. James Fleming, B.D., Vicar of St. Michael's, Chester-square, and Honorary Chaplain to the Queen, has been offered by the Crown the Residuary Canonry in York Minster, which has been rendered vacant by the elevation of Bishop Thorold to the Episcopal bench.

The foundation-stone of the new Church of All Saints, near Duncannon, in the county of Wexford, in the diocese of Ferns, was laid on Whitsun-Monday, by Lady Emily Chichester. The building, which will accommodate nearly a hundred persons, will cost about £1500.

A reredos, designed by Messrs. Carpenter and Ingelow, has been erected at St. Edmund's, Northampton, by Mrs. Franklin, as a memorial of her husband and her sister. A mosaic pavement, copied from one at Sherborne, has also been laid down by some of the parishioners in memory of Mrs. Hughes, the wife of the Vicar.

Horton church, Bucks, a very old Gothic structure, which is supposed to be the mother church of Eton, was reopened last Saturday, after restoration, by the Bishop of Oxford. In the chancel lie the remains of Sarah, the wife of John Milton, and it was in the parish that the poet wrote his "L'Allegro" and "Il Penseroso."

The Rev. G. W. Gedge, Diocesan Inspector for Surrey, has been appointed Clerical Organising Secretary to St. John's Foundation School for the Sons of the Clergy, Leatherhead. Mr. Gedge will retain his inspectorship of West Surrey and the Channel Islands in the Winchester diocese, but resign that of Mid and East Surrey, now transferred to the Rochester diocese.

A new church is to be erected on the site of St. Mary's, Brighton, which lately fell in during the execution of extensive repairs. It will be in the Early French style, and will cost about £12,000. On Thursday week the foundation-stone was laid by Miss Blanche Elliott, sister of the late Incumbent. The Bishop of Chichester was present and preached a sermon at St. James's before proceeding to the site.

The old historic church of Bangor Monachorum, in the county of Flint, was reopened by the Bishop of St. Asaph on the 18th ult. The edifice has been thoroughly restored under the direction of Mr. Douglas. The cost of the restoration exceeds £3000, towards which the patron, the Duke of Westminster, the Rector, the churchwarden, and the chief landowner (Mr. Peel, of Brynypys) have each given £500. The pulpit and porch are private gifts, "In Memoriam."

On Tuesday, the 5th inst., the Rev. Thomas James, Curate of Orsett, Essex, who is leaving the parish, was presented with a handsome pocket Communion Service and a service of plate, value forty guineas. The presentation was made by Mr. Wingfield Baker and Dr. Corbet in the institute before a large audience. The subscribers numbered about 250, and included nearly every family in the parish, Dissenters as well as Churchmen.

The Dover-street adult male week-night Bible class assembled in St. Andrew's Schools, Leeds, recently, to hear the farewell address of the Rev. A. J. Binnie, who has for some time past been labouring in the parish. After its delivery he was presented by the Mutual Improvement Society and the Bible class with a pocket Communion Service and an inkstand; and Mrs. Binnie received from the teachers and friends a dressing-case and silver card-case, as a token of the affection and esteem in which she is held by them.

The Church of St. Nicholas, Newcastle-on-Tyne, after being closed for some years for restoration, was reopened on Thursday week. It was founded, according to the authority of a volume preserved in the vestry, in the year 1091, by St. Osmund of Salisbury. The total cost of the work amounts to £21,400, of which only £250 has to be raised. At the opening service about 2000 persons were present. The Bishop of Durham preached from Eph. ii. 20. The beauty and grandeur of the church, says the *Durham Advertiser*, was the subject of general remark as the congregation left the church.

The Ven. Archdeacon Iles began his first visitation at Lichfield on Monday. He mentioned that the Bishop of the diocese had taken upon himself the entire responsibility of the new mission to canal-boatmen, and had engaged a chaplain and ordered a church-boat, in which his Lordship himself would make the first missionary journey. He also intimated that the scheme for the division of the archdeaconry of Staffordshire had been approved, and that eight of the twenty rural deaneries would be placed under the care of the Archdeacon of North Staffordshire.

On the 31st ult., St. Nicholas, Deningham, Norfolk, was reopened, after undergoing extensive repairs and restoration. The restoration of this fine church, just completed under the superintendence of Mr. Christian, is mainly due to the liberality of the Rev. Dr. Bellamy, president of St. John's College, Oxford, patron of the living. The whole cost of the work, in nave, aisles, and tower, has been borne by him, the Ecclesiastical Commissioners providing for the chancel. The total expenditure has been between £4000 and £5000. The Prince of Wales made a handsome contribution to the general offertory through Sir William Knollys, who was present at the morning service.

A special service in commemoration of the four-hundredth anniversary of the introduction of printing into England by William Caxton was held last Saturday afternoon in Westminster Abbey. Mendelssohn's "Hymn of Praise" was performed by a numerous choir and band, and at the close of the solo and chorus, "The night is departing, the day is approaching," Dean Stanley preached a brief sermon from the text, "The night is far spent, the day is at hand; let us therefore cast off the works of darkness, and let us put on the armour of light." At the conclusion of the sermon a collection was made for the Caxton Memorial Fund of the Printers' Pension, Almshouse, and Orphan Asylum Corporation.

The thirty-ninth anniversary meeting of the Society for Promoting the Employment of Additional Curates was held yesterday week at the Mansion House, under the presidency of the Lord Mayor. The work of the society was fully explained by several speakers, and among the resolutions adopted was the following:—"That the increased efforts made to extend the ministrations of the Church of England conclusively prove the great need of an increase in the number of bishops to superintend the work, and of clergymen to carry it on; and that the efforts now being made in connection with the Additional Curate Society to provide funds for the endowment of a additional number of English sees and for furthering the education of eligible candidates for holy orders are deserving of liberal support at the hands of members of the Church."

METROPOLITAN NEWS.

Lord Penzance presided over the first meeting of the Stock Exchange Commission, which was held on Tuesday.

Her Majesty's Judges were entertained on Wednesday at the Mansion House by the Lord Mayor and Lady Mayoress.

Mr. Gladstone has consented to preside at the opening ceremony of the Caxton Exhibition at South Kensington.

The inspection season of the volunteers may be said to have begun last Saturday, three of the principal metropolitan rifle regiments being put through that ordeal in Hyde Park, in addition to which two brigade drills were held.

The Royal Horticultural Society's great summer flower show and annual show of the Pelargonium Society will take place on the 19th inst., under the large tent, the band of the Royal Horse Guards attending.

The ninth annual dinner in aid of the funds of the French Hospital and Dispensary is announced to be held at Willis's Rooms to-day (Saturday); his Excellency the Marquis d'Harcourt, the French Ambassador, will be in the chair.

The extension of the District Railway to Richmond by way of Hammersmith has been opened, and trains now run to and from the Mansion House every half hour throughout the day. Passengers are conveyed between Richmond and the district stations on the Hammersmith line without change of carriage.

Professor Goldwin Smith and Mr. J. H. Stoddart, editor of the *Glasgow Herald*, have been elected members of the Reform Club, under the rule which enables the political committee to select once a year from the candidates' book two gentlemen who have rendered services to the Liberal cause.

A "Maritime and Piscatorial Exhibition" was opened at the Royal Aquarium, Westminster, on Monday. The Prince of Wales has sent his collection of Indian stuffed fish, and Mr. Frank Buckland his casts of fish and models and other interesting natural curiosities.

Last Wednesday the Rev. C. H. Spurgeon, of the Tabernacle, laid the foundation-stone of a Baptist chapel in Trinity-road, Upper Tooting, and an embossed silver trowel was presented to him. Mr. Spurgeon has himself contributed £250 to the building fund.

On Wednesday evening the annual dinner of the Royal Agricultural Benevolent Institution was held at Willis's Rooms—the Earl of Dunmore in the chair. The subscriptions amounted were £11,000, including legacies of £1000 each by the late Mr. George Moore and Mr. Thomas Congreve. There are 362 adult pensioners, and fifty children are maintained.

The first meeting of the season of the Four-in-Hand Club took place at the Magazine in Hyde Park on Wednesday afternoon, at five o'clock, when about twenty-one coaches mustered at the usual rendezvous. After a full-dress parade from the Magazine to the Albert Memorial, the procession broke up, a few taking their way to the Orleans Club at Twickenham.

Last Monday evening the annual meeting of the members of the Victoria (Philosophical) Institute was held at the house of the Society of Arts, John-street, Adelphi, when the address was delivered by Mr. J. E. Howard, F.R.S. Captain F. Petrie (the honorary secretary) read the eleventh annual report, which spoke encouragingly of the progress of the institute.

On Monday evening the anniversary dinner of the United Law Clerks' Society was held at the Freemasons' Tavern—Mr. Justice Hawkins in the chair—the subscriptions amounting to £530; and Mr. Baron Pollock presided over the annual dinner of the Solicitors' Benevolent Association, at the Albion Tavern, on Wednesday, when the subscriptions amounted to £530.

Sir William Gull made a post-mortem examination on Wednesday of the body of Sir Henry Pelly, and found that the cause of death was not sunstroke, as stated in our Obituary column, but the rupture of a blood-vessel of the brain. The Queen inquired on Wednesday by telegraph as to the health of Lady Pelly and her two children.

The Chancellor of the Exchequer received on Wednesday a deputation of gentlemen interested in the passing of the Colonial Marriages Bill, and, in reply to their representations, was afraid that he could not hold out any encouraging expectation of his being able to find a day for the discussion of the measure, particularly as it was one which the Government were unable to accept.

By the kindness of the Benchers, the Inner Temple Gardens are open to the public every evening between the hours of six and eight o'clock. The privilege thus granted is taken advantage of principally by the poor children inhabiting the neighbouring courts and alleys, many hundreds of whom enter the gardens every evening. The gardens will continue open until the end of August.

Lord Houghton presided at the annual general meeting of the London Library. The report showed a net increase of ninety-two members, there being a loss by death, withdrawal, and otherwise of 119, as against 211 new members. The financial gain was £851. There remain altogether on the register 1518 members. The balance-sheet shows a gross income of £4758, and a gross expenditure of £3452.

At a general meeting of the Royal Horticultural Society on Wednesday—Lord Aberdare, president, in the chair—the medals which had been awarded at previous exhibitions were presented by his Lordship. After thanking the exhibitors for their generous support to the society, Lord Aberdare stated that he had received intimation that the Prince and Princess of Wales would honour the great summer flower show, on the 19th inst., with their presence.

The weekly return of metropolitan pauperism shows that the total number of paupers at the end of last week (the fourth week of May) was 80,837, of whom 37,208 were in workhouses and 43,629 received outdoor relief. Compared with the corresponding weeks in 1876, 1875, and 1874, these figures show a decrease of 1002, 5713, and 15,234 respectively. The number of vagrants relieved on the last day of the week was 729, of whom 473 were men, 200 women, and 56 children.

The School Board for London reassembled on Wednesday after the Whitsuntide holidays—Sir Charles Reed presiding. The debate on teachers' salaries and school fees was resumed and concluded. Both subjects were referred to the school management committee. The question of lending libraries was also discussed, and the school committee were instructed to establish a library in every permanent board school as far as possible, at a cost to the board of not more than £10.

The seventy-first anniversary festival of the Licensed Victuallers' Schools was held on Wednesday at the Alexandra Palace. The banquet took place in the grand concert hall, where covers were laid for 700. The spacious gallery was occupied by the wives and daughters of the licensed victuallers. Mr. J. Hiscutt Crossman took the chair. He was supported by the leading members of the trade. Speeches were made in support of the charity, and a large addition to the subscription-list was made.

The twenty-second annual dinner in aid of the funds of the funds of the Poplar Hospital for Accidents was held on Monday night at the Cannon-street Hotel, under the presidency of the Lord Mayor. During the past year nearly 4000 cases were treated at the hospital, and many had to be refused admission on account of the limited accommodation. The patients come almost entirely from the docks, warehouses, shipping, engineering works, and building-yards connected with the import and export trade of London.

A friend of the late Charles Kingsley has given £100 towards the endowment of a cot, to be called "The Charles Kingsley Memorial Cot," in the Cheyne Hospital for Incurable Children. The annual cost of each cot being £30, the additional sum required to make the endowment perpetual is £500, which sum it is hoped will be subscribed by others to whom Charles Kingsley's works have given pleasure, and who sympathised in his great love for children. Contributions will be received by the hon. secretary, at 47, Cheyne-walk, Chelsea.

The annual meeting of the friends of the Infant Orphan Asylum was held on Thursday week at the Cannon-street Hotel—Mr. John Deacon, the treasurer, presiding. The report referred to this being the jubilee year. It also stated that nearly 3000 children had been admitted into the institution since its establishment, most of whom had been placed in respectable positions. There are about 600 children in the asylum. The asylum is free from debt, and has a moderate reserved fund. It depends almost entirely upon voluntary contributions for its support, and more subscribers are needed.

A wardmote was held at Guildhall last Saturday for the election of an Alderman for the ward of Cheap, to fill the vacancy occasioned by the death of the late Mr. Allen. Sir John Bennett and Mr. Waddell were nominated, and, the show of hands having been declared in favour of the former, a poll was demanded on behalf of Mr. Waddell, to take place on Monday. After a close and exciting contest, the Lord Mayor announced that 234 votes had been recorded for Sir John Bennett, and 233 for Mr. Waddell, thus giving the former a majority of 1. Mr. Waddell has demanded a scrutiny, which will begin on the 22nd inst.

An inquiry was held on Wednesday by Mr. Payne, at St. Bartholomew's Hospital, respecting the death of Patrick Toohig, a wealthy costermonger. John Tatherage and Arthur Willis Payne, two omnibus drivers, were charged at the Guildhall Police Court with causing the death of the man, and were remanded on bail. The accused, after having been cautioned, said it was not true that the omnibuses were racing, and after other evidence had been heard the jury returned a verdict of manslaughter against the drivers. There was found £250 sewed in the deceased's coat, and it was further stated that he was worth £800. By his will he leaves £100 to each of his two sons, and the remainder to his daughter.

Cardinal Manning, presiding yesterday week at a meeting of Roman Catholics, held in celebration of the Pope's Jubilee, pointed to the great change which had passed over the world during the pontificate of Pius IX. When the present Pope began to reign all the nations of Europe were in unity with him, and all Governments looked upon him as the lawful Sovereign of Rome. But although they now regarded him as a deposed monarch, there never was a time, in the opinion of his Eminence, when the Church of Rome was more united than it was at present.—In all the Roman Catholic churches and chapels in the two dioceses of Westminster and Southwark solemn services were held on Sunday in celebration of the fiftieth anniversary of the Pope's episcopate.

The fourteenth annual horse show was opened at the Agricultural Hall last Saturday, and is considered to be an unprecedentedly good one. The hunters are remarkably fine animals, and the number of entries—130 altogether—is unusually large. In the first class, for weight-carrying horses, there were thirty-five competitors, and it was a matter of some difficulty for the judges to decide which were best entitled to the prizes where all displayed excellences of the highest order. The champion cup was, however, awarded to Mr. Foord Newton for his four-year-old Sir George, which took the prize at Manchester. For the second class of hunters, without conditions as to weight, there were forty entries. The judges were the Marquis of Waterford, the Earl of Shannon, and Lord Valentia.

Another attempt at highway robbery on Blackheath, smacking of the days of Dick Turpin, is reported. It is stated that a few minutes before eleven o'clock on Monday night Mrs. Amelia Potter, of the Redlands, Shooters'-hill-road, and Mrs. Poole, her daughter, were being driven home across Blackheath, when two masked men suddenly appeared in front of the carriage and called upon the driver to stop. At the same time they presented pistols at the heads of the coachman and the groom. The former, instead of stopping the horses, began to thrash with his whip the man who had hold of the reins. The man then let go his hold of the horses and ran away with his companion in the direction of Greenwich. The masked men are described as "of short stature, well dressed, and having the appearance of men belonging to a rather superior order of society." The coachman says he believed they alighted from a four-wheeled cab which he saw near the spot. Their description corresponds with that of the men who last week stopped a carriage on Blackheath and succeeded in obtaining a gentleman's purse and money. Since that time the police have made every effort to discover the perpetrators of the robbery, and a large force of constables has been stationed each night upon the heath. At Romford a farm bailiff named Wood was a few nights ago knocked down in the outskirts by two men and robbed of his purse.

There were 2225 births and 1443 deaths registered in London last week. Allowing for increase of population, the births were 106 below, whereas the deaths exceeded by 64, the average numbers in the corresponding week of the last ten years. The deaths included 61 from smallpox, 69 from measles, 28 from scarlet fever, 8 from diphtheria, 41 from whooping-cough, 16 from different forms of fever, and 13 from diarrhoea. Thus to the seven principal diseases of the zymotic class 236 deaths were referred, against 246 and 220 in the two preceding weeks. These 236 deaths were five above the corrected average number from the same diseases in the corresponding week of the last ten years. The fatal cases of smallpox, which in the three preceding weeks had been 78, 70, and 69, further declined last week to 61, of which 27 were certified as unvaccinated and 12 as vaccinated; in the remaining 22 cases the medical certificates did not contain any information relating to vaccination. The deaths referred to diseases of the respiratory organs, which had been 355, 338, and 303 in the three preceding weeks, further declined to 259 last week, which, however, exceeded the corrected average weekly number by 40. In Greater London 2661 births and 1713 deaths were registered. Eight fatal cases of smallpox were registered in the Outer Ring. Five deaths from whooping-cough were returned in Croydon. The mean temperature was 53.7 deg., being 2.4 deg. below the average. The duration of registered sunshine in the week was 44 hours out of the 113.2 hours that the sun was above the horizon.

THE WAR: CONSECRATION OF THE BANNERS OF THE BULGARIAN LEGION IN THE PRESENCE OF THE GRAND DUKE NICHOLAS AND HIS SUITE.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

"FRIENDS IN COUNCIL." BY J. D. WATSON.

PARLIAMENT.

LORDS.

The House of Lords reassembled after the Whitsuntide recess on Monday. But little business has hitherto been done. Earl Granville on Monday drew from the Duke of Richmond and Gordon the announcement that the report of the Burials Bill had been fixed for June 18, and that ample notice would be given of any amendments that might be forthcoming. The Earl of Belmore having called attention to the dangers arising from the mismanagement of joint railway stations under the control of different companies, the Duke of Richmond and Gordon thought there was need for improvement, urged that a standing order would scarcely remove the difficulties, and repeated that the whole scheme of railway management was under the consideration of the Government. On Tuesday a sitting of twenty minutes' duration sufficed to advance various bills a stage, including the Consolidated Fund Bill for £5,900,000.

The time of their Lordships was occupied principally on Thursday by the consideration of the Scotch Game Laws Bill.

COMMONS.

Hon. members learnt on the second sitting after the recess that, possibly in consideration of the extension of the Whitsuntide holidays over the Derby Day, Government would claim tribute from them in the shape of a quarter of an hour of their valuable time every day for the rest of the Session. Thenceforth, the Chancellor of the Exchequer thought public business should begin at a quarter past instead of half-past eight. Fresh from his yachting trip in the Sunbeam, "Round the World and Back Again," Mr. Brassey then metaphorically shivered his timbers, and gave cheerful support to Lord C. Hamilton's motion calling upon the Government to seriously consider how they could improve the harbour accommodation on the north-east coast of England. But Mr. Pease moved an amendment to the effect that the matter should be left in the hands of the local authorities. Sir C. Adderley and Sir Stafford Northcote offering mild opposition to both motion and amendment, and at the same time urging that the Ministry were not unmindful of the question, the House negatived Lord C. Hamilton's resolution by 99 to 28 votes. A count-out ensued whilst the alleged sale of Crown lands in the Forest of Dean was under discussion.

On Monday various questions stopped the way of business, as usual. Some were not without point or importance. So grave and learned a personage as Dr. Lyon Playfair may, perhaps, be acquitted of intentionally casting a stigma upon the gentlemen of the Admiralty who held the inquiry respecting Captain Nares's Arctic Expedition; it was possibly by a slip of the tongue that he said on the Navy Estimates he would call attention to the report of the Scurvy Committee. If there be not an exodus from England to Jersey and Guernsey it will not be the fault of the Home Secretary, for Mr. Cross informed Mr. Cowen that inhabitants of the Channel Isles are exempted from Imperial taxation and enjoy the "doubtful" privilege of Home Rule. Then Lord George Hamilton had the satisfaction of informing Mr. Courtney that the famine in India would cost £5,000,000, and he would have to ask the House for a portion of that sum. Sir G. Bowyer was about to allude to Mr. Gladstone's participation in the Federal Union of Liberal Associations in Birmingham, but was ruled out of order. The right hon. member for Greenwich shortly after made his first speech in the House since his "starring" appearance at Birmingham. In Committee on the Oxford and Cambridge Universities Bill, Mr. Goschen had moved a clause throwing open fellowships to laymen. This clause having been seconded by Sir O. Dilke, supported by Mr. O. Morgan and Mr. Trevelyan, and opposed by Mr. Mowbray, Mr. Beresford-Hope, and Mr. Hanbury, Mr. Gladstone admitted that the question was by no means free from difficulty, but was disposed on the whole to go with his right hon. friend the member for the city of London, and to say he would not rely on the absolute limitation of fellowships to tenure by clergymen for securing what he thought to be objects of great importance. Mr. Hardy, on the other hand, thought the Commissioners would be competent to deal with the matter. He was answered by the Marquis of Hartington; and Mr. Goschen's clause was only rejected by a narrow majority—147 against 138 votes. Sir Charles Dilke raised the question of Clerical Fellowships once again by moving an amendment to clause 18, but his amendment was negatived by 173 to 153, and the clause was adopted. A fruitless division followed against clause 56; and the bill passed through Committee, and was reported. The Customs, Inland Revenue, and Savings Banks Bills were then read the third time; the second reading of the Bishops' Bill was postponed; the Companies Act Amendment Bill was read the second time; the Colonial Fortifications Bill was passed through Committee, some other business was transacted.

Mr. Whalley gave the keynote for the questions asked with regard to the war on Tuesday. The hon. member for Peterborough elicited from Mr. Bourke that no other Power had passed an opinion on Lord Derby's reply to Prince Gortschakoff's despatch. Later, Mr. Bourke answered Mr. Gourley to the effect that Russia would adhere to the Declaration of Paris regulating maritime warfare; whilst as for the Suez Canal, the position taken by her Majesty's Government in the matter would be found stated in the correspondence issued to the House. The Under-Secretary for Foreign Affairs further informed Sir W. Harcourt that he was of opinion that the Porte also had made declaration of an intention to observe the maritime rules of the Treaty. These answers did not at all satisfy Mr. Gourley or Mr. E. Jenkins. The latter moved the adjournment of the House in order to comment on the decision of Lord Derby (whose despatch had been published that day) not to allow the blockade of the Suez Canal by the fleet of Russia or of Turkey. Mr. Jenkins was supported by Mr. Whalley; but Sir H. D. Wolff threw his shield over the Ministry, whom he has quite taken under his protection during the discussion of the Eastern Question. After this, not a word from Sir Stafford Northcote could be needed. Indeed, the matter eventually dropped on the understanding that Mr. Gourley would again put his question on Friday. Mr. A. Egerton having explained away the reported mutiny on board H.M.S. *Alexandra* by stating that a few slight acts of insubordination had occurred, the prolonged discussion in Committee of the Prisons Bill was resumed. Irish members (postponing for the nonce a Select Committee of Inquiry into the Parliamentary conduct of Mr. Parnell and Mr. Biggar) rallied round Mr. O'Connor Power whilst he dilated on the alleged hardships of the Fenian convicts, and moved an amendment, asserting that no prison legislation would be deemed satisfactory that did not deal with convict establishments. Mr. Cross, endeavouring to mollify the representatives of the Emerald Isle by sprinkling over them some of his patent essence of common sense, pointed out that the Prisons Bill would ameliorate the condition of prisoners in the long run. With a devotion worthy a better cause, Mr. Whalley seized the opportunity to animadvert on the treatment to which a certain "prisoner at Dartmoor" had been subjected; but his chival-

rous championship was thrown away upon an impatient House. Mr. O'Connor Power's amendment was then withdrawn; and a couple of clauses moved by Dr. Kenealy, one to repeal existing prison regulations, the other to prevent flogging, were negatived. Mr. Mitchell Henry, the hon. member who objected to be likened unto a *jeune premier*, moved a series of resolutions affirming that the burden of imperial taxation imposed on Ireland is excessive, and out of proportion to her financial ability to bear it as compared with England. This the Chancellor of the Exchequer could not allow. With that tone of gentle remonstrance which serves the right hon. gentleman alike for an Eastern or a financial question, and with the accompanying manual action which suits his expostulatory voice to a nicety, Sir Stafford Northcote used a number of forcible arguments against the resolutions, culminating with the not inapt remark that if Irishmen chose to drink whisky, which he did not say might not be suited to their climate, in preference to porter, they had no reason to complain that taxation in this respect fell more severely upon them than upon the population of England. The mellow voice of Mr. Butt pleaded plausibly in support of Mr. Mitchell Henry, who said a few words in reply to the Leader of the House and to the other hon. members who took part in the debate: and, the vote being taken on the first resolution, it was rejected by 152 to 34 votes. The House was counted out whilst Mr. Whalley was calling attention to Mr. John de Morgan's petition, and to the expenditure on the Tichborne prosecution.

The first event of Wednesday's sitting was a vain endeavour on the part of the Marquis of Hartington to obtain from Sir Stafford Northcote a promise that he would lay on the table copies of the despatch containing the intimation that "an attempt to blockade or otherwise interfere with the canal or its approaches would be regarded as a menace to India and as a grave injury to the commerce of the world," and any reply from the Russian Government which might have been received by her Majesty's Government. The Chancellor of the Exchequer had not had an opportunity of seeing Lord Derby, and could not say whether it would be convenient or inconvenient to produce the papers; and, as for the correspondence regarding M. de Lesseps and the Suez Canal, that had been published, because a meeting of the company was fixed for this week. Thereupon Sir William Harcourt announced that he would return to the charge on the morrow. So little fresh is to be said on the subject of granting the Parliamentary suffrage to women, that Mr. Jacob Bright made no speech in moving the second reading of his Bill to remove their electoral disabilities. Mr. Hanbury, formerly an advocate for the measure, now moved its rejection, but Mr. Forsyth, reappearing in his character of an intellectual St. George, mounted his hobby, and rode to the rescue of the damsels who suffer under these disabilities. The O'Donoghue would vote for a bill to remove the disability under which ladies laboured in the matter of "popping the question," but would stop there. This trifling with a great topic brought up Mr. Hopwood, who warmly supported the bill, which, after being opposed by Sir W. Barttelot, Mr. Balfour, Mr. Beresford-Hope, and Mr. Butt, and supported by Mr. M'Laren, Sir J. McKenna, Mr. Henley, and Mr. Jacob Bright, was talked out by Mr. Courtney, who, in answering the hon. member for Limerick, thus showed a rather Irish mode of upholding the measure.

The business of the House on Thursday evening commenced by a little passage of arms between two Baronets. Sir E. Watkin, referring to the opinion expressed by the Lord Chief Justice on the occasion of the trial of "Twycross v. Grant," to the effect that parties resorting to certain practices for the purpose of raising the value of particular stocks on the Exchange were guilty of the offence of obtaining money under false pretences, asked the Attorney-General whether it was the intention of the Government to prosecute the parties to the transactions disclosed in the report of the Foreign Loans Committee. Sir R. Peel seized the opportunity also of asking the hon. and learned gentleman a question couched in somewhat similar terms, but with the addition whether he intended to institute legal proceedings in reference to the case of the Humber Iron Works Company, of which Sir E. Watkin was chairman. Sir E. Watkin claimed the indulgence of the House whilst he offered a few observations. The right hon. Baronet was grossly in error and guilty of great injustice towards him. The facts were very simple; the trial of the case he alluded to, after occupying three days, resulted in the jury unanimously finding that no case had been made out, and that the prosecutor, who was a small attorney in Yorkshire, elected to be non-suited. The Lord Chief Justice stated that there was no case against him (Sir E. Watkin), and said that he left the court without the slightest imputation upon his character. The Attorney-General, responding, said he understood the Lord Chief Justice to condemn the practices referred to as equivalent to obtaining money under false pretences, but not to say that the parties concerned were liable to a criminal prosecution. He did not consider it his duty to initiate such prosecutions. In reply to an interpellation of Sir William Harcourt, the Chancellor of the Exchequer stated that, in the communications which her Majesty's Government had made to the Government of Russia and to the Porte in reference to the Suez Canal, they had no wish to prescribe the particular limitations of what either belligerent might deem to be within its rights. Their object was simply to protect the Suez Canal from being blocked or injured either by offensive or defensive measures on the part of either belligerent. They did not anticipate that any measures of the kind would be resorted to by either of them. The Government did not feel it expedient to enter further into the question. In reply to Mr. Whalley, Mr. Bourke stated that the intimation to Russia that an attempt to blockade or otherwise interfere with the Suez Canal or its approaches would be deemed a menace to India, &c., would not have been given by her Majesty's Government unless they intended to act upon it. He might, however, add that Lord Derby had not the slightest apprehension that any occasion would arise for so acting. With regard to the "co-operation or consent" of the other neutral Powers, those Powers are interested, like ourselves, in the keeping open of the Suez Canal, and we have every reason to believe that the course which her Majesty's Government has adopted meets with their approval. In reply to Sir H. D. Wolff, Mr. Gourley said the resolution he proposed to move was as follows:—

That the Government be requested to enter into negotiations with Russia and the Porte for the purpose of obtaining guarantees that the free navigation of the Suez Canal shall not be interfered with during the continuance of the present war; and, in order to prevent future complications in the route to India, the Government be requested to adopt such measures as they think necessary for protecting the canal and its approaches, and the adjoining property.

Mr. E. Jenkins thereupon gave notice that he would move as an amendment:—

That, in the opinion of this House, no arrangement with regard to the Suez Canal at once satisfactory to Europe can be effected without concert with the Powers of Europe, and before taking steps with regard to the future status and regulations of the Suez Canal her Majesty's Government will endeavour to secure a permanent settlement by the co-operation of the Powers interested in its navigation.

The Prisons Bill, as amended, was under consideration during the rest of the night.

The Extra Supplement.

"COUNTING HER CONQUESTS."

The fair lady whom Mr. Brewtnall has surprised in a mood of triumphant self-complacency, standing apart from the crowded ball-room, among the flowers of the adjoining conservatory, between the last dance up to midnight and the announcement that supper is ready, has a pretty memorandum-book, or ivory tablet, in her gloved right hand; she is perusing its record with evident satisfaction. It is a list of the gentlemen who have implored the favour of her hand for the dances of that festive night, and most of whom, she has reason to believe, are fascinated by her charms and graces, so that she now enjoys an agreeable sense of power and of pre-eminence in her own sex, as well as the pleasure of being adored by not a few of the male portion of mankind and taking up a large share of social regard. There are many women, according to their own frank confession, particularly fond of this kind of success; but it is not exactly the disposition to make a good wife and mother, and he who is seriously looking for a desirable partner in life will do wisely to avoid the young lady, however beautiful, highborn, and accomplished, who is capable of seeking her gratification in the way here noticed.

"FRIENDS IN COUNCIL."

With a touch of ironical humour, as though a professional nincompoop were fitly mated in deliberative conference with a puppet-head of carved and painted wood, this title has been given to the subject of Mr. J. D. Watson's picture. The ancient and ridiculous order of Fools or Jesters, who were frequently attached to the household service or personal suite of a nobleman or of a rich man in the higher ranks of society, are most familiar to the reader of Shakespeare's plays. We can yet see, in the so-called "Clown" of an equestrian performing Circus or Amphitheatre, a coarse imitation of the grotesque style of attire, the impertinent behaviour, and the peculiar vein of forced drollery, which this unhappy class of merry-makers were required to assume for the amusement of their patrons in the long hours of tedious vacancy between one hunting party and the next, or to beguile the lazy afternoon from dinner-time to supper. The Fool was usually equipped, however, with a cap-and-bells on his head, and with a jacket likewise bearing small bells suspended to its lapels and skirts, while he often carried in his hand the characteristic "bauble," a short mace or staff of office, ornamented with the effigy of a Fool's Head. It is not difficult to fancy him left alone, in some obscure gallery or cell of the baronial castle, with leisure to concoct new jokes and pranks, or to con over his memories of the old; and we can even imagine, as here represented, that he may be found talking to the silly little idol, as one would talk to a cat or dog, for a slight relief from solitary dullness.

MUSIC.

ROYAL ITALIAN OPERA.

The repetition of "Faust" on Thursday week included two changes from the former cast—the first appearance of Mdlle. Synnerberg on any stage, and the début of Signor Ordinas. The lady has a mezzo-soprano voice of agreeable quality, which had already been heard in concert performances. She gave the songs of Siebel with good effect, more particularly the first, "Le parole d'amor." Signor Ordinas can scarcely fail to prove a valuable acquisition to Mr. Gye's company. The new singer has a good bass voice, his intonation is correct, and his phrasing shows cultivation. Moreover, he is an excellent actor, his qualities in which respect could scarcely have been put to a greater test than in the character of Mephistopheles—a difficult one to render dramatically effective in combination with the vocal requisites. Some tendency to exaggerated gesture may perhaps be admitted, but this is more easily conceded than its opposite in a stage delineation of such a character. Mdlle. Albani resumed her part of Margherita, the charm and power of her performance having been again admirably displayed. The jewel song received the usual encore. Signor Gayarré, as Faust, sang with good effect, particularly in the cavatina "Salve dimora," and in other portions of the garden-scene music. It was his first performance of the character in England. The cast was otherwise as before.

Yesterday (Friday) week Madame Adelina Patti appeared as Leonora in "Il Trovatore," a character in which (in 1871) she first largely proved the possession of those capabilities for tragic expression which contrast so remarkably with the powers of genial comedy for which alone she was before celebrated. The performance presented all its former high vocal and histrionic merits. The same occasion brought back Signor Nicolini, who repeated his well-known performance as Manrico. Other features of the cast were the same as last year.

On Monday Verdi's latest stage work, "Aida," was given, for the first time this season. The work possesses a special interest as being the latest of Verdi's operas, and showing a strong departure from that melodic style which gained such popularity for his earlier productions. The frequent occurrence of prolonged declamation in "Aida" would seem to prove that Verdi has been somewhat influenced by the music of Wagner. The characteristics of "Aida," however, were sufficiently commented on in our notice of its first production at the Royal Italian Opera last season, when the cast was almost identical with that of Monday; all-important having again been the fine performance of Madame Adelina Patti in the title-character. The part of Amneris was transferred to Madame Scalchi, who rendered it with great efficiency, both in its vocal and dramatic aspects. Signor Nicolini again gave effect to the music of Radamès especially in the declamatory passages; and Signor Graziani's Amonasro was the same forcible performance as before—other parts having been filled by Mdlle. Cottino (a Priestess), Signor Scolara (the King of Ethiopia), and Signor Capponi (Ramphis, the High Priest of Isis).

"Linda di Chamouni" was given on Tuesday, and "Les Huguenots" on Wednesday; the remaining announcements for this week having been "Guglielmo Tell," "I Puritani," and "L'Etoile du Nord."

"Il Vascello Fantasma," an Italian version of Wagner's "Der fliegende Holländer" ("The Flying Dutchman") is announced for Saturday, June 16, with a strong cast, including Mdlle. Albani as Senta, and M. Maurel as the doomed captain of the Dutch vessel.

HER MAJESTY'S THEATRE.

The closing performances of last week call for no comment, having been repetitions—on the Thursday of "Faust," and on Saturday of "Il Barbiere di Siviglia," substituted for "Robert le Diable," on account of Mdlle. Salla's indisposition.

On Monday "Faust" was given again; and on Tuesday "Rigoletto" introduced one of the new singers promised in Mr. Mapleson's prospectus, Signor Talbo, who made a very successful début as the Duke. The singer possesses a tenor voice of considerable power and compass, with some good high

chest notes. He was greatly applauded throughout, and was encored in his first aria, "Questa o quella," and in the canzone, "La donna è mobile." As Rigoletto, Signor Galassi made his first appearance this season, and repeated a performance of high vocal and histrionic merit. Mlle. Alwina Valleria sang with great effect as Gilda, and the co-operation of Madame Trebelli-Bettini as Maddalena was again a valuable feature.

"Lucia di Lammermoor" was announced for Thursday, with the second appearance of Mlle. Ohioni as Lucia. "Faust" was to be given yesterday (Friday), and "La Figlia del Reggimento" this (Saturday) evening.

Herr Wachtel, the German tenor, is announced to appear at Her Majesty's Theatre on Tuesday next; and Mr. Mapleson has also entered into an engagement with Mlle. Gerster, a soprano of continental renown, who is shortly to appear as Amina in "La Sonnambula." "Otello" is promised for Thursday next, with Madame Christine Nilsson as Desdemona, M. Faure as Iago, and Signor Tamberlik as Otello.

Herr Rubinstein's long and successful course of appearances closed for the season on Monday afternoon, when his farewell concert took place at the Crystal Palace. The programme opened with the fourth and most elaborate of his orchestral symphonies, that in D minor, entitled "Dramatic Symphony." Of this work we have already spoken in reference to its first performance in England at a concert of the Philharmonic Society. The ballet music from Herr Rubinstein's opera "Feramors," and a rather effective vocal duet from his Biblical opera, "Die Maccabæer," were included in Monday's programme. Herr Rubinstein's extraordinary powers as a pianist were displayed in Beethoven's fourth concerto (in G), and in three unaccompanied pieces by Liszt, Rubinstein, and Chopin. The concerto was conducted by Mr. Manns, Herr Rubinstein having directed other portions of the concert. Madame Lemmens-Sherrington and Herr Henschel were the vocalists. There was a large attendance, and Herr Rubinstein was very warmly received.

The grand morning concert given by Madame Christine Nilsson at James's Hall on Wednesday had a double interest—first, in the special attraction offered by the performances of the concert-giver and of other eminent artists, and next in the purpose for which the concert was given—that of aiding the funds of the excellent institution (founded by Lady Augusta Stanley) the Westminster Training School and Home for Nurses. On past occasions Madame Nilsson has given concerts with similar purposes and with large results to the institutions benefited. Madame Nilsson sang on Wednesday Handel's air "From mighty Kings" and Cohen's "Valse de Bluets," besides having been associated with M. Faure in that gentleman's duet "Cradle Song" (encored), and with Madame Trebelli in Rossini's duet "Giorno d'orror." Other interesting vocal performances were contributed by Madame Trebelli, the Mlles. Badia, Mr. Sims Reeves, and Signori Franceschi and Brocoloni; and Mlle. Pommerai and Mlle. Cognetti played, respectively, brilliant violin and pianoforte solos. Sir J. Benedict and Mr. Sidney Naylor conducted. There was a very large attendance.

On Wednesday afternoon, also, a National Welsh Concert was given at the Crystal Palace, in aid of the Tynnewydd Miners' Fund; the performances having been under the direction of Mr. Brinley Richards. Nationality was duly represented, both with respect to the music and the performers, a special feature having been the appearance of one of the rescuers, Gwilym Thomas, who sang with Miss Mary Davies in Mr. B. Richards's duet, "How beautiful is night." Mr. Thomas possesses a good baritone voice, and knows how to use it well. He met with an enthusiastic reception. Other vocal music was very effectively rendered by Madame Edith Wynne, Misses M. Davies, M. Williams, Evans, Harries, M. J. Williams, and Wren; Mr. Sauvage, and Mr. J. L. Williams. Among the pieces was a new song, "The Men of Wales," composed for the occasion by Mr. B. Richards, and sung by Madame E. Wynne. Choral music, including "The Miner's Hymn," was contributed by the Welsh Choral Union and the Crystal Palace Choir; and Mr. John Thomas played a harp solo, and Mr. B. Richards a pianoforte piece, both on national airs. Between the parts of the concert Mr. Richard, M.P., delivered a brief address, appropriate to the occasion, and including a recognition of the exertions of Mr. Brinley Richards, who acknowledged the compliment. The successful result of the concert, together with the subscriptions announced, will doubtless largely increase the Miners' Fund.

A concert was given by Mr. C. H. Coudery at the Royal Academy of Music, in Tenterden-street, yesterday (Friday) week, when his cantata, "Christ's Entry into Jerusalem," was performed for the first time, and was favourably received. The work is a setting of words chiefly selected from the Holy Bible, and comprises several choruses and pieces for solo voices. The music is written with musicianly knowledge, and several numbers were very effective in performance, particularly the bass aria, "He bowed the heavens" (sung by Mr. Wadmore), and the unaccompanied trio, "Softly fall those sounds," rendered by Miss Jessie Jones, Miss M. Severn, and Mr. Cummings. This was encored. The cantata was given with a string band reinforced by the organ, at which Mr. Stephen Kemp presided. Mr. T. Pettit conducted.

The concert of Madame Edith Wynne took place on Thursday evening at St. James's Hall with an interesting programme, strongly reflective of the accomplished singer's (Welsh) nationality.

Mr. Charles Hallé is approaching the termination of his series of eight pianoforte recitals, the sixth of which took place yesterday (Friday) afternoon, when his programme consisted of quintet in F minor, op. 34, pianoforte, two violins, viola, and violoncello (Brahms); fantasia in C, op. 17, pianoforte solo (Schumann); solo, violin, adagio from ninth concerto (Spohr); and trio in E flat, op. 70, No. 2, pianoforte, violin, and violoncello (Beethoven). Mr. Hallé was assisted by Madame Norman-Néruda as solo violin, and Herren L. Ries, Straus, and Franz Néruda.

Yesterday (Friday) evening there was to be a great choral rehearsal of the London division of the Handel Festival choir at Exeter Hall, directed by Sir M. Costa.

One of Handel's least-known works, "Hercules," was to be revived at St. James's Hall yesterday (Friday) evening, conducted by Mr. H. Leslie, and with the co-operation of his excellent choir and an orchestra. Of the performance we must speak next week.

The fifth and last New Philharmonic concert of the twenty-sixth season takes place at St. James's Hall this (Saturday) afternoon, with an excellent programme, comprising Mendelssohn's Italian symphony, Beethoven's third "Leonora" overture, Raff's concerto for violin in B minor, Hiller's "concert-stück" for piano, and Reinecke's duet for two pianos on themes from Schumann's "Manfred" music.

Among the miscellaneous concerts of the week have been Madame Viard Louis's concert, at Willis's Rooms, on Monday; Mr. H. Ketten's Pianoforte Recital on Tuesday afternoon, at St. James's Hall; a concert given by Madame Sainton-Dolby, at the Royal Academy of Music, on Wednesday evening, in aid of the funds for the restoration of Handel's organ in the parish

church of Little Stanmore; the first of Mr. Lindsay Sloper's two matinées of pianoforte music at Willis's Rooms on Thursday; and, on the same day, the concert of Herr Henschel (the excellent baritone) at St. James's Hall; Mr. Richard Blagrove's seventh concertina concert at the new Concert Room of the Royal Academy of Music; and Miss Grace and Josephine Sherrington's Matinée Musicale at the Hall, Primrose-hill-road, by permission of Mr. Holmes.

It is highly gratifying to be able to announce that Mlle. Titens is progressing most favourably towards recovery. The following telegram, in answer to an inquiry by the Queen, was dispatched to her Majesty, at Balmoral Castle, on Saturday afternoon last: "Mlle. Titens has been relieved of all the more urgent symptoms under which she was suffering, and may now be considered out of danger. (Signed) T. Spencer Wells, F.R.C.S., Horace S. Howell, F.R.C.S."

THEATRES.

At the Haymarket Mr. Buckstone took his usual benefit yesterday week, in the revived comedy of "The Overland Route," and appeared as Mr. Lovibond, greatly to the amusement of his numerous patrons. The house was crowded. Mr. Sims Reeves sang, to repeated plaudits, "Come into the garden, Maud;" after which Mr. Buckstone delivered his valedictory address. It was brief and to the purpose. Mr. Buckstone is now on a tour in the provinces, and visits in succession Newcastle, Glasgow, Edinburgh, Dundee, Aberdeen, Bradford, Liverpool, Manchester, and Birmingham. Mr. Joseph Jefferson meanwhile occupies the Haymarket boards, from Monday next, with a series of miscellaneous impersonations, commencing with the character of Goliath in the farce of "Lend Me Five Shillings," and that of Hugh de Bras in "A Regular Fix."

The Aquarium has secured some distinction by the revival of Farquhar's comedy of "The Inconstant," re-edited by Mr. Marshall, who has modified the dialogue with judgment and success, and provided with costumes by Mr. Planché. Mr. Warner merits praise for his performance of Young Mirabel, and Mr. Stephens is remarkably well suited for that of Old Mirabel.

The Whitsuntide season altogether has been remarkably barren, wanting in enterprise and novelty. Meanwhile there are rumours of good manuscript plays which vainly appeal for a hearing. We fear that managements are falling back into the old ruts, and that commercial speculation in this direction is effete.

The French drama continues to find an interested audience at the Gaiety.

A special meeting of the subscribers to the Royal Dramatic College—Lord William Lennox in the chair—was held on Tuesday, when it was proposed, in default of sufficient support from the profession and the public, to sell the building, and apply to the Court of Chancery for a scheme for the disposition of the proceeds. An amendment, appointing a committee to consider the best means of preserving and extending the institution, was, however, passed.

The thirty-second anniversary festival of the Royal General Theatrical Fund was held on Wednesday night, at the Freemasons' Tavern, under the presidency of the Duke of Beaufort. About seventy gentlemen sat down to dinner. During the evening a list of subscriptions was announced by Mr. Edgar, the secretary, amounting to nearly £800.

The Dramatic Authors' Society celebrate their annual dinner at Rosherville to-morrow. The chair will be taken by Mr. John A. Heraud, the author of "Videna; or, the Mother's Tragedy." We may mention that this gentleman has a volume in the press, consisting of two pieces, one entitled "Uxmal, an Antique Love Story," and the other "Macé de Lecdepart, an Historical Romance."

THE "FINISH" FOR THE DERBY.

Our last week's chronicle of "National Sports" described the victory of Lord Falmouth's bay colt Silvio, ridden by F. Archer, in a field of seventeen horses, including the winner, over the well-known course on Epsom Downs. We present an illustration of what may be called "the finish" of this interesting race for the Derby Stakes, which had a rather unexpected result. The moment chosen by the Artist for his sketch is just when Silvio made a great rush forward on the lower ground, about one hundred yards from the goal, and passed half a length in advance of Glen Arthur, while the latter at the same time passed before Rob Roy into the second place, by three quarters of a length. The skill of Archer's riding was greatly admired. The time occupied in the race was two minutes and fifty seconds. The winning horse was led into the paddock by his noble owner, amidst the cheers of a large assemblage of spectators. The net value of the Derby Stakes this year is about £6000. Silvio had comparatively few backers for the race, and numerous supporters of Rob Roy or of Chamant have suffered a disappointment.

Miss Milligan has given £5000 to the Royal Isle of Wight Infirmary.

A striking series of experiments with various forms of torpedo was made at Portsmouth on Tuesday in the presence of many naval and military officers and men of science.

At a meeting of the General Assembly of the Irish Presbyterian Church on Tuesday the Rev. George Bellis, for many years mission secretary to the Church, was unanimously elected Moderator for the ensuing year.

The Bath and West of England Agricultural Society opened its hundredth exhibition at Bath on Monday. The weather was very fine, and there was a large attendance. Alike in the extent of the show of implements and in the number and quality of the live stock, the exhibition was far in advance of all its predecessors. The Prince of Wales was one of the successful exhibitors, taking the first prize for Southdown yearling rams. Lord Falmouth carried off both first and second prizes for old bulls, while Mr. Tarling took all the first prizes in the heifer classes. Lady Pigot and Mr. Griffin have the best shorthorn bulls; Mr. W. Taylor and Mr. Archer Cleeve the best Herefords; the Earl of Ellesmere and Mr. Street show the best agricultural horses, while Colonel Barlow has the best thoroughbred. At the annual meeting of the society on Tuesday—Lord Lansdowne, the president, in the chair—it was decided to hold the meeting for 1878 at Oxford; and the Earl of Jersey was elected president, with the Mayor of Bath, the Hon. W. Portman, and Mr. G. H. Morrell, vice-presidents. The Earl of Cork and Orrery, Sir T. D. Acland, M.P., Colonel Archer, and Mr. J. C. Morie Stevens were among the principal speakers.—A lamentable accident happened on Wednesday morning. A toll foot-bridge leading from the Great Western Railway station, at Bath, to the show-yard gave way as a considerable crowd was passing over the structure; a large number fell into the river Avon, and many were drowned.

NATIONAL SPORTS.

The "off-day" at Epsom was characterised by very fine weather, but the card was not a particularly strong one, and the attendance somewhat smaller than usual. Only half a dozen contested the High Level Handicap, the chief event of the day, which was rendered additionally interesting by the presence of Petrarch (8 st. 12 lb.), who has not been seen in public since the Lincolnshire Handicap, and who made his first appearance in the colours of Lord Lonsdale. The Leger winner was on his best behaviour, and Cundance, taking him to the front at the distance, won very easily from Rabagas II. (7 st. 4 lb.), and Lilian (7 st. 5 lb.). The Two-Year-Old Stakes produced a dead-heat between Bishop Burton and Larissa, and, in the run-off, odds of 6 to 4 were laid upon the latter, who was in receipt of 10 lb. from Mr. Bush's colt. The Brocklesby winner was in trouble nearly a quarter of a mile from home, but, struggling on with his accustomed gameness, he fairly wore down Larissa, and won very cleverly indeed at the finish.

A complete change in the weather rendered the Oaks day one of the most unpleasant that we have endured this year, and that is saying a good deal. Heavy rain fell in the morning, and there was such a gale of wind that a portion of the roof of Barnard's Stand was blown away, and a great many of the booths and other temporary erections were completely destroyed. Under such depressing circumstances it is not surprising that comparatively few ladies visited the Downs, and the gay toilettes that we are accustomed to see on the last day of the meeting were conspicuous by their absence. On the whole, backers had a bad time of it. La Merveille disappointed them sadly in the Acorn Stakes, in which Birdie had little trouble in beating Bellicent, the hard-working Ersilia running a good third. The great race of the day came next, and if the field, which numbered nine, was a small one, Placida, Lady Golightly, Belphebe, and La Jonchère, formed a quartet of very smart fillies. Placida was much liked in her preliminary canter, and the forward position unexpectedly obtained by Rhidorroch in the Derby made her a 2 to 1 favourite, as it was generally understood that she is about 14 lb. superior to the colt. The story of the race is easily told. The flag fell at the second attempt, and Placida at once went to the front and showed the way at a merry pace, Lady Golightly and Belphebe bring up the rear. When they had gone half a mile Plaisante was out of it, and the others constantly passed and repassed; but Placida was never caught, and, though Belphebe made a great effort in the last hundred yards, she was beaten cleverly by three parts of a length. Muscatel was a good third, and then came Lady Golightly, Quickstep, La Jonchère, Astree, and Mirobolante, in the order named, Plaisante being beaten off. The winner was exceedingly well ridden by Jeffery, who, it will be remembered, secured the One Thousand upon Belphebe. Placida is a brown filly, by Lord Lyon—Pietas, and was certainly the most consistent, if not the best, performer of her sex last season, as she won no less than six out of eight races, beating, amongst others, such celebrities as Tangible, Ernest, Bruce, Chevron, and Shillelagh. Unfortunately, she has few future engagements, and is not in the St. Leger. The Epsom Cup, which was won by Dalham last year, produced a magnificent struggle between that horse and Hesper, and the former just failed to concede 12 lb. to Lord Lonsdale's colt, on whom Archer secured his eighth win during the meeting. There is little to add to our remarks of last week upon the Derby. With three Blair Athols in the first five, the enemies of the Cobham sultan are surely silenced for ever, and the Stud Company should have a great sale next Saturday. It has transpired that Rob Roy was seriously interfered with by the unwieldy Thunderstone as he rounded Tattenham Corner, and, but for this unfortunate contretemps, Mr. Mackenzie would probably have carried off the "blue ribbon" and £50,000 in bets at the first time of asking.

Messrs. Tattersall disposed of the Middle Park yearlings very successfully last Saturday, as only two out of forty-seven lots had to be sent back, and the capital average of 273 gs. was obtained. The young Rosicrucians were naturally the backbone of the sale, and a colt by that sire from Baz Blen, the dam of Blue Gown, made 1500 gs., although, like Cœruleus, his half-brother, he is a June foal. The Rosicrucian—Hilda colt (1050 gs.) was second in the list, and a filly by Rosicrucian—Pandore (900 gs.) came third. The Vespasians were also much liked, and the half-dozen sold averaged 323 gs.

So many important cricket-matches have taken place within the last few days that we can only glance briefly at the most interesting of them. Lancashire, thanks mainly to the fine batting of Mr. A. N. Hornby (68) and the bowling of W. M'Intyre (twelve wickets), has defeated Derbyshire with ten wickets to spare. A somewhat weak eleven of the Gentlemen of England had little chance against the University of Cambridge. Messrs. I. D. Walker (50) and R. G. Hargreaves (38 and 12) did best for the former; but the fine scoring of Messrs. A. P. Lucas (90) and W. S. Patterson (57), and the Hon. A. Lyttelton (77) enabled the "light blues" to win in a single innings, with 56 runs in hand. North v. South, which was played at Prince's, enabled Mr. W. G. Grace to prove that he is as fresh as ever, and his splendid innings of 261, the largest score he has ever made in a first-class match, was well backed up by the 88 of Mr. J. M. Cotterill and the 54 of Mr. G. F. Grace. On the other side, E. Lockwood (45 and 36) batted well; but Messrs. W. G. Grace and W. R. Gilbert were both "on the spot," taking eleven and nine wickets respectively, and secured an easy victory in one innings, with 163 runs to the good. A very exciting contest between Yorkshire and Middlesex was won by the former eleven by 35 runs. Myers (49 and 25), Lockwood (45), and Eastwood (68) did most for the victors; and, on the opposite side, Messrs. H. R. Webb (58), C. E. Green (65), C. F. Buller (20 and 25), and M. Turner (31 and 21) chiefly distinguished themselves. Kent, though weakened by the loss of Lord Harris, who is suffering from a sprained wrist, had little trouble in defeating Hampshire by seven wickets. Messrs. A. W. Ridley (39 and 62) and C. Booth (73) worked hard for their county; while Kent was worthily represented by Willis (68) and Messrs. C. A. Absolom (42 and 23) and F. Penn (55 and, not out, 48).

A splendid fleet of yachts has been entered to contend for the Channel match of the Royal Thames Yacht Club from the Thames to Dover, on the 11th inst.

The Royal Harwich Yacht Club regatta took place on Monday. The Veronica took the first prize in the match for schooners and yawls. In the match for cutters exceeding 41 tons, the Neva took first prize. In the match for cutter-yachts from 25 to 41 tons, the Britannia was first. In the match for yachts from 10 to 25 tons Vanessa was first; and in the match for yachts under 11 tons Lily was first. The usual Channel matches of this club were sailed on Tuesday. The course was from Harwich to Southend. Colonel Markham's Vol-au-Vent won the first prize; and the yawls and schooners' prizes were taken by Mr. Macleay's Jullianar and Mr. Lampson's Miranda.

MR. GLADSTONE AT BIRMINGHAM.

The visit of the Right Hon. W. E. Gladstone M.P., to this important Midland seat of industrial and political activity and the popular demonstrations of local sympathy with his recent acts and expressions of opinion, may be considered of sufficient interest to be worthy of the illustrations we have prepared.

Mr. Gladstone arrived at Birmingham on Thursday week from Hawarden, between three and four o'clock in the afternoon, accompanied by his wife and the Hon. Albert Lyttelton. He was met at the New-street railway station by several hundred gentlemen belonging to the Birmingham Liberal Association, led by Mr. Joseph Chamberlain, M.P., chairman of that society, and of a federal association of political societies which has just been formed. The Mayor of Birmingham, Mr. Alderman Baker, and Mr. George Dixon, late M.P. for the borough, also Lord Lyttelton, whose mansion of Hagley Park is near the town, were among those present. Mr. and Mrs. Gladstone were to be the guests of Mr. Chamberlain during their stay at Birmingham. A procession was formed, consisting of one carriage-and-four with some carriages and pairs, and a multitude of people walking in close order, to conduct these honoured visitors through the streets. They were greeted with enthusiastic cheering all the way, along a distance of nearly two miles. Our first illustration gives a view of this animated scene. In the evening there was a great meeting at Bingley Hall, which was crowded with an audience estimated by thousands, and presenting an extraordinary spectacle—the subject of our second illustration. The Mayor of Birmingham was in the chair, and the speakers were, besides Mr. Gladstone, the Rev. R. W. Dale, Mr. Chamberlain, M.P., Mr. N. Clarke, of Leeds, Mr. J. S. Wright, and Mr. Wilson, of Sheffield, the last three proposing and supporting a vote of thanks to Mr. Gladstone for his visit and address. He urged, in this speech, the necessity of a sound organisation of the Liberal party, but dwelt more largely on the Eastern Question, denouncing the misrule of the Turkish Empire, and censuring the present Government of Great Britain for its undecided, equivocal, and inconsistent policy, which had led to the war by preventing concerted action of the European Powers. Mr. Gladstone's earnest eloquence, as usual, was exerted irresistibly to command the assent of his hearers, and their feelings were expressed with the utmost force, in the manner customary at such meetings.

On the next day (yesterday week) the right hon. gentleman went to see the Small-Arms Company's factory. He afterwards, at the Board School, in Bristol-street, received an address from the Committee of the Liberal Association and other political societies or committees, to which he replied in a short speech; he then went to the Townhall, and received an address from the Town Council of Birmingham. In the evening Mr. Gladstone, with Mr. John Bright, M.P., who had come from London to join him, was entertained by the Mayor at a banquet of two hundred gentlemen at the Queen's Hotel. Both these right hon. gentlemen spoke at the dinner-table, but Mr. Bright refrained from discussing the Eastern Question. Several other influential members of the Liberal party shared in the proceedings at Birmingham.

Mr. William Dunn, solicitor, of Frome, has been appointed Clerk of the Peace for Somersetshire.

Mr. John Hosack, of the Northern Circuit, has been appointed to succeed the late Mr. Arnold as police magistrate at Westminster.

The Earl of Limerick was installed Grand Master of the Mark Degree of Freemasonry in England at a meeting of the Grand Lodge of the Degree on Tuesday.

After an interval of seven years, the Lady Godiva procession at Coventry was revived on Monday, and the streets were crowded with excursionists and others. Lady Godiva was represented by a lady from Messrs. Sangers'. Friendly societies took part, children tastefully attired represented local trades, and historical persons connected with Coventry were represented.

The Board of Trade inquiry into the stranding of the steamer City of Venice, of Glasgow, on the North Rock, in the county of Down, on April 17, concluded at Belfast last Saturday. The Court attributed the stranding to an error of judgment arising from the defective state of the light on board the South Rock light-ship, and stated they had pleasure in returning Captain Barrie his certificate.

Some remarks upon the continued blockade of Whydah, the seaport of Dahomey, by the British naval squadron under command of Commodore Sullivan, who has succeeded Sir William Hewett on the West Coast of Africa, will be found in our Supplement this week. They accompany an illustration of the ships lying off Whydah, and the delivery of the mails to them from the ordinary mail-steamer. But we observe that since those remarks were put in type, the *Daily News* has published a telegraphic despatch from its correspondent at Madeira, announcing that the King of Dahomey has agreed to make peace. He has actually paid the fine demanded, five hundred puncheons of oil, so that the blockade was raised on the 12th ult. There is, consequently, no longer any expectation or idea of sending a force to attack his capital, the redoubtable town of Abomey.

NEW BOOKS AND PUBLICATIONS.

MR. TROLLOPE'S NEW NOVEL.

Send order of your Booksellers and at the Bookstalls, or send subscriptions to the Publishers. Quarterly, 2s.; half-yearly, 4s.; yearly, 8s.
From the "Bookseller."
"Myra"—This lady, whose nom de plume is a power throughout the country, has brought out a Mid-Monthly Journal, which will be welcomed in all families where young children are to be found. All mothers like their little ones to look nice, but how few are able to accomplish this except at great expense. Yet little expense is needed when taste is abundant, and that may be cultivated if proper care be taken. It was therefore a happy idea of Myra to take the mothers of England in hand, and show them how to dress their children with taste, and yet with economy.
GUTHRIE and SON, 39, Bedford-street, Covent-garden.

NINTH ANNUAL DINNER in AID OF

THE FUNDS OF THE FRENCH HOSPITAL AND DISPENSARY (open to all nations), at WILLIS'S ROOMS, King-street, St. James's-square, on SATURDAY, JUNE 9.

The French Ambassador, His Excellency the Marquis D'HAUCOURT, in the Chair.

Tickets, One Guinea, to be had of the Stewards; or at the Hospital, 40, Little-street, Leicester-square, where donations and subscriptions are also received.

LONDON HOSPITAL, Whitechapel-road, E.

Treasurer—Thos. Fowell Buxton, Esq., Chairman—Sir Edmund Barry, Esq.

This institution, which is the only large general Hospital for the Eastern half of the metropolis, is situated in the midst of districts too poor to contribute, except slightly, to its support. The committee are therefore compelled to appeal to the charity of the general public.

FUNDS ARE NOW GREATLY NEEDED between £50 and £100 (Patients admitted according to the urgency of their medical needs) being always in the wards, and from £200 to 500 Out-Patients under treatment at the same time.

Of the 638 In-Patients admitted last year 998 were children under twelve years of age.

The income from investments, &c., is about £14,000; while the unavoidable expenditure is over £40,000 yearly.

Annual Subscriptions and Donations towards meeting the deficiency are earnestly solicited.

Annual Government, £25,000; Life ditto, £31,100; enabling the governor in either case to recommend one in-patient and four out-patients at the same time; subscribers of less than £50s. yearly receive three out-patient letters per annum.

Contributions may be paid to the bankers, Messrs. Roberts, Lubbock, and Co., and Messrs. Glyn, Mills, Currie, and Co., or to the undersigned.

A. G. BENTON, Secretary.

METROPOLITAN HOSPITAL SUNDAY

JUNE 17, 1877. The Lord Mayor will be happy to receive CONTRIBUTIONS towards the Hospital Sunday Fund, 1877.

All friends of the movement unable to make their Donations on the day are requested to send their subscriptions to the Mansion House, addressed to Mr. Henry N. Custance, the secretary to the fund, who will give official receipts for each contribution.

Cheques should be crossed Bank of England, and sent to the Mansion House.

HOSPITAL FOR LADIES, Bolton House,

192, Clapham-road, Surrey. Specially appropriated to cure Surgical Cases without cutting. Physician, David Jones, M.D. Consultations Daily till One (Tuesday and Friday excepted), at 15, Cavendish-square, London, W. Treatise sent for 12 stamps. Terms, from Four Guineas per Week.

A CONSIGNMENT OF MANY THOUSANDS OF POUNDS WORTH OF BLACK SILKS.

LADIES who may require Persian or Taffeta BLACK SILKS are respectfully solicited to inspect a Consignment of many thousands of pounds' worth just purchased in Lyons by Messrs. JAY for ready money, and which they confidently offer at a price cheaper than they have ever known during an experience of nearly fifty years. It is the produce of two of the best makers of Black Silks, Messrs. Bonnet et Cie, and Messrs. Janbret, of Lyons.

The Silks are warranted to wear well, and will not "turn greasy." The lowest price per yard is 3s. 6d., worth 4s. 6d.; the highest 5s. 9d., worth 5s. 9d. Messrs. JAY beg to express their sincere conviction that their customers will be pleased with their recommendation. If in choosing a Silk at a fixed price, they will be more than their confidence and trust to their selection. On application, patterns will be sent gratis.

JAY'S, Regent-street.

EVENING DRESSES. Two guineas and

21 guineas each. The newest and most fashionable style, and made of Non-Crushing Black Tulle. Engravings of the same, postage-free, on application.

JAY'S, Regent-street.

JOSEPH WILLIAMS'S NEW PUBLICATIONS.
All Music sent post-free half price.

NEW SONGS by FRANZ ABT;

"TIS I, MY LOVE. SO RINGS THE LARK.
THE PATROL. IT MAY NOT BE.
ONE LITTLE WORD. A brief and tender poem by E. Oxenford has been wedded to a charming melody by Franz Abt. A tenor will find this song very effective.

EVENTIDE. Vocal Duet.
FAIRY DELL. Vocal Quartet.
Free by post, 1s. 6d. each.

MY SAILOR LOVE. Music by L. DIEHL; Words by Edward Oxenford. Free by post, 1s. 6d.

MOONLIGHT MAGIC HOME. Music by J. MASSANET; Words by Dr. J. E. Carpenter. Free by post, 1s. 6d.

LES BERGERS WATTEAU. Air de Danse Louis. By L. GREGH. Solo. Duet by HUMMELL. Each 1s. 6d. A simple piece in old dance measure, interesting and pleasing.

CABILLON DE LOUIS QUATORZE. By C. NEUSTEDT. Solo, 1s. 6d.; Duet, by HUMMELL, 2s. This is a very pleasing trifle, quaint, melodious, and fanciful.

SILVER THREADS. Transcription by W. KUHE. Price 1s. 6d. A pretty melody, with three variations, excellently designed.

MY SAILOR LOVE. Words by Edward Oxenford; Music by L. DIEHL. Will be an established favourite. It is a simple and catching melody, the subject also being one of a popular character.

Free, 1s. 6d.—JOSEPH WILLIAMS, Berners-street and Chancery-lane.

ONE LITTLE WORD. A New Song. By the melodious Composer FRANZ ABT; the Words by E. Oxenford; and the music has the simple, plaintive character so well known and so generally admired in other works of the Composer. Net 1s. 6d.—JOSEPH WILLIAMS, 24, Berners-street, W.

HOBART PASHA MARCH. By MICHAEL WATSON. Just published. Splendidly illustrated in colour, with lifelike Portrait of this celebrity. Post-free, 18 stamps.

THE PROCESSION.

MR. GLADSTONE ADDRESSING THE MEETING IN BINGLEY HALL.

SKETCHES OF THE WAR.

Our Special Artists, both on the Russian and on the Turkish side, in the campaign along the banks of the Danube, have supplied a number of Illustrations of recent events to furnish the Engravings for this week's publication. The Turkish fortified town of Rustchuk, which is occupied by a main part of the Sultan's forces arrayed on the defensive line of the Bulgarian frontier, affords the subjects for several incidental sketches by Mr. Melton Prior. We have also a scene in the camp of the Egyptian troops. On the other hand, we have sketches of the Russian head-quarters at Ploesti, north of Bucharest, and of the ceremony of consecrating banners for a Bulgarian Legion, formed under the patronage of the Grand Duke Nicholas. The portraits of his Chief of the Staff, General Nepokoitschitzky, of the ruling Prince Charles of Roumania, who leads his army to join that of Russia, and of Lieutenant Doubassoff, the young officer whose small party achieved the daring feat of blowing up a Turkish gun-boat on the river a fortnight ago, are presented in this Number of our Journal.

Prince Karl or Charles I., who has during eleven years past reigned over the united provinces of Wallachia and Moldavia, now called "Roumania," with a population of four millions and a half, is a German, of the Prussian Royal family, being a son of the late Prince Karl of Hohenzollern-Sigmaringen. He is thirty-eight years of age, having been born on April 20, 1839. His election to be Prince of Roumania, in 1866, was consequent upon the revolution which deposed Alexander John Couza, the first ruler of the united provinces under the Constitution of 1861. Prince Charles is married to Elizabeth von Neuwid, daughter of the late Prince Hermann von Neuwid. The government of Roumania is Constitutional, with the legislative power intrusted to a Senate and a Chamber of Deputies at Bucharest, elected by all citizens who are twenty-five years of age, and who can read and write. The ordinary revenue is estimated at £3,600,000; some account of the Roumanian army has already been given in this Journal.

The Russian Chief of the Staff, General Nepokoitschitzky, is of Polish family, and is nearly seventy years of age. He has seen more service than most of the Russian leaders, and his experience of staff duty in particular has been long and continuous. He joined the army as an infantry officer, and first saw active service in the Caucasus, where his merit was so conspicuous that he speedily received a staff appointment. He held an important and responsible office on the general staff in the army which Russia sent to co-operate with Austria in quelling the Hungarian insurrection of 1849. In the war of 1854 and 1855 he was chief of staff to one of the corps composing the army with which Gortschakoff occupied the Principalities, and took part, under Paskiewitch, in the memorable siege of Silistria. Since 1855 the General has seen no active service, but has been continually in military employment of one sort or another. Although chief of the staff of the Army of the South, for which position he was chosen because of his acquaintance with the region of the Danubian Valley derived from his experience in the campaign of 1854, he is not the head of the superior general staff of Russia. That high office is filled by Count Heidan. Before his appointment to the office he now holds, General Nepokoitschitzky was at the head of the Commission for the reorganisation of the army on the new system which has replaced the old Russian system, and the operation of which, although its institution was so recent that its full value is as yet not realised, has done much to improve the Russian army. Although, then, in years and service, the General is unquestionably an old soldier, his position as President of this Commission sufficiently indicates that he is a disciple of the modern school of military organisation, and of strategy and tactics.

The Russian field army is commanded by the Grand Duke Nicholas, the Emperor's brother. The principal members of the Head-Quarter Staff are:—Chief of the Staff, Lieutenant-General Nepokoitschitzky; Aide to Chief of Staff, Major-General Levitzky; Chief Secretary of the Head-Quarter Staff, Councillor of State Stéfán; Commandant of Artillery, Lieutenant-General Prince Massalsky; Aide to Commandant of Artillery, Major-General Adamovitch; Commandant of Artillery Parks, Major-General Kanatich; Commandant of Engineers, Major-General Depp; Ataman of Field Cossacks, Lieutenant-General Fomine; Commandant at Head-Quarters, Major-General Voriehoff; Chief of Military Communications, Lieutenant-General Katele; Chief of Quartermasters, Major-General Stolzenwald; Chief of Posts and Telegraphs, Major-General Stahl; Chief of Clerks, Major-General Zaitsoff; Inspector of Hospitals, Major-General Kosinsky; Aide to Inspector of Hospitals, Colonel Widischeff; Intendant of the Army, Councillor of State Airens; Aide to Intendant of Army, Councillor of State Leokovitch; Advocate-General, Councillor Aschamuroff.

The Russian army has not hitherto been organised in peace with higher units than the division, and only lately has the Army Corps been recognised. This consists of two Divisions of Infantry, with a Cavalry Division. As a rule, the Infantry Division consists of two Brigades, and the Brigade of two regiments. Each regiment has three battalions, so that there are six battalions to a Brigade, twelve to a Division, and twenty-four to an Army Corps. The fifth companies of battalions are tirailleur, and the three tirailleur companies in a regiment may thus form what is virtually another battalion, and the tirailleur battalions may form a brigade if required. To each division of infantry is attached a brigade of field artillery, bearing a number corresponding to the division to which it belongs, and consisting of three 9-pounder and three 4-pounder batteries, each battery having eight guns. The total strength, including artillery and hospital train, on paper, of a division in which the regiments have three battalions is 15,924 men, of whom 11,400 are infantry combatants in front line; and of a division in which the regiments have four battalions, 20,348 men, of whom 15,360 are infantry combatants in front line. A cavalry division consists of two brigades—the first formed by a regiment of dragoons and a regiment of lancers; the second, by a regiment of hussars and a regiment of Cossacks, and also of two horse artillery batteries. Including the batteries, a cavalry division numbers 4079 men, placing in the field 2499 sabres and twelve guns. A brigade of rifles comprises 3816 men, placing in the field 3040 bayonets.

The Grand Duke Nicholas has ordered the formation of a Bulgarian Legion, to be composed provisionally of six battalions of infantry, each of five companies, and of six sotnias (hundreds), or three squadrons of cavalry. The legion is divided into three brigades, each comprising two battalions and two squadrons. The whole is placed under the command of General Stolf, who has had the organisation of these battalions since the commencement of the war. A part of the legion reached Ploesti last week, and the remainder are to arrive before the end of this month. At first they are to be employed only in the rear of the army, but as the sphere of operations widens they will take a more prominent part in the campaign, on account of the excellence of their organisation and the tactical merit of the officers who have command of them. The men are said to be already sufficiently familiarised with the Russian language to be able to understand the orders

issued to them, and by the time that Bulgaria is occupied many of them will be competent enough to assist in the formation of fresh battalions. Every day large numbers of Servians, Bulgarians, and Roumanians join the Russian army. None are allowed to remain with it who do not at once consent to be incorporated with the regular soldiery, for the Commander-in-Chief is determined not to have any volunteer irregulars hanging at his rear. As regards pay, the volunteers receive the same as the regular soldiers, and they likewise participate in the privileges enjoyed by the latter. Until now the Bulgarian battalions have been equipped by the Pan Slavist committee at Moscow; but although the Russian Government is willing that the maintenance of the Legion shall be partly or wholly borne by that society, it intends to take the equipment into its own hand. It is also clearly understood that the insurrectionary operations of these committees must be carried on outside the circle of the Russian army, preference being given to the districts in the rear of the Balkans. The Commander-in-Chief expects to be kept well informed as to the movements of the Pan Slavist agents, in order that he may give assistance when necessary, and prevent the organisers in Russia from exerting too much individual freedom. It is anticipated that some very important political results will be achieved by the Bulgarian Legion. On the army crossing the Danube the battalions will serve as the nucleus for future volunteers, who, it is predicted, will flock round the Russian flag in large numbers. The Legion thus enlarged, and representing the Christian population of Bulgaria, may play an important part in the future settlement of that province. To prevent it from being too local in its aspirations, and to Russianise the Bulgarians as much as possible while in the Czar's service, the cadres of the Legion are partly made up of regular Russian soldiers, who have a proportion of two to one of the volunteers. The Grand Duke Nicholas has bestowed upon the Bulgarian Legion a flag displaying the coat-of-arms of the former kingdom of Bulgaria, with the following inscription:—"Forward! with the help of God and the might of the renowned Czar of Russia, Alexander."

We have related the manner in which one of the most daring deeds ever recorded in the history of warfare was performed on the Lower Danube. This was the blowing-up of a Turkish monitor, on Saturday, the 28th ult., by the torpedo-launches under the command of Lieutenant Doubassoff. That young officer, whose portrait we now publish, belongs to the Russian Navy. He obtained his education in the Naval School, and afterwards in the Naval Academy at St. Petersburg. He is considered to be one of the promising officers of the Russian Navy. He was for some years at sea, during which time he went round the world. His last appointment was as chief officer on board the Imperial yacht Slavyanka, belonging to the Grand Duke Czarewitch. We mentioned last week that both Lieutenant Doubassoff and Lieutenant Scheetkoff have been decorated by the Grand Duke Nicholas with St. George's Cross, which is the highest order in Russia for military service.

The special correspondent of the *Standard* thus describes the small Roumanian town of Ploesti, the temporary headquarters of the Russian army:—"In this country the peculiarities of Bucharest appear in every town; the character of the peasant is that of the boyard; and in small places like this, wherein the Grand Duke has pitched his tent for the moment, oddities become more striking. Ploesti covers a great space of ground, and is approached through a characteristic landscape, divided between two zones. There is a zone of forest and a zone of plough land; look through the carriage window as often as you will the same picture lies in view. If the low-lying track be not edged by trees, most exquisitely green and tender of foliage, it will be running through an endless plain. Very far off, a pale blue line of mountains may sometimes suggest that the whole universe is not flat. At this time of year the level has charms of its own, reminding one of *velde* lands in Cape Colony. Swathes of yellow colza bar it, and acres of wild strawberry in full blossom, and belts of iris round a marsh, break the eternal green. Here and there a white-clad peasant scratches at the earth with a wooden plough, to which, for the look of the thing, he has harnessed six bullocks. So shallow are the furrows that small strips of weedy ground escape between them, and tares wave in triumph behind the track of that guileless husbandman. But with no better preparation he will raise a crop that might make the prairie farmer jealous, and madden with despair our scientific agriculturists at home. Pity it is to see how narrow are the streaks of brown in that great sea of weeds, and how often the females of the household are helping at the plough. Those stalwart fellows who should have been aiding us with us here in the train, equipped at the price of their country's ruin, for a war which nobody wants, saving always those who hope to 'fish in troubled waters.'"

"The strategical reason which caused the Russian chiefs to make Ploesti their headquarters is seen evident upon the map. All day long the trains of baggage and artillery come filing in by the road from Braila without a break. The horses—nearly all young—step well through the deep black soil; the men, dirty and unkempt, as are all troops upon campaign, have an admirable airy spirit and good humour. There are always officers waiting at the entrance of the town, who observe the waggons and men as they pass by. At four o'clock this afternoon General Nepokoitschitzky himself, the chief of the staff, did not disdain to undertake the duty. Motionless, upon a beautiful white horse, he watched the uninteresting procession for nearly two hours—uninteresting at least it seemed to me, waiting an audience with his Excellency. At intervals of the interminable train, the baggage guards passed by, a score of men marching with free step, though caked to the knees in mud. Then the General always pushed through the crowd, and, whilst the men presented arms, he uttered a word or two. The reply always came in a short, sharp, startling cheer; the soldiers passed briskly on, and the General resumed his station. How many vehicles I saw pass, how many baggage guards I heard cheer, none but a 'calculating boy' could estimate, but the sum was one *d faire réver*. Not to-day nor this week did the procession begin, nor will it end to-morrow. How are these innumerable horses to be fed in Bulgaria; how are these waggons to be dragged over Bulgarian roads? Each should and did carry a spare wheel behind; the wheel is missing already in one case, at least, out of ten; it has been needed and used before Roumania has been crossed."

"The town into which these vehicles are pouring is a little Bucharest—less wealthy, of course, perhaps dirtier, possibly more idle. The holes in the streets are deeper, and filled to the brim with mud, for rain is constant at Ploesti—whence the name. Very wide streets are bordered with stucco houses tumbling down, but not tumbling from age, for the greater part are new. On the lower floor dwells a tailor or a tobacconist; from the upper windows dark eyes peep round a blind, catch the stranger's glance, and modestly vanish. So, as you limp along the breakneck pavement, it happens at every house. There are, indeed, a certain number of shops devoted neither to smoke nor dress, but they are scarcely worth counting."

"Round Ploesti stand such pretty houses as I have

described in Bucharest—little gems of beauty and comfort. Here, of course, they are not so sumptuously adorned; but the villa of the Grand Duke is handsome. The old Roumanian hotel, almost extinct in the capital, may be found here, and is worth description. Along three sides of an immense courtyard run lofty galleries, covered in with glass. Upon these open the windows of the bed-rooms, tiny dens, in which no privacy is possible. You perceive that ladies are not expected to travel here. The staircases run to the gallery. In the courtyard stand a few acacias, a few oleanders, struggling towards the light, and a great number of those coloured glass globes which, mounted upon a pole, are more than equivalent in the Roumanian eye to flowers. I have seen a meadow thus adorned, in which the owner stood with rapt delight, as a devoted amateur might stand among his roses. Amongst the acacias and the oleanders people dine, weather permitting; but for rainy nights there is a pavilion along one side of the courtyard—a wooden building full of taste in shape and decoration, so bright of colour, so gracefully carved, that one is pleased to look at it. Then of an evening come the *Lauatorei*, or gipsy minstrels, another institution of the land. They play wild tunes and sing till midnight—always by ear—or else they seize a waltz—French or German—transform it, with notes new and strange, into a barbaric chant; and the public of Ploesti come to drink beer and listen."

In another letter, one of the Special Correspondents at Rustchuk says:—"Opposite Rustchuk, at a distance of about two miles across the Danube, the Roumanian village of Slobosia borders the steep bank of a creek or inlet, leading to an extensive swamp in its neighbourhood. Only the steeple of a Greek church marks its position, as its humble cottages are all hidden in a grove of fruit-trees. The level there is very nearly the same as here—that is to say, about twenty yards on the average above the ordinary water-line. Between the two places, divided by a narrow island in the middle, flows, some 1000 yards broad, the stately river, the main channel of which whirls its waters over a rocky stratum of hard limestone that supports the clay plateau of Rustchuk. Then follows another island, larger by far, covered with brushwood and pasture, which is separated from the Roumanian main land by the aforesaid creek and swamp. The whole valley, however, is at this time of the year entirely flooded, and only the topmost branches of the willow-trees wave above the water. Five hundred yards down the river to the left of Slobosia, and about two hundred yards from the bank, on the highest point of the ground, the Roumanians have constructed, since the Crimean War, a series of pretty strong entrenched lines, at which they are now actively working again. We see from here through the glass how the parapets rise daily higher and higher. This business is usually done at night, but they continue it also in the morning, evidently not heeding what the Turks may think of it. The latter, however, who, with a carelessness or want of pluck which nothing can excuse, neglected to cross over to the Roumanian side, when they could do so, in order to secure for their fortresses the necessary *têtes de pont*, now find out at the instigation of European counsellors that the Roumanians display a little too much impertinence in their preparations. They appear to be quite indignant of late, and have decided in council on disturbing the workmen and destroying the intrenchments by the fire of the heavy cannons from our bastions on the river side. The batteries called forth to act are five in number, more or less distant from each other. They are not connected by curtains, but are isolated on the border of our plateau, the steep slopes of which are washed by the Danube. Some thirty guns, among them five 15-centimeter breechloaders of cast steel, bronze pieces fashioned after the Krupp system, Faixhan's long muzzle-loaders of various calibre, and even mortars, are to open, perhaps to-morrow, their fire on the Roumanian earthworks. To that effect the Turks are busily clearing the Danube of all vessels. The cannonade cannot but lead to the destruction of Slobosia, and subsequently, of course, of Giurgevo, which is entirely dominated and threatened by one of our outworks. As to the enemy's intrenchments, however, no appreciable result can be obtained at such a considerable distance, because the damage done in the daytime can easily be repaired at night, when all precision in firing is out of the question. The powder will therefore be wasted. On the other hand, moreover, as we are not aware yet if the Roumanians have their heavy metal in position, they will not hesitate to answer the challenge; and then every shot must strike our city and sweep through dozens of the miserably-built houses at once. Innocent persons, women and children, are of course exposed to be killed."

One of our Artists has been with the Egyptians in Bulgaria, and writes as follows:—"The heights of Cape Galata, near Varna, now studded over with the white tents of the Egyptian contingent, who have come to assist the Osmanlis in the present struggle, form a delightful contrast to the verdure of the surrounding scenery; and the artistic eye is, on a closer acquaintance, arrested at every turn by the picturesqueness of the black soldiery. These are a fine, hale, kindly set of fellows, who take good-naturedly to hard work, and appreciate with true philosophy the meagre comforts of camp life. Only give him a good supply of cigarettes and an occasional draught of sharrab, your Egyptian will work like a horse through the hottest hours of a hot day. There is, indeed, something almost absurd, to a Northerner, in the way in which they will wrap their huge capuchined cloaks round them at times when any one of us would gladly divest himself of coat and waistcoat. The sketches I send were taken during a flying visit I paid the other day to their encampment. The rapid and energetic way in which they dig trenches, mount guns, and go in generally for the harder work of military life, is something remarkable. One of the sketches I send is of the construction of a battery commanding the Black Sea. Another is of a snug corner in camp at supper time, a scene which would have gladdened the heart of Rembrandt with its broad effects of light and shade, and would have delighted Salvador Rosa with its grim picturesqueness. I also send some miscellaneous sketches, one of a sentry outside the Commandant's headquarters, and one of a sacker, or water-carrier, who goes his rounds shouting out the commodity of his calling, and satisfying the wants of thirsty troops in a very innocent way, that would gain the high approval of our old friend George Cruikshank and the members of the Temperance League."

The Jews resident at Constantinople are generally disposed to be content with the Sultan's rule, as they have mostly emigrated from Spain to Turkey, and in both those countries the Mohammedan Power was less intolerant of their national religion than the Christian Governments of Europe have till lately been. Russia and her allies, the States of Roumania and Servia, have treated the Jews with extreme harshness and injustice; and the consequence is that, nearly everywhere in the East and South of Europe, the Jews take the side of the Turks in the present war. They have no pretensions, like the Greeks and the Slavs, to revive or set up an independent monarchy amidst the ruins of the Ottoman Empire. They hold a very large amount of Turkish bonds or consolidated stock, and they have recently obtained political enfranchisement under the new Turkish Constitution, with seats in the Senate and the Chamber of Deputies. For these reasons, probably, more than ten thousand Jews of Constantinople lately joined in the

solemn offering of prayers for the success of the Turkish arms in the impending conflict against those of Russia. The service in their principal synagogue at Balata, on the banks of the Golden Horn, was attended by Mohammed Damad Pasha, Grand Master of Artillery and a very influential member of the Sultan's family, accompanied by several Turkish officials of high rank, and Ulemas, or Mussulman Doctors of Divinity. We give an illustration of the scene at this religious celebration, with Mohammed Damad Pasha seated in an arm-chair placed on a small carpet in the middle, and other distinguished Turks standing beside him. The officiating Jewish clergy have opened the Ark and have taken out the Books of the Law, to be read from the pulpit in the midst of the congregation. The ceremony was performed with great pomp; and the vestments of the clergy, the architectural decorations, the burning lights, and the crystal lustres of the candelabra had a splendid effect. The building, which was erected in 1732, is of Byzantine architecture, with two domes and eight massive pillars internally; the ceiling is of finely carved wood. The doors of the ark, made of walnut-wood and ornamented with mother-of-pearl, are considered very handsome. Our illustration is from a sketch by one of our Correspondents at the Turkish capital.

ROYAL INSTITUTION LECTURES.

ISOLATION OF THE ALKALINE METALS.

Professor Dewar, in his second lecture on the Chemical Philosophy of Davy, given on Tuesday, May 29, resumed his account of the long-continued elaborate researches whereby the great philosopher conclusively demonstrated that, as an electric current always decomposes a compound body, such as water or a salt, so also every chemical action, however feeble, generates an electric current. This led him to hope that the new mode of analysis might lead to the discovery of the true elements of various bodies, if the materials acted on were sufficiently concentrated and the electricity adequately exalted. Having repeated several of Davy's most striking experiments, Professor Dewar proceeded to describe and illustrate the way in which his hopes were realised, and how the fixed alkalis, potash and soda, were decomposed by the action of the great voltaic battery at the Royal Institution in October, 1807. Davy's first attempts made on aqueous solutions of potash failed. The water only was acted on, and the gases oxygen and hydrogen were disengaged with much heat and violent effervescence. He next fused potash and applied the electric current to the liquid, producing intense light from a column of flame; aeriform globules, which inflated in the atmosphere, rising from the potash. After failing in various endeavours to collect this combustible matter, he at length succeeded by making the potash a conductor of electricity by slightly moistening it. When such a piece of potash, placed on an insulated disk of platinum, was connected with the negative pole of a powerful battery, and a platinum wire, communicating with the positive side, was brought into contact with the upper side of the alkali a vivid action began. The potash fused at both points of electrification, and violent effervescence took place at the upper surface, due to the evolution of oxygen gas. At the lower or negative surface no gas was liberated, but small globules having a high metallic lustre appeared, some of which immediately burst with explosion, while others remained merely tarnished, and soon after were covered with a white film. These globules were a new metal, which Davy named potassium. Numerous experiments proved to him that he had attained his object, and a few days after he obtained sodium, another new metal, from soda in a similar manner; but the decomposition required greater intensity of electrical action. After illustrating these discoveries by experiments, Professor Dewar explained the method of obtaining the new metals more easily in the form of amalgams, as suggested by Berzelius; and in this way he produced some lithium and potassium, the mercury employed being driven off by distillation. Finally, he exhibited specimens of the metals so produced, the potassium having a silvery white appearance, the colour of sodium being somewhat yellowish.

INVISIBLE HEAT RAYS.

Professor Tyndall, in his eighth and concluding lecture, on Thursday, May 31, resumed his experimental illustrations of the phenomena of radiant heat, and showed that metals are worse radiators and absorbers of heat than other bodies. Producing a teapot and cosy, he explained that the heat was preserved by the bad radiation of the teapot and the bad conduction of the cosy; but added that a closely-fitting cosy would rather promote than diminish the radiation, and have a precisely opposite effect. He also introduced Faraday's old experiment showing the protective action of scraps of gilt paper. When such were fixed on a sheet of paper, the colour of the back (coated with iodide of mercury) was changed by heat applied to the upper surface, except where the gilt paper was placed. He next showed that a source of light emits and absorbs rays of a certain refrangibility or colour. The yellow in the spectrum of the electric lamp was replaced by a black line through absorption when the vapour of sodium was introduced into the flame. Then, referring to a fine spectrum, the Professor said that there were ultra-violet rays and ultra-red rays, invisible to our ordinary vision—the former having chemical power, the latter being most powerful in regard to heat, although very much absorbed by the aqueous vapour in our atmosphere. He then explained and illustrated the way in which, after much labour, he eventually succeeded in filtering, as it were, the composite radiation of the electric light, by stopping the visible rays and allowing only the invisible rays free transmission; and with these latter rays, concentrated into a focus by a plano-convex lens, he ignited paper and zinc, and caused the combustion of carbon in oxygen with vivid scintillations. He also explained how, by a most ingenious arrangement, platinised platinum foil in a vacuum may be raised to a white-heat by this focus, and stated that on looking at this white-hot platinum through a prism of bisulphide of carbon a rich and complete spectrum had been obtained, all the colours being extracted from an invisible focus. In concluding, the Professor referred to the sun as the great source of all our heat. In vegetation it decomposes carbonic acid and water, and causes the aggregation of carbon and hydrogen in the woody fibre. Combustion is the reverse of this process of reduction, all the energy derived from the sun reappearing as heat when the plant is burnt. This, then, is the source of all our power, vegetable and animal, and from it all our coal is derived. For our increased knowledge of the phenomena of heat and the principles therein involved we are greatly indebted to the laborious researches of Mayer and Joule.

HISTORY OF EDUCATION.

Mr. Oscar Browning, of King's College, Cambridge, began his discourse at the evening meeting on Friday, June 1, with remarks on our great national advantages in regard to education—wealthy endowments and able teachers—only requiring stimulation to more abundant life. After that in the family, he said that the earliest instruction—by priests and prophets and the schools of Judaea and Egypt—was ecclesiastical, and the "wisdom of the Egyptians" was a source

of enlightenment to all surrounding nations. In Greece education became secular. Two subjects were studied—music and gymnastics; the first comprising all mental, the second all bodily, training. Plato describes the Athenian palaestra—Socrates surrounded by ready listeners and ardent disciples; and Plato is the author of the first systematic treatise on education. Amongst the Romans, Quintilian taught how to fit a man to perform justly, wisely, and magnanimously all the offices, both public and private, of peace and war. "Can we," said Mr. Browning, "produce anything by education, except by combining, blending, and modifying the self-culture of the Greek with the self-sacrifice of the Roman?" He then contrasted the education of the cloister and the castle in the Middle Ages. The young monk was subjected to harsh discipline, his studies being the "trivium" (grammar, dialectics, and rhetoric) and the "quadrivium" (music, arithmetic, geometry, and astronomy)—a seven-years' course which profoundly affected our modern education; while the seven knightly accomplishments were to ride, to swim, to shoot with the bow, to box, to hawk, to play at chess, and to make verses (not in Latin) with chivalrous devotion to women. Both forms disappeared before the Renaissance and the Reformation, the precursors of which were the "Brethren of the Common Life," who did immense service by devoting themselves to the education of children in the northern Netherlands. Erasmus merely aimed at gradually forming the child into a good Greek and Latin scholar and a pious man; but Luther brought the schoolmaster into the cottage, and founded the system which is the chief honour and strength of modern Germany. Melancthon also wrote school-books, and even introduced physical science. John Sturm, of Strasburg, the friend of Ascham, the first great head-schoolmaster, was also an able diplomatist and representative of the Protestant cause. In 1576 his school numbered thousands of pupils, and the effects of his universal influence remained in our own public schools till the present century. John Amos Comenius, a poor Moravian, was quite the reverse to Sturm. His life was spent in wandering and obscurity; but his ideas were accepted by advanced thinkers such as Milton, and his practical system foreshadowed the education of the future: he taught things as well as words. His course included science, arts, and handicrafts; and in his kindness and gentleness he was the forerunner of Pestalozzi. The Catholics were stirred up by the Protestant activity, and Ignatius Loyola's programme for education by the Jesuits was highly successful. Their defects, pointed out by Montaigne, were over-estimating the intellect, rejecting morality, and depreciating useful knowledge. The wise system recommended by Locke was next noticed, and the large course set forth by Milton commented on. At the Port Royal, the greatest men of France devoted their highest gifts to promote education, but their light was quenched by Jesuit jealousy. In 1762 an astounding effect was produced by the publication of Rousseau's "Emile," the main principle of which was to overturn all other systems and to return to a state of nature. Restraint and punishment were to be abolished; "do no harm" was to be the chief moral principle; and teaching was to be chiefly by observation and experience, the use of books being deferred till late. In concluding, Mr. Browning glanced at the method of Basedow, and the opinions of Richter, Goethe, Herbert Spencer, and Alexander Bain on this all important subject.

DISCOVERIES AT MYCENÆ.

Mr. Charles T. Newton, M.A.C.B., gave his first lecture on the Recent Discoveries at Mycenæ on Saturday last, the 2nd inst. After quoting Strabo's statement, in the first century of our era, that there were no remains of Mycenæ, he read a translation of a passage, written by Pausanias in the second century, describing the Lions Gate, the treasuries, and the five tombs of Agamemnon, supposed by Dr. Schliemann to be those which he discovered on the Acropolis. Referring to a map, Mr. Newton showed that Mycenæ is placed upon a height between two mountains bordering on the Argive plain on the east, thus corresponding with Homer's description. Its military position was very commanding, and its fortress, which lies between two torrents, is rather more than 1000 ft. long, and the breadth about half. The entire circuit of the walls, from 15 ft. to 20 ft. high, is nearly all preserved; the masonry is of the ancient kind termed Cyclopean, the material being a breccia; some of the blocks are 18 ft. long. The chief gate, through which the Acropolis is entered, at the north-west angle of the wall, is approached by a passage 50 ft. long and 50 ft. wide, which may have served as a place for arms or business. Over the massive doorway were sculptured two lions standing on their hind legs, with a pillar between them. There was also another fortified gate, but no flanking towers. As also at Tiryns, there are remains of a subterranean passage. Immediately south of the great gateway Dr. Schliemann found the tombs with their interesting relics. Along the crest of a ridge to the north is a rock which probably marks the line of an ancient wall and road leading from the Gate of Lions to a bridge over the stream in the ravine, remains of which still exist. Whether there was once a lower town, perhaps that termed by Homer "Mycenæ, the wide-streets," or "spacious," has not been ascertained; but this lower ground contains the singular buildings termed treasuries by Pausanias and others. That of Atreus, which is entirely subterranean, was approached through the slope of the hill by a passage 20 ft. wide; fragments of columns of its gateway are in the British Museum. After giving details of the interesting structure, such as the discovery of square bronze nails which had been driven into the walls, probably to fasten bronze plates, Mr. Newton expressed his opinion that these subterranean buildings were really tombs, which may have served also as treasuries in emergencies, as temples did in later times. He then briefly reviewed the mythic history of Argos, noticing the story of Io, the coming of Danaos, who gave his name to the Greeks, the foundation of Mycenæ by Perseus, the tragic history of the Pelopides, the reign and murder of Agamemnon, the appearance of Mycenæans at Thermopylæ and Plataea, and the utter destruction of the city by the jealous Argives, B.C. 468. Mr. Newton thinks that we may assume that all the monuments of Mycenæ were constructed before the fall of the Pelopid dynasty, certainly before the return of the Heraclids, which took place, according to the received chronology, B.C. 1048. The lecture was illustrated by pictures and photographs, with some beautiful drawings by Mr. Simpson, of the *Illustrated London News*.

Mr. C. T. Newton's lecture this day, on the Recent Discoveries at Mycenæ, will close the season.

On Monday the Duke of Cambridge, attended by the Horse Guards staff, visited Aldershot, and witnessed a sham fight by the troops. The division represented a force advancing by Frimley and North Camp Station in pursuit of an enemy retiring over Aldershot-common and Beacon-hill. The skeleton force representing the enemy was commanded by Colonel Davis, 90th Regiment. It acted as the rearguard of a retreating force, consisting of two infantry brigades, two cavalry regiments, and three batteries.

THE BLOCKADE OF WHYDAH.

The port of Whydah, belonging to the negro kingdom of Dahomey, on the West Coast of Africa, is still blockaded, as it has been during several months past, by some vessels of the British naval squadron employed along that coast. No satisfaction has yet been offered by Gelele, the King of Dahomey, for the injuries done to the persons and property of English and other European traders or visitors to the shore over which he claims to reign. The newly-appointed commander of the squadron, Commodore Sullivan, C.B., has now arrived from the Cape, with instructions to open fresh negotiations, and to ascertain whether Gelele is ready to comply with the demands of the British and French Governments if the blockade should be withdrawn. Our illustration of a scene in the roadstead off Whydah is from a sketch by Mr. N. Jay, representing the screw-steamer Africa, on the morning of March 18, sending the mails for the squadron on board H.M. Sirius; the other steamer is a French ship. Whydah is the only seaport of Dahomey, and is situated fifty or sixty miles from Abomey, the capital of that kingdom. Abomey itself is a town somewhat resembling Coomassie, the famous metropolis of Ashantee; but it is smaller, and the palaces and tombs of the first Kings of Dahomey occupy three fourths of the area. The wall is about twenty feet high, surrounded by a broad and deep dry ditch, the receptacle for the trunks of the decapitated victims of "the customs," and on the outer edge of the ditch is a very high and thick hedge of thorns, impassable to man or beast. Lying in all directions around Abomey are other palaces and their peculiar environment of houses, which constitute the capital of Dahomey. The King has several large cannon, mostly of Portuguese manufacture, for the most part dangerously rusted. Of the art of gunnery the Dahomey soldiers know nothing. Many of the cabocers are armed with Snider rifles; but the weapon most in vogue is the Tower musket. This is loaded almost to bursting with bullets, or, failing these, with stones, broken iron pots, crockery, or, in short, anything. They fire from the hip, and both men and Amazons are but very indifferent marksmen. As every man is bound to serve as a soldier if called upon to do so, in an emergency Gelele could perhaps bring 80,000 troops, male and female, into the field. But, except near the capital and in a few open spots near Whydah and Savi, the country is too thickly covered with forest to permit much manœuvring with so large a body. Their general method of fighting is to steal upon the enemy in the night-time, and just before dawn, amidst terrific yells and howlings, to startle him out of his last sleep, when—after the first onset, wherein a dreadful butchery prevails—all try to take as many prisoners as possible, to make as fine a show as circumstances will permit at the ensuing "customs." The King is surrounded by his Amazons, but ere the heat of the fray begins retires to the rear with his own life guard of warriors. We must not, however, fall into the error of supposing that because Gelele is a semi-civilised savage, whose whole trade consists of slave-dealing and cutting off men's heads, we shall have an easy task if we declare war against him. It is considered, indeed, that something can be done from Lagos, and that a way out of the difficulty has been found, thanks to the perseverance shown by Mr. Durness in his late endeavours to find the new and hitherto unknown road to the interior of Dahomey. By the system of lagoons between Lagos and the Whemi River, and afterwards by that river itself, a number of gun-boats can arrive within seventeen miles of Abomey. The country between Dugbah and Abomey is fine and open, and free from swamps. It might easily be crossed by a party landed from the squadron, and the natives of the Whemi country, to say nothing of the tribes from the Denham Waters and the Egba and Yoruba countries, who live in daily dread of the Dahomians, are most eager for an opportunity to revenge the wrongs they have suffered for many years, by joining in an expedition to capture Abomey.

THE LATE SIR JAMES SIMPSON.

We give an illustration of the scene at Edinburgh when the bronze statue of the late eminent surgeon, Professor Sir James Simpson, Bart., recently erected on the terrace near the west end of West Princes'-street Gardens, was unveiled by Lady Galloway in presence of a large assemblage of people. The statue was designed by Mr. W. Brodie, R.S.A., and cast in bronze by Messrs. Masefield and Co., Chelsea. It represents the Professor in a sitting posture, as if in the act of addressing his students. The face is turned towards the left shoulder. The right hand supports one side of a large book that rests on the knees, while the left fingers the pages, as if referring to them for proof of what is being expounded. The professorial robe and hood are turned to account in securing a telling arrangement of drapery. Modelled on the scale of a twelve foot figure, the statue is eight feet high; and in its general effect animation is happily combined with massive repose. It is placed on a pedestal of freestone from Fairloan Quarry, near Hawick, executed by Mr. Thomas M'Ewen from a design by the sculptor.

For the inauguration ceremony preparations had been made by the erection of two covered galleries vis-à-vis, with a low dais, in the space between the statue and the line of Princes'-street. To these subscribers and others were admitted by ticket. The Earl of Galloway, Lord High Commissioner, was accompanied by Lady Galloway, the Ladies Stewart, and several members of his suite. After the Countess had been conducted to her place by the Lord Provost and presented by Miss Brodie with a handsome bouquet, the proceedings were opened with prayer by Professor Duns. Dr. Alexander Wood, in the name of the Memorial Committee, proceeded to hand over the statue to the Lord Provost, as representing the City Corporation. After he had spoken, the statue was unveiled by Lady Galloway, amid the cheers of the assemblage. Dr. Wood, having formally intrusted the monument to the safe keeping of the civic authorities, concluded by stating that the residue of the subscription of £5000, after placing a bust in Westminster Abbey, was to be appropriated in aid of the erection of a new Maternity Hospital. The Lord Provost, in a few sentences, accepted the trust on behalf of the Corporation. Sir Walter Simpson proposed a vote of thanks to his Lordship and the magistrates for undertaking the care of the monument. Lord Kintore proposed that thanks be given to Lady Galloway, and the ceremony was brought to a close. Immediately after the unveiling, wreaths of flowers were placed upon the base of the pedestal by Miss Eva Simpson (daughter of Sir James), and some other young ladies. This is the pretty performance shown in our illustration of the proceedings upon the occasion.

A meeting was held at North Shields on Monday night—the Mayor of Tynemouth, Alderman Green, in the chair—upon the subject of international arbitration. Resolutions were carried expressing a hope that the nations would adopt arbitration as a means of settling their differences, in preference to resorting to the costly and barbarous method of war.

THE BLOCKADE OF WHYDAH: MAIL STEAMER AFRICA SENDING MAILS TO H.M.S. SIRIUS.

UNVEILING THE STATUE OF SIR JAMES SIMPSON AT EDINBURGH.

THE LAND OF MIDIAN, FROM THE GULF OF AKABA.

PALM GROVE ON THE COAST OF MIDIAN.

THE LAND OF MIDIAN.

A territory which has usually been identified with the ancient Midian, familiar by name from the historical chapters of the Old Testament, has lately come once more under general notice. It forms part of the dominions of the Khedive of Egypt, but is situated on the borders of the Syrian and Arabian deserts, on the eastern, or rather north-eastern, shores of the Red Sea. The Gulf of Akaba and the Gulf of Suez are the two branches or head inlets which terminate the Red Sea, towards the junction of the Continents of Asia and Africa, on each side of the peninsula of Sinai, which lies between those two gulfs. On the east coast of the Gulf of Akaba lies the reputed land of Midian, and for years past that country has been supposed to teem with mineral wealth. The Khedive, whose viceregal rule extends to Midian, has long had a desire to put rumour to the test, and he lately asked Captain Burton to make a visit of inspection. A Government frigate was placed at his disposal; a military escort was given him, as turbulent tribes make travel in Arabia no holiday task; a secretary, and an able mining engineer in the service of the Khedive—M. George Marie—were attached to the expedition. The party left Suez on March 21 last, and on April 2 they arrived at Moilah, on the east coast of the Red Sea, at the entrance of the Gulf of Akaba. It is a small port, with a tolerable anchorage and an Egyptian garrison. Thence they took boat to Aiyunah Bay, at the entrance of the Wady, or Valley of Aiyunah, a little to the north of Moilah, on the eastern side of the gulf. These wadys are curious. The coast is divided from the interior by a range of granite and porphyry mountains running about parallel with the sea; but water has worn its way as usual, and these gorges, each with its mountain torrent, occur at frequent intervals. They are barren, rocky places, with no possibility of much culture, and yet they all bear signs of abundant population in times gone by. Large towns, built not of mud, as Arab towns so often are, but of solid masonry such as the Romans used, roads cut in the rock, aqueducts five miles long, remains of massive fortresses, artificial lakes—all these signs of wealth and population are reported by Captain Burton. According to him the reason of it all is not far to seek. The rock is full of mineral wealth. Gold and silver were found by this party, and the former seems to exist in quantity sufficient to repay the labour of acquisition. Quartz and chlorites occur, with gold in them, just as they are found in the gold districts of South America. The party tested both the rock by crushing and the sands of the streams by sifting, and in each case with good result. Tin and antimony they also discovered, and they had evidence of the existence of turquoise mines. Each ruined town had its mining works; dams for the washing of sand and crushed rock were frequently seen; scorise lies about near ancient furnaces; in short, the traces are numerous of a busy mining population in a country which seems to be full of mineral wealth. From Makná (Mugna of the maps), the capital of the Land of Midian, up to Akaba, at the head of the Gulf, Captain Burton reports the country as auriferous, and he believes the district southwards as far as Gebel Hassani—a mountain well known to geographers—to possess the same character. He even goes so far as to say he has brought back to life an ancient California. The correctness of this assertion remains to be proved. But it must be received as the statement of a careful, experienced traveller after a personal survey of the district, and it is supported by the opinion of M. Marie, a skilful mining engineer. Captain Burton has kept elaborate notes, and he maintains that they will bear out his golden views of the Land of Midian. In any case, they will be interesting, as the country is utterly unknown; even the map has yet to be made. The Khedive, of course, is much interested in the complete success of this expedition, and is now very desirous to give practical effect to it. He has asked the Foreign Office to allow Captain Burton to return next winter to assist him in the development of his new gold-fields.

For the important news of these discoveries, startling as it may be, our readers will have been somewhat prepared by the late Dr. Charles Beke's predictions, resulting from his Biblical researches during a period of half a century, but ultimately confirmed by his discoveries in 1874 of Aiyunah, Midian, and other places in the Gulf of Akaba, connected with the exodus of the Israelites, and, finally, by that of the "true Mount Sinai," in Arabia, of which we published views in the *Illustrated London News* of April 18, 1874, and respecting which so much controversy took place at the time.

We are indebted to Mrs. Beke for the sketches now published, which are by Mr. John Milne, F.G.S., who accompanied Dr. Beke on his expedition to the Gulf of Akaba in 1874, and whose geological notes of their journey were published in the *Quarterly Journal of the Geological Society* for February, 1875.

Writing from Akaba, Jan. 28, 1874, Dr. Beke says:—"His Highness the Khedive having been pleased to place the Egyptian steamer *Erin* at my disposal for the conveyance of myself and party to the head of the Gulf of Akaba, we left Suez . . . Jan. 18 and arrived at . . . On our return into the Gulf, as the tempest had not entirely abated, we anchored on the 24th close to the shore at Magna, or Midian, in 28 deg. 23 min. N. lat., behind a point of land and a reef, which, though not a fit anchorage for a large vessel, afforded shelter to the little *Erin*, though we lost here one of our anchors. At Midian, . . . which afforded us an opportunity of going on shore and inspecting the place, a camping-ground of the Benn Ughba Arabs, numbering about 400 souls. The Sheikh, with the main body of the tribe, was away in the interior, a few persons only remaining here to attend to the fructification of their numerous date palms—it is no exaggeration to estimate them at 1000 or more—growing near the beach and along a valley coming from the east, in which there is a perennial stream of water. With the date-trees we saw also several dóm palms, lime, nebbuk, and fig trees; and there were even a few patches of barley carefully protected by hedges of palm-leaves.

"We were on the point of returning to the ship when we were informed of the existence in the vicinity of a holy spot, where it is said the prophet Moses prayed, and over which a 'mosque' had been erected. This was stated to be at one hour's distance from the shore; and as, with these people's vague estimate of distances, it might possibly be much more, I did not feel myself competent to go so far on foot. Mr. Milne walked inland with a servant and a native guide. He proceeded eastward up the valley, along the side of the palm-grove, gradually ascending over a sandstone slope in places worn into hummocks by the water, which during the rainy season finds its way down to the sea, and when about half a mile from the coast he came to a small stream some 3 ft. wide, running in a channel which it had cut in the solid rock. At the point where he struck the stream the water runs prettily over the inclined but irregular surface of the rock, with a fall, or succession of falls, of about 12 ft. in all, winding and losing itself among the palm-trees. The surface of the rock, which is sandstone, in places merging into a conglomerate of granite, diorite, and quartz, in stones some as large as cocoa-nuts, cemented by coarse sand, is here quite clear, so that one walks upon the bare rocks; but at a couple of hundred yards further up the valley the rock is covered with sand, which appears to

be making rapid inroads. So great, indeed, is its encroachment on the date plantations that the Arabs have made hedges round these to protect them from the sand, which hedges, however, are being overwhelmed, and others have consequently to be erected further in.

"On reaching the end of the palm-groves a mound is seen half as high as the tops of the trees, with numerous blocks of white stone lying among the sand, and beyond this there is a good view further up the valley, along which date palms are seen growing in patches. There are also a few dóm palms, one noticeable overhanging the white stones.

"These remains, which are at the utmost one mile from the beach, were found to consist of blocks of alabaster, so white and pure as at first sight to be mistaken for marble, and only proved to be sulphate of lime by scratching it with a knife, and by its non-effervescence with muriatic acid. The blocks are each about three feet long and one foot six inches square, and appear to have been worked with a tool, though the edges are now much rounded by the weather. One of them seems to form a portion of a column. Together with the blocks of alabaster are some of granite, likewise much weathered. As far as a brief and hasty inspection would allow an opinion to be formed, these stones appear to lie in two parallelograms, ranging from north to south, the one within the other, the south end of the inner one being semicircular, and there even seem to be indications of a third range of stones further to the north. But it is difficult to speak with certainty on account of the sand which covers these stones in part, and threatens soon to hide them entirely.

"There are several mounds of sand round about, which may probably contain other remains. This most interesting spot, which requires to be more closely examined, is especially important to me, because I now see that here, at Midian, and not at Aiyunah, must have been the 'Encampment by the Red Sea' of the Israelites.

"Its proximity (half a day's journey) to Magharo Sho'eib, or Jethro's Cave, which I identify with the Elim of the Exodus, and the fact that the stream of running water must have some of its sources at or near that spot, explain why it should not have been mentioned in Exodus xv. 27, xvi. 1, as a separate station, much more satisfactorily than I attempted in page thirty-eight of my pamphlet, 'Mount Sinai a Volcano,' to explain the apparent discrepancy in the two statements of Scripture. The 'Encampment by the Red Sea' of the Israelites, was simply of that at Elim, with its 'twelve wells of water and three score and ten palm-trees,' the two together stretching down the valley, with its living water, from Magharo Sho'eib, or 'Jethro's Cave,' to this 'praying place of Moses' at Midian . . . all serve to show that there is sufficient reason for my hypothesis that this, the Gulf of Akaba, and not the Gulf of Suez, is the Red Sea through which the Israelites passed in the flight from Pharaoh, King of Mizraim."

With respect to Captain Burton's discoveries of gold and precious stones in this country, Dr. Beke wrote in March, 1872:—"As, however, whatever knowledge we possess of Ophir is derived from the Hebrew Scriptures alone, we are not warranted in seeking for it anywhere except where, from a comparison of the various passages in those Scriptures, we find it to be placed by them. And the mention of Ophir in conjunction with the Arabian countries of Havilah and Sheba ought to be conclusive that Ophir itself was in Arabia likewise. Taking this for granted, it shall now be shown how intelligible the whole history of the Tyro-Israelitish trade with the land of Ophir becomes. From 1 Kings ix. 28-28, we learn that King Solomon, having obtained a footing on the shores of the Yam-Suph (Red Sea), in the land of Edom—that is to say, the Gulf of Akaba—opened a trade by sea with Ophir, at the instigation of, and in conjunction with, Hiram, King of Tyre. The practical effect of this joint maritime enterprise was similar to that of the Portuguese in the fifteenth and following centuries. As the modern nation found a way to India by sea round the Cape of Good Hope, and so diverted the commerce of the further East from the overland route through the Levant, so did the Tyro-Israelites open a maritime trade by the way of the Straits of Babelmandel with the countries in Eastern and Southern Arabia, with which they had previously traded overland. As soon, however, as the fleet reached Ophir, the Queen of the adjoining country of Sheba, having become acquainted with the fame of Solomon (1 Kings x. 1), undertook in person an overland journey to his court, taking with her no less than 120 talents of gold—nearly equal to one third of the total quantity (420 talents) brought home by the joint fleet—and of spices very great store, and precious stones: there came no more such abundance of spices as those which the Queen of Sheba gave to King Solomon' (1 Kings x. 10). The avowed object of this lady's visit to the wise King of Israel was 'to prove him with hard questions' (1 Kings x. 1); but it is not impossible that, like the Chinese of modern times when the Russians first visited them by sea, the Sovereign of Sheba and her people were averse to this opening of a new trade in that direction, preferring the continuance of the ancient overland route, which could be more easily kept under native control; and that she brought with her such an abundance of the rich produce of India and Africa by the old road, in order to show how unnecessary the new one was. Be that as it may, this maritime route to Ophir and Sheba did not last long. . . . Under any circumstances, the whole duration of this Red Sea commerce did not exceed two centuries and a half."

The position of Ophir is discussed by Dr. Beke in "Origines Biblicæ," pp. 112-116, and "The Source of the Nile," pp. 60-65, and elsewhere. In conclusion, should the discoveries of Captain Burton be verified, as can hardly be doubted, the Khedive will indeed have cause for congratulation, that, through his usual courtesy and generous assistance to Dr. Beke and Captain Burton, and, indeed, to all travellers bent on scientific exploration and research, this mine of wealth has so opportunely resulted when so greatly needed.

In accordance with annual custom, about thirty gentlemen, being mostly members of the Epping Forest Fund, visited the chief points of interest in the forest on Saturday last.

It appears from the forty-third report of the Commissioners of National Education in Ireland that during last year the comparatively new system of results' fees led to a contribution from the rates in sixty-nine poor law unions of £30,499, and this contribution involved a payment of double that sum from the Parliamentary grant, or a total of £91,499 in results to the teachers of the contributory unions. In addition to this expenditure, in 2698 of the 3272 schools, in non-contributory unions the conditions entitling the teachers to contingent results' fees were fulfilled, and £22,357 was so expended. The Commissioners say of these arrangements that their influence in stimulating local effort in support of the schools is manifested by the fact that in the schools of those non-contributory unions the local subscriptions increased from £7582 in 1875 to £12,486 in 1876, and the school pence of the pupils from £23,978 in 1875 to £34,984 in 1876, or a total increase in local aid of £15,909. The total results' money paid from the Imperial Exchequer was, within the financial year, £108,339, to which may be added £30,499 from the unions, or a total augmentation of teachers' salaries to the amount of £138,839.

OBITUARY OF EMINENT PERSONS.

SIR H. PELLY, BART.

Sir Henry Curstains Pelly, third Baronet, of Upton, Essex, and of Warham Court, Sussex, J.P. and D.L., M.P. for Huntingdonshire, died from a sunstroke he received while riding in Hyde Park, on the 4th inst. He was born April 23, 1844, the eldest son of Sir John Henry Pelly, Bart., by Johanna Jane, his wife, youngest daughter of the late John Carstairs, Esq., of Stratford-green, Essex, and Woodhurst, Hunts, and succeeded to the baronetcy at his father's death, Dec. 20, 1864. Sir Henry received his education at Harrow, and joined the 2nd Dragoons in 1865, from which he exchanged into the 2nd Life Guards in 1867. He was Aide-de-Camp to the Duke of Abercorn, K.G., during his first tenure of the Viceroyalty of Ireland, and retired from the Army in 1873. He sat in Parliament for the county of Huntingdon, in the Conservative interest, from February, 1874, till his demise. He married, Nov. 27, 1872, Lillian Harriet, second daughter of Lord Elcho, and leaves two daughters, Annie Evelyn and Constance Lillian. The title devolves on his half-brother, now Sir Harold Pelly, fourth Baronet, who was born in 1863.

SIR W. L. GRIFFIES-WILLIAMS, BART.

Sir Watkin Lewis Griffies-Williams, Bart., of Llwyny-Wormwood, Carmarthenshire, died on the 23rd ult. He was born in 1800, the fourth son of Sir George Griffies-Williams, first Baronet, by Anna Margaretta, his second wife, daughter of Herbert Evans, Esq., of Highmead, in the county of Cardigan, and succeeded to the baronetcy in 1870 on the death of his brother, the Rev. Sir Erasmus Henry Griffies-Williams, Bart. Sir Watkin entered the Indian Army in 1819, and attained the rank of General in 1871. He served during the Burmese War, 1824-6, at the siege and storming of Punnah and capture of Munnohur, 1844-5, and in the second Burmese War, 1852. He was never married, and is consequently succeeded by his only surviving brother, now the Rev. Sir David Herbert Thackeray Griffies-Williams, fourth Baronet, Rector of Penboyr and Vicar of Llandeveisant, and of Llanvihangel Aberbythic, in the county of Carmarthen.

THE BISHOP OF SODOR AND MAN.

The Hon. and Right Rev. Horatio Powys, D.D., Lord Bishop of Sodor and Man, who died at Bournemouth on the 31st ult., aged seventy-two, was the third son of Thomas, second Lord Lilford, by Henrietta Maria, his wife, eldest daughter and coheir of Robert Vernon Atherton, Esq., of Atherton Hall, in the county of Lancaster, and was uncle of the present Lord Lilford. He received his education at Harrow, and at St. John's College, Cambridge, where he graduated in 1826. He was Rector of Warrington from 1826 to 1854, in which year he was consecrated Bishop of Sodor and Man. His Lordship married, Feb. 21, 1833, Percy Gore, eldest daughter of William Currie, Esq., of East Horsley Park, Surrey, and leaves issue.

ADMIRAL SIR STEPHEN LUSHINGTON, G.C.B.

Admiral Sir Stephen Lushington, G.C.B., Knight of St. Louis, and of the Redeemer of Greece, Knight Commander of the Legion of Honour, died on the 28th ult., at Oak Lodge, Thornton Heath, Surrey, aged seventy-three. He was the second son of Sir Henry Lushington, second Baronet, of South Hill Park, Berks, by Fanny Maria, his wife, eldest daughter of Matthew Lewis, Esq., Under Secretary at War, and sister and coheir of Matthew Gregory Lewis, Esq., M.P., the romance writer. He entered the Royal Navy in 1816, and served for several years in the Mediterranean. From 1848 to 1852 he was superintendent of the Indian Navy, and he served with distinction in the Crimea, commanding the Naval Brigade on shore at Sebastopol. For some time he was in charge of the South American Station, and in 1862 he was appointed Lieutenant-Governor of Greenwich Hospital. Sir Stephen, who had received several foreign decorations, was made a K.C.B. in 1855, and a G.C.B. in 1867. He became Admiral on the Reserved List in 1865. He married, in 1841, Henrietta, daughter of Admiral Sir Henry Prescott, K.C.B., and had two daughters, Henrietta, and Agnes, wife of Henry Kirke, Esq., of The Eaves, Derbyshire.

MR. TAIT.

John Tait, Esq., of Harviestoun, in the county of Clackmannan, and afterwards of Montagu Lodge, Blair Logie, for many years Sheriff of Clackmannan and Kinross, and subsequently of Perthshire, died at his residence, Great Stuart-street, Edinburgh, on the 22nd ult., in his eighty-second year. He was eldest son of Craufurd Tait, Esq., of Harviestoun, by Susan, his wife, daughter of Sir Ilay Campbell, Bart., Lord Succoth, Lord President of the Court of Session, and was consequently brother of the late Colonel Thomas Forsyth Tait, C.B., Commander of Tait's Irregular Cavalry, Bengal, and of the Most Rev. Archibald Campbell Tait, present Archbishop of Canterbury. Mr. Tait was educated at Harrow, Geneva, and Edinburgh, and in 1819 was called to the Scottish Bar. He was for some time Convener of the Sheriffs of Scotland and Vice-Dean of the Faculty of Advocates. He married, April, 30, 1824, Mary Amelia, daughter of Francis Sitwell, Esq., of Barmoor Castle, Northumberland, and by her, who died Jan. 29, 1845, leaves one son and two daughters.

The deaths are also announced of—

Charles Long Crafer, late of her Majesty's Treasury, at Ventnor, on the 22nd ult., aged seventy-eight.

Henry Hunt, M.D., F.R.C.P., formerly of Dartmouth, on the 25th ult., aged seventy-five.

Major-General Hamilton Charles Smith, late commanding 80th Regiment, on the 29th ult., at 29, Norfolk-crescent.

John Fowler, Esq., of Parnacott, Devon, J.P. and D.L., at his seat near Holworthy, on the 30th ult., aged ninety.

The Rev. Wilkinson Affleck Peacock, for twenty-nine years Rector of Uleby-cum-Fordington, in the county of Lincoln, on the 29th ult., aged sixty-two.

Patrick Hugh O'Connor, Esq., of Dundermott, in the county of Roscommon, J.P. and D.L., High Sheriff in 1860, died recently, aged thirty-nine. He was a descendant of a branch of the great house of O'Connor of Connaught.

John Hackblock, Esq., late of Brockham, Warren, Surrey, J.P., on the 24th ult., at Slaney Park, in the county of Wicklow, aged seventy-five. He was brother of Mr. William Hackblock, sometime M.P. for Reigate, and at one time was a merchant in London.

Lady Elizabeth McClintock, on the 31st ult., in her ninety-seventh year, at Corrig House, Kingstown. Her Ladyship was the third daughter of William Power, first Earl of Clancarty,

and widow of John McClintock, Esq., of Drumcar, in the county of Louth, father (by his first wife) of the present Lord Rathdownell. Lady Elizabeth McClintock was one of a family of fourteen, amongst whom were the last Countess of Rathdowne, the last Viscountess Castlemaine, and the last Archbishop of Tuam.

Frederick William Irby, Esq., of Boyland Hall, Norfolk, J.P. and D.L., High Sheriff, 1852, on the 1st inst., at 18, Chester-square, aged seventy. He was eldest son of the late Rear-Admiral the Hon. Frederick Paul Irby, C.B., of Bayland Hall, second son of Frederick, second Lord Boston.

Her Majesty Sophia Frederica, Queen of the Netherlands, at the Hague, on the 3rd inst., in her fifty-ninth year. Her Majesty was daughter of William I., King of Wurtemberg, and was married, June 18, 1839, to William III., present King of the Netherlands, by whom she had two sons, William Prince of Orange, born Sept. 4, 1840, and Prince Alexander, born Aug. 25, 1851.

Christopher Neville Bagot, Esq., of Anghrue Castle, in the county of Galway, J.P., on the 23rd ult. Mr. Neville Bagot, youngest son of Thomas Neville Bagot, Esq., of Ard and Ballymoe, in the county of Galway, by Ellen, his wife, daughter of John Fallon, Esq., of Runnimead, went many years ago to Australia, realised a considerable fortune, and on his return purchased the estate of the late Denis Kelly, Esq. He married, Aug. 8, 1875, Alice Emily, daughter of the late Sir William Verner, Bart.

WILLS AND BEQUESTS.

The will and codicil, both dated June 27, 1876, of Mr. George Head Head, late of Rickerby, Cumberland, who died on Dec. 12 last, have been proved at the Carlisle district registry by Miles MacInnes, the acting executor, the personal estate being sworn under £160,000. The testator, subject to the payment of a considerable number of legacies and annuities, including £1000 to the British and Foreign Bible Society, devised and bequeaths all his real and personal estate to his relative, the said Miles MacInnes, and he desires him by all lawful means to take and use the name of "Head" and to bear the arms of that family.

The will and codicil, dated Jan. 3, 1873, and Oct. 18, 1876, of Mr. Charles Townsend Hook, late of Snodland, Kent, paper manufacturer, who died on Feb. 11 last, were proved on the 12th ult. by Edward Sedgfield, Isaac Gunton, and Henry Eddow Keene, the executors, the personal estate being sworn under £160,000. The testator leaves upon trust for his brother Eustace and his children, £10,000; to his mother, Mrs. Anna Maria Hook, £500 and his freehold house Veles for life; to the General Conference of the New Church, £1000, the interest of which is to be applied in augmentation of the salary of the minister at Snodland; to his executors, £100 each; to Miss Drummond, £100; to his clerk, Henry Brown, £50; to each of his workmen who have not been less than seven years in his employ, £5, to be invested in the Post-Office Savings Bank; and the whole of the rest of his property to his three sisters, Miss Edith Anna Hook, Miss Maud Midsummer Hook, and Miss Agnes Darlington Hook.

The will, with four codicils, dated March 26 and Nov. 13, 1873, July 10, 1876, and Jan. 22 and April 21, 1877, of Mrs. Lucy Sarah Jarman, formerly of Brenley House, near Faversham, and late of No. 63, Montagu-square, who died on the 6th ult., was proved on the 24th ult. by the Rev. John Conant and Frederick Sutton, the executors, the personal estate being sworn under £70,000. The testatrix gives very numerous legacies, and the residue of her estate to her nephew, the said Frederick Sutton.

The will, dated Feb. 15, 1877, of Mrs. Eleanor Ann Roach, formerly of Parson's-green, Fulham, and late of Paris, who died on the 7th ult., was proved on the 18th ult. by George Matthews Arnold, the acting executor, the personal estate being sworn under £50,000. Subject to the payment of her just debts, funeral and testamentary expenses, the testatrix gives all her real and personal estate to her daughter, Mrs. Elizabeth Harriet Roach.

The will, dated May 24, 1843, of Mrs. Mary Dunkin, formerly of Torrington-square, and late of No. 32, Campden-hill-gardens, Kensington, who died on April 7 last, was proved on the 11th ult. by Mrs. Mary Fenning, the daughter, one of the residuary legatees named therein, the personal estate being sworn under £25,000.

The will, dated Aug. 15, 1870, of Mrs. Maria Browne, late of No. 120, Inverness-terrace, Bayswater, who died on the 1st ult., was proved on the 11th ult. by the Rev. Robert Henry Nibbett Browne and the Rev. Edward Slater Browne, the sons of the deceased, the executors, the personal estate being sworn under £25,000.

The will of the late Mr. John Pemberton Heywood, banker, was proved last Saturday in the Liverpool district registry. The personality was sworn under £1,900,000. After the payment of various bequests the residue, which will amount to about £1,250,000, is left to Mr. Lonsdale, his nephew, who is sole residuary legatee.

Deputy Chief Constable Stretten, of the Cambridgeshire constabulary, has been presented with a silver salver and a purse of 400 sovereigns, raised by public subscription, in recognition of his services during the past quarter of a century.

The Corporation of Wolverhampton is about to remodel the east part of the town, at a cost of £160,000, under the provisions of the Artisans' Dwellings Act.—At a meeting of the Birmingham Town Council held on Tuesday the finance committee reported that arrangements had been made for an advance to the Corporation by the Bank of England of a further loan of £500,000, at 3½ per cent interest, upon the security of the borough rates, for the purchase of lands for the purpose of the improvement scheme about to be effected in the town under the Artisans' Dwelling Act. The report was approved.

A handsome timber pier at Carrick Castle, Lochgoil, Argyleshire, was recently opened in presence of Major-General Sir John Douglas, of Glenfinart; Lady Elizabeth Douglas; the Rev. Mr. Craig, Ardentinny; Mr. John Turner, Mr. James Keydon, Glasgow (factor to Sir John), Mr. James Stewart, and Mr. M. Tavish. When the first steamer from Glasgow arrived at the pier a goodly number, including the company just named, disembarked. Each was provided with a new penny, and, headed by Sir John, passed through the wicket and paid his coin, the pence so collected being placed in an antique casket, and presented to Lady Elizabeth as a remembrance of the event. Luncheon was laid out on tables in the field near the ancient ruin; and, after the usual loyal and patriotic toasts had been disposed of, the health of the lord and lady of the manor was proposed, the gallant officer acknowledging the compliment. The speakers expressed the belief that the construction of the pier would induce gentlemen in Glasgow, Paisley, Greenock, and other towns to take feus along the shore, and that in this way there would soon be another rising watering-place in the Firth of Clyde.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

LANEY AND COPIING.—The solution of the problem referred to commences with 1. B to R 3th.

E B and W L.—Your problems are still under examination.

J G F (Hampshire).—Thanks for the problem. You are still in error as regards No. 1735, as you will discover on reference to the solution below. The answer to 1. Kt to Kt 4th is 1. B to K sq, after which there is no mate in two more moves.

J C W (Honor Oak).—The problem shall have our best attention. We think our readers, however, prefer problems in two or three moves to those requiring a greater number for the solution.

H E K (Liverpool).—All excellent, as usual. Please accept our best thanks.

J W (Temple).—The games are altogether too weak for this column. Thanks for your compliments.

CORRECT SOLUTIONS OF PROBLEM No. 1734 received from L. Mabilly, N. Bumbelow, M. W. E. J. P. Taylor, W. N. Payne, and Bishop's Pawn.

CORRECT SOLUTIONS OF PROBLEM No. 1735 received from H. Beermann, Highway Institute, F. Dennis, L. Mabilly, and Oakley.

CORRECT SOLUTIONS OF PROBLEM No. 1736 received from H. B. G. W. Stevens, Cant. Triton, T. Edgar, M. Hawkins, H. Stanfield, S. Adams, L. Burnett, A. Mackenzie, G. Wright, G. F. Brooke, E. Esmond, N. Hastings, Only Jones, B. R. Stone, Tallyho, E. Worsley, J. Lyndford, T. W. H. East Marden, G. H. V. E. H. R. V. W. S. B. G. Reeves, M. Whiteley, Nicholas, F. G. V. Leonard, A. Leon, H. Burgher, J. S. SOLUTION OF PROBLEM No. 1735.

WHITE. BLACK. 1. Kt to Kt 6th B to K sq 2. Kt to K 6th (ch) K to Q 4th 3. Kt (from Kt 6th) takes P. Mate. 4. If 1. K to Q 5th, 2. Kt takes Kt (ch); if 1. P to Q 4th, 2. Q to Kt 5th (ch); if 1. B to Q 5th, 2. Q to R 5th (ch); and if 1. K to Q 3rd, 2. Q to Kt 5th (ch), &c.

PROBLEM No. 1738.

By J. NEUMANN.

BLACK.

WHITE.

White to play, and mate in two moves.

THE COUNTIES CHESS ASSOCIATION.

A capital game played at the last meeting of the Counties Chess Association, between Professor WAYNE and Mr. THOROLD.—(Philidor's Defence.)

WHITE (Prof. W.) BLACK (Mr. T.) 1. P to K 4th P to K 4th 2. Kt to K B 3rd P to Q 3rd 3. P to Q 4th P to K B 4th 4. Q P takes P B P takes P 5. Kt to Kt 5th P to Q 4th 6. P to K 6th Kt to K B 3rd

The sacrifice of the exchange here is highly characteristic of Mr. Thorold's dashing style. B to B 4th is still more effective should White continue with 7. Kt to B 7th; but 7. Kt takes K P is a good reply to that move.

7. Kt to B 7th Q to K 2nd 8. Kt takes R P to K 3rd 9. B to K 2nd P to Kt 3rd 10. Castles B to Kt 2nd 11. B to K Kt 5th

Much better than 11. Kt takes P. The gain of a Pawn would not compensate White for the disadvantage of an open file upon his castled King.

11. B takes Kt P to B 3rd 12. Kt to B 3rd Q to K 2nd 13. P to K B 3rd Q to K 2nd

This assault upon Black's imposing-looking centre is exceedingly well timed.

14. Castles P takes P 15. P takes P P takes P 16. Q R to Q sq P takes P

16. Kt takes K P Kt takes Kt 17. Kt to Q B 4th, White can reply with 17. Q to K 4th, &c.

17. B takes Q Kt takes Q 18. B takes R Kt takes R 19. B to Kt 5th B takes Kt P, and Black has won another Pawn.

20. B to Q 4th Q to B 4th (ch) 21. B to K 3rd Q to Q 3rd 22. B to R 3rd K to Kt sq 23. B to B 4th K to K 4th 24. Q to Q 4th R to K sq

We think 21. Kt to K R 4th, threatening to win the Queen by 22. Kt to B 6th (ch), is the best move at this point. If, in reply to that move, White plays 22. B takes Kt,

CHESS IN LONDON.

The following amusing affair occurred in the contest for the Trophy of the Working Men's Club and Institute Union, between Mr. KEATS of Bermondsey and Mr. LOUIS CORNÉ, one of the most promising young players of the day. (Vienna Game)

WHITE (Mr. C.) BLACK (Mr. K.) 1. P to K 4th P to K 4th 2. Kt to Q B 3rd Kt to K B 3rd 3. P to K B 4th Kt to Q B 3rd 4. Kt to K B 3rd P to Q 4th 5. P takes Q P Kt takes P 6. P takes K P B to K B 4th 7. Kt to K 4th B to Kt 3rd 8. P to Q 4th Kt takes P

Anticipating 9. Kt takes Kt, when he could have regained the piece by the check of the Queen at K R 5th.

9. B to K Kt 5th Kt takes Kt (ch) 10. Q takes Kt Kt to K 2nd

WHITE (Mr. C.) BLACK (Mr. K.) 11. B to Kt 5th (ch) K to B sq 12. R to Q sq B to Q 5th 13. B to Q B 4th B to K B 4th 14. B takes Kt (ch) Q takes B 15. Q takes B B takes K P 16. R to Q 7th Q to Q Kt 5th (ch) 17. Kt to Q 2nd B to B 3rd 18. R takes P (ch) White mates in a few moves.

CHESS INTELLIGENCE.

On Friday last a match was played between the City and the University of Dublin, the former represented by Messrs. Hunt, Pim, Tuthill, A. White, Wollett, and Captain Melhado, the latter by Messrs. Cherry, Goodbody, Hoyte, Leahy, A. Mease, and C. Mease. The University team, which was chiefly composed of young players, suffered a total defeat, their more experienced adversaries winning all the games played on the occasion.

DR. SCHLIEMANN'S RESEARCHES AT MYCENÆ.

At the last meeting of the Royal Society of Antiquaries, in Burlington House, on Thursday week, Mr. C. T. Newton, C.B., of the British Museum, read a paper on the objects recently found by Dr. Schliemann at Mycenæ. Lord Carnarvon was in the chair. Mr. Newton explained that since his return from Mycenæ he had been engaged investigating the very remarkable discoveries made by Dr. Schliemann, and he proposed that evening to give them the result of his work. He stated that there was in the British Museum a small collection of ancient pottery which had been presented by Professor Ruskin. It was from Ialysus, in the island of Rhodes, and there was not only a resemblance in the form of articles found at Ialysus and Mycenæ, but there were also points of identity in the style of the ornament. One of the most remarkable similarities was connected with the octopus, or cuttle-fish; representations of that form of marine life were common among the gold objects at Mycenæ. In the fictile vases from Ialysus there was a peculiar ornament, to which Mr. Newton had at first paid little or no attention, but since his late return from Greece it had attracted his observation, and, to assist his inquiries into what was more strictly a branch of natural history, he had called into his counsels Professor Owen. It was a sort of "inquest" on this animal, and the verdict of that very high authority on such matters was "octopus." It must be understood that it was the octopus in a conventional form. A representation of it, from one of the Ialysus vases, is here given to illustrate this very curious discovery, which is not only important in connection with archaeology, but also in relation to the history of ornamental art. One of the peculiarities of the designs found at Mycenæ and Ialysus is that of scrollwork, which wanders in a wild and "lawless" manner over the field of the design. This the lecturer considered to be a development derived from the tentacles of the octopus. The probable truth of this suggestion will be evident from the illustration which we give below.

Other points of analogy between Mycenæ and Ialysus were noticed. One was the almost total absence of glass in both places, a few objects of a semi-transparent kind only having been found. Mr. Newton pointed out that the fragments of pottery found in the so-called Treasures at Mycenæ were different from those found in the graves of the Acropolis, and the conclusion as to date would be only approximate; but the more geometric designs of the Treasures would be after the supposed date of the Trojan War; while the objects found in the Acropolis, with its octopus scroll patterns and freer designs, were no doubt as early, if not earlier, than the story of the "Iliad." The small Juno or Hera idols, of which Dr. Schliemann found so many at Mycenæ, are also found at Ialysus. Mr. Newton afterwards referred to the curious stone circle which stood over the graves which he considered to have been the Agora or Forum of Mycenæ. We may be justified in calling attention to the fact that this explanation was first suggested in the pages of the *Illustrated London News*, and that it will be found in the Number for March 24 of this year, in the description of the spot, given by our Special Artist, Mr. W. Simpson, where he refers to the passage from the *Iliad* in the description of the Shield of Achilles, showing how a court is held and the elders sit upon polished stones "in a sacred circle." This passage Mr. Newton quoted, and also referred to Mr. Paley's letter to the *Times*, in which he pointed out a passage in Euripides which mentions "the Circle of the Agora" in the Acropolis of Mycenæ. Having the high authority of Mr. Newton that this is the most probable explanation of this unique monument, a passage from Sophocles may be pointed out bearing upon it, one which has puzzled Greek scholars. The passage describes Artemis, "who sits on the circular throne of the Agora." This now presents no difficulty, and shows the light which Dr. Schliemann's explorations are throwing on classic literature.

At the end of Mr. Newton's paper there was a discussion, in which Dr. Schliemann, Mr. Watkiss Lloyd, Mr. William Simpson, and Mr. Gardner took part, and Lord Carnarvon summed up.

It will be observed that Mr. Newton has been lecturing at the Royal Institution upon the same subject this week.

A resolution in favour of disestablishment was carried by 460 to 78 votes, at the meeting of the General Assembly of the Free Church of Scotland, on Thursday week.

The several orders of the Bedfordshire local authority, made in pursuance of the cattle plague order of 1877, prohibiting or restricting the movement of cattle into the county of Bedford have been revoked.

Sir Walter Wyndham Burrell, M.P., was elected Right Worshipful Grand Master of the Order of Freemasons for the County of Sussex at a large and influential meeting assembled at the Royal Pavilion, Brighton, on Saturday afternoon. The installation ceremony was followed by a dinner.

The committee of the Peace Society have unanimously adopted a resolution of thanks to Mr. Henry Richard, M.P., for his "noble and courageous protest" on behalf of peace whilst presiding as chairman at the recent annual meeting of the Congregational Union of England and Wales.

The final meeting of the general committee of the Thunderer Relief Fund was held on Thursday week at the Dockyard, Portsmouth; Admiral Elliott, the Commander-in-Chief, presided. The audited accounts showed that £10,560 5s. 10d. had been received from subscriptions, with £185 1s. 7d. interest upon deposits in the National Provincial Bank. The sum of £2992 7s. 9d. had been expended in relief.

Notice has been received from the Post Office of India (under which the British Postal Agency at Zanzibar is conducted) that the postage of letters, &c., for Zanzibar must be fully prepaid in future, or they cannot be forwarded to their destination. The following rates of postage must therefore be prepaid upon correspondence for Zanzibar:—Via Brindisi—Letters, 8d. per half oz.; newspapers, 2d. per 4 oz.; books and patterns, 3d. per 2 oz. Via Southampton, or any other route—Letters, 6d. per half oz.; newspapers, 1d. per 4 oz.; books and patterns, 2d. per 2 oz.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, JUNE 16, 1877.

The prorogation of the French Parliament for a month has swiftly run out the appointed term. The resumption by the Legislature of its legal functions promises to be signalled by one of the severest party struggles of late days. It is matter of deep regret both for France and for Europe that the contest has been so abruptly and unnecessarily provoked. Of this, however, we have already spoken, and hence are under no urgent obligation to drag the attention of our readers over ground already familiar to them. The question of immediate interest concerns the future action of the Chambers, more particularly of the Chamber of Deputies. The political freedom of France is for the present in the hands of the Representatives elected by Universal Suffrage. They are, as is well known, preponderately Republican—Republican, at least, to this extent, that they desire, whether from political sympathy or patriotic expediency, to retain and to consolidate the Constitution devised by

the late National Assembly and ratified by a large majority of the Electors of France. That Constitution appears to be in danger. The authority of the people, legitimately expressed, is being challenged, with a distinct view to its overthrow, by a Government of reactionists, who look upon it with the utmost distrust. The Duc de Broglie and M. de Fourtou have been resolutely and indefatigably employed during the four weeks' prorogation curtailing in almost every conceivable fashion the legitimate action of the Republican Party; in changing Prefects, sub-Prefects, Judges, Justices of the Peace, and other administrative officials; in preventing political meetings, shutting up clubs, impeding the circulation of adverse newspapers and pamphlets; in gagging public opinion, so far as that opinion is suspected to be in harmony with the lines of the Constitution. All this must be in view of an approaching Dissolution. Probably, whatever happens, no second prorogation will be resorted to, for an assent of the Senate to an appeal to the Electorate will probably be given.

The issue of the Elections appears to be counted upon with some confidence by M. de Broglie as well as by M. Gambetta. Much will depend, of course, upon the attitude taken up by the Government on the one hand, and by the Parliamentary majority on the other, in the Chamber of Deputies during the Session about to be resumed. Hitherto, the provocation likely to render a Dissolution inevitable has proceeded from the ruling Executive power. The Republicans have exercised marvellous self-restraint under the unfair pressure to which they have been subjected. Naturally, each leader would be anxious to put himself into the best possible position for securing the final vote of the Electors of France. The interview recently accorded by Marshal MacMahon to the Delegates of the Legitimist Party shows that he intends to confine the contest within strictly legal limits. "I shall lend myself," said he, "to no *coup-de-main* of any kind whatever. Let me also tell you that I shall lend myself to no venture of Imperial or Monarchical restoration." If the Senate should, after all, refuse its concurrence in the Dissolution of Parliament, the Marshal, seeing two to one against him, would resign. But what he will do in case of the return of a large majority of Republicans to the Chamber of Deputies at the next General Election he has nowhere intimated. Outside of his own circle there are not two opinions as to the course which he should take.

The tactics apparently agreed upon by the Republican Party combine, as far as we can see, firmness with courtesy. On the very first sitting of the Chamber of Deputies, M. Gambetta, on behalf of the Parliamentary majority, will probably submit to the House an interpellation, or, at any rate, demand the appointment of an early day that he may do so, drawn up in forcible terms and implying want of confidence in the present Administration. The motion will probably be carried by 350 members against about 150. This decisive demonstration will not drive M. de Broglie from office. The Chamber of Deputies, he is expected to argue, is not the sole arbiter of public affairs in France. The Senate has equal authority, and manifestly inclines to a different line of politics. It will be requisite, therefore, to postpone for a moment merely political questions, and to vote the Budget with as little delay as possible. The Chamber will meet this demand by professing its readiness to grant whatever money may be required to meet immediate wants, such as two hundred millions of francs to complete the National Defences. But, relying upon precedents, it will probably refuse to discuss grants of public money, implying trust and confidence in the existing Administration, on the ground that the Government asking them has been constituted in the spirit of enmity to the National Representation, and in violation of the Constitution. Thereupon, it is supposed that the Deputies will refuse to entertain a discussion of the Budget, and nothing will remain to the Cabinet but an application to the Senate for the Dissolution of the refractory House. As we have already intimated, the issue of that appeal is exceedingly uncertain. The expectation is that it will go against the Government, not in the Senate, but in the constituent bodies. Should the verdict of the Nation be in support of the Republican majority, as against the aggressive course taken by Marshal MacMahon, he would have to signify his submission by taking his Ministers from the ranks of the majority, or, considering that step as repugnant to his dignity as President of the Republic, resign his post or resort to a *coup d'état*. The last alternative is looked upon as out of the question, both as regards the character of the Marshal and the circumstances of the case. The first will, no doubt, be sufficiently humiliating; but, on the whole, it would seem that the most likely penalty he may have to pay for having acted on the advice of his back-stairs advisers will be that, with whatever repugnance, he will be compelled to submit to a Cabinet with whose views he cannot personally agree, and therewith rub on to the end of the Septennate.

There is one ground of consolation, and only one, to those who watch from afar the progress of this conflict. "The battle of France," as the *Times* remarks, "is to be fought at the hustings and not in the streets. The issue is to be sought in balloting-urns and not across barricades." Midst much confusion and turmoil, and at no little sacrifice of her present commercial prosperity,

France will be learning the first great lesson of Constitutional life—the submission of a minority to the legally expressed will of the majority. Thenceforth her course may be more tranquil than it has ever been before, and the time may not be far distant when the principles of Parliamentary Government will be fairly understood and firmly established in that foremost of Continental States.

THE COURT.

The Queen and Princess Beatrice attended Divine service on Sunday at Crathie church. The Very Rev. Dr. Tulloch, Principal of St. Andrews, officiated. Her Majesty and the Princess have made daily excursions on Deeside, and have visited Glen Gelder Shiel Allanaquoich and other picturesque localities. The Queen and the Princess paid a visit to Mrs. George Clark at Allanaquoich. The Right Hon. Lord Odo Russell, her Majesty's Ambassador at Berlin, has been on a visit to the Queen at Balmoral. Her Majesty has received at dinner the Rev. Dr. Tulloch, and Dr. Robertson, of Hopewell. Lord John Manners is the Minister in attendance upon the Queen.

The Queen's ball, announced for Wednesday next, will be postponed to Friday next, in consequence of the former day having been fixed for the funeral of the late Queen of the Netherlands. Her Majesty's first concert will take place on Wednesday, the 27th inst.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess, after attending the wedding of Mr. Albert Grey and Miss Holford on Saturday last, accompanied by Princes Albert Victor and George, went to Hurlingham and witnessed the games of lacrosse and polo. The Prince Imperial visited the Prince and Princess. On Monday their Royal Highnesses, with their children, left Marlborough House for Easthampstead Park, near Bracknell, where they have entertained the Duke of Cambridge and a large party during the Ascot week. The Prince and Princess, with various members of the Royal family, have attended Ascot races, proceeding there in the customary semi-state.

The Princess has consented to distribute the prizes at the schools of the Chapel Royal, Savoy.

ARRIVAL OF THE EMPEROR AND EMPRESS OF BRAZIL.

The Emperor and Empress of Brazil arrived at Claridge's Hotel on Wednesday from Paris. Their Imperial Majesties were received on landing at Folkestone by his Excellency the Brazilian Minister and the members of the Legation, who accompanied the Emperor and Empress in a special train to Charing-cross.

DEATH OF THE GRAND DUKE OF HESSE-DARMSTADT.

Louis III., Grand Duke of Hesse-Darmstadt, died at Darmstadt on Wednesday, aged seventy-one. He is succeeded by his brother, Prince Carl, born April 23, 1809. He married, Oct. 22, 1836, Princess Elizabeth of Prussia, cousin to the present Emperor of Germany, and their eldest son, Prince Louis, the husband of Princess Alice of Great Britain, is now the heir-apparent to the Grand Dukedom.

Princess Christian, upon her last birthday, sent a valuable present of clothing and toys for distribution to the children in the "Helena" ward at the Children's Hospital, Great Ormond-street.

On Friday week Princess Louise was present at a representation of passages from the second part of Bunyan's "Pilgrim's Progress," which was given at Grosvenor House, Park-lane, by the family of Mr. and Mrs. George Macdonald, in aid of the funds of the National Orphan Home, Ham-common, Richmond. Princess Louise and the Marquis of Lorne dined with the Marquis and Marchioness of Hertford last Saturday at Hertford House, Connaught-place, and were present at the Marchioness's reception. The Princess and Prince Leopold have consented to patronise a performance, to be given at the Opéra Comique on Saturday afternoon, June 30, in aid of the funds of the Victoria Hospital, which is situated in Gough-square, Queen's-road, Chelsea. The Marquis of Lorne is going through a course of instruction in gunnery at the Royal Military Repository, Woolwich.

The Duchesse of Edinburgh left Coburg on Tuesday for Potsdam, travelling via Jüchenheim, en route to Tsarskoié Selo.

The Grand Duke of Mecklenburg-Strelitz dined with the Earl and Countess of Wilton on Saturday last.

The Duke of Cambridge dined with the Marquis and Marchioness of Donegall at their residence on Saturday.

The Duke and Duchess of Teck have passed the Ascot week at Cumberland Lodge with Prince and Princess Christian.

The Duc d'Aumale has arrived in town from France.

General and Mrs. Grant, with their son, have returned to London from a visit to their married daughter, Mrs. Algernon Sartoris, at the residence of her father-in-law, Mr. Edward Sartoris, Warsash, Hants. The presentation of the freedom of the city of London to the ex-President was arranged to take place at the Guildhall yesterday.

FASHIONABLE MARRIAGES.

The marriage of Mr. Albert Henry George Grey, son of the late General Hon. Charles Grey, and nephew of Earl Grey, K.G., with Miss Alice Holford, youngest daughter of Mr. Robert S. Holford, was solemnised on Saturday last, at St. George's Church, Hanover-square. The bridegroom's cousin, the Hon. Frederick Wood, was best man. The bridesmaids were Miss Holford and Miss Grey (sisters of the bride and bridegroom), Lady Louisa Beauclerk, Lady Mary Lindsay, the Hon. Cicely Burrell, and Miss Violet Lindsay. The bride, who was given away by her father, wore a dress of ivory-coloured antique satin duchesse with long train, flounced and trimmed with point de gaze. She wore a diadem of sprays of orange-blossoms, fastened to the hair by five diamond marguerites, the gift of Mr. and Mrs. Holford, and a large tulle veil. The jewels comprised a necklace of pearls, also the gift of her parents; a diamond and ruby pendant, the gift of the Hon. Mrs. Grey; a bracelet set with emeralds and pearls, the gift of the Prince and Princess of Wales; and a diamond and pearl brooch and ear-rings en suite, the gift of Colonel and the Hon. Mrs. Loyd-Lindsay. The bridesmaids were dressed in pale blue cachemire princess gowns, with lace sleeves and chemisettes, and muslin caps and Indian bangles, gifts from the bridegroom. The Hon. and Rev. John Grey, Rector of Houghton-le-Spring, performed the ceremony, assisted by the Hon. and Rev. Francis R. Grey, Rector of Morpeth, and the Rev. Edward Capel Cure, the Rector. The wedding party reassembled at Dorchester House, Park-lane, where Mr. and Mrs. Holford received several hundred guests at breakfast on the auspicious occasion. The Prince and Princess of Wales, Princess Louise of Lorne, and the Marquis of Lorne were present. The bride and bridegroom left for Lockinge, Colonel Loyd-Lindsay's seat in Berkshire, to spend the honeymoon. The wedding presents were very numerous. The Queen sent a large gilt clock; Princess Louise of Lorne, a

black carved table with marble top; the Duke of Connaught, a pair of silver candlesticks; Prince Leopold, a set of four silver-gilt salt-cellars.

Marriages are arranged between Earl Annesley and Mabel, eldest daughter of Colonel and Mrs. Markham; between Lady Elizabeth Adeane and Mr. M. Biddulph, M.P.; between Lieut.-Colonel the Hon. R. Trefusis, of the Scots Guards, and Lady Mary Scott, the youngest daughter of the Duke and Duchess of Buccleuch; and between Mr. Duncan Macneill and Miss Louisa Agnew, daughter of Sir Andrew Agnew, Bart., of Lochnaw, and Lady Louisa Agnew.

METROPOLITAN NEWS.

The last and most successful show of the Royal Botanic Society for the present season took place last Wednesday.

The Lord Mayor was, at the Mansion House Police Court, on Saturday presented with a pair of white kid gloves, in consequence of there being no charge for hearing.

Sir Joseph Hooker, the president of the Royal Society, had a soirée on Wednesday night at Burlington House, when several hundreds of friends honoured him by their presence.

Wednesday night was both call night and "grand" at the Middle Temple, and among the guests were Lord Derby, Prince Edward of Saxe-Weimar, and most of the Judges.

On Wednesday evening the sixty-second festival of the Caledonian Asylum took place at the Freemasons' Tavern—the Duke of Buccleuch in the chair. Subscriptions amounting to upwards of £1000 were announced.

The annual meeting of the Women's Protective and Provident League will be held on the 19th inst., in the large room of the Society of Arts. Miss Helen Taylor will preside, and the attendance of distinguished social reformers is expected.

The marriage of Major William Francis Butler to Miss Elizabeth Sutherland Thompson, painter of the "Roll-Call" and other well-known battle-pieces, took place on Monday, at the Church of the Seven Dolours, Fulham-road. Cardinal Manning and Father Antonino officiated.

The awards in the exhibition of models of vessels of various descriptions, held at the Fishmongers' Hall, under the auspices of the Shipwrights' Company, have been made; and the prizes will be presented by Lady John Manners, at the Fishmongers' Hall, next Friday, the 22nd inst.

The memorial stone of a new building in connection with the Field-lane Institution was laid on Wednesday afternoon by Lord Shaftesbury, on a site in Vine-street, near Gray's-inn-road. Later on his Lordship presided at the annual meeting of the institution in the Refuge on Little Saffron-hill.

Mr. Henry Smith, F.R.C.S., has been elected Professor of Surgery at King's College to fill the vacancy caused by the death of Sir William Ferguson. Mr. Smith has been upwards of sixteen years assistant and full surgeon at King's College Hospital.

Lord Salisbury, Lord Derby, Midhat Pasha, and Dr. Schiemann were guests of the Merchant Taylors' Company on Monday night. Referring to the Eastern Question Lord Salisbury remarked, with regard to the anxiety felt on the subject of India, that there were no grounds for apprehension, an opinion with which Lord Derby coincided.

To-morrow being Hospital Sunday in London and its suburbs, the Lord Mayor, as president and treasurer of the fund, has made an appeal to the generosity of all classes to give at least something in proportion to their means in return for the daily relief that is being afforded by our medical charities to those whose sickness or injury requires treatment.

The Caxton Exhibition at South Kensington will be opened by Mr. Gladstone on the 30th inst. Mr. Gladstone will deliver an address, which will be immediately after printed in old Caxton type. The Queen has lent a book—the Mantz Psalter—valued at £3000, to the exhibition. This is the first printed book bearing a date—viz., 1457.

A numerously-attended meeting of the citizens of the ward of Lime-street was held on Wednesday afternoon in the ward school-room, St. Mary-axe, for the purpose of presenting a testimonial to Mr. Alderman Cotton, M.P., in recognition of the manner in which he performed the duties pertaining to the office of Lord Mayor last year, and also as Alderman of the ward. The testimonial has taken the form of a massive and carved oak dining-room suite of the value of 300 guineas.

The ninth anniversary dinner of the French Hospital and Dispensary took place last Saturday evening at Willis's Rooms, under the presidency of the Marquis d'Harcourt, the French Ambassador. M. Eugène Rimmel, hon. secretary to the institution, read a report of last year's operations, showing that 155 in-patients and 4616 out-patients had been relieved. He announced a list of subscriptions amounting to about £1000, the Duc d'Aumale giving £100.

The executors of the late Mrs. Bunning, widow of a former City architect, have presented to the Corporation of London, for the use of the Guildhall Library, two pictures by David Roberts, R.A., the one "The Nave of St. Stephen's, Vienna," and the other "A Street in Antwerp," of the value of £1150. In accordance with Mrs. Bunning's will, they had been offered to the Government to be added to the National Gallery; but the offer was declined, with the explanation that enough specimens of the artist's work were already hung there.

The Horse Show at the Agricultural Hall closed yesterday week, among the visitors being General Grant and the Kashgar Envoy. During the jumping Mrs. Riddle and her horse fell into the centre of the pond, when she was not able to disengage herself, and the horse kicked with great violence. When everybody appeared apparently paralysed, not knowing what to do, a gentleman entered the water and cut the stirrup straps. Mrs. Riddle was then extricated from her perilous position amid the loud cheers of the spectators.

Mr. Leopold de Rothschild on the 7th inst. laid the foundation-stone of a new Temple of the United Synagogue at St. Petersburg-place, Bayswater. It will be built in Greek-Byzantine style, by Mr. N. S. Joseph and Mr. Audsley, architects, at a cost of £18,000, of which £8000 has been subscribed and £4000 granted by the United Synagogue. Mr. de Rothschild said it was now seven years since his father, Baron Lionel de Rothschild, laid the foundation-stone of the Central Synagogue, and since then seven of these sacred buildings had been consecrated.

Mr. Slater-Booth, M.P., President of the Local Government Board, accompanied by Earl Stanhope, on Saturday last officially inspected the Exmouth, which has taken the place of the Goliath as a training-ship for the pauper boys of London. The right hon. gentleman, having distributed the prizes given for proficiency and meritorious conduct, addressed the lads, and pointed out the advantages which had been afforded them by the excellent training they were receiving in being made proficient to take their places in her Majesty's Navy or the mercantile marine of their country.

Mr. Lowe, M.P., presided at a meeting on Wednesday in the Social Science Rooms, Adelphi, of the committee formed to raise a testimonial to Mr. John Simon, F.R.S., late medical officer to the Privy Council and Local Government Board. It is proposed that the testimonial shall assume the form of a marble bust of Mr. Simon, to cost £500, for presentation to the Royal College of Surgeons.

Sir Charles Reed, as Chairman of the London School Board, presided on Monday at the opening of new board schools in Westminster, the first built in this large division. The reason why only this one school has been built by the board in Westminster, while 152 have been erected in other parts of the metropolis, is owing to the fact that Westminster is generally well provided for as regards education. The schools opened on Monday night to meet the wants of the crowded district in and around the Horseferry-road give accommodation for 613 children.

A public meeting in connection with Princess Louise's Home and National Society for the Protection of Young Girls was held on Monday at the Mansion House—the Lord Mayor presiding. It was stated that the object of the society, whose "home" is at Wanstead, is "to educate, train, feed, clothe, and prepare for domestic servants" young girls between the ages of eleven and fifteen; and that, since its establishment, over 1100 orphans or girls in danger of being abandoned had been saved by it. The Lord Mayor and other gentlemen enlarged upon the claims of the institution.

At the weekly meeting of the School Board for London held on Wednesday—Sir Charles Reed presiding—a deputation representing the National Health Society presented a memorial asking that steps be taken for the opening of the playgrounds attached to the board schools after school hours both to the children of these schools and to other children of the several neighbourhoods. The memorial was referred to the works and the school management committees. Professor Gladstone, chairman of the select committee on spelling reform, presented a report on the subject, which gave rise to a discussion, ending in the report being sent back to the committee.

At a meeting of the Royal National Life-Boat Institution on Thursday week the silver medal of the institution and its thanks inscribed on vellum were voted to Hiram Lineker, one of the crew of the New Brighton life-boats, in acknowledgment of his long and gallant services in the boats since the first formation of the station. Rewards amounting to £180 were granted to the crews of other life-boats for recent services in saving life from shipwreck. Further payments amounting to £2330 were ordered to be made on some of the 266 life-boat establishments of the institution. The receipt of various contributions was announced. Several new life-boat stations were ordered to be formed on different parts of the coast of Scotland.

There were 2348 births and 1429 deaths registered in London last week. Allowing for increase of population, the births exceed by 111, and the deaths by 80, the average numbers in the corresponding week of the last ten years. The deaths included 58 from smallpox, 65 from measles, 19 from scarlet fever, 6 from diphtheria, 40 from whooping-cough, 16 from different form of fever, and 16 from diarrhoea. These 220 deaths were 17 below the corrected average number from the same diseases in the corresponding week of the last ten years. The deaths referred to diseases of the respiratory organs, which had steadily declined from 355 to 259 in the four preceding weeks, were 251 last week, and exceeded the corrected average weekly number by 53. The duration of registered sunshine in the week was 70.3 hours out of the 111.6 hours that the sun was above the horizon.

THE DISASTER AT BATH.

Our front-page Engraving shows the scene of this frightful accident, which was mentioned last week. It happened on Wednesday week, upon the arrival of a special train about eleven o'clock, with several hundreds of people to see the exhibition of the Bath and West of England Agricultural Society. There was, adjoining the Great Western Railway Station, a foot bridge over the river Avon, leading to the suburb of Widcombe, where the Agricultural Exhibition was held. The bridge was private property, belonging to Messrs. Hickes and Isaac, architects and surveyors, Mr. S. G. Mitchell, builder, and Mr. Bruce. A halfpenny toll was charged for passing over it. It was a suspension bridge, 30 ft. or 40 ft. above the river, which has steep banks, with a high wall on the Widcombe side. The structure was a bow-string girder bridge, of wood and iron, about 180 ft. span and 12 ft. wide. It was never intended to bear a very great weight, and broke down under that of a dense crowd of people, nearly two hundred, waiting to get past the toll-house at the Widcombe end of the bridge. The crash was fearful; half the unfortunate persons, men, women, and children, fell into the water. It would have been still worse, but the whole bridge did not fall at once; the Widcombe end of it seemed to hang a moment on the edge of the towing-path below, so that many had time to leap or scramble ashore. The water is 10 ft. deep at this place; and some were drowned, while others suffered fatal hurts from the fall, being dashed against the abutments or fragments of the bridge, or crushed by the falling timbers. The confusion and alarm were terrible; but several boats came to the rescue, with the rafts used by the workmen building a new railway bridge higher up the river. Ropes and ladders were also placed to ascend the steep and slippery banks. The people were thus got out of the water, but eight of them were dead; forty or fifty of those injured were taken to the Royal United Hospital or to the Southern Dispensary and the inns or private houses in Claverton-street. Most of them belonged to the families of small farmers in Somersetshire and Dorsetshire. The surgeons who promptly attended were Mr. H. C. Hopkins, Dr. Hensley, Messrs. R. Biggs, G. E. Lawrence, H. W. Freeman, and Cowen. The police, under Major Wilkinson, seem to have done their duty. The water of the river was afterwards drawn off to search for dead bodies. An inquest has been held upon the deceased; and Colonel Yolland, inspector from the Board of Trade, has opened an official inquiry at the Bath Guildhall. One of those injured, Mr. John Milborne, of Yeovil, died on Wednesday; and Mr. Milton, a tradesman of Bath, is said to be in a precarious state.

The Devon and Cornwall industrial training-ship Mount-Edgcombe, given by the Admiralty and fitted at Devonport Dockyard, was on Wednesday inaugurated by being towed to her moorings off Saltash. She is a first-class man-of-war, formerly called the Winchester, but re-named Mount-Edgcombe in respect to the Earl, who is chairman of the committee.

The council of the Royal Horticultural Society have resolved to hold a great provincial horticultural show in June, 1878, at Preston, in Lancashire, and the needful guarantees have been secured with a view to a good local special prize fund, in addition to the prizes offered by the Royal Horticultural Society. Mr. T. M. Shuttleworth, of Howick House, Pres-on, has undertaken the office of local secretary.

STEEL TORPEDO-VESSEL USED BY THE RUSSIANS ON THE DANUBE.

A. Captain or Steersman. B. Torpedist. C. Stoker. D. Engineer.
SECTION OF STEEL TORPEDO-VESSEL.

1. American Torpedo-Vessel Alarm.

2. Outrigged Torpedo-Pinnace Attacking an Ironclad.

4. Electrical Pinnace with Countermines.

3. A Launch Laying Down Submarine Mines to Protect Entrance to Harbour.

5. Whithead Torpedo.

ILLUSTRATIONS OF TORPEDO WARFARE.

TORPEDO WARFARE.

The Russian operations on the Danube are now inviting attention to this destructive arm of the service. We offer some illustrations of the chief of the present recognised systems. In so doing, it may be well to remark that the experiments of our own Government, and those of other Great Powers, have rather been directed to the use of torpedoes at sea than to their employment for holding a river such as the Danube, about half a mile wide, against an immensely superior force. But the late daring feat of planting a torpedo against the side of a Turkish ironclad gun-boat will probably be followed by other equally hazardous and perhaps successful attacks, if the Turks are unwise enough to permit their ironclads or other vessels of deep draught to remain within those narrow waters. It will be observed, however, on the other hand, that the more recent failure of a similar attack on a Turkish ship at the Sulina mouth of the Danube, on Sunday last, and the sinking of two Russian torpedo-boats by the ship's guns, has moderated some of the opinions that were expressed a week or two ago concerning the irresistible power of this novel instrument of warfare.

As yet we know of no more formidable ocean-going torpedo-vessel than the American despatch-vessel *Alarm*, designed by Admiral David Porter, of the United States Navy. This vessel has a length of 172 ft., including the snout or ram, which projects 32 ft. from the stem; her breadth of beam is 27 ft. 6 in., and she draws 11 ft. of water, with a displacement of about 700 tons. She is built of iron, with double sides and bottom, divided into water-tight compartments. She carries three cylinders, one at the snout and one on each side. By these cylinders, or hollow spars of iron, which are 18 ft. long at the sides and 32 ft. long forward, either of two kinds of torpedoes might be placed against the hull of the enemy's ship. One is a modification of the Whitehead or fish torpedo, to be detached and darted off; the other kind is a fixed spar-torpedo, to be held and thrust forth. There are other vessels, such as the *Lightning*, constructed by Messrs. Thornycroft for our own Government, which are fitted to carry the fish torpedo. These have been inspected by privileged visitors, but the exact details of the mechanism are carefully concealed from the general public.

It is efficient to be told that the Whitehead torpedo is a cigar-shaped steel cylinder, 14 ft. to 19 ft. in length and from 14 in. to 16 in. in diameter. It is to be sent, requiring no crew, against the ship to be destroyed; and if one torpedo fails to deal the death-blow, another and a third can be sent after the enemy without much trouble or expense. This torpedo consists of three compartments—head, centre, and tail. The head contains the explosive, say 360 lb. of gun-cotton; the central chamber holds the machinery, and mechanism for regulating it, so as to remain at the depth at which the torpedo is to travel under the water-line; and the third part holds the supply of compressed air for the engine. The motive power is supplied by a small engine, capable of indicating 40-horse power, but so compact that it can be made to weigh only 35 lb. The working pressure of the air in the tail is usually about 100 lb. per square inch; and the quantity carried is sufficient to propel the large torpedo 200 yards, at a speed of twenty-five miles an hour, or about 1000 yards at a speed of seventeen miles.

We lately gave an illustration of the *Lightning*, which can steam about nineteen miles an hour. She is to be armed with one of the cylinders, from which any number of the Whitehead fish torpedoes can be ejected one after another. These little boats glide so noiselessly and rapidly up to the ships they attack that they can with difficulty be hit by cannon-shot; and at night, or in fog or smoke, while almost unseen, from their colour and size, can project their torpedoes with comparative safety to themselves.

A Fish Torpedo should be capable of piercing the protective nets that are suspended from booms around an ironclad. Whether such nets, made of rope and wire or any other material, will effectually keep off the torpedoes remains to be seen. But probably, if the net is sufficiently strong to keep out the Whitehead torpedo, or to divert its course, this net will be so heavy as seriously to impede the manœuvring power of the big ship, and expose her to the equally great danger of being rammed.

Outrigger Torpedoes, made of wood or steel, may be carried by large vessels over the bows or sides, either attached to booms above water or propelled through cylinders below the water-line, as just described. They can be fired on contact, or at will, by electricity.

Small steam-launches, or gigs propelled by steam, or other motive power, and steered by electricity, either from the shore or from a large vessel, or by one man on board the launch, and carrying one or more of these torpedoes, will prove most formidable. They may be used even in a general fleet action, fought in mid ocean, if the water be sufficiently smooth for their use. Generally they will be manned by a crew, and, under cover of gunsmoke or the darkness of night, will be likely to render a good account of their work.

It has been suggested that Holmes's distress signal, capable of emitting a very strong white light at a distance of more than a mile, or some other illuminating power, may be employed by the enemy's ships to discover the movements of torpedo attack. But it is most unlikely that any of the big ship's guns could hit one of these steam-launches. And the mere fact of the big ship having to fire these shots would disclose her position, and would, instead of being a deterrent, aid the approach of the torpedo-boat armed with these infernal machines. It is difficult enough by daylight to hit one of these fleet little vessels; but in comparative darkness, or with a flickering light, it becomes the merest chance whether the gunner, even when thus forewarned, could bring his gun sights to bear upon them. As means, therefore, of defence against the most powerful ships of war, it may be sufficient for ordinary vessels to carry one of these torpedo-boats either at their davits or in special compartments, with a few torpedoes, keeping them in readiness to detach at a moment's notice.

The explosive—usually gun-cotton—held in a tin and secured to the boom-end of the torpedo, is fired on striking the vessel's side, or, if desired, by electricity, when within a few feet of it; the length of the spar being so arranged that the explosion does not injure the launch carrying it. For this purpose a bow-screen is fitted to prevent the upheaved water coming on board the launch. A charge powerful enough to sink an ironclad can be fired at a distance of 20 ft. from the bow of the launch without damage to the launch or its crew.

A very useful torpedo-boat, recently designed by Messrs. Yarrow and Co., of Poplar, for the Russian Government, is now in use on the Danube. We shall probably hear something of her doings before long. Although, like most vessels of her class, liable to derangement from gun-fire, she possesses special advantages. In the first place, she is built of light steel, has great speed, and is whale-backed, which serves to throw off the seas, to give greater height in the engine-room, and more readily to deflect rifle and mitrailleuse bullets. Her funnel is placed on one side, to allow the steersman clear sight ahead, and the free passage of the torpedo boom. Forward she carries a torpedo secured to the end of a steel boom, which

boom is rigged out, from the ordinary position on top of the launch, just before closing with the enemy, and the torpedo is lowered ten feet beneath the water-line before the desired contact. Two similar booms, each carrying a torpedo pivot on the top of a kind of martello tower, or look-out turret, are on the afterpart of the vessel; these swing right around the stern, from one boom to the other, and are so adjusted that they can be made to submerge themselves at the right moment. In fact, they perform to the torpedo-launch the same duty that Harvey's torpedo does to the full-sized man-of-war, and give her the choice of bow on, side, or stern attack, a most important consideration where the boats are so fragile. By steering alongside and then using a stern torpedo, the launch puts herself in the best position to run away and remove herself from the effects of the explosion, which must always be extremely dangerous, however well conducted. To reduce the chance of tackling the launch or running it down, an admirable addition has been made to this boat by fitting two iron out-rigger beams with powerful heel-springs. They project many feet over the bows, and act as fenders or crushers, saving the launch from that certain destruction which would happen if she were caught by the enemy at the moment of collision or missing her object. Again, these outriggers perform the very needful duty of steadying the bow torpedo boom; for, when the boat travels at a high rate of speed, it not infrequently happens that a boom without guys is buckled up, and rendered useless, just when the critical moment arrives.

The value of this small class of torpedo-boat must be universally admitted, and we should like to see a fleet of them held in readiness to assist in protecting our shores and colonial harbours, especially as they are so inexpensive, and involve but a small loss of money and life if they be unfortunately destroyed. It is marvellous to think of the vast and rapid advance that has been made in torpedo warfare. We might refer back to one of the submarine boats—in shape and size intermediate between the Whitehead and the torpedo launch—which the Confederates used in the American war. This boat finally blew up with a torpedo the Housatonic sloop of war, and then disappeared herself, after killing three crews, consisting of twenty-four men, in her several attempts. But with the torpedoes and boats used nowadays such a loss of life to the attacking party is quite impossible, while certain destruction seems to await the enemy's big ship if a sufficient number of fast torpedo-boats can be brought against her. The torpedo-boats, probably, under all conditions in future, will have to be met by similar boats and torpedoes.

Another illustration shows a launch placing ground torpedoes, or submarine mines. Such defences are of great use in protecting a harbour or shipping of inferior force from the fire of an enemy. This class of torpedo consists of an iron case, part of which contains the charge and fuse, and the remainder is the air-space for buoyancy. It is held in position, a few feet beneath the surface of low water, by a chain, which is secured to an iron mooring-block. Two or more lines of mines are necessary: they can be fired by the enemy striking them, or by electricity at the desired moment when two observers stationed at points well situated for getting lines of intersection note the enemy exactly over the position of a mine. Each torpedo might contain 250 lb. of gun-cotton. We may suppose 100-ft. spaces to exist between neighbouring mines on the same line, and some 500-ft. spaces between each of the lines crossways, over which series of two or three independent lines an enemy would have to pass before entering the harbour. Should the first explosion fail the torpedo on No. 2 line will be fired as soon as the vessel crosses, and finally, if necessary, the torpedo on No. 3 line. The inside line would usually be supplied with circuit-closers in addition to the means of firing them on cross bearings and signal; these circuit-closers being always rendered active when darkness or thick weather sets in. To ensure the greatest accuracy in firing the torpedoes by cross bearings, telescopic firing keys have been designed, so that all that is necessary is for the observer to watch the approaching vessel through the spy-glass, and, whenever its movement brings the firing key over one of the points, the position of a mine, to press it down to close the break in the circuit.

The only way to clear an entrance into a harbour through this defence is by means of countermines suspended from casks or buoys, drifting them either by the current or the wind into the desired position, and then exploding them. A charge of 500 lbs. of gun-cotton is calculated to destroy all submarine mines within an area having a radius of 120 yards.

The following is a more particular description of the steel torpedo steamer which has been built by Messrs. Yarrow and Co., at Poplar, for the Russian Government, and the interior of which is shown in a side-section, among our illustrations:—

The steersman will be seen in the forward end of the vessel. He has the entire movements of the boat under his control. He not only steers, but also regulates the speed of the engines. To protect his head from being struck by shot, he is provided with a kind of steel helmet, perforated with holes at the level of the line of vision, for him to look through. Close to him, in the same compartment, will be seen the torpedoist, who regulates the inclination of the pole which carries the torpedo at its forward extremity. He also fires the torpedo by means of electricity at the proper time. The torpedo itself simply consists of a copper case filled with a charge varying from 30 lb. to 50 lb. of dynamite, which is amply sufficient to sink any vessel afloat. The remaining two men seen on board are to attend to the boiler and machinery, all of them being protected by a rifle-proof steel shield or deck. This vessel is provided with one bow-pole only; but Messrs. Yarrow and Co. sometimes fit two poles, so as to ensure a greater certainty of success. In working this class of boat the engines are reversed immediately before the torpedo comes in contact, so that the boat may recede after the explosion as quickly as possible out of harm's way; but for further security Messrs. Yarrow and Co. fit the steel girder, which will be seen projecting about 12 ft. from the bows of the boat. It is arranged to slide back under considerable pressure, thereby, in case of collision, gradually reducing the forward motion of the launch. The illustration shows the pole and torpedo as they are previous to being lowered into the water, which is done the very last thing, when within a few feet of the vessel to be blown up. The torpedo when lowered is 20 ft. from the boat and 10 ft. below the surface of the water. The boat's speed is eighteen to twenty miles an hour, and it is capable of steaming 150 to 200 miles.

An extra hour has been granted by the Benchers of the Inner Temple for their gardens to remain open to the public in consequence of the great number of poor children who come to them, the time being now extended to nine.

With the view of promoting uniformity in the dress of seamen in the Navy, the Lords of the Admiralty have directed that the flannels of seamen shall be cut square across the breast, and close up to the neck—so as to afford more protection to the chest—with a narrow half-inch blue binding round the neck, the wearing of sleeves being optional.

THE WAR.

We present this week four or five Sketches taken by our Special Artists with the Russian and Turkish Armies on the banks of the Danube, besides a series of very useful little Maps of the neighbourhood of several important towns and fortresses, both on the Bulgarian and on the Roumanian side of that river, which have been sufficiently described in our former notices of the localities of the impending campaign. The Russian engineers and pioneers are shown, in one of these Sketches, employed in finishing the construction of a battery which was first begun, a few weeks since, by the Roumanian artillery, on the river-bank near Oltenitza. This shore is low and flat, whereas the opposite Turkish position, at Turtukai, rises to height of 300 ft. or 350 ft. above the Danube, so that the Turks have been enabled, with their Martini-Henry breechloading rifles, to shoot at the Russians working on the battery. Our Artist was there at the time, and heard many a bullet whistle past his head while he continued sketching, but not one man was hit by the Turkish fire. Another of our Special Artists, who is still at Rustchuk, the headquarters of the Turkish Commander-in-Chief, sets before the reader's eye a "squad" of Turkish artillery recruits practising their regular drill. They seem to be learning the knack of taking "sights" for laying the guns in a field battery; and we see them, with rifles mounted on tripod rests, studying the long-range practice, in the camp of Hassan Pasha. One of the Turkish post-houses along the Danube is the subject of a passing Sketch. The ceremony of bestowing decorations on fifteen soldiers and seven officers of the Roumanian army, the first of them who were under fire at Oltenitza, though really not at all in danger from such a distant cannonade, has been thought worthy of an illustration. It was performed by Prince Charles of Roumania, accompanied by the Princess, his wife, in the Cotrotcheni Field, at Bucharest, on the 23rd ult. The Prince is shown in the act of placing the decorative ribbon and badge on the breast of General Manu. It has been said, however, that the small Roumanian army will not, after all, be permitted to cross the Danube, and that the Servians likewise will not be allowed by Russia to join the war, lest the Austrian Government should take alarm at the spread of active hostilities to the westward in the direction of its Slavonic provinces.

The portrait of two Grand Dukes, the Emperor of Russia's brothers Nicholas and Michael, commanding respectively his armies on the Danube and in Asia, have been given in our Journal. We now present that of another brother, the Grand Duke Constantine, who is High Admiral of the Russian fleet. He was born Sept. 21, 1827, being therefore several years older than the Grand Dukes Nicholas and Michael. He is married to a daughter of the late Duke of Saxe-Altenburg, and has six children. The portrait is from a photograph by Bergamasco, of St. Petersburg.

There has been little apparent progress in the military operations of the Danube since our last week's report of them. The time and place of the Russian army crossing that river in main force cannot yet be predicted with certainty. There has been a feigned advance or chance encounter not far from Rustchuk; on Tuesday night a party of Russians opposite Martin went out in vessels to attack a Turkish monitor, but the latter, supported by the land battery, repulsed them. Next morning the enemy sent a working party to construct a battery, but they could not withstand the fire of the Turks, and were compelled to retreat. The whole affair is considered of no moment. The waters of the Danube are rapidly subsiding.

There is a Turkish despatch from Sulina giving details of the attack upon Turkish monitors by six torpedo-boats early last Sunday morning. Four of the latter came from Sebastopol and two from Odessa, having been brought by the steamer Constantine. Five of them succeeded in reaching the monitor *Idjaleh*, but the explosion they produced did no damage, thanks to the able manœuvring of the monitor. Two of the torpedo boats were sunk by her fire. Six men belonging to the crews of the torpedo-boats were made prisoners; one of them was an Englishman. A reward of 80,000f. had been promised them if they succeeded in firing the torpedoes underneath the Ottoman ships.

We learn from the Herzegovinian frontier that Suleiman Pasha, after a sanguinary battle with the Montenegrins, forced the entrance to the Duga Pass and advanced rapidly on Nicsics, driving the enemy before him, totally defeated. Suleiman Pasha states that his junction with the other two army corps is imminent.

In Asia, too, the Turkish position is said to have improved. It is said that the forces under Moukhtar Pasha have succeeded in driving the Russians out of Olti. This intelligence is corroborated by a telegram, which adds that before leaving the former place the Russians threw a quantity of arms and ammunition into the river. The Turkish troops afterwards occupied Olti. The Russian preparations for attacking Kars continue. The latest intelligence from Kars states that on Friday last week three attacks were made by the Russians against Fort Tahmaz, which was erected in 1855 by General Fenwick Williams to strengthen the defence of Fort Veli Pasha, regarded as the key to Kars. On the Friday and Saturday other attacks of a determined character were made upon Kars, the result of which is not yet known. The Turks, after having occupied Olti, continued their march in the direction of Ardahan. A Russian detachment has been sent from Ardahan to reinforce the army of the centre.

The Egyptian additional contingent of troops, numbering 6000, has been sent from Alexandria, under an escort of four Turkish ships of war. The Sultan's Government has finally rejected all the demands of the Cretans or Candians for self-government. An insurrection of that island, and a war between Turkey and Greece, may be considered imminent.

The Turkish Chamber of Deputies has voted a forced loan of five millions sterling, to bear 10 per cent interest, and to be levied on all classes of the people. The Emperor of Russia has ordered his Finance Minister to raise a foreign loan of fifteen millions sterling, at five per cent interest, in £20 bonds, redeemable by annual drawings to a certain amount.

The Government have offered £500 reward for the discovery of the murderer of Mr. Young, J.P., of Harristown, County Mayo; and £900 has been subscribed locally for the purpose.

Notice has been given by the Post Office that arrangements have been made to dispatch a mail for Australia and New Zealand by the Pacific Steam Navigation Company's steamer *Lusitania*, leaving Plymouth on the 28th inst. The mail will be made up in London on the evening of the 27th inst., and all letters and newspapers intended for dispatch should be marked "per steam-ship *Lusitania*."

Information has been received at Lloyd's that the train which left the city of Mexico for Vera Cruz at midnight of May 16 was attacked between Mexico and Tepexhan, and ten cases containing 27,292 dols. 71c. were stolen. These dollars were intended for shipment per the *Ville de Bordeaux* mail-steamer for St. Nazaire, and were insured at Lloyd's.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Yesterday week the Duc de Broglie received a Legitimist deputation, which urged that the Ministry should be remodelled in accordance with the views of the Royalist party. In reply, the Duke stated that Marshal MacMahon had no intention of asking for a prolongation of his powers. He would retain office until 1880, but did not propose to hold it beyond that time, and thereby shut out hopes which were justified by the Constitution. This statement is said to have been confirmed by the Marshal himself.

M. Gambetta attended a banquet at Amiens last Saturday, and, in reply to the toast of his health, delivered a speech upon the political situation in France, in which he expressed the utmost confidence in the answer which will shortly be given to the question whether the nation approves the recent course of the Government.

M. Bonnet-Duvergier, President of the Municipal Council of Paris, was yesterday week sentenced by the Tribunal of Correctional Police to fifteen months' imprisonment and a fine of 200*fr.*, on the accusation of having, at an illegal meeting, used expressions insulting to the President of the Republic. M. Chambord, a member of the Municipal Council of St. Denis, and MM. Alexandre and Boyer, were at the same time convicted of having organised an illegal meeting—the two first named being sentenced to two months' imprisonment and a fine of 1000*fr.*, and M. Boyer to one month's imprisonment and 500*fr.* fine.

A public lecture on Diderot, which was to have been given in Paris, has been prohibited by the Minister of the Interior. The police also have prohibited the holding of a private meeting upon the electoral pledges given by the Deputies of the Seine to their constituents.

On the 5th inst. the annual fête of the British Schools at Paris took place, and was honoured by the presence of Lord Lyons and a large number of friends and patrons. The children, to the number of upwards of ninety, were plentifully entertained with roast beef and plum pudding.

M. Victorien Sardou, the dramatic author, has been elected a member of the Academy by 19 votes, against 17 obtained by the Duc d'Audiffret-Pasquier, the other candidate.

The biennial prize of the Paris Institute of 20,000*fr.*, set apart this year for the Fine Arts, has been awarded to M. Chapu, sculptor.

The field for the Grand Prize of Paris was only seven strong, and resulted in favour of Count Lagrange's St. Christophe; Count de G. Juigné's Jongleur being second, and Baron Rothschild's Strachino third.

The review of the garrison of Paris is fixed for July 1. The Bishop of Nantes, died at Rome last Saturday morning.

ITALY.

The monument erected in Rome to the memory of the Duke of Genoa was unveiled on Sunday, in presence of King Victor Emmanuel, the Royal family, the authorities, and an immense crowd. Signor Selopis delivered the inaugural address, and much enthusiasm was displayed.

In the Chamber of Deputies on Tuesday a bill was discussed for the reduction of the tax on movable property. The Government adopted a proposal of the committee to add to the bill a temporary clause by which all persons liable to this tax, and now inscribed on the register for municipal and Parliamentary elections, are to retain the franchise, although the amount of taxation paid by them under the new law may fall below 40 lire, the sum which gives the right to vote.

The result of the municipal elections in Rome is a complete victory for the Liberals, not one Clerical candidate having been returned.

The Pope continues to give audiences. Last week he received the Irish pilgrims, who were led by Cardinal Cullen and the Bishops of Elphin, Down and Connor, Achonry, and Galway. Their offering amounted to £14,000 in money, and a number of valuable gifts. On Saturday he received the Vicar Apostolic of the eastern district of Scotland, who presented an album containing the signatures of 9312 Catholic children of his vicariate. He also presented a similar album with the signatures of 9875 children from the western district of Scotland, together with some other offerings. On Sunday the Pope gave audience to representatives of the Roman Catholic press from all parts of the world. They were led by Monsignor Tripodi, and Monsignor Parocchi, Archbishop of Bologna, who was himself once a journalist, and who read an address in the name of the press. A number of gifts were presented. The Spanish journalists offered a valuable collection of gold coins. The journalists present numbered about 400. On Monday the Pope received a deputation of Hungarian pilgrims; and on Tuesday he received Mgr. Moreno, Vicar Apostolic of California, who, in the name of Lower and Upper California, presented to his Holiness the sum of 45,000*fr.*, accompanied by an address bearing numerous signatures. One thousand Spanish pilgrims were also received by his Holiness.

HOLLAND.

It is announced that the funeral of the late Queen is to take place with much pomp at Delft, on the 20th inst.

The Government has opened an architectural competition, in which foreigners are allowed to take part, for the erection of a new university building at Leyden. The author of the best plan will be intrusted with the execution of it or receive a prize of 5000*fl.*, and the author of the second best plan will receive a prize of 2500*fl.*

BELGIUM.

The Chamber of Representatives has passed, by 56 to 46 votes, a bill for the prevention of electoral frauds. The House has adjourned until the 19th inst.

SWEDEN.

The Second Chamber has negatived the demand of the Government to provide means for the maintenance of Swedish neutrality, the Finance Committee having reported such provision to be, in their opinion, unnecessary.

AMERICA.

A Washington telegram states that the Cabinet has resolved to prosecute the perpetrators of the Mountain Meadow massacre until all those who participated in it have been punished. If the Mormons resist, which is hardly expected, Federal troops will be sent to enforce the decisions of the legal tribunals.

Mr. James Russell Lowell has been appointed United States Minister to Spain instead of ex-Congressman Kasson, appointed Minister to Austria.

CANADA.

A telegram from Ottawa states that the Canadian Cabinet has been modified, the Hon. E. Blake becoming President of the Council, Mr. Laflamme Minister of Justice, and the Hon. J. Cauchon Minister of Inland Revenue.

THE CAPE COLONIES.

Special advices from the Transvaal state that the news continues to be satisfactory. The Dutch farmers and native-born inhabitants have petitioned the Queen expressing their loyalty and asking her Majesty to appoint Sir Theophilus Shepstone administrator.

INDIA.

The *Times'* correspondent at Calcutta, in a telegram dated Sunday, says that the recent rains seem to have done much good in nearly all the famine districts, and there is a marked decrease in the numbers on the works.

A factory is established in Kansas City for the exportation of preserved rat's meat to China.

The Windsor Castle sailed from Gravesend on Sunday for Brisbane, Queensland, with 355 emigrants—viz., 148 men, 144 women, and sixty-three children.

Colonel Wyndham has obtained from the King of Burmah 4000 acres of land, to the east of the city of Mandalay, for the purpose of cultivating cotton.

Accounts received from the Pachalic of Tripoli and Barbary state that an area of one hundred miles of country has been devastated by locusts.

An exhibition and market of machines and implements used in flour-mills, bakeries, breweries, distilleries, and in the corn trade will be opened in Vienna on Aug. 20, in connection with an international grain and seed fair.

CHURCH.

PREFEMENTS AND APPOINTMENTS.

Armstrong, Alfred Thomas, to be Honorary Canon of Manchester Cathedral.
Baldwin, A. W., Chaplain of York Castle.
Bower, Avarard Hollier Spring; Vicar of Ringland, Norfolk.
Bromley, Francis; Vicar of St. James's, Benwell, Newcastle-on-Tyne.
Butler, Lord Theobald; Chaplain to Bishop Claughton.
Butler, Henry Montagu; Chaplain in Ordinary to the Queen.
Campbell, Hugh Stille; Rector of Nettleton, Lincolnshire.
Capel, B., Vicar of Abergavenny; Honorary Canon of Llandaff.
Carter, Edmund Bardinson; Rector of St. Martin-cum-Gregory, York.
Challen, John Louis; Rector of Nunney, Somersetshire.
Cooke, Henry Salkeld; Perpetual Curate of Llanbaddock.
Cook, Robert Kenningale; Rural Dean of Rochdale.
Cowper, F.; Vicar of Dacre.
Davies, W.; Perpetual Curate of Llanddwale, Denbighshire.
Deane, William Edward; Rector of Eccles, Norfolk.
Else, John Edward; Vicar of Kilsby.
Evans, Lewis; Vicar of Kenarth, Carmarthenshire.
Ewald, William Harris; Vicar of Overton.
Francis, T.; Vicar of Stockcross, near Newbury.
Girdlestone, Arthur Gilbert; Vicar of All Saints, Clapham Park.
Glover, Frederick Augustus; Rector of Withern, Lincolnshire.
Gooderham, Abraham; Vicar of St. Anne's, Newcastle-on-Tyne.
Gorton, Archdeacon; Rector of Kirby-la-Thorpe, Lincolnshire.
Griffiths, David; Curate of Llanfihangel, Aberystwyth.
Griffiths, James Martin; Curate of Bayvil with Moylgrove.
Griffiths, John; Archdeacon and Canon of Llandaff.
Grimley, H. N.; Curate of St. Michael's, Aberystwyth.
Harrison, E. H.; Rector of St. Andrew's, Worcester; Rector of Bubbennall.
Hawley, Charles Cusack; Rector of Leybourne, near Maidstone.
Herring, A. S.; Chaplain of the Gray's Inn-road Workhouse and Infirmary.
Hoare, John Gurney; Vicar of St. Dunstan's, Canterbury.
Hobbs, Frederick John; Incumbent of Christ Church, Stepney.
Husey, C. J.; Rector of Denton.
James, G. B.; Vicar of St. Philip and Jacob's, Bristol.
Jenkins, David; Perpetual Curate of Llanychaiani, Cardiganshire.
Johnson, Henry Robert Arthur; Vicar of Tugby-cum-East Norton.
Jones, William; Rector of Bettws Gwerfllgoch, Merionethshire.
Kemp, G. H.; Rector of Farmborough, Somersetshire.
Maclean, W. D.; Vicar of Kensington; Honorary Chaplain to the Queen.
Marsell, W. Surman; Vicar of Radstone, Northamptonshire.
Medlicott, S.; Rector of Bowness.
Merrick, George P.; Chaplain of the House of Correction, Westminster.
Morgan, Hugh; Archdeacon and Canon of St. Asaph.
Noble, W.; Curate of Shildon; to the new Ecclesiastical District of Eldon.
Phillips, A.; Rector of St. John's, Bacup, Lancashire.
Pilling, J. H. N.; Curate-in-Charge of Wells, Norfolk.
Plummer, Mathew; Vicar of Heworth; Rector of Stratford Tony.
Rawnsley, R. D. B.; Prebendary of Welton Painsall, in Lincoln Cathedral.
Rudd, T.; Rector of Helton-le-Hole, Surrogate.
Richardson, Thomas; Rector of St. Paul's Church, Quebec.
Roberts, David; Perpetual Curate of Henllis, Monmouthshire.
Robinson, Wm. Kay; Rector of Robeston West, Pembrokeshire.
Samson, Edward; Vicar of St. James's, Selby.
Stones, Charles Edward; Perpetual Curate of Holy Trinity, Heworth.
Thwaites, H. G.; Vicar of Bulkington, Warwickshire.
Troutbeck, J.; Chaplain to the Earl of Carnarvon.
Vever, W. W.; Chaplain of St. Oswald's Hospital, Worcester.
Weaver, John Crowley; Vicar of Kempley.
Welburn, Dale J.; Vicar of Wardington.
Williams, Charles; Curate of Northallerton.
Young, Albert Stewart W.; Vicar of Kingston-on-Thames.—*Guardian*.

Last Saturday the district Church of St. Agatha, Finsbury, was opened by Bishop Piers Claughton.

On the 3rd inst. the parish church of Teddington, which has been under restoration, was reopened by the Bishop of London.

A new church was consecrated by the Bishop of Chester on Tuesday at Lindon, near Alderley Edge.

The reopening of the parish church of Farnham Royal, Bucks, was signalled by the addition of a tower and organ, the gift of Mr. Henry Dodd.

The sum of 500 guineas has been subscribed towards the Tewkesbury Abbey Restoration Fund by Mr. James Martin, formerly a member for the borough.

The Bishop of Bath and Wells last week addressed 1600 Sunday-school teachers in Wells Cathedral, and afterwards entertained them by batches of 200 in the crypt of Wells Cathedral, which he has converted into a dining-hall.

Mrs. George Unett, wife of Mr. G. Unett, of Castel Froma, at Leamington, laid the foundation-stone of the new church of St. Michael and All Angels, which is to be substituted for an unsightly iron structure.

Mr. E. B. Wheatley-Balme, of High Close, Westmorland, ex-High Sheriff of the county, has offered to give £5000 towards the fund of the new bishopric to be formed out of the diocese of Ripon, without attaching any conditions as to whether the Bishop's seat be at Halifax or Wakefield.

John Wycliffe's condemnation by the Pope in five bulls, on June 11, 1377, was celebrated by a meeting held on Monday night in Exeter Hall, under the presidency of the Bishop of Meath. Amongst the speakers were the Rev. Canon Farrar, Dr. Angus, and Newman Hall.

The ceremony of "churching the Judges" at St. Paul's Cathedral took place on Sunday afternoon, and was attended by the Lord Chancellor, the Lord Chief Justice, Vice-Chancellors Malins, Bacon, and Hall; Barons Pollock and Huddleston; and Justices Brett, Denman, Lindley, Hawkins, and Manisty. The Lord Mayor and Sheriffs were also there. The preacher was Bishop Piers Claughton.

The executive committee for the completion of St. Paul's, which had suspended all proceedings for nearly three years, met last Saturday at the Chapter House. It was resolved unanimously "that it is desirable, with the funds now in hand, exceeding £40,000, to carry into effect as far as possible the wishes of Sir Christopher Wren by decorating the dome with mosaic, in a similar style to the dome of St. Peter's at Rome."

The annual meeting of the London Diocesan Lay Helpers' Association, whose object is to assist the clergy gratuitously, especially those of poor and populous parishes, in various branches of their parochial work, was held on Tuesday evening in Exeter Hall, under the presidency of Mr. J. G. Talbot, M.P. The report stated the number of members as 2803, of which number 116 hold the Bishop's commission as lay members.

Dr. Claughton was on Tuesday enthroned as Bishop of St. Albans. Some particulars of the ceremony are given in another column. Mr. Booth, the organist, conducted the musical arrangements.

On the 7th inst. the Bishop of Exeter consecrated the new Church of St. Michael, Torquay. It is intended to serve the Pimlico district, and it has cost about £6000. It is in the Early English style; and it owes its origin to the late Prebendary Harris, Vicar of St. Luke's, who opened a mission chapel, and to the labours of the Curate-in-Charge, the Rev. H. M. Patch, by whom the nucleus thus formed has been developed into a regularly-organised congregation.

The Church of St. George, Millom, was consecrated on the 28th ult. by the Bishop of Carlisle. The church, the foundation-stone of which was laid by the Countess of Lonsdale in July, 1874, is in the Early English style, and will accommodate 500 persons. It has cost, with the vicarage, about £13,000, towards which the proprietors of the Millom Ironworks have given £7186. The late Earl of Lonsdale presented a site of five acres for the church, vicarage, and burial-ground. The east window has been given by Sir J. Ramsden; and a pulpit of white sandstone, with marble panels, by Colonel Bourne, M.P.

Some testimonials to clergymen are reported in the *Guardian*.—The Rev. F. C. Master, on leaving the curacy of Christ Church, Battersea, has received from the chief members of the congregation a magnificent clock, with a note for £10, and a handsome gold pencil-case from the pupil-teachers.—The Rev. W. Clarke and his wife, on his resignation of Winham vicarage, have been presented with silver coffee-pot and sugar-basin by the parishioners, with address, signed by 180, expressive of deep concern at his resignation of the pastoral charge.—The Rev. R. P. Bent, M.A., on resigning the chaplaincy of Gothenburg for the rectory of Tickencote, Rutland, has received a silver centrepiece, with the following inscription: "To the Rev. Robert Paul Bent, from the members of the British congregation, Gothenburg, as a token of their esteem, and with their best wishes for his happiness in his new home."

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

Commemoration Day was celebrated on Wednesday, when the honorary degree of D.C.L. was conferred upon the Bishop of Winchester; Lord Coleridge; the Right Hon. Richard Assheton Cross, M.P.; the Right Hon. Sir Henry Thornton, K.C.B.; and Mr. John Evans, F.R.S. Mr. Dallin delivered the Creweian oration, and the prize compositions were recited.

The Chancellor's prizes have been awarded as follows:—Latin Verse, A. D. Godley, Scholar of Balliol; Latin Essay, O. P. Lucas, B.A., Exhibitioner of Balliol; English Essay, R. J. Alexander, B.A., Brasenose. The Newdigate Prize, for an English poem, has been awarded to J. Brooks, Merton. The Gaisford Prize for Greek Verse to S. G. Hamilton, Scholar of Balliol; and the Gaisford Prize for Greek Prose to A. E. Haigh, Scholar of Corpus. The electors for the Pusey and Elleston Scholarships have reported to the Vice-Chancellor that they have elected Mr. G. H. B. Wright, B.A., of Queen's College, to the scholarship. They have also recommended E. J. Perry, of Winchester College, for a present of books. For the Turnicott Hebrew Scholarship no candidate appeared.

The following Class Lists have been issued:—
Final School of Natural Science.—Class I.: A. W. H. Adrian, Christ Church; G. R. Christie, Magdalen; O. W. Clark, St. Edmund Hall; W. F. Evans and O. Evans, Jesus; J. J. Taylor, Christ Church.
Final School of Jurisprudence.—Class I.: F. A. Milne, Keble; A. A. Frankerd, Worcester.
Final School of Modern History.—Class I.: H. O. Arnold, University; G. E. Buckle, New; T. H. Childs, E. L. Fanshawe, and V. W. C. Hamlyn, Balliol; A. Hassall, Trinity; T. R. E. Holmes, Christ Church; B. Lodge, Balliol; J. C. Potter, Christ Church; C. H. Simpkinson, Balliol; W. H. Woodward, Christ Church.
Final Mathematical School.—Class I.: E. H. Hayes, Balliol; J. R. Maguire, Merton; A. B. Wakeley, Corpus.

CAMBRIDGE.

From among the gentlemen who offered themselves as candidates for the Esquire-Bachelship, vacant by the death of Mr. Godfray, Mr. Wace has been elected.

Mr. C. C. Cumberbatch, Trinity, has passed in the first class, and Mr. C. F. Townley in the second class, of the special examination in mechanism and applied science.

A meeting of the trustees of Cavendish College was recently held at Devonshire House, to appoint a warden, and Mr. John Cox, Fellow of Trinity, was elected out of several candidates.

Mr. S. R. Wilson, B.A. (Seventh Wrangler in 1877), has been elected to a Fellowship at Sidney Sussex. Mr. W. N. Shaw, B.A. (First Class in Natural Sciences Tripos, 1877), has been elected to a Fellowship at Emmanuel. At Christ's the following have been elected to Open Scholarships before commencing residence:—For Classics and Mathematics—£60, Williams; £50, Harvey and Robinson; £30, Heslop, Morris, Newman, and Temperley. For Natural Science—£60, Ward; £50, Pigeon. The Burney Prize has been adjudged to H. R. Knipe, LL.B., of Trinity.

The lists of those who have passed the various examinations for the ordinary degree have been published.

DURHAM.

The Rev. J. Atkinson, M.A., has been nominated to represent the Fellows in the Senate of the University; and the Rev. J. Cundill, B.D., has been nominated to represent Convocation in the Senate of the University.

The University Mathematical Scholarship has been awarded to Mr. F. W. Sanderson, Hatfield Hall; and the University Classical Scholarship to Mr. M. W. Mitchell, University College. The Long Reading Prize has been awarded to Mr. R. E. R. Jesse, University College.

On St. Barnabas's Day a large company assembled at Merchant Taylors' to hear the "speeches." The Master (Mr. Samuel Mason) and the wardens of the Merchant Taylors' Company presided. It was announced that three scholarships belonging to the Company at St. John's had been awarded to Messrs. Marr, Lawrence, and Perry; the Dr. Andrew's Exhibition to St. John's, to Mr. G. W. Ellis; the Parkin Exhibition for the best mathematician now leaving for Cambridge, to Mr. G. R. Alston; Sir James Tyler's elocution prize, to Mr. Marr, who also obtained the Gilpin prize for good conduct.

The biennial Old Pauline dinner is to take place on July 2 next at Willis's Rooms. The chair will be taken by Mr. Arthur Shelly Eddis, Q.C. Mr. Dorset Eccles, of the British Museum, is again acting as principal hon. secretary.

New Foundation Day was observed at Mill-hill School on Wednesday, in the presence of a large number of visitors, amongst whom were Prince Louis Lucien Bonaparte, Sir Walter Elliot, and many old pupils. The prizes to the scholars, which now number about 160, were distributed by Mr. Justice Lush.

The foundation-stone of the new buildings in connection with the Bristol Grammar School was laid on Monday morning on a convenient site in Tyndall's Park, adjoining the suburbs of Clifton, Redland, and Colham, by the chairman of the governing body, Mr. Herbert Thomas.

THE WAR: CONSTRUCTING A RUSSIAN BATTERY ON THE BANKS OF THE DANUBE, AT OLTENITZA.
FACSIMILE OF A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE WAR: PRINCE CHARLES OF ROUMANIA DECORATING SOLDIERS WHO HAVE BEEN UNDER FIRE.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

PARLIAMENT.

LORDS.

Lacking measures of vital interest, noble Lords have concerned themselves with a variety of social questions. Yesterday week Earl Deleware, seeing that during the last four years no less than 100,000 accidents had occurred in industrial occupations, thought it opportune to move for returns on the subject, but withdrew his motion on Earl Beauchamp expressing an opinion that useless expense would be incurred in obtaining the returns. Both the Duke of Somerset and the Duke of Richmond and Gordon then expressed their satisfaction that the railway companies were bestirring themselves to provide a due amount of brake-power on their lines. On Monday Royal assent was given by Commission to the Consolidated Fund and several other bills; the Duke of Richmond and Gordon introduced a number of verbal amendments to the Burials Bill, in addition to the Earl of Portsmouth's amendment, altered to suit the views of the Government; and the Marquis of Salisbury, in a speech studiously moderate, endeavoured to remove from the mind of Lord de Mauley the suspicions he entertained as to Russia's designs on India. Lord de Mauley's motion was for the appointment of a British Consul somewhere in Central Asia; but the noble Lord was reassured by the Marquis of Salisbury's statement that the Government were not blind to the value of his suggestion. Lord Truro showed some perturbation of mind at the alleged acts of highway robbery on Blackheath; and, although Earl Beauchamp explained that the police would be on the alert to prevent a repetition of the outrages, Lord Redesdale suggested that it would be safest for travellers across the heath to provide themselves with revolvers. On Tuesday the Crown Office Bill, Quarter Sessions Boroughs Bill, the Local Government Provisional Orders (Altrincham, &c.) Gas Bill, and the Local Government Gas Provisional Orders (Penrith, &c.) Bill were read the second time.

On Thursday Lord Redesdale called attention to a book entitled "The Priest on Absolution," privately printed and at the disposal of clergymen called the "Society of the Holy Cross," being, as he stated, a body of Churchmen who held extreme opinions. It advocated frequent confession, the doctrine of the intercession of the Virgin Mary, and taught that the priest could absolve from sin and its consequences here and hereafter. Another work, entitled "The Priest on Prayer," had been sent to him. This book contained doctrines repugnant alike to the Rubric and to pure Christianity. He wished to know whether the attention of the Rev. Bench had been directed to these books. The Archbishop of Canterbury said the use of the books was a cause of great grief. No one could read the first referred to without a blush, and it was a disgrace to any body of the clergy to patronise it. He believed that those who circulated it brought themselves within the penalty of the law. The Bishop of Gloucester also strongly condemned the work. Lord Oranmore and Browne and the Earl of Harrowby having expressed opinions of a similar character, the latter warning heads of families against allowing "Holy Cross" clergymen to enter their doors, the subject dropped.

COMMONS.

Sir Stafford Northcote, in allusion to questions by Lord Robert Montagu and Mr. Whalley, strove to impress upon the House yesterday week that it was inexpedient to put isolated queries respecting the attitude taken by the Government in reference to the Suez Canal. Various members of the Ministry having exhibited their versatility by disposing of a diversity of questions, Mr. P. A. Taylor introduced his annual motion:—

That, in the opinion of this House, it is desirable to give greater facilities for the recreation and instruction of the people by opening for some hours on Sundays the national museums and galleries.

Lord F. Hervey, in seconding the motion, dwelt upon the fact that Sunday was the only day when the majority of the people had a chance of seeing the museums and picture-galleries. Colonel Beresford as stoutly opposed the motion; and Mr. A. M'Arthur thought there was too much labour in London on Sundays already. Mr. Locke, on the other hand, ranged himself on the side of Mr. Taylor, who found his most formidable opponent in Mr. W. H. Smith. The Financial Secretary to the Treasury, in speaking both in the capacity of a member of the House representing a large constituency and as to some extent representing the Government, said that while he acquiesced in the view that national museums or picture-galleries were better places of Sunday resort than the public-house, maintained that a different question was raised by the motion. He argued that the motion threatened Sunday as a day of rest. He believed that the observance of Sunday as a day of rest had contributed largely to the power and prosperity of this country, and he trusted that, upon this and upon other occasions, the House of Commons would not do anything to diminish the hold which Sunday had upon the minds of the people. Mr. Forster, in enrolling himself as a recruit in the ranks of Mr. Taylor's supporters, answered Mr. Smith to the effect that he did not think that, when people could see the pictures at Hampton Court, and hear the bands play in the parks, they would be doing anything new in accepting this motion. As to Sunday play leading to Sunday work, substitutes might be provided for the attendants at the museums. On the division, Mr. Taylor's motion was rejected by 229 to 87 votes. The rest of the sitting was occupied by the discussion of Mr. Delahanty's suggestion regarding the Currency Laws, Sir E. Wilmot's plea for more rapid action in the High Court of Justice, and Captain Nolan's grievance as to postal delays in Ireland, and by a colloquy between Mr. Whalley and the Speaker apropos of the hon. member for Peterborough being called to order for persisting in his request that Mr. De Morgan should be heard at the bar of the House, and for again dwelling upon the expenses of the Tichborne prosecution.

On Monday Sir George Bowyer having asked the Attorney-General whether the promoters of the Federal Associations at Birmingham had not rendered themselves liable to prosecution under the statute 39 George III., Mr. Chamberlain made a palpable hit by inquiring of the hon. and learned gentleman whether the Act would not also apply to the National Union of Conservative Associations. Whereupon the Attorney-General, answering in the same vein, suggested that the most effective way to test the legality of the Birmingham Association would be for Sir George Bowyer to prefer an indictment against the hon. member for Birmingham. Major O'Gorman considerably relieved the tedium of the evening, firstly, by his epigrammatic defence of the Fenian convicts when Captain Pim had vainly and with some naïveté asked the Home Secretary whether he could hold out any hope of the release of the Fenian prisoners provided they gave their word never again to participate directly or indirectly in treasonable practices. Later on, some time was taken up with the discussion of Mr. Butt's fruitless motion for an Irish Board presided over by a responsible Minister sitting in Parliament—a desideratum which the Secretary for Ireland explained that he himself supplied—and then yet another Irish matter, the Irish Constabulary, occupied the attention of the House before the haven of Committee of Supply could be reached by the Chancellor of the Exchequer. Then Major O'Gorman again excited hilarity by his good-humoured argument for the

retention by Ireland of the 1500 guineas expended in the shape of Queen's Plates. Lord A. Churchill had moved that the Irish Vote should be curtailed by this sum; but his Lordship was placed in a minority of 108.

On Tuesday Mr. Bourke discreetly informed Lord R. Montagu that it would be inexpedient to enlighten him as to the ability or inability of Egypt to pay the coupons on the Egyptian Unified Debt. Various clauses of the Prisons Bill having been adopted, there arose a debate of especial interest from the fact that it was enriched by a powerful speech from Mr. Bright. Sir E. Wilmot moved that, while it was not possible at the present time to remove the penalty of death altogether from the Statute Book, it was desirable to consider whether the laws under which offenders were liable to capital punishment should not undergo revision. To this Mr. Pease moved an amendment affirming that it was expedient to abolish the penalty of death and substitute penal servitude for life. The hon. member found a seconder in Sir H. Jackson; and the speeches throughout were of a high order. The Attorney-General opposed motion and amendment alike. Mr. Bright delivered an address of sustained eloquence and power in warm advocacy of the abolition of capital punishment, a measure to which the Solicitor-General was adverse, whilst Sir William Harcourt was in favour of it. On a division the amendment was negatived by 105, and the motion by 69 votes.

On Wednesday Mr. Mitchell-Henry's bill for rendering the registration of electors an easier matter in Ireland was read the second time on the withdrawal of Mr. Plunket's amendment; Mr. Hubbard's Crossed Cheques Bill was rejected by a majority of 109; and one or two measures were advanced a stage.

The commencement of the proceedings on Thursday was marked by a debate of a somewhat warm and enlivening character. Mr. Richard Smyth, who was the father of the Irish Sunday Closing Bill, asked the Government to afford him facilities for the passing of the measure, the Select Committee to which it had been referred, at the instance of the Chief Secretary for Ireland, having reported in its favour. The Chancellor of the Exchequer said that, although he was fully aware of the great interest attaching to this bill in Ireland, he could not take the responsibility, in the present backward state of the Government business, of fixing a day for the further progress of the measure. Mr. Smyth complained of the conduct of the Government in relation to this question, and insinuated that it had broken faith with him. Having concluded by a motion for the adjournment of the House, there ensued a general discussion, in the course of which Mr. Gladstone and Mr. Bright severally urged upon the Government even to strain a point for the purpose of settling the question involved. Sir W. Lawson expressed himself as willing to waive his right to a certain Wednesday for the consideration of his permissive bill, if the Government would afford facilities for the passing of the Irish Sunday Closing Bill, by making it a Government measure. The right hon. gentleman made no response to this offer, and after some further discussion the subject dropped. In reply to Mr. Gourley, the Chancellor of the Exchequer stated that the substance of the communications received from the Government of Russia relative to the intimation of her Majesty's Government forbidding the exercise of belligerent rights on the Suez Canal during the continuance of the present war, was to the effect that the Russian Government would neither blockade, nor interrupt, nor menace in any manner the navigation of the canal. Her Majesty's Government had not received any communication on the subject from the Porte or the Khedive of Egypt. Sir C. Adderley informed Lord Easington that the Egyptian Government had placed £200 in the hands of the Board of Trade to reward the crews of two English vessels who had gallantly assisted an English corvette in distress, and he understood that they proposed to give a further reward. Mr. R. Smyth gave notice that on Monday he would ask the Chancellor of the Exchequer whether, having regard to the action taken by the Government and the decision of the Select Committee on the bill to regulate the sale of intoxicating liquors in Ireland, he would afford an opportunity for discussing a resolution declaring that, in the opinion of the House, it would be highly detrimental to public interests should her Majesty's Government allow the question involved to remain unsettled for another year. One more night was occupied in the consideration of the Prisons Bill, in respect to which there appeared upon the notice paper about three pages more of amendments. The chief opponents, however, evincing a disposition to relax their efforts, the Government were enabled to make considerable progress in the measure.

NATIONAL SPORTS.

In spite of the demand made on our space by the Ascot Meeting, it is impossible to pass over the pleasant days spent at Sandown Park last week without a word or two. The weather was simply perfect, and, in many ways, the members' inclosure at Esher compares favourably with the more famous lawns at Ascot or Goodwood. The "fair women and brave men" are there, but not in such overpowering numbers as at the more famous rendezvous we have mentioned, and we can stroll about in comfort on the beautiful turf, or under the shade of the trees which form such a fine background to the scene. Then the band, which is always engaged on the great days, forms an additional attraction, and, under all the circumstances, it is not surprising that the Prince and Princess of Wales, and other members of the Royal family, are constant visitors. The sport last week was fairly good, but might, we think, be greatly improved. At present the course is not well adapted for short-distance races, and yet the card is almost entirely made up of half-mile and five-furlong spins. We would suggest the occasional introduction of a good cup, to be run for over two miles or two miles and a half. Large fields of hunters—which are really racehorses under a different name—frequently run the first-named distance at Sandown, and there is no reason why such a race as we suggest should not prove a great success. We cannot take leave of the meeting without comment on the great form shown by Constable, who secured no less than six out of the eight races in which he took part during the two days. His victory on Paramatta was most remarkable, as he fairly outjockeyed a comparatively old hand like Newhouse.

The heavy rain which fell on Monday evening was all that was wanted to make the opening day at Ascot quite perfect, as it proved amply sufficient to lay the dust, cool the air, and render the course beautiful "going." The Ascot Tuesday has always furnished the very best day's racing of the entire year, and we doubt if there have ever previously been so many people present on the opening day. The Royal party arrived in state just before the first race was run. This was the Trial Stakes, in which old Thorn was backed against the field, but he stopped to nothing under his welter weight at the distance, and Plaisance won easily from Breechloader. The Gold Vase produced the most interesting race of the day, being selected for the first appearance of Rosebery since his great handicap victories. He scarcely, however, looked quite up to the mark, and it was rumoured that he had been beaten in his trial. Skylark, on the contrary,

was a perfect picture, looking bigger and more muscular than on any previous occasion. The other runners included Dalham, who was somewhat out of his distance, and the fourth and fifth in the Derby, Rhidorroch and Altire. The last named ran well until they were fairly in the straight, when he was headed by Rosebery, who held the lead to the distance, at which point Skylark shot out full of running, and won in a canter. The Prince of Wales's Stakes appeared little short of a certainty for Glen Arthur, who claimed the maiden allowance, and Lord Falmouth wisely declined to run Silvio, who would have had to concede the second in the Derby no less than 16 lb. Belphebe, who had 12 lb. the worst of the weights with Glen Arthur, was never dangerous; but the latter had to gallop to beat the Thane colt, who made nearly the whole of the running. We were glad to see that Dodge again rode the winner, as we consider that his performance in the Derby deserved the warmest praise, instead of the severe criticism which it generally received. One of the most interesting events of the day was the Queen's Stand Plate, which was virtually a match between Springfield and Ecossais. Mr. Houldsworth's grand colt, who was never defeated last season, had the worst of the weights; but he brought Ecossais along at a cracking pace from the start, and had him fairly beaten at the distance. A poor field of nine contested the Ascot Stakes, Getroffen (5 st. 10 lb.), a three-year-old Blue Gown filly, being made a great favourite. She, however, was out of it a long way from home, and a rattling finish between those old opponents, Chypre (7 st. 3 lb.) and Finis (7 st. 7 lb.), resulted in favour of the former by half a length. Attalus, backed against the field in a Biennial, only got home by a head after a desperate race with Gaberlunzio; and the victory of Correggio over Morning Star enabled T. Osborne to score his third victory for Mr. Houldsworth.

There was again a very large attendance on Wednesday, and backers generally had a good time of it. Placida had really nothing to beat in the Fernhill Stakes; and Jeannette, a filly by Lord Clifden—Chevisance, who came from Heath House with a great reputation, cantered away from four others in a Triennial. After his great bid for the Prince of Wales's Stakes, Strathmore, the newly-named Thane colt, was naturally made a very hot favourite for the Hunt Cup, in which he had only 5 st. 10 lb. to carry. He got well away, and showed in front for a couple of hundred yards; but we suppose that he is not a boy's horse, as, after going that distance, he was never dangerous, and Cradle (6 st. 4 lb.) had little trouble in beating Sutton (7 st. 7 lb.) and Prince George (6 st. 12 lb.). Whitebait (8 st.) ran very well indeed, and Helena (6 st. 3 lb.) also finished well up. The result of the Coronation Stakes seems to show that Lady Golightly is completely out of form, for Belphebe had no trouble in giving her 7 lb. and a handsome beating into the bargain. With only Touchet and Chevron to oppose him, Rob Roy had merely an exercise canter for a Biennial over the Old Mile; but the Ascot Derby produced a most interesting race. Silvio and Glen Arthur fought their Epsom battle over again at level weights, and a large number of backers once more supported Morier, who received 17 lb. from each of the first-named pair. Half way up the straight the Two Thousand impostor was beaten, and Silvio confirmed the truth of his Derby running by a gallant victory over Zucchero and Glen Arthur.

The result of the competition for the Gold Cup on Thursday was that Petrarch won by a length, Skylark being second, and Coomassie third. The time, by Benson's chronograph, was 4 min. 33 sec. For the Fifteenth Biennial Stakes Placida beat Laura; Springfield was first in the Fourteenth Biennial; Bellicent in the New Stakes; Trappist in the Windsor Handicap; and in the All-Aged Stakes Ecossais beat Trappist.

The serious illness of Admiral Rous cast a gloom over the opening day at Ascot; but we are happy to say that the latest bulletins are of a more reassuring character, and there is reason to hope that he may shortly be pronounced out of danger.

Mr. Gee's breeding stud was disposed of at Dewhurst Lodge on Saturday last; and, though it is a matter of great regret that such a grand collection of mares should be dispersed, we note with satisfaction that most of them will remain in this country. No one would give the reserve price of 4000 gs. for Mandragora, Repulse, or Formosa, and they will remain at their old quarters, with Citadel, who was also bought in. The highest prices were reached by Agility (3300 gs.), Idalia (1050 gs.), Lady Dewhurst (1200 gs.), Summer's Eve (1300 gs.), Violet (1750 gs.), and Virtue (2000 gs.). Mr. Blenkiron luckily gave 8000 gs. for Scottish Chief; and the total amount realised was something like 37,000 gs.

Lack of space warns us that we must content ourselves with a bare record of the cricket-matches of the past few days. Last week the M.C.C. and Ground, for which the Hon. A. Lytton made 101 and 20, beat Lancashire by 145 runs; and Gloucestershire defeated Surrey by nine wickets. No less than three county matches have already taken place this week. Gloucestershire has scored a victory over Sussex by 84 runs; a good contest between Middlesex and Surrey ended in favour of the latter by four wickets; and Nottingham beat Lancashire by 45 runs, both teams collapsing in the most extraordinary manner in their second innings.

Keen and Cooper met for the thirteenth time over a mile course at Lillie-bridge on Monday. They both rode 55-in. bicycles, and the former won easily in 3 min. 4½ sec., the fastest time ever made at these grounds.

A very important match was decided on Monday last between J. Higgins and T. Blackman, who sculled from Putney to Mortlake for £200 a side. Long odds were laid on the latter, who seemed, however, to be all abroad in his steering, and fouled Higgins, in whose favour the race was given.

The New Thames Yacht Club sailed its matches for schooners and yawls on the 7th inst., the course being from Gravesend round the Mouse Light-ship and back. Mr. M'Leay's Jullianar and Mr. Lampson's Miranda won the two £100 prizes, and Mr. Williams's Surf took the £50 prize.

In the matches of the Royal Thames Yacht Club for schooners and yawls on the 8th inst. Mr. Jessop's Florida won the £100 prize for yawls of 100 tons and upwards, and Mr. Freke's Veronica that for £50 for yawls of 50 tons. Mr. Lampson's Miranda and Mr. Taylor's Sea Belle carried off the £100 and £50 prizes respectively for schooners of over 100 tons. The result of the annual match at Dover of this club on Monday was that Mr. Borwick's Neva won the £100 prize, and that the £50 prizes were taken by Mr. Jessop's Florida and Mr. Wood's Corinne.

The yawl and schooner races of the Royal London Yacht Club came off on Saturday. The prizes in the races were £75, and the course from Gravesend to the Mouse and back, a distance of fifty-five miles. The Sea Belle won the schooner race, and the Surf the yawl race.

The fifteenth annual sailing-match for topsail and spritsail barges took place on the 7th inst. between Erith and the Nore. The first prize for topsails was won by the Challenger, and that for spritsails by the Anglo-Norman.

The Extra Supplement.

"SALUT AUX BLESSÉS!"

This picture, by the French artist Edouard Detaille, was exhibited at the Paris Salon des Beaux Arts, and was justly admired for the dramatic skill and effectiveness of its grouping, and the force of character and expression developed in such a variety of soldierly figures. It may be considered as a work appealing to the same kind of popular sympathy as those of a well-known English female artist, to whom we beg to offer our most respectful congratulations, this week, upon changing her name from Miss Elizabeth Thompson to Mrs. W. F. Butler. The interest that is naturally felt, in every country of the world, in the fortunes of soldiers while employed on active service in the field, depends of course upon their continual risk of being killed or wounded. Such is the obvious source of the great attraction which has been found in "The Roll-Call," and in the pictures referring to Inkerman and Balaklava, lately placed before the view of London spectators. The subject of this picture, which has proved successful at Paris, is not less suggestive of genuine feelings of enthusiasm, and sentiments of manly valour and fidelity to the stern behests of duty. The veteran general officer in high military command, surrounded by his staff, pays a graceful homage to the sad procession of the wounded, leaving the battle-field for the nearest temporary hospital. If he were their King or Emperor, he could do no less, and he would scarcely do more, to mark his approbation of their conduct.

ROYAL ACADEMY EXHIBITION.

[SIXTH NOTICE.]

As a "conversation-piece," in that style which has yielded so rich a crop of laurels to Mr. James Tissot, attention will be attracted to Mr. Carl Hoff's "Tales of Two Conquests" (332). A young officer comes home from the American war (that of the last century, *bien entendu*). He is explaining on a map the episodes of the campaign at Saratoga or Savannah to an elderly gentleman; and the elderly gentleman has a young and lovely daughter, who listens, not unmoved, to a recital of the gallant young officer's adventures by flood and field. Given, in addition, some very well-painted furniture and accessories, and the *mise-en-scène* of Mr. Carl Hoff's picture is complete. It is the old story of Othello, Desdemona, and Brabantio over again, and, moreover, told very gracefully and effectively. Mr. G. Pope's "Daily Bread" (355), a pretty widow painting hard in her studio for the support of her olive-branches, is full of sentiment—not of the mawkish kind—and is distinguished by firm drawing and skilful massing of light and shade. There is a wonderful amount of careful architectural draughtsmanship in Mr. Walter Logsdail's "South Porch, Lincoln Cathedral" (367), the finish in the details of which is wellnigh as minute as that of Steinwyck's; and Mr. John O'Connor has a surprisingly clever effect of aerial perspective in "High Level Bridge, Newcastle-on-Tyne, Evening" (368). Mr. Phil. R. Morris's "Heir of the Manor" is a charmingly-painted scene in some ancestral park, with a very brave little boy not at all frightened at being suddenly confronted by a herd of deer. Why should he be terrified? The manor will be his; the park and deer will be his—that is to say, if no accidents happen—in fee simple, to have and to hold for him and his heirs for ever. It is seldom that we have seen so delectable a pictorial exposition on the law of primogeniture as Mr. Phil. R. Morris has here given us. Let us also mention with commendation Mr. Lowes Dickenson's powerful but refined portrait of "the late Sir George Essex Honyman, one of the Justices of the Court of Common Pleas" (381), and Mr. John Scott's very tenderly treated "In Pensive Thought" (385). Miss Hilda Montalba's "Swedish Peasants in Church" (386) is a vigorous composition, full of earnest thought and skilful execution; and there is ambition of the most exalted kind, the practical fulfilment of which, however, is scarcely equal to its execution, in Mr. F. A. Bridgman's "Pharisee and Publican" (391). An excellent transcript of the bold, rocky, almost savage, "scar" scenery of the north country is Mr. Alfred W. Hunt's "On the Coast of Yorkshire" (390); and dexterous drawing, exquisite harmony of colour, and much quaintness of character distinguish Mr. Cecil G. Lawson's "View from Don Saltero's Cheyne-walk, Chelsea, temp. 1770" (396). Mr. Keeley Halowell's "Rome from the Sistina" (425) is broadly but somewhat carelessly picturesque; and Mr. Walter Logsdail exhibits another admirable piece of architectural painting in "His Last Vespers" (434). There is an effective story told, moreover, in this Gothic interior, with the stalls of the cathedral choir crowded with clerics gathered round a dying prelate. Miss A. F. Mutrie asserts her long held supremacy as a queen among floral painters (the king of whom this year is undoubtedly M. H. Fantin) in "Wild Flowers of South America" (435); and Mr. J. G. Naish shows remarkable energy in "Life-Boat Returning: a Sea to Starboard" (438). Against Mr. H. Moore's elaborate and generally superb "Loss of a Barge in Yarmouth Roads" (489) the only objection which can possibly be urged is that the sea resembles the storm-tossed German Ocean far less than it does a mass of immobile, albeit highly heaped, cotton wool, of a dingy grey in hue. Mr. J. W. Oakes, A.R.A., contributes a very good landscape, "A Quiet Morning in Early Autumn" (443); and there is a great deal of *verve* and spirit in Miss Jane Escombe's "An Etoher Biting" (445). The canvas is, perhaps, slightly too extensive for the subject treated. Mr. Andrew MacCallum is at his best in "Untrodden Snow: within Three Miles of Charing-cross" (447); and all the delicacy, harmony, studious appreciation of highest art, and, alas! all the disappointing slightness of handling which so conspicuously mark the productions of Mr. A. Moore, are visible in his delightful yet inadequate "Reader" (469). If we prefer against this accomplished master the reproach of inadequacy we do so without in the slightest degree disparaging either his genius or his power. The first is unmistakably manifest in every touch of his pencil; but the last, through the paleness of his chiaroscuro and the attenuation of his colour, he only allows us to guess at or to suspect. Tintoretto might paint fans for ladies once in a way; and there is no harm in Giorgione stooping now and again to conquer fame by the execution of a miniature; but one would not have liked to see the great Venetian masters always occupied by such trifles; and, *ceteris paribus*, the same remark may be applied to Mr. A. Moore. Of Mr. W. W. Oulless's continuously increasing power of execution as a portraitist we have already spoken, and can only repeat that his astonishing faculty of vigorous modelling and concentration of expression are most brilliantly shown in "The Right Hon. Russell Gurney, Q.C., M.P., Recorder of London" (496). There is one thing, however, which, to our thinking, Mr. W. W. Oulless would do well to avoid, and that is a tendency to blackness in his shadows. Titian and Velasquez were enabled, through long experience, to make splendid use of black in their portraits; but Mr. W. W. Oulless has not yet come, pictorially, to the complexion of Don Diego de Velasquez or of

Messer Tiziano Vecellio. Another picture very much in the style of Mr. Tissot's "waterside" comedies is Mr. J. Napier Hemy's "Nautical Argument" (517); and there is plenty of the raciest humour, and of good painting besides, in Mr. J. Watson Nicol's Jacobean pipe-smoking epicurean, practically illustrating the old saw, "When a man's single he lives at his ease" (516). Certainly, Mr. J. Watson Nicol, single blessedness may, under certain circumstances, be productive of much physical and mental ease; but we have heard, nevertheless, that bachelors living in chambers, not only in the Jacobean but in the Victorian era, are apt, even when suffering from such trifling ailments as toothache or a cold in the head, to be exceedingly miserable. There is much cleverness, but also a *souçon* of affectation, in M. Charles Gogin's "Andante Amoroso" (565). The hue of the red spinet in this work is decidedly displeasing. Mr. G. F. Watts's "Dove" (566) passes, we frankly confess, our comprehension. It is doubtless full of fine qualities; but those qualities are beyond our ken. Our godfathers and godmothers gave us the name, not of Oedipus but of Davus, and we are unable to solve the ornithological riddle propounded by the distinguished Academician in his "Dove." There is nothing, on the other hand, enigmatical or mystical in Mr. W. Holyoake's charming "sweethearting" picture (611), bearing the poetic epigraph:—

"'Twas ever so! 'twas ever so!
Lovers' vows are traced in snow."

We have heard that defendants in breach of promise of marriage cases have been heard to express a wish that lovers' vows when inscribed on paper were all written in ink warranted to fade at the expiration of a fortnight. Mr. Holyoake's hero will never, we hope, occupy the painful position of a defendant; but he has been worldly-wise enough to write his "little language" (as Dean Swift termed the most idiotic and the most fascinating form of parlance in the world) on a material warranted to melt after exposure to half an hour's sunshine. The picture, albeit painfully suggestive of man's hypocrisy and woman's weakness, is a very pretty one, most delicately painted.

THE BLACK AND WHITE EXHIBITION.

The Fifth annual "Black and White" Exhibition at the Egyptian Hall, Piccadilly, has been recently opened; and, among the 599 works in charcoal, chalk, crayon, pen and ink, indian ink, sepia, copper-plate etching and dry point which cover the walls of the saloon known as the Dudley Gallery, there are very many examples of really a high degree of merit. Conspicuous among these are three superbly drawn and finished heads in chalk by Mr. Frederick R. Burton (23, 260, 391), which may be qualified as real triumphs of design and manipulation; to say nothing of their usefulness as models to all young students in the much-neglected art of draughtsmanship in "black and white." Mr. R. W. Macbeth has a very powerful composition, seemingly in monochrome *gouache*, "A hot day in Hyde Park;" Mr. Cave Thomas sends a stately cartoon, "Fud between Guelph and Ghibelline" (52); and M. A. de Neuville has a wonderfully spirited little pen drawing, "A Garde Mobile" (83). Mr. R. Caldecott's "Sketches at Monaco" are clever, but trivial; and, while the artist tries his best to be comic, he frequently misses his point. Mr. T. Graham's "Mudlark," in charcoal (90), an admirably drawn study of a "wastrel," water-side girl, is one of the finest performances in the gallery; and there is much to admire in Mr. Joseph Knight's "On the West Coast" (96), a study in sepia. Of the pen-and-ink caricatures by Messrs. G. Du Maurier, Charles Keene, and Linley Sambourne it is needless to speak, as the excellence of those humorous performances, in the guise of wood-engravings in *Punch*, have long since been fully recognised. Mr. J. Wolf is almost "terrifically" praiseworthy in his charcoal studies of animals, and the "Midnight Meeting" (107) of two wild boars by moonlight, and in charcoal, is exceptionally forcible, intensely dramatic, and yet scrupulously faithful to nature. Mr. A. Legros, among other "exhibits" of varying merit, has a very spirited etched portrait of Cardinal Manning (129). The same artist's "Prisonnier" (191), in sepia, we fail to admire, notwithstanding its vigorous drawing and dashing effect. The "Prisonnier" has the torso of a Hercules and the legs of Tom Thumb, and looks altogether like a highly-glorified presentment of Mr. Daniel Quilp, from "The Old Curiosity Shop." A highly interesting drawing is Mr. Arthur Hawkesley's "Tomb of John Howard the Philanthropist, in the Desert near Kherson, Russia" (224); and all Mr. Briton Rivière's potency of design and expression are visible in "Actæon Devoured by his own Hounds" (233), a magnificent drawing in charcoal and chalk. There is exquisite feeling in Mr. Joseph Clark's "Left in Charge" (245), and an astonishing amount of elaborate execution must be recognised in Mr. James Tissot's etched portrait of "Mrs. N. * * *" (254). M. E. Meissonier, Honorary R.A., shows an amicable interest in the Black and White Exhibition by contributing a delicious little figure of a man smoking, "Le Fumeur" (254). The original drawing and the reproduction as an etching are in the same frame. Another "Left in Charge" subject (265), a baby in its cradle tenderly watched over by a bluff old peasant, has been executed in lamp-black with remarkable breadth of effect by Mr. Hubert Herkomer. Mr. Heywood Hard's "Study" (278) of a lion in body colour is very striking; and there is much originality in Mr. H. W. Bremer's pen drawing of "An Ancient City" (279). "Glen Head, Donegal" (318) is a fine chalk drawing by Mr. W. F. Stocks; and the indefatigable pencil of Sir John Gilbert, R.A., makes magisterial mark in "The Installation of Bolingbroke" (311). Mr. Samuel Read sends two designs (223, 270) executed for this Journal. Mr. J. Wolf is again "terrific" in his charcoal cartoon of "The Lion's Share" (425); and Mr. Cecil G. Lawson has produced a very tender and appreciative drawing in pen and ink, entitled "In Memoriam, 1875—a Study in a Sculptor's Garden at Chelsea" (348). To Mr. F. Hamilton Jackson's large charcoal study of "Boadicea" the Council of the Royal Academy has this year adjudged the medal for Design; thus, Mr. Jackson's work may, to a certain extent, be held as *hors concours*. There was, doubtless, something the matter with our optic nerve when we visited the Black and White Exhibition. Had it been otherwise, we should have been tempted to think that Boadicea's head was ill-set upon her shoulders, and that her arms seemed small and puny when contrasted with the muscular development of her lower limbs. The Exhibition likewise comprises drawings and etchings by, among others, Messrs. A. Barraud, H. Holiday, Carl Haag, H. Fantin, Charles Horsley, F. J. Sang, Edwin Edwards; Misses Guinness, Gow, Elias, and Thornycroft; and last, but not least, the redoubtable Mlle. Rosa Bonheur, who sends a pleasing study of "Sheep." It is remarkable that, among the three hundred celebrities, or thereabouts, seventy-two are foreigners, or bear names denoting a foreign origin.

MR. MILLAIS'S "EFFIE DEANS."

Mr. Millais's masterpiece this season is not to be found on the walls of the Royal Academy. His beautiful painting of "Effie Deans" is exhibited for the benefit of the Artists'

General Benevolent Institution in a secluded niche of the King-street Galleries, near Christy's. Passing through the gallery, wherein a bold landscape by Oakes commands admiration, and acquaintance may be pleasantly renewed with a seductive riverside scene by Fildes, and Macallum's bright picture of bonny Scottish lassies washing linen on the seacoast, the visitor finds that "Effie Deans" can be studied without the mind being distracted by other canvases, for the simple reason that it is screened off. No one can deny that this exquisitely natural portrayal of the winsome, albeit grief-stricken, "lily of St. Leonard's" is alike worthy the genius of painter and poet. There is much of poetry in the fascinating story of Effie Deans as told by Walter Scott in "The Heart of Midlothian;" and there is much of poetry in Mr. Millais's graceful delineation of the fair girl keeping tryst with the handsome outlaw who has betrayed her. The mute but eloquent language of lips, that would alone furnish ample material for a ballad. As Effie Deans stands silently sorrowful, with her arm resting on the low wall which separates her from Georgie Robertson, a slender hand supporting her pretty face, her sweet lips are parted, and there seems to linger on them the trace of the last quivering sob which made the blue upturned eyes glisten. It is in this sorrow-laden mouth, in the azure depths of tenderness in her appealing eyes, that the rare art of Mr. Millais is exemplified to a marked degree. The emotional pathos of the meeting is represented with all the greater force from being unexaggerated even by a hair's breadth. As a skilled actor heightens the effect of a touching situation by subduing his emotion—by allowing a half sob or a broken word alone to indicate the state of his innermost feelings—so the painter of "Effie Deans" by the simple truth of his treatment presents a faithful embodiment of the fair girl, whose pink jacket and mauve skirt may fade from one's memory, but whose sad, winsome face will long linger in our recollection. We may be wrong, but is there not a family likeness between Mr. Millais's "Huguenot" and this good-for-nothing Georgie Robertson, with overhanging Rob-Roy cap? Even he is not unconcerned at the ruin he has wrought. A hand of his rests caressingly on Effie's arm, and there may be a touch of softness in the eyes fixed upon her piteous face. Our attention may be called now and again to the somewhat hard features of the Faust of this Scottish Marguerite; but it is Effie Deans herself who is the centre of attraction. So rightly thinks her faithful collie, evidently brimful of sympathy for his young mistress, whom he wistfully regards. It is Effie on whom Millais has lavished his greatest care; and one of the most admired pictures of the London season, accordingly, is an exact counterfeit presentment of the Effie Deans whom the "Wizard of the North" first limned. The accessories of the mossy and fern-decked wall which parts the lovers, and the red-berried bush overhead, do but enhance the charm of "Effie Deans," to which delicate creation we would fain hope that Mr. Millais will paint a companion picture illustrating with equal truth the devoted sister, Jeannie Deans. We are glad to learn that the exhibition of this picture is likely to result in a substantial addition to the funds of the Artists' General Benevolent Institution, of which Mr. John Everett Millais is the honorary secretary; and we are pleased to know the cause of art will be furthered yet more by the reproduction of "Effie Deans" in the shape of a steel-plate engraving by Mr. T. O. Barlow, A.R.A., who interpreted Mr. Millais's "Huguenot" with a fidelity which was attested by the world-wide circulation of the Engraving.

The council of the Art-Union of London have selected Mr. Brierly's picture of the morning after the fight between Sir Richard Grenville and a Spanish fleet, now in the exhibition of the Water-Colour Society, for engraving. The picture has been painted for Mr. W. G. Clarke, of Victoria, Australia.

An excellent facsimile reproduction in colours of H. A. Harper's celebrated picture, "Sinai, the Mount of God," has been published by Messrs. Lucas and Co. The original is on view at M'Lean's Gallery, 7, Haymarket.

The fifth distribution of prizes by the Imperial Art-Union will take place next July. Each subscriber of five shilling shares, besides having the chances of the drawing, will be entitled to a charming chromolithograph entitled "The Missing Spectacles." This humorous picture shows grand-mamma entering the nursery in search of her missing spectacles just as some merry urchins are placing them on the head of a gaily-decked Pomeranian dog.

THE JAPANESE IRONCLADS.

We give an illustration of the Foo-Soo, the first ironclad ship built in England for his Imperial Majesty the Mikado of Japan. A second, the corvette Hi-yei, was launched on Tuesday last at the Pennar Works, near Pembroke Dock. Both were designed for the Japanese Navy by Mr. E. J. Reed, C.B., M.P. The Foo-Soo was built at Poplar, by Messrs. Samuda Brothers, and was launched on April 14, in the presence of the Japanese Imperial Commissioner and of the Chinese Ambassadors. Admiral Lord Clarence Paget was also present. The Foo-Soo was constructed within little more than a year and a half from the date of the contract. This was due to the facility given by a new system of framing, which Mr. Reed here introduced for the first time. The frames, behind the armour-plating and below it, from the maindeck down to the keel, were made continuous; and a longitudinal girder, supported by brackets, was fixed on the outside of the frames, projecting beyond them. This longitudinal girder was made to support the armour-plates and backing, all securely bolted and riveted together. The ship has an inner bottom, divided into water-tight compartments, and a fore-and-aft bulkhead extending the length of the magazine, engine, and boiler spaces. Her length is 220 ft. between perpendiculars; breadth, 48 ft.; depth in hold, 20 ft. 4½ in.; burden, 2343 tons; weight of armour, 776 tons; displacement, 3700 tons; mean draught of water, 18 ft. She is barque-rigged, spreading 17,000 square feet of sail; and has a screw-propeller driven by compound surface-condensing engines of 3500 indicated horse-power, constructed by Messrs. John Penn and Sons, of Greenwich, on the trunk principle. The armament of the Foo-Soo consists of four of Krupp's long breech-loaders, weighing each above 15 tons, with a calibre of 9½ in., in the main-deck battery, and two smaller guns on the upper deck. The main-deck battery is protected by armour 8 in. thick, and projects somewhat over the ship's side. The upper deck battery, which is not armoured, is placed amidships, with the sides of the deck slightly recessed, and its guns can be fired either right ahead, or on the broadside, or right astern. The ship has also a powerful ram, with a running-in bowsprit. Her belt of armour, at the water-line, is 9 in. thick, covering the magazine and engines. The ceremony of christening the Foo-Soo, at the launch, two months ago, was performed by a Japanese lady, the wife of the Commissioner Woo-yeno.

THE WAR: DRILL IN THE TURKISH CAMP—SIGHTING GUN PRACTICE.

THE WAR: TURKISH POST-HOUSE ON THE DANUBE.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE WAR GRAND DUKE CONSTANTINE, ADMIRAL OF THE RUSSIAN FLEET.

THE LATE QUEEN OF HOLLAND.

FIELD-MARSHAL SIR CHARLES YORKE, G.C.B.

THE LATE QUEEN OF HOLLAND.

We had last week to announce the death of this Royal Lady, whose proper title, in the correct diplomatic designation of the Dutch sovereignty, was Queen of the Netherlands. She died at the Hague on Sunday week. A portrait of her Majesty is now given; she was Sophia Frederica Mathilda, second daughter of the late William I., King of Wurtemberg, and was married to the King of the Netherlands in 1839. She was in her fifty-ninth year, having been born on June 17, 1818. Her two sons are William, Prince of Orange, heir-apparent to the crown, born in 1840, and Prince Alexander, who is ten years younger. The King has no daughters.

The portrait is from a photograph by A. Ken, of the Boulevard Montmartre, Paris.

FIELD MARSHAL SIR C. YORKE.

One of the three distinguished military officers just raised to the rank of Field Marshal is the Constable of the Tower, General Sir Charles Yorke. He is a son of the late Colonel Yorke, some time Lieutenant of the Tower. He was born in the year 1790, and entered the Army in 1807. He served in the Peninsula and at Waterloo, and in the Kaffir War of 1852-3, and has been Military Secretary to the Commander-in-Chief at the Horse Guards. He was made a Knight of the Bath in 1856, and was promoted to the Grand Cross in 1860. He has held the Constabulary of the Tower since 1875, when he succeeded the late Sir William Gomm. He is Colonel Commandant of the Rifle Brigade.

The portrait is from a photograph by Maull and Co.

SUBSCRIPTION

ILLUSTRATED LONDON NEWS.

AT HOME.

Twelve months (including Christmas Number) £1 0s. 3d. Six months, 14s.; Christmas Half-Year, 15s. 3d. Three months, 7s.; Christmas Quarter, 8s. 3d.

By order of the Executors of the late V. W. Bromley, Esq., removed from Harpenden, for convenience of sale,

MESSRS. J. and R. KEMP are instructed to SELL by AUCTION, at ROBINSON'S ROOMS, 21, Old Broad-street, on TUESDAY, JUNE 26, the excellent FURNITURE, recently supplied by Messrs. Filmer and Son, including Bedsteads and Bedding, a Suite of Walnut and Satinwood Bed-room Furniture, a Blackwood Drawing-room Suite in painted velvet, Japanese, Chippendale and other Cabinets and Tables; 100 Carpets, Tapestry, and other Curtains; Old English and Convex Mirrors; Couches, Easy Chairs, Dining-room Appointments, handsome six-seat Japanese Folding-Screens, Blue and White Vases and Baskets, Brass Work, Jardiniere, Oriental Items, Plate, and Plated Ware, Gold Chronometer and Albert Chain, China and Glass, Winchester Repeating Rifle, Revolver, Saddle, Harness, Outdoor Effects, Oil Paintings, Water Colour and Black and White Drawings and sketches by the deceased Artist and others, Indian Costumes, Eggs, a Lay Figure, and contents of studio. On view the day preceding the Sale. Catalogues at Robinson's Rooms; of Messrs. Boulton and Sons, Solicitors, 21, Northampton-square, E.C.; and of the Auctioneers, 27, Albany-street, N.W. Notice.—Due intimation will be given of the Sale by Auction, at a subsequent date, of the important Oil Paintings and Water Colour Drawings, the works of the deceased Artist, most of them exhibiting at present at the Royal Academy, the Crystal Palace, the Institute of Painters in Water Colours, and elsewhere. Particulars of the Catalogues will be printed in the Catalogue; and meantime they may be treated for privately.

Kensington House.—The Palatial Fresh Id Mansion, recently erected by Albert Grant, Esq., situated in Kensington, opposite Kensington Palace-avenue and Gardens. It is approached through massive iron entrance-gates by a carriage sweep, and contains a suite of splendid reception rooms, and all possible requirements and accommodation for a nobleman's or gentleman's family. It is surrounded by well laid-out pleasure grounds and gardens, with ornamental walks, lawns, and shrubberies, in which are lake, bathhouse, conservatory, orangery, American bowling-alley, and skating-rink, besides which there are extensive detached stabling and coach-house premises, also fowl-houses, the whole covering an area of over seven acres. Immediate possession.

MESSRS. DRIVER are instructed to SELL by AUCTION, at the MART, on FRIDAY, JULY 6, at two precisely (unless previously sold by private contract), this unique and exceedingly valuable FREEHOLD ESTATE—Particulars of Sale, 1s. 6d. each, which will admit the buyer to view the premises, may shortly be had; meanwhile the Estate can only be viewed by special order, for which written application must be made to the Auctioneers, but which will only be given exceptionally. Further information of Messrs. West, King, Adams, and Co., Solicitors, No. 68, Cannon-street; and of Messrs. Driver, Surveyors, Land Agents, and Auctioneers, 4, Whitehall, London.

WRITING, BOOK-KEEPING, &c.

Persons of any age, however bad their writing, may in Eight easy Lessons acquire permanently an elegant and flowing style of penmanship, adapted either to professional pursuits or private correspondence. Book-keeping by double entry, as practised in the Government, Banking, and Mercantile Office, Arithmetic, shorthand, &c.—Apply to Mr. W. SMART, at his old Institution, 57a, Quadrant, Regent-street.

TELEGRAPH, Tramway, Railway, and

Miscellaneous Securities.—Special information as to the position and prospects of the above can be obtained from WILLIAM ABBOTT, 10, Tokenhouse-yard, London, Stock and Share Broker.

METROPOLITAN HOSPITAL SUNDAY

FUND, MANSION HOUSE, E.C. SERMONS in aid of this FUND will be preached in upwards of 1100 Places of Worship on SUNDAY NEXT, June 17. Any person unable to attend Divine Worship on that day is requested to send his or her contribution to the Lord Mayor.

METROPOLITAN HOSPITAL SUNDAY,

JUNE 17, 1877. The Lord Mayor will be happy to receive CONTRIBUTIONS towards the Hospital Sunday Fund, 1877. All friends of the movement unable to make their Donations on the day are requested to send their contributions to the Mansion House, addressed to Mr. Henry N. Cusance, the secretary to the fund, who will give official receipts for each contribution. Cheques should be crossed Bank of England, and sent to the Mansion House.

PIANOFORTES of every description by all the most celebrated makers from Two Guineas a Quarter.

SECONDHAND HARMONIUMS.

Three Guineas and Upwards.

NO. 50, NEW BOND-STREET.

CHAPPELL'S ENGLISH 20-GUINEA or SCHOOL-ROOM PIANOFORTE. with Check Action, in Canadian Walnut or Mahogany. This instrument combines good quality of tone and excellence of workmanship. Capable of enduring hard practice without going out of order. In Solid Oak or White Ash, 22s.; Rosewood or Walnut Case, 27s. 6d.

CHAPPELL and CO'S ORIENTAL MODEL PIANOFORTE. Iron Frame, Trichord throughout. Check Action, Seven Octaves, Solid Walnut Case. FIFTY-FIVE GUINEAS; or in Solid Mahogany or Black Walnut Case, and Check Action, FORTY-THREE GUINEAS; with Plain Action, THIRTY EIGHT GUINEAS.

Made expressly to withstand the heat and moisture of extreme climates. Every part that is glued is also secured with screws. The felt on the hammers, &c. is fastened with pins. The back and the silk frame are lined with perforated zinc to keep out damp and insects; and every precaution taken that has been suggested by persons who have had many years' experience in the care of musical instruments in India and China.

Testimonials of the durability of these instruments can be seen at 50, New Bond-street.

The price includes—1. Packing-cases of tin and wood; 2. A suitable tuning hammer or key; 3. A tuning fork; 4. Some additional strings; 5. A Book on Tuning and Preserving the instrument; 6. And the Carriage to the Docks.

Show-rooms, 50, New Bond-street.

ASHDOWN and PARRY, Hanover-square, London.

STEPHEN HELLER'S PIANOFORTE WORKS.—ASHDOWN and PARRY beg to announce that the entire Works of this renowned Composer may now be had of them.

The universal esteem in which these admirable Compositions are held throughout France, Germany, Austria, Russia, Italy, America—in fact, wherever the study of Music is cultivated—is the best evidence of their unique beauty and sterling worth.

ASHDOWN and PARRY'S EDITIONS of STEPHEN HELLER'S WORKS are to be had of every Musician in Great Britain, Ireland, the Colonies, India, and the United States of America; or will be sent post-free, at half price, on receipt of Post Office order or stamps.

ASHDOWN and PARRY, London.

STEPHEN HELLER'S PIANOFORTE COMPOSITIONS.—A COMPLETE CATALOGUE is NOW READY, and will be sent, on application, post-free, to any part of the world.—ASHDOWN and PARRY, Hanover-square, London.

SIR WILLIAM STERNDAL BENNETT'S BARCAROLLE (from the Fourth Concerto).—This beautiful Composition, which is universally admitted to be the representative Pianoforte Piece of the great English Musician, is now published in the following forms:—

Piano Solo .. 4s.
Piano Duet .. 4s.
Organ, arranged by Dr. Staggall .. 4s.
London: ASHDOWN and PARRY.

NEW SONGS by VIRGINIA GABRIEL.

SUNRISE AND SUNSET. Words by George March.
THE MISSIONARY ANGEL. Words by Samuel F. Smith.
REUNITED. Words by George March.
Price 2s. each, post-free.

J. B. CRAMER and Co., 201, Regent-street, W.

MUSIC at HALF PRICE and POST FREE.

J. B. CRAMER and CO. undertake to supply all Sheet Music of all Publishers at the above rate, on receipt of remittance. Music Circulating Library (for Town or Country). Two to Four Guinea per annum.

MUSICAL BOXES, GUTHRIE'S, CONCERTINAS, METRONOMES, DIGITARIUMS, &c.

201, REGENT-STREET, W.

CHARLES HALLE'S PRACTICAL

PIANOFORTE SCHOOL.
Section I.—No. 1. Pianoforte Tutor.
GLUCK'S BALLAD AND BOREE.
Transcribed by CHARLES HALLE.
Price 4s. Sold at half price.

FOURTH BROTHERS, 272A, Regent-circus, Oxford-street, London; and Cross-street, South King-street, Manchester; and all Musicellers.

J. P. KNIGHT'S NEW GEMS OF SONG.

THE WATCHMAN. C. bass, or mezzo-soprano to D: E flat, baritone.
THE ANCHOR. F. bass, compass A to D, G for baritone.
PEPITA. the Merry Gipsy Maid. G. mezzo-soprano, A. soprano.
Post-free, 2s. each.—W. MONTAGUE, Junr., 70, Upper-street, N.

MUSICAL MINIATURES.

Twelve Songs in three books.
By Lady LINDSAY (of Balcarres).
Price 4s. each book.
London: STANLEY LUCAS, WELLES, and Co., 84, New Bond-street; and 308A, Oxford-street, W.

MACFARLANE'S PEACE OR WAR. A

new Patriotic Song. Sung by Signor Caravaglia. Always encored. 2s. net.
Ricordi's Depot, 23, Charles-street, Middlesex Hospital, London, W.

BOOSEY & CO'S PIANOFORTE ROOMS,

Sole Address, 295, REGENT-STREET.
GRAND and UPRIGHT PIANOFORTES, by all the great makers, both English and Foreign, subject to the largest discount obtainable in London.
Pianettes, from £20. Short Grands, from £40.

BOOSEY and CO'S BRASS

THE NEW BISHOPRIC OF ST. ALBANS.

ST. ALBANS ABBEY CHURCH, THE CATHEDRAL OF THE NEW SEE.

THE GATE-HOUSE.

NORTH-WEST ENTRANCE TO THE ABBEY.

MARKET-PLACE AND CLOCK-TOWER.

PASSAGE LEADING TO THE ABBEY FROM HIGH-STREET.

ST. ALBANS ABBEY.

The ancient Abbey Church of St. Albans is now made the Cathedral of the new Episcopal Diocese of St. Albans; and its first Bishop, the Right Rev. Dr. Claughton, late Bishop of Rochester, was solemnly enthroned there on Tuesday last. We give some illustrations of the venerable building, which has been esteemed, during many past centuries, one of the finest examples of the Norman and the Early Pointed styles of architecture. The town, situated about twenty miles north-west of London, in the county of Herts, was called by the Romans Verulamium, and was one of their principal cities in Britain. It took the name of Albanus, the first Christian martyr in this country, who suffered under the Diocletian persecution, about A.D. 303. A monastery was founded there by the Saxon Offa II., King of Mercia, in 793. After the Norman Conquest, it was ruled by Abbot Paul of Caen, who rebuilt the Abbey Church, of stones and bricks from the ruins of the ancient Roman city. The present tower and transepts, and eastern part of the nave, are the remains of this Norman building of the eleventh century. The Gothic portions, mostly of the thirteenth and fourteenth centuries, are of stone from the Totternhoe quarries, near Dunstable. They include the side aisles, transepts, choir with its aisles, retro-choir or sanctuary, ante-chapel, and Lady Chapel. The entire length of the building, from east to west, is 548 ft. externally, and 434 ft. internally from the east to the west window; the width, including the transepts, is 189 ft., and the central tower is 144 ft. high. The shrine, and several of the monuments in different parts of the Abbey, are of much antiquarian interest. St. Albans has been frequently mentioned of late in noticing the works of restoration executed under the direction of Sir Gilbert Scott, for the continuance of which more funds are to be raised. Our illustrations present a view of this noble church on the north-east side, one of the north-west doorway, one of the gate-house leading into the Abbey precincts, and one of a passage between the Abbey and High-street. The town market-place is also shown, where a fierce battle was fought, and King Henry VI. was wounded and taken prisoner, at the outbreak of the Wars of the Roses, on May 23, 1455.

The ceremony of the Bishop's enthronement on Tuesday was orderly and dignified. The Mayor, Aldermen, and Town Councillors of St. Albans, with the municipal officers of that borough, and the Mayors of Hertford, Colchester, and Harwich, joined by many of the clergy of Hertfordshire and Essex, and a numerous company of the laity, assembled in the Townhall. They received the Bishop there at eleven o'clock, and conducted him in procession to the Abbey, where he was met, at the west door, by the clergy and choir of the Abbey and by the Archbishop of Canterbury. A Te Deum was first chanted, and the letters patent founding the see were read. Archdeacon Grant formally installed the Bishop in the episcopal chair or throne, after the administration to him of the required oaths and the act of investiture by the Archbishop. The Primate subsequently preached a sermon. There was, finally, a celebration of the Holy Communion. In the afternoon the Mayor of St. Albans entertained the Archbishop and the Bishop, with Earl Brownlow, the Earl and Countess of Dudley, the Earl of Verulam, the Earl of Essex, Lord and Lady Selborne, and 200 other guests, at a luncheon party. The proceedings were altogether satisfactory and auspicious of prosperity for the new See of St. Albans.

THE MAGAZINES.

The most generally attractive section of the *Cornhill* this month is that devoted to "Erema"—most entertaining reading, but decidedly overdone. There are, however, a spirit and vitality about it which we miss in the companion novel, "Carità." "Lizzie's Bargain" is a clever specimen of the photographically accurate and minutely analytic delineation of ordinary life which has so long been in fashion. Mr. Alfred Austin's Breton ballad is a fair specimen of his style, too near prose to be quite entitled to the name of poetry, yet pleasing from its truth to nature and masculine vigour. "Crema and the Crucifix" is neither story nor poem, but material for both; the description of a crucifix in the writer's possession sheathing a concealed dagger, no bad emblem of Italian Ultramontanism. Mr. Symonds has blended with the account of his curiosity some very beautiful writing on the brick architecture of Lombardy. An essay on genius and vanity resolves itself into a disquisition on genius and conduct.

The most important paper in *Macmillan's* is a very able vindication of the Mordecai of George Eliot's "Daniel Deronda," from the pen of a co-religionist. Mr. Jacobs is perfectly correct in regarding Mordecai's enthusiastic patriotism and Deronda's acceptance of the creed of his ancestors as perfectly natural, and only requiring a moderate endowment of imaginative sympathy to comprehend. He does not, perhaps, allow sufficient weight to the fact that, on his own showing, Mordecai is neither a portrait from the life nor an ideal creation, but is depicted in a great measure after hearsay. Mr. Statham's criticism on the Grosvenor Gallery hits the blot of this interesting exhibition—the predominance of merely technical excellencies over the expression of mind and thought. "Merlin and Nimue," however, should have been mentioned as a conspicuous exception. Dr. Walter Perry contributes a thorough account of the German school system, with useful hints for the improvement of our own. The other articles are unimportant.

We have rarely seen a less interesting number of *Blackwood's*, which is, indeed, destitute of any feature of attraction except the conclusion of "A Woman-Hater," the continuation of "Pauline," and a lively Canadian sketch entitled "How I caught my first salmon." A review of recent African travel is fairly executed, but heavy; and we know precisely what the authors of the essays on the Eastern Question have got to say before they have begun to write.

Fraser's article on "The War in Asia" is more to the purpose, illustrating speculations respecting the future by the writer's personal experience of the past, and concluding with the useful suggestion that in certain contingencies a Sikh force might advantageously be dispatched to Bagdad. "Studies of Russian Literature" contains an interesting account of an authoress whose literary renown has been eclipsed by her glory as a sovereign—no less a person than Catherine the Second. It is not generally known that one of her plays is an adaptation of the "Merry Wives of Windsor," and another professedly modelled after Shakespeare's style. "British Trade" deals with the commercial and financial prospects of Australia and New Zealand, and severely censures the financial administration of the latter colony. "The Probable Results of Disestablishment" is an ingenious dissuasive from the measure, indirectly suggesting, rather than enforcing, various injurious consequences by which it might probably be attended. "Italian Masks" is an agreeable account of the stock characters of Italian comedy.

The Laureate's sonnet to Victor Hugo, which ushers in the fourth number of *The Nineteenth Century*, is not unworthy either of the offerer or the recipient of its homage, though we ques-

tion the taste of alluding to the latter's supposed dislike to the country of the former. Mr. Froude's first paper on Thomas à Becket is merely introductory, but is evidently to lead up to a scathing indictment of this very questionable saint. We should have thought it impossible for so lucid a writer as Mr. F. Harrison to have composed eleven pages on the future life, from which no mortal can conjecture whether he believes in it or not. The constancy with which the point eludes him, or he it, becomes at last perfectly comical. Lord Stratford de Redcliffe's memorandum on the condition of Turkey thirteen years ago would have been a valuable state paper if published when originally written. More practical interest attaches to Mr. Edward Dicey's bold but statesman-like and well considered proposal for the occupation of Egypt by England. Mr. Edgar Bowring's account of the doings of the Exhibition Commissioners with their South Kensington property may be variously regarded as a vindication at the expense of the Horticultural Society, or a signal of distress on behalf of that unlucky institution. Few, we think, will regret that the National Gallery and the learned societies should have escaped the destiny which the Commissioners intended for them. Mr. Mackonochie, in the name of the Ritualistic party, frankly adheres to the programme of ecclesiastical disestablishment. He seems to be under the impression that the Church would retire from State connection as a whole, instead of breaking up into fragments, of which his own would be the least influential.

Mr. Mackonochie might learn something from Mr. Crosskey, who, treating of the same subject in the *Fortnightly Review*, seriously considers the probability of a portion of the disestablished body adopting a congregational form of government. Mr. Crosskey also indicates the rock on which all schemes for disestablishment must be shipwrecked for a long time to come—the disposal of the parish churches. His proposal to take them from the Episcopalian body is utterly impracticable, while nothing less will be accepted by Dissenters. Come, we know, proposed to repress scientific research by forbidding discoveries to be made without leave from himself or his representatives. One of the latter, Dr. Bridges, would attain the same end by discouraging that thirst for a satisfactory theory of the universe which—doomed perhaps to be ever disappointed—is, nevertheless, the most potent incentive to research and discovery. Mr. Arnold's brief paper on George Sand is disappointing as a literary criticism, but embodies a generous recognition of her moral influences. The controversy between Mr. McLennan and Mr. Herbert Spencer on "endogamous and exogamous" marriages can only be appreciated by a specialist, except in so far as concerns the advantage in point of temper, which is very evidently with the former. We cannot escape from an impression of having previously seen the extract from the late Mr. Nassau Senior's Egyptian journal in print.

The *Contemporary* commences an instructive but not brilliant number by an article on the opium trade, from the pen of Mr. Justice Fry. Every word is indisputable; but, when all is said, the question remains unanswered whether the needy millions of India ought to be, or can be, taxed to an enormous amount in the cause of Chinese sobriety. Mr. Freeman is very angry with the concoctors of ancient pedigrees for modern upstarts, a race at whom, as well as at their customers, the rest of the world is usually content to laugh. Professor Dowden writes ably on the French Revolution and Literature; Major Osborn has much worth knowing to tell on Mohammedan law; but perhaps the most valuable contribution to the number is Mr. J. M. Stuart's exposition of the motives of the supporters of the Italian Clerical Abuses Bill.

The centre of interest in the *Gentleman's Magazine* continues to be Mr. McCarthy's "Miss Misanthrope," and the centre of interest in *Miss Misanthrope* the merciless but salutary derision of the affectations of minor poetical and artistic cliques. There is much curious learning in Mr. Mew's paper on early Italian novels; Mr. Sala's "Grand Turk at Home" evinces his usual graphic power; and scientific subjects are ably popularised by Dr. Wilson and Mr. Proctor.

The *North American Review* has a very interesting review of recent African travel from the pen of a distinguished traveller, Mr. Laurence Oliphant, who severely censures Mr. Stanley for trying to obscure or appropriate the discoveries of former explorers, and predicts that persistence in this course will ruin his reputation. The veteran Bryant's essay on Cowley is interesting as the judgment of a poet upon a poet. Mr. Karl Blind's paper on European diplomacy is a seasonable warning to the American people against indiscriminate Russian sympathies; and "Soul and Substance" is an ingenious argument in favour of the corporeality of the spiritual essence. A very short essay on the American Constitution, by Senator Morton, advocates the direct election of the President by the people; and is amusingly associated with an ingenious satire on the superstitious reverence of the Americans for their Constitution, ascribed to an imaginary Japanese traveller. Out of sixteen contemporary works briefly criticised, it is noteworthy that only two are American.

The *Atlantic Monthly* has a remarkably interesting essay on the translations of Mr. Edward Fitzgerald. Mr. Fitzgerald's version of Omar Khayyam has won him fame, but few are aware of his merits as the translator, or rather the paraphraser, of Calderon and Æschylus. A second article on South Carolina society graphically sketches the dislocation consequent on the uneasy relations of its white and coloured constituents. There seems no adequate remedy except an extensive immigration from the North, which must take place sooner or later. Wendell Holmes and Bayard Taylor contribute poems in their characteristic styles; and there is a sad but beautiful piece of verse, entitled "Rose Daniels," from the pen of Marian Douglas.

Mr. James Payn's Chinese story provides amusing reading for the readers of *Belgravia*, and Mrs. Linton's fiction is not an unfavourable specimen of her later style. The most remarkable of the miscellaneous contributions is an essay on the purpose of the Pyramids by Mr. Proctor, who contends that it was astrological. He entirely fails to show, however, in what manner the erection of a pyramid could facilitate the calculation of a nativity. "Proud Maisie" continues to constitute the main attraction of *London Society*, and *Tinsley*, as usual, is fairly interesting without special features.

We have further to acknowledge Good Words, The Victoria Magazine, Golden Hours, Cassell's Magazine, All the Year Round, Dublin University, Churchman's Shilling Magazine, Charing-Cross Magazine, No. 1 of the Island Quarterly (an Isle of Wight publication), Leisure Hour, Weekly Welcome, Day of Rest, Science Gossip, Poet's Magazine, Foreign Church Chronicle, Sunday at Home, Sunday Magazine, Gardeners' Magazine, Garden, and Argonaut.

We have just received a copy of No. 6 of the *Melbourne Review*, which contains some good solid reading. Among the articles are—On Property in Land, by Professor Pearson; Biblical Inspiration, by the Rev. W. H. Wollaston; the Temperature of Acute Disease, by Dr. Balls-Headley; Phases of London Life—No. 1, Christie and Manson's, by the Hon.

A. Michie, Q.C.; the Origin of Language; the Incidence of Taxation and the Expenditure of Public Money, by R. Savage; Should not the Melbourne University be Removed? by Professor H. A. Strong; and Science Gleanings.

The unusual pretension accompanying the issue of the *Chesley Novels* (Blackwood), two parts of the first of which, *A Modern Minister*, now lie before us, of itself sufficiently indicates that we have not to do with a new writer. We have no great difficulty in conjecturing the authorship, but for fear of indiscretion will content ourselves with observing that the novel, so far as it has proceeded, is distinguished by all the vigour of style and fertility of invention to be anticipated under the circumstances, accompanied with a hardness, boisterousness, and melodramatic exaggeration disintitling it to rank as a serious work of art.

ROYAL INSTITUTION LECTURES.

DAVY'S CHEMICAL DISCOVERIES.

Professor Dewar, F.R.S., began his third and concluding lecture on Tuesday, the 5th inst., with an interesting experiment showing how inflammable globules of the alkaline metals, potassium and sodium, may be produced from their fused salts at a red heat by a voltaic current; and he then explained the methods by which Davy demonstrated that these are really elementary metals and not compounds of hydrogen, as supposed by Gay-Lussac and other chemists. Davy next attacked the volatile alkali ammonia with his powerful battery. He formed an amalgam of ammonium and mercury, and tried in vain to isolate a metal from it; and the substance is now regarded as a metallic froth. He was mainly opposed by the inherent experimental difficulty of proving the distinct atomic relations in the composition of ammonia itself. Professor Dewar next explained the elegant process, simple yet recondite, invented by Davy to prevent the corrosion of the copper sheathing of ships, by placing on the copper pieces of zinc, tin, iron, or some other metal; a method which failed through secondary causes. He then described what he termed the culminating point of Davy's researches, which completely revolutionised the chemical science of the time, in that, after having succeeded in producing new metals by the decomposition of bodies hitherto supposed to be elements, he now demonstrated the elementary character of a body always considered to be a compound. He proved that there is no oxygen in the oxymuriatic gas discovered by Scheele, and, from its greenish colour, named it "chlorine," as a new element. Professor Dewar stated that there are compounds of chlorine and oxygen, but their properties differ from those of their constituents; and, by the action of a beam of electric light, he caused the explosion of a mixture of hydrogen and chlorine with the evolution of light and heat. Davy, he said, was the first to define strictly an element to be a body which cannot, by any mode of treatment, be made to yield up any other body; but, up to the close of his career, he maintained that we can only regard metals, or any other bodies, to be elements so long as they cannot be decomposed. He concluded with a warm eulogium of the great philosopher.

LIEZT AND HIS COMPOSITIONS.

Mr. Edward Dannreuther began his lecture on Thursday, the 7th inst., by saying that Liszt, even more than Chopin, was the representative of the last stage to which the technique of pianoforte playing can be carried. He warmly controverted the charge of charlatanism brought against Liszt, who, in his wonderful effects, made use of the enormous improvements in his instrument; for since the beginning of the present century the pianoforte has been really transformed in relation to the quantity and quality of sound, its entire mechanism, and the method of its treatment. Liszt was born on Oct. 22, 1811, near Pesth, in Hungary. He began to play in 1817, and made amazing progress. He studied earnestly under Czerny, at Vienna, and soon astonished composers by playing at sight their most difficult pieces. In 1822 he gave a concert, at the close of which he was embraced by Beethoven. After appearing in 1823 as a phenomenon in Paris and London, he settled as a teacher in Paris in 1826, receiving lessons in counterpoint from Reicha. In 1831 the appearance of the great violinist Paganini gave him the impulse which ended in his own supremacy as a pianoforte-player. He then determined to do for his own instrument what Paganini did for the violin. For this purpose he retired from public life for five years, and when he reappeared it was as the mature master, before whose transcendent execution all rivals vanished. From 1836 to 1848 he travelled from one end of Europe to the other, being everywhere received with the greatest enthusiasm. In 1848 he gave up playing in public, and settled at Weimar as conductor of the Court Theatre, teaching and composing; and since 1868, when he joined a religious order, he has resided occasionally at Rome and Weimar, and also at Pesth, where he is chief of the National Hungarian School for Music. In the latter part of the lecture Mr. Dannreuther commented on the changes in the mode of playing introduced by Liszt, especially in the treatment of the key-board, in the position of the hand and arm, whereby their available mechanical power is enormously increased, in the ingenious use of the pedals, and in the production of full rich chords by placing their component notes in acoustically favourable positions. His telling effects of sonority are now the common property of pianists. After remarking on the great variety and originality of Liszt's compositions, Mr. Dannreuther selected the "Rhapsodies Hongroises" as perhaps the best representative of the composer himself and his treatment of his instrument. The illustrations, which included "Les Préludes" for two pianofortes, played by Mr. Dannreuther and Mr. Walter Bache, were rendered with full justice to their melodious sweetness and grace, mingled with magnificent telling harmonies.

PUTREFACTIVE AND INFECTIVE GERMS.

Professor Tyndall, in his discourse at the evening meeting on Friday, the 8th inst., the last of the season, gave an account of his studies and experiments, in continuation of those described on Jan. 19 last, of which a notice was given in our Number for Jan. 27, page 91. Having found that his boiled infusions of various animal and vegetable substances remained free from minute putrefactive organisms in the pure atmosphere of Kew, he tried if a similar result could be obtained in a shed which he caused to be erected on the roof of the Royal Institution. The experiments were unsuccessful, till his assistants wore clothes free from the bacterial germs which existed in the air of the laboratory. They previously resembled the cowherds who spread cattle disease. His infusions then remained pellucid, with no trace of bacterial life. Having projected in the beam of the electric lamp the dust from some old hay, he said that in it existed germs, which would cause a perfectly sterilised infusion in twenty hours to swarm with putrefactive organisms, and which might be the contagion of hay fever. How would these germs act in the wards of an hospital? How would they affect the wounds and sores of living men? Might they not also cause serious loss in food-preserving establishments? He next noticed the difference in the behaviour of the germs and their offspring, and described experiments which showed that, while

desiccated indurated germs retain their vitality after from five to eight hours' boiling, the plastic sensitive adult organisms may be destroyed after a few minutes' boiling, and in some cases by heat under the boiling point. In all known organisms there exists a period of incubation, and if the infusions are boiled at successive stages eventually the last living germ will disappear. The Professor then described a series of experiments which showed the striking analogy between the vital action of the highest and the lowest organisms. The privation or excess of oxygen kills these bacteria as well as ourselves. The living scum on the top of an infusion will greedily consume all the oxygen in the air above it, and the water beneath will be as pellucid as if distilled; and infusions of beef and mutton which had been subjected for many weeks to a pressure of ten atmospheres of oxygen were shown to remain sweet and transparent, without a trace of life. After alluding to M. Paul Bert's experiments on this subject, Dr. Tyndall concluded by saying that the results of eight months' labour led him inexorably to the conclusion that no evidence exists for the transformation of the non-living into the living; and that, in the lowest as in the highest of organised creatures, the method of nature is that life shall be the issue of antecedent life.

THE DISCOVERIES AT MYCENÆ.

Mr. Charles T. Newton, C.B., in beginning his second lecture on Saturday, the 9th inst., adverted to his assumption that the fortifications of Mycenæ, the Lions' Gate, and the Treasuries (or rather tombs) were not built later than the fall of the Atridæ dynasty. For an adequate account of the discoveries of Dr. Schliemann he referred his audience to that gentleman's forthcoming work. He then commented on the antiquities obtained from the tombs, some of gold, being cups, ornaments of weapons, and personal decorations; others in silver, bronze, ivory, wood, and fictile ware. The fashion of all is very rude, the metal being hammered out in the manner termed by the Greeks "sphyrelaton," their subject-matters being symbols, derived from the lower forms of animal life, a few only being mythologised—one figure may probably be the Phœnician Aphrodite. The execution of the art is feeble, like the work of a child, and ruder than the earliest known Greek art. This was illustrated by reference to diagrams of very early jewellery from Camirus. To the opinion that these relics were Byzantine Mr. Newton did not agree, and pointed out resemblances between them and specimens found at Ialysus, in Rhodes. After fully considering the evidence as to the antiquity of both, he expressed his opinion that if the local tradition preserved by Pausanias as to the five tombs of Agamemnon and his companions was grounded on any real event, and if, again, the reign of Orestes was, as computed by ancient chronologists, 1120 A.C., or even earlier, which he could not guarantee, then there was nothing in the relics themselves to make so remote a date impossible. They remarkably illustrate the descriptions given by Homer, who, however, probably lived when art was more advanced. In conclusion, Mr. Newton strongly recommended Dr. Schliemann to continue his excavations at Hisarlik, and to explore the tumuli in the plain of Troy and those near Sardis.

With this lecture the Royal Institution season was closed.

The sitting of the Royal Geographical Society last Monday evening was mainly occupied with the reading of a paper, written by Bishop Crowther, entitled "Journeys up the Niger, and Notes on the Neighbouring Countries." The paper was read by Mr. Hutchinson. The river was described as being of noble character and great extent; the land, except in the neighbourhood of the delta, as fine and fertile; and the inhabitants of the surrounding country as being civilised, industrious, and of good physical type as to strength and stature. During a journey of 700 miles Bishop Crowther had encountered thirteen different dialects, but the Hausa was a general medium of communication. A native had told him that a competent knowledge of Hausa would carry the pilgrim from London to Mecca. He had everywhere ascertained that a friendly feeling towards the English prevailed amongst the natives. The reading having terminated, Bishop Crowther said a few words, in the course of which he gave the Mohammedan conquerors of Central Africa credit for having as much as possible suppressed pagan worship and human sacrifices. Their main object, however, was to make slaves, not proselytes; and therefore they could not enter for a moment into competition with the Christian missionaries, of whose labours he gave a brief description. A short discussion ensued. Mr. Hutchinson announced that it was the intention of the Church Missionary Society to promote the construction of a steamer in which Bishop Crowther could renew and extend his explorations.

Madame Schliemann read a paper before the Royal Archaeological Institute yesterday week, in which she discussed the greatness and beauty of Greek life, its dependence on the meteorological and other phenomena of the country, and the causes of its decline. She adverted to the discoveries of her husband and herself at Troy and at Mycenæ, and paid a warm tribute to the sympathy and interest shown by the English nation in the progress of Greek independence. Some brief remarks were made by Dr. Schliemann and Lord Talbot de Malahide (the chairman), and Mr. Gladstone was among the speakers. He expressed his preference for the current Greek pronunciation of academical England as against the modern pronunciation of the ancient language.

The annual distribution of prizes in connection with the Royal Institute of British Architects took place on Monday evening in the rooms of the institute, 9, Conduit-street, Hanover-square, under the presidency of Professor Donaldson. After some preliminary business had been duly disposed of, the chairman presented Mr. Charles Barry, F.S.A., with the "Royal Gold Medal." In so doing he expressed the satisfaction it gave him to be able to present such a distinguished artist as Mr. Charles Barry, whose family had long been honourably associated with the profession, with the "Royal Gold Medal." The "Soane Medallion" was presented to Mr. William Scott; prizes being awarded to Mr. J. L. Ball, Mr. W. G. Scott, Mr. H. Stannus, and others. At the conclusion of the distribution Professor Donaldson read a communication from M. Lyandros Kaitangioglov respecting the recent excavations at Mycenæ. Sir Gilbert Scott also contributed a paper in reply to a paper lately read at the institute by Mr. Stevenson on Architectural Restoration: Its Principles and Practice. A short discussion ensued.

A two days' discussion was brought to a close on Tuesday, at the United Service Institution, upon a suggestive paper by Mr. Scott Russell on the development of our modern war fleet.

Mr. J. Boss writes to the *Times* to announce the first ascent of the Wetterhorn this year. It was made on the 8th inst. by the Rev. Edward Frederic Cavalier, an Englishman. He started on the previous day, with two guides, from Grindelwald. They slept on the roof of the club hut on the Glockstein, which they still found filled with ice and snow. On the 8th they reached the top of the Wetterhorn at about half-past seven in the morning, and returned safe and sound to Grindelwald at two o'clock in the afternoon.

MUSIC.

ROYAL ITALIAN OPERA.

Brief comment will suffice in recording the performances given at this establishment since our last week's notice, these having been repetitions of well-known operas, mostly with familiar casts. This week opened with "La Favorita," followed on Tuesday by the second performance this season of "Aida," "Tannhäuser" having been given again on Wednesday and "Martha" (as announced) on Thursday. For yesterday (Friday) "Il Barbiere di Siviglia" was promised, with Madame Adelina Patti as Rosina, for the first time this year. To-night (Saturday) is to take place one of the special events of the season, the production of "Il Vascello Fantasma," an Italian version of Wagner's "Der Fliegende Holländer."

HER MAJESTY'S THEATRE.

Since our last notice Mdlle. Chiomi has appeared for the second time as Lucia in "Lucia di Lammermoor," and met with enhanced success.

"Faust" was repeated on the following evening, and "La Figlia del Reggimento" on Saturday, with Mdlle. Mila Rodani again as Maria. Signor Carrion, a recent débutant, was the Tonio; and the cast was otherwise the same as that lately noticed. The opera was followed by a new ballet entitled "Les Nymphes de la Forêt," invented and arranged by Madame Katti Lanner, and including some clever dancing by that lady, and some pleasing grouping of the juvenile dancers, Mdlles. Marie Muller, Luna, Anna, and Scotti.

Herr Wachtel made his first appearance here on Tuesday as Manrico in "Il Trovatore," in which part he was first heard in England, at the Royal Italian Opera, some years ago. Again, as then, he produced a marked impression by the resonant quality of his voice, and his effective declamation. He was enthusiastically encoored in the aria "Ah! si ben mio," and in the solo "Di quella pira" the high chest C was more than once produced. The success of the singer was decided. Signor Galassi was the Count di Luna, the cast of the opera otherwise having been the same as recently.

On Thursday Rossini's "Otello" was to be given with a very powerful cast, including the Deademona of Madame Nilsson, the Iago of M. Faure, and the Otello of Signor Tamberlik, his first appearance here. Of this performance we must speak next week.

Handel's "Hercules" was given at St. James's Hall, under the direction of Mr. Henry Leslie, yesterday (Friday) week. The work was composed in 1774, and first performed, under Handel's direction, in 1775. It has been revived at Berlin and Düsseldorf, under the superintendence of Herr Joachim; but in London (the place of its original production) it had been consigned to obscurity until rescued by Mr. Leslie. It contains rather an undue preponderance of pieces for solo voices over choral writing, in which latter lay Handel's greatest strength. The few movements of this class are impressed with the genius and power of the composer, particularly the choruses "Let none despair" and "Crown with festal pomp the day." The latter was encoored. The solo music assigned to the characters of Dejanira, Iole, Lichas, Hyllus, the Priest of Jupiter, and Hercules, was sung, respectively, by Mrs. Osgood, Miss Robertson, Madame Patey, Mr. E. Lloyd, Mr. Patey, and Mr. Santley. In these portions of the work the most effective features were Dejanira's air, "The world when day's career," Iole's song, "How blest the maid," those for Lichas, "The smiling hours," and "As stars that rise," Hyllus's solo, "Where congeal'd the northern streams," and Hercules' airs, "Alcides' name" and "O Jove! what land is this?" The performance was altogether of a high order, the choristers having consisted of members of the Guild of Amateur Musicians and Mr. Leslie's Choir, and the orchestra of many eminent instrumentalists. Mr. Leslie conducted, and Mr. Calcott and Mr. Ward were, respectively, pianoforte accompanist and organist.

The twenty-sixth season of the New Philharmonic concerts closed on Saturday afternoon last with the fifth of the series. The programme was of very strong interest, particularly in the instrumental portion, which comprised Mendelssohn's Italian Symphony, Beethoven's third "Leonora" overture, the march from Wagner's "Tannhäuser," Joachim Raff's violin concerto in B minor (op. 161), finely played by Herr Leopold Auer; Dr. Ferdinand Hiller's Concertstück for pianoforte (op. 113), brilliantly executed by Mr. Alfred Jaell (his first appearance this season), and Reinecke's duet for two pianos on themes from Schumann's "Manfred" music, in which Mr. Jaell was associated with Mdlle. Debillemont. Vocal pieces were effectively rendered by Madame von Sadler-Grün (one of the principal singers of last year's Bayreuth Festival); and Miss Eléne Webster (of the London Academy of Music), who made a highly successful first appearance on the occasion. The office of conductor was divided, as usual, between Dr. Wylde and Mr. Ganz. The fine orchestra, led by M. Pollitzer, has again been a special feature at these concerts.

The eighth concert of the Philharmonic Society took place on Monday afternoon, when the orchestral performances consisted of Mozart's symphony in E flat, Beethoven's overture to "Coriolan," and Weber's to "Euryanthe." Viotti's violin concerto in A minor and Weber's "Concertstück" for pianoforte were finely played, respectively, by Madame Norman-Néruda and Mdlle. Mehlig. Madame Trebelli and Mr. E. Lloyd were the vocalists.

Mr. Kuhe's annual concert, which took place at the Floral Hall on Monday afternoon, was of similar attractiveness to those of preceding years. The admirable performances of Madame Adelina Patti and Mdlle. Albani were special features in a varied programme that also comprised much besides that was highly interesting, familiar as the selection was. Mdlles. Thalberg, Bianchi, Smeroschi, and Synnerberg, Signori Nicolini and Marini, M. Capoul, M. Maurel, Signori Pandolfini, Caracciolo, Capponi, and Scolara, and the choristers of the Royal Italian Opera also contributed to the vocal performances. Mr. Kuhe and Herr Wilhelmj played some effective solos on their respective instruments, pianoforte and violin.

That accomplished young pianist Miss Emma Barnett gave a pianoforte recital at St. George's Hall on Wednesday afternoon, when her programme consisted of a long and varied selection of pieces in the classical and romantic styles.

The miscellaneous concerts of this week comprised those of Mr. Gerard Coventry (vocalist), at Langham Hall, on Wednesday afternoon; of Mr. J. Greenhill (vocalist), at the Royal Academy Concert-Room, on Wednesday evening; and a concert on Friday evening, at St. James's Hall, in aid of the Samaritan Free Hospital for Women and Children.

The first Alexandra Palace Saturday concert of the season took place last week. The programme included Mendelssohn's "Scotch" symphony, Sterndale Bennett's "Naiades" overture, and vocal music by Madame Blanche Cole, Miss Cummings, Madame De Valence, Mr. E. Lloyd, and the Alexandra Palace Choir, under the direction of Mr. H. Weist Hill. Operas in English are still being given at this establishment, under the management of Mr. G. Perren. "Il Trovatore" was announced for Thursday, with Madame Arabella Smyth as Leonora and Mr. Perren as Manrico; and "La

Sonnambula" for to-day (Saturday), with Madame Rose Hersée as Amina and Mr. Perren as Elvino.

M. Rivière's Promenade Concerts at the Queen's Theatre continue to be carried on with enterprise and success, and are attracting good audiences. Wednesday's programme comprised a selection from Wagner.

A grand concert is to be given this (Saturday) afternoon at the Royal Albert Hall, the programme comprising performances by some of the principal vocalists of Her Majesty's Theatre and the fine orchestra of that establishment.

Sir J. Benedict's annual concert is to take place in the Floral Hall on Monday next, and will include performances by the great singers of Mr. Gye's establishment.

Yesterday (Friday) week a meeting was held at the Royal Academy of Music, Hanover-square, in furtherance of the project of erecting a permanent college in which young pupils may be trained in the sol-fa system. The college has been incorporated since 1875, and a site for the necessary buildings has been obtained at Plaistow, in Essex. The object of the meeting was to open subscription-lists to meet the necessary expenses. The chair was taken by the Rev. John Rogers, M.A. In the course of the evening a class of infants and a choir of boys gave creditable illustrations of the sol-fa method, and glees and part-songs by men's voices were given under the direction of Mr. Proudman. The secretary read an outline history of the rise and progress of the sol-fa system through the persevering exertions of Mr. Curwen, there being now 5000 teachers in the United Kingdom; and the chairman testified, from long experience, to the value of the method.

THEATRES.

The German-Reed entertainment has undergone a slight change. A new first part has been provided, written by Mr. Arthur Law, who besides sustains one of the characters, and is supplied with music by Mr. King Hall. The title of the new piece is "A Happy Bungalow." The principal rôle is supported by Miss Fanny Holland, as Ethel Newbound, recently married, and just arrived from England in India. The part sustained by the author is that of Jack Newbound, the young lady's husband. The happiness of the bungalow is complete. But Mr. Alfred Reed enters as Madra (Bhoj), with the contents of the letter-bag, which threaten the new-married couple with a visit from the lady's aunt, Lady Currie (Mrs. German Reed). Mrs. Newbound is delighted; but Mr. Newbound is fain to get help from a friend, Tom Standbye (Mr. Corney Grain), who promises to get rid of the intruder in a day or two, provided he is permitted to manage the matter. Lady Currie is a character, devoted to a dead husband, and easily falls a prey to Jack's inventions. She soon finds she is in the way, whether as the object of Jack's extravagant affection, or that of the husband's, is not very clear. Accordingly, she determines to compromise matters. Instead of living with them she will live near them, and occasionally look in for a cosy cup of tea. The lyric portion of the little drama is more than usually animated. One song ("The Golden Dream") by Miss Holland is delicious, and will secure the popularity of the new piece. A duet, also, between Mr. Alfred Reed and Miss Leonora Braham, as Ayah, a fellow-servant, commanded an encore. It represented a rough and ready Indian courtship between two well-to-do domestics, who cunningly understand their mutual interests, and wisely determine on an instant union. With such attractions, "A Happy Bungalow" will speedily achieve popularity.

A performance is announced to take place at the Gaiety Theatre on Wednesday next for the benefit of Mr. Charles Lamb Kenney, whose services to literature and the drama thoroughly deserve this recognition. "The School for Scandal" and "The Waterman" are to be performed. Lady Teazle will be played by Miss Ellen Terry, and Tom Tug by Mr. Sims Reeves. Mr. Neville, Mr. Clayton, Mrs. A. Stirling, Mrs. Alfred Mellon, and Mr. Santley will give their services on this occasion. It is to be hoped that a full house will be present on the morning of June 20.

Messrs. Maskelyne and Co. have furnished a new attraction to their Egyptian Hall exhibition, by adding an automaton called Zoe, which now, in conjunction with Psycho, takes part in the entertainment. Zoe is a distinct figure, but she registers what Psycho does, and ultimately produces a drawing, which turns out to be a portrait of Mr. Gladstone. The combined efforts thus secured will probably secure the popularity of the new "android." Such is the name bestowed on the invention by its author.

ROYAL NAVAL ARTILLERY VOLUNTEERS.

The London division of the Royal Naval Artillery Volunteers attended Divine service on Sunday at Westminster Abbey. The corps, numbering about 180 of all ranks, paraded upon the Thames Embankment at half past nine, under the command of Lieutenant Lord Ashley, Lieutenant Brassy, M.P., and the whole of the officers. Marching off in fours, the corps were met at the door of the abbey by Dean Stanley, and proceeded to take up places reserved for them in the centre of the nave. The Dean preached the sermon, taking for his text Judges v. 1, 2. He spoke of the value of freedom and independence—first, of our country; secondly, of the Church; and, thirdly, of the human soul. The nation which lost its freedom lost half its virtue, and in losing its independence lost half its chance of serving God and mankind. Freedom was, however, only worth having in proportion as it helped us to do our duty. Our country was chiefly dear to us because it was in itself worth serving. And the freedom of the individual soul was what most concerned us all. There were few but must at some time have felt that they were slaves to some evil feeling. To get rid of bad habits and turn over the new leaf it had often been found good to go to sea, in which could be buried our evil passions. There was nothing better in the world than a good sailor; and we might recall with pride such names as Collingwood, Franklin, Parry, and Goodenough. He exhorted his hearers, then, to go forth to serve their country in all purity of mind, returning better citizens and better Christians, with harder frames, stronger minds, and higher characters. Might God bless them going out and coming home from that time forth and for evermore! After the service the parade was dismissed. We give an illustration of the Royal Naval Artillery Volunteers marching into Westminster Abbey.

The sixtieth annual dinner in aid of the German Society of Benevolence was held on Tuesday evening at the Crystal Palace. His Excellency Count Beust occupied the chair, Count Münster being also present. The subscriptions amounted to £457, including £50 from the Emperor of Austria, £50 from the Emperor of Germany, and a like sum from Count Beust. Count Münster on the same day laid the foundation-stone of a German school, in connection with the German Lutheran church in little Alie-street, Goodman's-fields, intended for the benefit of the German population in the east of London.

THE ROYAL NAVAL ARTILLERY VOLUNTEERS ON THEIR WAY TO WESTMINSTER ABBEY ON SUNDAY LAST.

THE WAR: MAPS SHOWING THE SITUATION OF TOWNS AND FORTRESSES ON THE DANUBE.

NEW BOOKS.

ORIENTAL.

The Syndics of the University Press, Cambridge, perform a peculiarly appropriate function as often as they publish such stately, scholarly, instructive, and useful books as *The Poetical Works of Behá-Ed-Din Zohair*, to be obtained at the Cambridge Warehouse, in Paternoster-row, or of Messrs. Deighton, Bell, and Co., at Cambridge, and edited, with a metrical translation, notes, and introduction, by E. H. Palmer, M.A., Lord Almoner's Reader and Professor of Arabic in the University of Cambridge. To students of the Arabic language the translation, if it be as accurate as the learned translator with good reason believes it to be, cannot fail to be of great service; and to others, though their number unfortunately is likely to be small, it will no doubt be an object of interest as well as of curiosity. Not many English readers, not more, perhaps, than could be counted upon the fingers of both hands, have so much as heard that there ever was any poet named Zohair; and even fewer are aware that he wrote poems, or verses, remarkable for their "easy and graceful language," and for the "freshness and originality of the thoughts," and still more remarkable, when his religion and the age at which he lived are taken into consideration, for characteristics which remind us rather "of an English courtier of the seventeenth century than of a Mohammedan of the Middle Ages," and which recall the spirit and manner of our own genial Herrick. Who, then, somebody may ask, was this Zohair, and when did he live, and what was the style of his muse? Zohair, hight "of Egypt," was born, according to his own account, both at Mecca and at another place, in the neighbourhood of Mecca, which, in words familiar to learners of Euclid, is impossible; but in or near Mecca he was born, A.D. 1186, and he died, having fallen a victim to an epidemic, at Cairo, A.D. 1258. He was surnamed Behá Ed Din, or Splendour of Religion, and is described as the Secretary, so called, presumably, from the office he filled at the Court of his friend and patron El Melek es Salih, who was the third Sultan of the dynasty founded by the great Saladin. Zohair is said to have been "one of the most accomplished men of his time, and not only the best writer of prose and verse, but the best calligraphist." It is not irrelevant here to mention that Saladin was "a rigid adherent of the Sunni sect; and his first act, on assuming the independent sovereignty, was to obliterate every vestige of the Fatemite heresy." And Saladin's successors pursued the same policy. This is the explanation given of the ridicule into which Zohair delights in turning "rites and observances which half a century before were part and parcel of the religion of the State." It is suggested that "the levity with which Zohair treats themes usually regarded with extreme reverence by Mohammedans must be attributed to his antipathy to the Ishmaelite heresy, rather than to a want of respect for El Islam itself. The texts and passages of the Corán which he turns into jest are not those which involve any of the broader principles of Monotheism, but rather those which were supposed to shadow forth prophetically the advent of Mehdi, the Mohammedan Messiah, and upon which so many impostors and enthusiasts have down to the present day founded their claims to a Divine mission." Whether the apology suggested be sufficient excuse for the frequency and the evident zest with which Zohair—who seems to have been what is called a jolly dog—adopts for his theme the decidedly secular subjects of love and wine, must be left to be determined by "true believers," who will be the best judges of how far the "Splendour of Religion" might go without offence. And now, perhaps, a reader may say, Sing us one of the songs of Zohair, and show us what his muse was like. Without using so uncomplimentary a phrase as that of throwing pearls before swine, one may nevertheless be pardoned for pleading that to quote his effusions in the original Arabic, even if it were conveniently at hand, would be simply to mock the majority of readers; and so recourse shall be had to Professor Palmer's translation, though the Professor himself acknowledges—what, indeed, was inevitable—that even he cannot do justice to the outpourings of the "Splendour of Religion." Here is a specimen of the way in which Zohair, writing in the thirteenth century, dealt with "that peculiar trifling of words and sentiments of which the English poets of the Restoration were so fond":—

I melt away when'er I hear
The liquid sweetness of her voice;
My heart will flutter when she's near—
Nor need it very strange appear
To dance when we rejoice!

Where, of course, the flutter of the heart is supposed to be the dance of joy. And "to the hackneyed hyperbole of dying for love" he gives the following turn:—

Oh! torture not my life in vain,
But take it once for all away,
Nor cause me thus with constant pain
To die and come to life again
A thousand times a day!

How he appreciated Nature and her beauties may be inferred from the following lines:—

I took by pleasure in a garden bright—
Ah! that our happiest hours so quickly pass;
That time should be so rapid in its flight!
Therein my soul accomplished its delight,
And life was freer than the green young grass.
There rain-drops trickle through the warm still air,
The cloud-born firstlings of the summer skies;
Full oft I stroll in early morning there
When, like a pearl upon a bosom fair,
The glistening dew-drop on the sapling lies.
There the young flowerets with sweet perfume blow,
There feathery palms their pendent clusters hold,
Like foxes' brushes waving to and fro;
There every evening comes the after-glow,
Tipping the leaflets with its liquid gold.

It should be borne in mind also that the "constant allusions to the history and traditions of the Arabs make the Diván of El Behá Zohair particularly valuable as a repository of Oriental learning." Diván, be it observed, means, among other things, a collection of poems.

The syndics of the University Press, Cambridge, displayed a very enlightened liberality in undertaking the cost of publishing the *History of Nepal*, translated from the Parbatīyā by Munshi Shew Shunker Singh and Pandit Shri Gunānand; with an introductory sketch of the country and people of Nepal, by the editor, Daniel Wright, M.A., M.D.; a work which is to be obtained at the Cambridge Warehouse, Paternoster-row, or of Messrs. Deighton, Bell, and Co., Cambridge. The book is of stately proportions, as far as size is concerned; and there are several coloured illustrations, occupying sometimes a whole page and sometimes as much as two pages of space. Peculiar interest will just now be felt in the plate which adorns the frontispiece, presenting a full-length portrait of the late Sir Jung Bahādur. The editor speaks a little slightly of the illustrations, simply remarking that "the portraits are from photographs taken by a friend;" and that the others, which are copies of drawings made for him by a native of Nepal, are "not of much value as works of art," though "they convey a very fair idea of the places and objects represented." He will probably be considered by the majority of those who examine his book to have underrated

rather than overrated the merits of his native assistants. The history proper is preceded by an introduction contributed by the editor. This introduction fills five chapters, or seventy-five pages, and forms an excellent preliminary exercise, giving the reader an opportunity of taking a rapid, preparatory glance at the physical features noticeable in the valley of Nepal, at the population of the country in all its varieties of race, at the occupations of the people, at the establishment of intercourse between the British and the Nepalese, and at the aspect of political matters in Nepal in these latter days. The history proper, translated from the original manuscript, will, no doubt, appear extremely meagre to readers accustomed to the voluminous histories of European countries: it fills but twelve chapters, occupying little more than two hundred pages. It starts from the mythological period, extending through a series of ages, during some of which men lived, or are supposed to have lived, so many years that, in comparison with them, Methuselah may be said to have been cut off in his youth; from 10,000 to 5000 years were considered the average duration of life for a healthy man. After this we arrive at the date of less long-lived races, when Nā Muni, who gave its name of Nepal to the country, appeared upon the scene and installed as King of the whole region a certain cowherd's son, whose dynasty, called the Gupta dynasty, "reigned through eight generations, extending over 521 years." Dynasty then succeeds and supercedes dynasty, until we come to the time of the Gōrkālī Rājās, the line to which the present reigning Monarch is understood to belong. Of his father it is related that he "repaired the umbrella of Pashu-pati-nātha;" but, notwithstanding that pious work, he is believed to have been deposed in 1847, leaving his throne to be ascended by his son. It would be sheer affectation to pretend that the history is as fascinating to read as the late Lord Macaulay might have made it, for it is, in fact, little more than a bare enumeration of various incidents and various names, which are, both of them, not only unfamiliar but totally uninteresting to the great majority of Englishmen; nevertheless, it is likely to be of great value to the student, and it contains, interspersed here and there, such simple, natural, artless little touches, revealing at a glimpse all kinds of quaint habits, manners, customs, beliefs, and superstitions, as are certainly more amusing and probably more impressive and instructive than the most elaborate and most ornate of critical expositions. The Nepalese appear to have a very singular and original view of the lightning-conductor; for, according to the editor, the carving on many temples and powahs, and sometimes even on private houses, contains most obscene groups of figures; and he has not been "able to get any reason assigned for this filthy custom, except that such figures are supposed to protect the buildings from being struck by lightning." In an appendix there will be found some lists of Nepalese musical instruments, agricultural implements, coinage, and weights and measures, together with an explanation of their measurement of time, a vocabulary, some specimens (translated) of native songs, and other more or less interesting and useful accessories.

Excellent is the aim of *Seonee*; or, *Camp Life on the Satpura Range*, by Robert Armitage Sterndale, F.R.G.S. (Sampson Low and Co.), and pretty satisfactory reasons are given for the somewhat unusual course of sinking the first person in a narrative of personal adventure, and attributing the sayings and doings to a gentleman belonging to the family of the famous but purely fictitious Mrs. Harris. The "aim throughout has been to inculcate a love for nature, and to make secondary to it the mere destroying of wild beasts." The chief reason, whatever may be thought of its weight, for the self-obliteration appears to have been a laudable desire to avoid anything like "the pedantry which might have been too obtrusive in an egotistical narration." How far the interest of the book will suffer from the fact that the Seonees of the author is the Seonee of twenty years ago, and differs vastly from that of the present day, will depend upon the sort of reader who takes up the volume. The lapse of time will make little or no difference to those who merely stay at home and regale their fancies with the perusal of other people's adventures; but a damping effect may be produced upon the spirits of those who would otherwise yearn to follow in the author's track. Still, the district of Seonee cannot have undergone so great a transformation as the station of the same name since the days of which the author has written; and it is in the district rather than at the station that he who reads with a view of picking up useful hints, as regards sport and its concomitants, would expect to find congenial employment for his physical powers and satisfaction for his hunting proclivities. How great is the change produced, during twenty years in the station itself, may be most easily perceived from a comparison of two descriptions. The Seonee of to-day, we learn from an authority, "contains large public gardens, a fine market-place, and a noble tank, which has recently been improved and deepened. The principal buildings are the court-house, gaol, school-house, dispensary, and post office. A handsome church is about to be erected." The Seonee of our author's time "was very different. There were no buildings to speak of save a few bungalows and the rude old pile which sheltered the impoverished descendant of the former Mahomedan ruler of the place. The noble tank—the Dul Sagur—was there, but a bed of rushes occupied the south end, where now a fine flight of stone steps, the work of a relative of the writer's, leads down to the water." For those who are curious about the geographical details it may be mentioned that "the district of Seonee, comprising a tract of about 4000 square miles, forms a section of the Satpura range lying between the valley of the Nerbudda on the north and the Nagpoor territory on the south, extending from about 21 deg. 39 min. to 22 deg. 53 min. N. lat., and from 79 deg. 15 min. to 80 deg. 15 min. E. long.;" and that "the plateau lies like a huge embankment between the valley of the Nerbudda and the Mahratta country of Nagpoor." There are exciting accounts of adventures met with in pursuit of the tiger, the panther, the blue bull, the bison, and other large game, and smaller game are by no means forgotten—birds, beasts, fishes, and reptiles, all are made to yield good sport, and the sport is described in a pleasant, colloquial style. A very striking, and even amusing, sketch is given of the way in which an elephant is brought to recover herself and her courage after she has been considerably demoralised by an attack made upon her by a wounded tiger. As soon as it is ascertained that the tiger is really dead she is with some difficulty coaxed to approach the carcass. When it has been dragged towards her she wriggles up to it by degrees, being encouraged by her keeper's cries of "Go on, my daughter; shabash! what is it but a cat? Shabash! well done! hit him again! who is he that he should spit on our beards?" She first gives the dead tiger one "tremendous blow with her trunk, enough to smash all his ribs," and finally she plays a sort of football with him till he is "almost pounded to a jelly." And so she is induced to overcome her timidity, which might have prevented her from facing a live tiger again, and made her useless for the purposes of hunting. Of what it is the fashion to somewhat contemptuously term padding the author has displayed no horror; he has not abstained from

legends which have little or nothing to do with his subject, and one of which may be recommended to the notice of Captain Mayne Reid; for, with the "hundred headless horsemen" of its title, it fairly eclipses, in point of titular suggestiveness of ghastly scenes, the single "headless horseman" of that popular novelist. It was only natural that the author, relating his experiences of twenty years ago, should have a story to tell of the Indian Mutiny; and he tells it, in his concluding chapter, with great spirit. Whether this story comes within the category of padding or not let those who are learned in such matters decide; but there can be no doubt that padding is, nine times out of ten, most unjustly condemned, for it very often serves to relieve a strain, and it always serves to diversify. And it is very seldom that diversification is not an advantage rather than a drawback. At any rate, the author of "Seonee" has made a very agreeable book; and the useful information conveyed in the narrative itself has been added to in an appendix, containing a "topographical and historical sketch of the Seonee district." Notes there are also, explanatory and supplementary; there is a glossary of the Indian terms used; there is a map; and there is a goodly number of illustrations, based, it is understood, on the author's own drawings.

A feeling as if a delightful dream dreamt long ago and long forgotten should suddenly recur in all its pristine vividness is elicited by simply turning over the pages of *Sind Revisited*, by Richard F. Burton (Richard Bentley and Son), a most agreeable and readable book, in two volumes. For do not the volumes recall to memory a treat enjoyed a quarter of a century ago? Perhaps it is a fond delusion; but the author himself says that he has "borrowed copiously" from "Scinde, or the Unhappy Valley," published by Messrs. Bentley in 1851, to the general enjoyment, it may be safely asserted, of all who read it; and the gallant author's new publication suggests the realisation of an impossibility, or what was hitherto considered an impossibility, namely, to eat your cake and have it. You have read your "Scinde or the Unhappy Valley" and have forgotten all about it, when suddenly it comes before you again and you devour it again under the title of "Sind Revisited." Of course it is not seriously meant that the latter publication is nothing but a reprint of the former, with some differences of spelling; but, as the author has himself acknowledged copious borrowing, a reader, after a lapse of six and twenty years, might be excused, perhaps, for fancying, at the first blush, that the new lamp was but the old one refurbished. Not that there would be anything to grumble at, if it were; the reader would probably be only too glad to renew acquaintance with an old friend, and renew at the same time an old pleasure. It may be that now, when twenty-six years have wrought their work of depression and sobriification, some readers may mock at the old rollicking style, and set down the author as flippant and frivolous; but there was a time when that same style would have struck those same readers as only gay, sprightly, spirited, and not at all unbecoming in the case of a light-hearted, but by no means light-headed subaltern. Let us rather rejoice, then, that the author still appears so green and fresh, and can still be tolerant of the youthful waggy he displays when he represents himself as a sort of showman, taking Mr. John Bull from spot to spot and enlightening and entertaining that typical personage with various exhibitions, accompanied with suitable discourses. He himself evidently looks upon his "Sind Revisited" as not much more than a third edition of "Scinde, or the Unhappy Valley," of which two editions appeared in or about 1851, and a change of title was rendered advisable, if not necessary, by the observations he made during "a flying visit in the spring of 1876 to the old haunts." It was that visit which suggested the title of his new volumes, and which presumably enabled him to speak so hopefully of what he formerly nicknamed the "Unhappy Valley." He bears witness that "either the climate of the Unhappy Valley has improved or, what is more likely, we have learned to subdue its wildness by the increased comforts of a more civilised style of life." He remarks that "the canal abuses of the olden time have disappeared;" that whereas "formerly it was a feat to live five years in Indusland," you may now find men who have gone through twenty years of it; that the mass of the native "population has, on the whole, benefited by our rule;" that "schools and educational establishments have at last been thrown open to them;" that "the embryo municipalities act as well as can be expected;" that "we have secured some confidence by giving it;" that we have not over-done the paternal fashion of government; and that "at present the principal want is legal and official protection for the Moslem Ryot against the Hindu Sahukar, who, in South African phrase, threatens to eat him up." How far the gallant author is to be considered an authority upon such points is a question which may be left open; it is as a descriptive writer that he claims especial notice, and in that capacity he is conspicuous for his spirit, buoyancy, picturesqueness, freedom of touch, dramatic force, and apprehension of the ludicrous. Sometimes—or, at any rate, in one instance—it looks as if he were capable of gross injustice; for it is hardly credible that the late General John Jacob, of the Sind Horse, whose name was once on so many lips and who won so high a reputation, can have deserved such contemptuous treatment as he gets at the hands of Captain Burton.

At the annual conference of the Methodist New Connection, which commenced at Leeds last Monday, the Rev. J. Medlicraft, of Nottingham, was elected president. There has been a net increase of 1161 members during the year, and the funds have been considerably augmented.

Lord F. Cavendish, M.P. distributed the prizes awarded at the Cambridge local examinations at Eastbourne on Tuesday. His Lordship spoke of the local examinations held in connection with the Universities of Oxford and Cambridge as being of great value in advancing middle-class education.

The Grocers' Company has forwarded a further donation of £100 to the council of the Charity Organisation Society; and Mr. Henry Brassey, M.P., has given £100 to the Cab-drivers' Benevolent Association, 15, Soho-square, in aid of the building fund of the Cabmen's Home.

Some Peerage claims came before the House of Lords Committee for Privileges on Tuesday. In the Annandale Peerage case the Scottish titles of Marquis of Annandale, Earl of Hartfell, Lord Johnstone of Lochwood, Moffatdale, and Evesdale, are claimed by Sir Frederick William Johnstone, Bart., of Winterhall; by Mr. John James Hope Johnstone, of Annandale; and by Mr. Edward Johnstone, of Fulford Hall. The main question in the case is whether the titles are, by the patents of creation, limited to heirs male, or whether they descend to "heirs general." The Committee for Privileges decided in 1844 that the limitation was to heirs male, but Mr. Hope Johnstone (who claims through a daughter of the late Marquis, who died in 1792) seeks to reopen the case on the ground that a most material document has been discovered since that decision was given. Both the other claimants claim as heirs male, Mr. Edward Johnstone claiming through an ancestor several degrees nearer the grantee of the honours than the ancestors of Sir Frederick Johnstone.

A meeting to initiate a national scheme of technical education was recently held at Mercers' Hall. There were present representatives of the Corporation and several of the City guilds. Captain Bicknell, the Master of the Mercers' Company, presided. In opening the proceedings, the chairman stated that they had been brought together by virtue of a resolution (passed at a meeting at Drapers' Hall in February last) declaring the expediency of forming a committee from amongst the guilds to advance the cause of technical education throughout the country. The resolution had been approved by the companies generally, the Mercers', Drapers', Fishmongers', Goldsmiths', and Clothworkers' having each conditionally promised an annual contribution of £2000 towards the project, provided, of course, that it took such a shape in its development that they could approve. In addition to this, the Armourers and Braziers' had offered an annual gift of 500 guineas, and the Plasterers' 50 guineas. The Masters of the Vintners' and Ironmongers' informed the meeting that their companies fully concurred in the movement and were prepared to support it. Resolutions to this effect from the Salters' and the Dyers' Companies were read, as were communications expressing approval and nominating representatives to the general committee, from the Painters', Coopers', Shipwrights', Weavers', Loriners', Spectaclemakers', and Glass-sellers' Companies. A committee was appointed to prepare a scheme in furtherance of the object of the meeting, and Lord Selborne, who has expressed his willingness to act, was appointed the chairman, with Mr. F. J. Bramwell, prime warden of the Goldsmiths', as vice-chairman. The clerks of the Drapers', Mercers', and Clothworkers', were appointed joint secretaries. It may now be said (remarks the *City Press*) that the Corporation and the Companies have set themselves to work in earnest in the cause of technical education, and, thus united, can hardly fail of success.

NOTICE.—LINOLEUM.—OETZMANN
and CO. have now received all the new PRIZE DESIGNS
in this favourite Floor Covering, warm, soft, and carpet-like in
appearance. Prices reduced. A visit of inspection solicited.

Customers in delivery of Goods by their own large PATENT
VANS, and fitting in position by competent persons. Descriptive
Catalogue, the best Furnishing Guide extant, post-free.
OETZMANN and CO.

READY MONEY versus CREDIT or
BOOKING.—Messrs. OETZMANN and CO.'s business is
conducted on the co-operative system of small profits and cash
payments, with the extra advantage of centralised management
and personal proprietary supervision, the public receiving all the
benefits of the co-operative system without its inherent trouble
and annoyances, and the prices will be found lower than those
charged at co-operative stores. This system offers great advan-
tages to those in a position to pay ready money.

CABINET and UPHOLSTERY
DEPARTMENT.—Elegant Drawing-room Suites, hand-
somely carved Italian Walnut Wood, upholstered in rich Worsted
Damask, from 8s. 6d. to 12s. 6d.; in rich Silk and Satin, 20s. to 60s.;

DESCRIPTIVE CATALOGUE, post-free,
OETZMANN & CO.,
HAMPSHIRE-ROAD.

BENHAM and SONS,
WIGMORE-STREET,
LONDON, W.

BENHAM and SONS'
VENTILATING GLOBE LIGHTS.
The following are some of the advantages of this mode of
lighting:—
1. It carries off all the heat and foul air from the burner.
2. It also ventilates the apartment by removing the heated and
vitiated air.
3. It introduces a constant supply of external fresh air.
4. The flame is powerful, steady, and cannot be affected by
draughts.
5. No smoke escaping, the ceiling is not blackened.

BENHAM and SONS'
CHINA TILE STOVES.

BENHAM and SONS'
TILE HEARTHES.

BENHAM and SONS'
GERMAN PORCELAIN STOVE may be
seen in operation. Keeps alight for twelve
hours. Consumes only 1 lb. coal in twenty-
four hours.—50, 52, 54, Wigmore-street, W.

BENHAM and SONS'
PATENT COAL-ECONOMISING GRATES.
This Grate in its construction is exactly the
reverse of an ordinary Register Grate; instead
of being recessed in the mantel, all the heat-
ing surface stands out prominently in the
room.—50, 52, 54, Wigmore-street, W.

BENHAM and SONS'
PATENT SLOW COMBUSTION GRATES keep
alight for several hours, and save more
than half the fuel.—50, 52, 54, Wigmore-street.

BENHAM and SONS'
COOKING APPARATUS.—For cooking pur-
poses, Benham and Sons have various patented
arrangements adapted to the various require-
ments of hotels, club-houses, hospitals,
asylums, prisons, workhouses, schools,
colleges.—50, 52, 54, Wigmore-street.

LAUNDRY DRYING-CLOSETS.

BENHAM and SONS are also prepared to
undertake **ENGINEERS' WORK** of every
description for Asylums, Workhouses, and
other large establishments, comprising the
following:—Boilers, Steam Engines and Boilers;
Heating Apparatus, by means of hot water,
hot air, or steam; Hot and Cold Water Tanks
and Services, Pumps, &c.; Baths, Lavatories,
Urinals and Water-Closets; Laundry; Wash-
house, and Drying Closets; Gas-works and
Gas-fittings; Hoists (or Lifts), for Dinners,
Coal, &c.—Wigmore-street, London, W.;
Factory, 68, Wigmore-street.

BENHAM and SONS'
LIFTS (or HOISTS), to work by Hand or
Steam, or Hydraulic Power.—Wigmore-st. W.

BENHAM and SONS'
GAS-WORKS, GAS-FITTINGS, and GAS
COOKING APPARATUS.—50, 52, and 54,
Wigmore-street.

BENHAM and SONS'
PATENT VENTILATING KITCHENES.
To require no brickwork to fix in. It roasts
bakes, boils, and steams with one fire, and
supplies a bath if required. It carries off
the heat and smell of the kitchen. It can be
fixed in its place in a few hours, after the fire-
place is cleared out and prepared for it, and by
local workmen if preferred.—50, Wigmore-st.

BENHAM and SONS'
PATENT COAL OCELLARETTE, or "Lon-
donderry," is specially adapted for use in
clubs, banking-houses, hotels, railway sta-
tions, Government offices, hospitals, steam-
ships, noblemen's mansions, entrance-halls,
&c. One Londonderry placed in a corridor or
landing will supply fuel for a whole suite of
rooms.—50, 52, 54, Wigmore-street.

KINAHAN'S LL WHISKY.
UNIVERSALLY RECOMMENDED BY THE MEDICAL
PROFESSION. A pure old spirit, mild, mellow, delicious, and
most wholesome. Dr. Hassall says:—"The samples were soft
and mellow to the taste, aromatic and ethereal to the smell.
The whisky is pure, well matured, and of very excellent quality."

LIEBIG COMPANY'S EXTRACT OF
MMEAT.—Finest Meat-flavouring Stock for Soups, Made
Dishes, and Sauces. Caution.—Genuine ONLY with
facsimile of Baron Liebig's Signature across Label.

E P P S'S C O C C O A.
GRATEFUL—COMFORTING.
"By a thorough knowledge of the natural laws which
govern the operations of digestion and nutrition, and by a care-
ful application of the fine properties of well-selected cocoa, Mr.
Epps has provided our breakfast-tables with a delicately
flavoured beverage which may save us many heavy doctors' bills.
It is by the judicious use of such articles of diet that a consti-
tution may be gradually built up until strong enough to resist
every tendency to disease. Hundreds of subtle maladies are
floating around us ready to attack wherever there is a weak
point. We may escape many a fatal shaft by keeping ourselves
well fortified with pure blood and a properly nourished frame."

DR. DUNBAR'S ALKARAM

ANTI-CATARRH SMELLING-BOTTLE,

THE ONLY CURE FOR

HAY FEVER AND COLDS

BY INHALATION.

ALKARAM, if inhaled daily during the
Hay Season, will effectually ward off all
attacks of Hay Fever. It has been known to
cure severe cases in half an hour.

HAY FEVER, however, affects but a limited
number of people, and at one season only.
Colds are caught by everybody at all times
of the year. How many have exclaimed on
feeling the first prickings in the nose and
roughness in the throat, "How is it
doctors can discover nothing that will
stop a cold when first coming on?" Dr.
Dunbar has removed this reproach: his

ALKARAM, if inhaled on the first
symptoms of cold, will at once arrest
them; and even when a cold has been
neglected and become severe, it will give
immediate relief, and generally cure in
one day.

ALKARAM contains no Narcotic, and never
occasions any unpleasant effects; the
smell is agreeable and reviving.

"55, Baker-street, May 10, 1873.
"Dear Sir,—Your Alkaram is certainly a
great boon, and seems to have a wonderful
effect in cases of Hay Fever and Cold in
the Head. It should prove more and more
valuable during the summer months, when
Hay Fever is so prevalent, as well as
during the winter months, when Colds are
so general.—Yours truly,
"A. W. POSTANS, F.R.S."

ALKARAM may be safely used by
children, as will be seen from the fol-
lowing testimonial:—

"49, Grosvenor-road, Highbury.
"Sir,—Allow me to testify to the efficacy
of your Cure for Colds. Six of my
children were troubled with colds, and,
having been induced to try your Alkaram,
I have much pleasure in saying that it
cured them in one day thoroughly.—I am,
Sir, yours respectfully,
"LOUIS GOLDSTEIN."

ALKARAM.—Of all Chemists, at 2s. 9d.
a Bottle. Agents for India—Messrs.
Smith, Stanbuck and Co., Calcutta;
Agents for Australia—Messrs. Elliott
Brothers, Sydney; and Messrs. Hammons,
Laws, and Co., Melbourne.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, JUNE 23, 1877.

The Anniversary of Her Majesty's Accession to the Throne can hardly be allowed to pass away without taking note of one or more of the thoughts it suggests. It is not by any means a novel incident. Forty years have run their round of weal and woe since England first did homage to her as the lawful Sovereign of these Realms. Measured by the life of a Nation, the span is but a brief one; measured by that of an individual, it is a considerable one; but measured by the changes which have taken place during its evolution, there have been, perhaps, few intervals of time of similar breadth that have been equally fraught with advantage to Europe, but especially to the United Kingdom. Such of us as were of age to observe public affairs and social characteristics forty years ago, and to compare them with those of the present day, can hardly fail to be struck with the marvellous amelioration which has been silently, or at any rate quietly, taking place since her Majesty's Accession to the Throne. There are those, of course, who doubt whether it has been all gain—who look with regret upon the alterations in the customs and manners that have been effected during the interval. But of the great majority it may surely be said with confidence that their lot at the present day is, in most material respects, not less certainly than in those that are political and moral, a great advance upon that of the class to which they may chance to belong, when the young Queen was summoned from her comparative privacy to assume the sceptre of the British Empire.

The course of Queen Victoria's life since her accession to the throne has not been one of unvaried ease. Her Majesty has had her trials as a woman. Domestic woes as severe as those which happen to most have troubled her career. "Billows of affliction" have broken over her;

nor has she been without those harassing anxieties to which ordinary wives and mothers are exposed. The Crown upon her brow has not charmed away the crowd of cares which usually roughen the path of human destiny. The Nation which she governs has sympathised with her in the trials she has borne; and perhaps at no period of her course has she been the subject of deeper or more reverential affection than at the present time. She has won her way to England's heart, as a true woman. In sorrow as well as in joy she has disclosed those feminine traits of character which have progressively endeared her to her subjects. She has thought and felt not for herself alone. Great misfortunes, which while they touch not her high estate, have ever called forth an expression of her sympathising regard. Great deeds of heroism have uniformly awakened her appreciation. It is not surprising, therefore, that she should be looked up to by her subjects of every class with loving confidence. Through all the different scenes of life she has borne her part with those at whose head she has been placed, and the consequence has been that a sort of intimacy has ripened between them from which devoted loyalty has taken an ever deepening tint of love.

Her Reign has hitherto been one which History will record as illustrious—illustrious for the peaceful conquests which it has achieved far more than for those which have been wrested by force of arms. Almost all the greater triumphs of science over natural forces which distinguish the present age from those which preceded it have occurred in her reign. Railway communication, although it originated shortly before she succeeded to the Throne, has been so developed as to knit together in one system all the ends of her Kingdom. The Electric Telegraph has made those who live at the Antipodes our near neighbours. Free Trade has immensely expanded British Commerce. Our Colonies—several of them incipient Empires—have been growing into lusty manhood. Our Press is free from all fiscal obstructions. Our political liberty satisfies the demands, or bids fair to satisfy them, of every class. Labour has taken a commanding position in relation to capital. Our Industrial people are better fed, better housed, better cared for, than ever they were before. The Statesmanship of the day (albeit, not without varieties) mainly aims at the welfare of the country. Much, doubtless, remains to be accomplished; much is in progress of being effected; but there can be no doubt, we think, that during the process of the four decades during which Queen Victoria has been upon the Throne the population of the United Kingdom have made an immense advance upon the political and social condition which was previously theirs. We have not yet seen the limit to which this amelioration will extend. The care which is now being bestowed upon National Education is already telling, and must tell to an almost indefinite extent, upon the elevation of the masses. Perhaps there never has been greater activity in contest with inebriety, ignorance, immorality, and crime, than in the present day. The methods adopted in this warfare may here and there be open to serious objection. But, on the whole, it will be admitted, we think, even by cynical observers, that the better off and more cultivated classes are earnestly intent upon improving the position of those who lack the advantages which they possess.

In this great work the Queen has taken an appropriate part. Her official life has been one of devoted application to the duties it involved. She has never strained the Constitution of the country. She has brought to the interpretation of it and to its application ceaseless goodwill and growing experience. Her Throne is the most stable in Europe. The policy of her Government never disturbs the balance of the political forces over the action of which she presides. This fact is due not merely to mechanism, but to political tact and wisdom. We have only to look across the Channel, at the present moment, to see how a misconception of duty on the part of the supreme authority of the State may shake to its foundation the political edifice with which it happens to be identified. The reigning Sovereign of these Realms is not the representative of a Party but of the People. She has been and is above all factions, and hence the recurrence of the day when she ascended the Throne, though no less than forty years have passed meanwhile, brings with it a grateful recognition on the part of her subjects, enhanced rather than diminished by the lapse of years.

Mr. Charles John Herries, C.B., has been appointed chairman of the Board of Inland Revenue, in the room of Sir William H. Stephenson, K.C.B., who retires, having completed a period of fifty years in the service of her Majesty.

Several inaccurate versions of the settlement effected in the Great Devonshire will suit of Crosswell and Others v. Walrond having been published, the *Exeter Gazette* has authority for stating that these are the exact terms agreed to:—Mr. Henry Walrond is to have the estate on payment of the following sums—To Mr. Alleyne (legatee), £10,000; to Mr. Frederick Burrow, solicitor, and one of the executors, £2000; to the Rev. R. Crosswell (legatee), £500; to Miss Chaytor (legatee), £2000; to Mrs. Snell (annuitant), £2000; to Miss Harriet Walrond (sister of Mr. H. Walrond), £10,000; to Lady Janet Walrond (mother of Mr. H. Walrond), £1100 a year for her life; the mortgages on the estate, amounting to about £19,000; and all the costs of the suit, amounting to many thousands of pounds.

THE COURT.

The Queen and Princess Beatrice were present on Saturday last at the christening of the child of Dr. Proffit, the Queen's Commissioner, who received the name of Leopold. The Rev. A. Campbell of Crathie, officiated. Her Majesty and the Princess attended Divine service on Sunday, performed at Balmoral Castle by the Rev. A. Campbell.

The Queen and Princess Beatrice have made excursions to the Glassalt Shiel, to Loch Callater, to the Linn of Dee, and other picturesque places.

Brevet Major J. M. Leith, 79th Queen's Own Cameron Highlanders, commanding the detachment at Ballater, with Lieutenant Gordon L. C. Money and Lieutenant James H. Hunt, were invited to luncheon at the castle yesterday week, and were received by her Majesty afterwards. Lady Cecilia Hay has been on a visit to her Majesty. The Right Hon. Lord John Manners has left the castle.

The fortieth anniversary of her Majesty's accession to the throne was celebrated with the usual honours on Wednesday.

The Queen has appointed the Hon. Mrs. Ferguson, of Pitfour, N.B., to be one of the Bedchamber Women in Ordinary to her Majesty, in the room of the Hon. Mrs. George Hope, deceased.

The first state ball was given yesterday (Friday) at Buckingham Palace; the second will take place on Wednesday, July 11. The first state concert will be given at Buckingham Palace on Wednesday next, and the second on Friday, July 6.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales, accompanied by Princes Albert Victor and George and the Duke of Cambridge, visited Wellington College on Monday. The Prince and Princess, with their children, returned to Marlborough House from East-hampstead Park, near Bracknell. Prince Leopold visited the Prince and Princess, and remained to luncheon. The Duchess of Teck also visited their Royal Highnesses. In the evening the Prince presided at the annual dinner of the (Prince Consort's Own) Rifle Brigade at the Criterion. On Tuesday the Prince and Princess, accompanied by Princes Albert Victor and George and Princess Victoria, visited the Royal Horticultural Show at South Kensington. Her Royal Highness afterwards distributed the prizes to the successful exhibitors. Princess Louise of Lorne and Prince Leopold visited the Prince and Princess, and remained to luncheon. Their Royal Highnesses gave a dinner in honour of the Emperor and Empress of Brazil, at which the Duke of Cambridge and a large party were present. The band of the Grenadier Guards, under the direction of Mr. Dan Godfrey, was in attendance. The Prince and Princess have visited the Emperor and Empress of Brazil at their hotel. The new ship Warspite, given by the Government to the Marine Society as a training-ship for boys between the ages of thirteen and sixteen, was inaugurated on Thursday by the Prince and Princess, who were accompanied by their two sons.

The Prince has written to Lord Aberdare expressing a hope that the Royal Horticultural Society will aid in promoting a due representation of British horticulture at the Paris Exhibition of 1878.

THE EMPEROR AND EMPRESS OF BRAZIL.

The Emperor of Brazil drove to Kew Gardens on Thursday week, returning to Claridge's Hotel to breakfast with the Empress; after which he visited the British Museum; next paid a visit to Dean Stanley, at the Deanery, Westminster; then went to the Royal Aquarium; and, after a drive along the Thames Embankment, returned to Claridge's Hotel to dinner; after which, accompanied by the Empress, he went to Her Majesty's Theatre.

The Emperor visited the Zoological Society's Gardens at seven o'clock the next morning, and afterwards drove to the Crystal Palace, and on his return inspected the Dulwich Gallery. After dining at Claridge's Hotel, their Imperial Majesties went to Her Majesty's Theatre.

On Saturday at eight o'clock the Emperor visited Siemens's telegraph cable-works at Woolwich, returning to the hotel to breakfast with the Empress, after which he inspected the National Gallery in Trafalgar-square, and in the evening their Imperial Majesties went to the Prince of Wales's Theatre.

On Sunday morning the Emperor walked in Kensington Gardens and visited the Brazilian Minister in Grosvenor-gardens, returning to Claridge's to breakfast. Their Imperial Majesties attended Divine service at the French Chapel in George-street, Portman-square, and afterwards visited Sir Richard Wallace's mansion in Manchester-square, and Buckingham Palace, and then went to the Royal Botanical Gardens in Regent's Park.

On Monday at half-past seven the Emperor drove to London Bridge, where he embarked on board Dr. Siemens's steamer and proceeded to Millwall and paid a visit to the frigate at present being built for his navy; and afterwards visited the Observatory at Greenwich, the Naval Museum, and the Seamen's Hospital. After lunching at the Ship Hotel he visited Mr. Penn's engineering factory at Greenwich. The Empress attended the marriage of Baron d'Estrella and Miss Drummond, and was present at the wedding breakfast given at his Excellency the Brazilian Minister and Baroness de Penedo's residence in Grosvenor-gardens. The Emperor and Empress went to Her Majesty's Theatre.

On Tuesday the Emperor drove to Battersea Park and returned to breakfast incognito at the Pall Mall Restaurant. He passed the forenoon at Buckingham Palace, and afterwards accompanied the Empress to the Horticultural Society's Gardens, South Kensington; after which he visited the Exhibition of the Society of Painters in Water Colours. Their Imperial Majesties dined with the Prince and Princess of Wales at Marlborough House.

On Wednesday the Emperor drove to the Alexandra Palace, and was conducted over the Palace and grounds by Sir Edward Lee, the manager, after which he breakfasted in the palace, and then drove to St. Thomas's Hospital, which he inspected. The Emperor and Empress were present at the afternoon performance of "Faust" at Her Majesty's Theatre, and the Emperor afterwards drove to Kew, and was present at Sir Joseph Hooker's garden party.

The Emperor and Empress have received at Claridge's Hotel all the Royal personages now in town and the principal members of the élite of society. They have also paid numerous visits, and have visited various commercial establishments.

Their Imperial Majesties intend to be present at the Caledonian Ball, at Willis's Rooms, on Monday next.

The Duchess of Edinburgh arrived on Monday, with her children, at Zarako Selo.

Princess Louise and the Marquis of Lorne entertained General and Mrs. Grant and a distinguished company at dinner on Saturday last at Kensington Palace.

The Duke of Connaught distributed the prizes at the Dublin University athletic sports last Saturday, in the presence of about 20,000 persons.

Prince Leopold was present, with the Duchess of Teck, on

Tuesday at a recital of Shakespeare's "Tempest," given by Mr. St. Brandram at Hertford House.

The Grand Duke of Mecklenburg-Strelitz dined with Earl and Countess Sydney on Saturday last, at their residence in Cleveland-square, St. James's.

The Duke of Cambridge dined with the Earl and Countess of Wilton on Monday at their residence in Grosvenor-square. The Duke held a Levée on Tuesday at the Horse Guards.

The Duke and Duchess of Teck dined with the Marquis and Marchioness of Londonderry on Tuesday, at Londonderry House, Park-lane.

The Duc d'Aumale left Claridge's Hotel yesterday week, on his return to Paris.

The Lord Lieutenant of Ireland has left for a cruise to Norway in his steam-yacht Francisca, accompanied by Lord Randolph Churchill. The Duchess of Marlborough and Lady Rosamond Churchill remain in London.

The marriage of the Hon. Eustace Vesey (9th Lancers), youngest son of the late Viscount de Vesci and the Hon. Constance Mary Lawley, third daughter of Lord Wenlock, was solemnised on Tuesday at St. George's Church, Hanover-square. The bridesmaids were the Hon. Algitha and the Hon. Katherine Lawley, her sisters; Lady Beatrice Grosvenor, her cousin; Miss Mary Milner, and the Ladies Alice, Katherine, and Beatrice Thynne, nieces of the bridegroom.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Appleyard, C. E. Emerit, to be Perpetual Curate of Troutbeck, Westmorland. Beaufort, William Augustus; Vicar of Egglestone, Durham. Bingham, Farnshaw; Sole Charge of Box, Wilts. Hagreen, Charles Selley; Vicar of Long Staunton. Heaton, W. C.; Incumbent of Trinity Church, Gough-square. Hughes, Geoffrey; Chaplain of Dorking Workhouse. Lefton, W.; Vicar of St. Mary's, Sheffield. Lloyd, John Augustus; Vicar of Broad Hinton, Wilts. Molincus, Arthur Ellison; Vicar of Maiden Bradley, Wilts. Papillon, Thomas Leslie, Fellow of New College, Oxford; Oxford Preacher at Her Majesty's Chapel Royal, Whitehall. Ram, Stopford J.; Vicar of Christ Church, Battersea. Richardson, Arthur John; Perpetual Curate of High Leigh, Cheshire. Robinson, William; Perpetual Curate of Holme, Westmorland. Smithwick, S. F. G.; Chaplain at Tabley. Swann, John Bellingham; Rector of Harleston. Travers, Charles Henry; Rural Dean of Bradfield. Tudor, Richard; Vicar of Swallowcliffe, Wilts. Wace, Arthur; Rector of Haddiscoe with Toft Monks, Norfolk. Walsh, John Thomas; Rector of Norton-juxta-Twyross, Leicestershire. Walsh, John William; Perpetual Curate of St. Aidan, Liverpool. Whalley, T.; Vicar of St. Alban's, Leeds. Williams, William Silvanus; Rector of Trawsfynydd, Merioneth. Woods, Frank; Vicar of All Saints'.—*Guardian*.

The congé d'élire for the election of Canon Thorold to the vacant see of Rochester appears in the *London Gazette*.

The Bishop of Manchester consecrated on the 14th inst. the new Church of St. Peter and St. Paul, which has been erected at Rishton, Blackburn, at a cost, including the site, of £4900.

The Right Hon. W. E. Forster, M.P., opened on Wednesday, at Menstone-in-Wharfedale, a bazaar which has for its object the securing of a permanent endowment of the vicarage of the Church of St. John the Divine, the providing of a parsonage, and the removal of debt on the day schools.

The *Birmingham Gazette* understands that a gentleman has offered £1000 towards the endowment fund of All Saints' (Oldknow Memorial) Church, Small Heath, on condition that £500 be raised before the end of the year to meet it. For this purpose a bazaar will be held in September next.

The Archbishop of Canterbury presided at a meeting held yesterday week in Lambeth Palace in support of the Church of Ireland Sustentation Fund. The report was not of an encouraging nature, only £3262 having been subscribed in England during the year. The Archbishop made some general remarks on the relations between Church and State.

After being closed for more than twelve months, St. Mary's Church, Broughton, was reopened on the 15th inst., a new chancel having been erected, through the munificence of Alderman W. Johnson (the Mayor of Chester), at a cost of upwards of £1400, and the older portion of the church has been re-decorated. The new chancel was consecrated by the Lord Bishop of St. Asaph (the Right Rev. Dr. Hughes).

On the 13th inst. the Bishop of Manchester consecrated the new church of St. John, Baxenden, near Accrington. It is the gift of Mrs. Margaret Pilling Taylor, Moreton Hall, and has cost £7000, or together with the burial-ground and endowment, about £12,000. The church is in the Gothic style, from plans by Mr. Varley, of Blackburn, and contains a peal of bells, with 533 sittings free and unappropriated for ever. The first Incumbent is the Rev. T. D. T. Donham.

A festival service in commemoration of the fourth centenary of the introduction of printing into this country by William Caxton, and of the jubilee of the Printers' Pension, Almshouse, and Orphan Asylum Corporation, was held on Tuesday at St. Paul's Cathedral. The congregation was large. The prayers were intoned by Dr. W. Sparrow Simpson, and Minor Canon J. V. Povah read the lessons. Before the sermon the anthem was Mendelssohn's "Festgesang," first performed at the ceremony of unveiling the statue of Gutenberg, the inventor of printing, at Strasburg, in 1840. The anthem afterwards was Beethoven's "Hallelujah." Both were performed, with grand effect, by the full choir of the Cathedral. Dr. Stainer presiding at the organ. The Rev. Canon Barry, D.D., Chaplain to her Majesty and Principal of King's College, London, was the preacher. He wound up an impressive sermon with an eloquent appeal for the Printers' Pension Fund, on behalf of which a collection was made at the doors.

The Incorporated Society for Promoting the Enlargement, Building, and Repairing of Churches and Chapels held its usual monthly meeting (the last but one of the present session) on Monday—the Earl of Powis in the chair. Grants of money were made in aid of the following objects—viz., building new churches at Allerton, in the parish of Wilsden, near Bingley; Leeds, St. Hilda; Penycase, in the parish of Ruabon; Plumstead, St. John the Baptist, Kent; Stepney, St. Augustine, Middlesex; and Wilstone, near Tring. Enlarging or otherwise improving the accommodation in the churches at Burmach, near Hythe, Kent; Clare, Suffolk; Eglwys Cummyn, near St. Clears; Elmstead, near Ashford, Kent; Feniton, near Honiton, Devon; Golborne, near Newton-le-Willows; and Inge, near Kendal. Under urgent circumstances, the grant formerly made towards enlarging St. Andrew's Church, Chippenham, was increased. Grants were also made from the Special School Church and Mission-House Fund towards building schools or mission churches at South Acton, Middlesex; Ialeham Fen, near Soham; Littlehampton, Sussex; Old Ford, St. Mark, Middlesex; and London Docks, St. Agatha. The society likewise accepted the trust of a sum of money as a repair fund for St. Augustine's, Bermondsey.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

In a Convocation held on the 14th inst. in the Sheldonian Theatre the degree of Doctor of Divinity, *honoris causa*, was conferred upon the Right Rev. Nathaniel J. Merriman, B.A., of Brasenose College, Bishop of Grahamstown, and upon the Right Rev. Edward Steere, LL.D., Bishop of the Universities Mission to Central Africa.

CAMBRIDGE.

At Caius Mr. F. B. de M. Gibbon, B.A. (Second Wrangler 1877), and Mr. H. Milton, B.A. (Tenth Wrangler 1877), have been elected to Fellowships. Welsford to a scholarship of £60; and R. G. Carr to one of £60, Legg to one of £50, Coombe to one of £40, on the expiration of their open scholarships. Robertson (Rossall School) for classics, Hoffmeister (Epsom College) for natural sciences, to scholarships of £60 each.

At Queen's, Mr. F. B. Walters, B.A. (Eighth Wrangler 1877), has been elected to a Fellowship.

At King's, J. R. Harmer (Eton), C. J. Hall (Christ's Hospital), W. R. Roberts (City of London School), N. L. Hallward (Haileybury), and C. F. Crowder (Eton) have been elected to entrance scholarships.

In first examination for the Natural Sciences Tripos the following have acquitted themselves so as to deserve Honours:—J. Allen, St. John's; Bower, Trinity; Buckmaster, Downing; Cullen and Fenton, Christ's; Foster, Trinity; Fuller, B.A., Emmanuel; Greaves, B.A., Christ's; Haig, Trinity; Harrison, Christ's; Hill, Downing; Holthouse, Trinity; Houghton and Murton, B.A., St. John's; North, Sidney; Ohm, Emmanuel; Sedgwick, Trinity; E. F. Taylor; Vinter, Sidney; Wallis, St. John's; Weldon, Caius. The final examination will be held in December.

At Trinity the Whewell International Law Scholarships have been awarded as follows:—First Scholar, P. M. Lawrence, B.A., Fellow of Corpus; Second Scholar, G. F. S. Stokes. Proxime accessit, W. R. Phillips, Scholar of Trinity Hall.

Mr. Samuel Robertshaw Wilson, B.A., has been elected a Fellow of Sidney Sussex.

Mr. William Napier Shaw, B.A., has been elected a Fellow of Emmanuel. At Emmanuel the following Undergraduates have been elected to Scholarships and Exhibitions:—W. B. Alcock, H. G. Mackenzie, E. R. Stable, to Foundation Scholarships of £70; H. A. Pearson, J. A. Laurier, A. J. Luckham, to Thorpe Scholarships of £30; D. Adamson to an Exhibition of £40; C. D. Pridden, C. J. R. Richardson, and J. L. Nightingale, to Exhibitions of £90.

Mr. H. D. Macleod has been appointed to lecture on "Political Economy" in the University.

LONDON.

The following is the list of candidates who have passed the General Examination for Women in the honorary division:—

Sara Annie Burstall, North London Collegiate School for Girls; Laura Elizabeth Cadwallader, Ladies' College, Cheltenham; Emily Olivia Harcourt, North London Collegiate School for Girls; Edith Marion Obbard, Ladies' College, Cheltenham; Mary Elizabeth Pailthorpe, North London Collegiate School for Girls; Florence Paine, North London Collegiate School for Girls; Henrietta Mary Selby, private study.

Yesterday week the prizes awarded by the Cambridge University examiners to the successful pupils in the London centres were distributed in the theatre of the University of London by Mr. Beresford-Hope, M.P.

Dr. T. H. Fraser, of Knutsford, has been elected to the chair of Materia Medica in the University of Edinburgh, vacant by the resignation of Professor Christison.

A Welsh gentleman engaged in business in London, in addition to sums of £250, £2500, and £1100 (the last sum in conjunction with his brother) previously subscribed, has placed in the hands of the council of the University College of Wales a sum of money to be used in promoting agriculture in Wales.

Saturday was speech day at Rugby. Among those present were the Lord Lieutenant of Warwickshire, Lord Leigh, and the Bishop of Exeter, Dr. Temple. The prizes were distributed as follows:—The Queen's medal for historical English essay to B. R. Wise; Latin hexameters, subject "Byzantium," G. G. Wilkinson; Dr. James's prize for Greek iambics, H. W. Fowler; Latin lyrics, "Tennyson's Lotus-Eaters," H. F. Wilson; Latin prose, "Green's History of England," C. A. James; Greek prose, J. C. Hurle. Fifth form.—Latin verse, R. I. Simey; Latin prose, R. I. Simey and M. Firth; English poem, "King Alfred the Great," H. F. Wilson.

Saturday was also speech day at Wellington College, and a large company, including Earl Granville, the Bishop of Hereford, Mr. Walter, M.P., and Lieutenant-General Sir L. Simmons, assembled to do honour to the occasion. The Queen's medal was awarded to Tindal; the Prince Consort's history prize to Atlay, ma.; and the Earl of Derby's gift, to Haines, ma. The list of honours gained during the past academical year showed that among many other successes three old Old Wellingtonians had been placed in the first class of the classical tripos.

The annual Commemoration Day of King's College was celebrated on Wednesday. Services were held in the chapel in the morning, and after service a large number of the friends of the council partook of luncheon in the large hall of the college—Canon Barry, the Principal, presiding.

The scholarships at Marlborough College have been adjudged as follows:—To senior scholarships—A. L. Davies, R. F. Cholmeley, and H. L. Callender (Ireland)—all of Marlborough College. To junior scholarships—H. Brinton, Mr. Waterfield's, East Sheen; L. T. Hobhouse, A. H. Hawkins, and E. N. Gardiner, Marlborough College; T. G. R. MacKenzie, Mr. Wilkinson's, Durdham Down, Bristol; M. L. Davies, Marlborough College; and W. G. Stokes, Mr. Waterfield's. Elected to free nominations—A. H. H. Maclean, Mr. Lloyd's, Winchfield; A. D. Innes, Mr. Marshall's, Benges, Hertford; K. F. Wood, Mr. MacLaren's, Oxford; and E. C. C. Firth, Preston Grammar School.

The Second Mastership of the Royal Grammar School, Newcastle-on-Tyne, vacant by the promotion of Mr. J. L. Ward, M.A., to the Head Mastership of Burnley School, has been filled up by the appointment of the Rev. T. A. Stoodley, M.A., Assistant Master, late Scholar of St. Mary Hall, Oxford.

The annual Wykehamist dinner was held at Willis's Rooms on Wednesday evening, and was numerously attended. The chair was taken by Mr. Justice Lopes.

The Archbishop of Canterbury has consented to preside at the midsummer examination, recitations, giving of prizes, &c., of the British Orphan Asylum pupils at Slough, to-day.

The new scheme for Rochester Cathedral Grammar School, as modified on the representations of the Dean and Chapter, has been finally approved by the Charity Commissioners and the Committee of Council on Education.

The new Independent College erected on the slopes of Heaton, near Lister Park, Manningham, Bradford, was opened on Wednesday, and at the same time the Rev. A. M. Fairbairn, formerly of Aberdeen, was installed as the new Principal. Including the site, the cost of the new college will be about £21,000.

SKETCHES OF THE WAR, BY OUR SPECIAL ARTISTS.

TURKS STORING CARTRIDGES IN A MOSQUE AT RUSTCHUK.

OUR ARTIST INTRODUCED TO THE TURKISH COMMANDER-IN-CHIEF AT SHUMLA.

A TURKISH MONITOR AND THE BATTERY OF HYDAR BABA RETURNING THE RUSSIAN FIRE AT RUSTCHUK.

SHIPPING HORSES AT CONSTANTINOPLE FOR THE SEAT OF WAR IN ASIA MINOR.

THE WAR.

Our Special Artists in Roumania, but especially at Ploesti, the Russian military head-quarters and temporary residence of the Emperor Alexander II., as well as those on the Turkish side at Rustchuk, at Widdin, at Shumla, and at Varna, the principal fortresses in Bulgaria, and one more at Constantinople, have supplied a great variety of sketches to furnish this week's illustrations of the War. We must speak more particularly of the largest Engraving, which presents a fine general view of the town and fortifications of Widdin, and the Turkish encampments in its neighbourhood, with a long stretch of the right bank of the Danube, seen from the opposite Roumanian batteries on the heights above Kalafat, on the left bank of that river. The point of view is shown in the foreground at the extreme left, upon the knoll or cliff where the "Prince Charles Battery" has been erected, and where a Turkish shell has just pitched and burst, scattering a party of soldiers who had been sitting at dinner there. The suburban villas and public gardens attached to the town of Kalafat are seen immediately below this higher ground. Beyond these houses, in the middle distance, spreads the wide expanse of water, where the swollen Danube has overflowed its banks and has inundated those meadows on the Roumanian side. A few islands are left uncovered by this spacious flood. On the tongue of a projecting lowland, just below Kalafat, which appears to the left hand in our Engraving, is an unfinished Roumanian battery, designed to command the passage of the river, and to prevent the Turkish gun-boats coming up to Widdin. Now let the reader cast his eyes farther, to the opposite shore, and behold the exact situation of the Turkish fortress and town, and of all that surrounds it on that side. The distance of the opposite river-bank from the Kalafat heights is about 2700 yards. Widdin has been frequently described in this Journal, as its position, near the termination of the line of the Timok on the Eastern frontier of Servia, was of great importance in the campaign of last year. Its most conspicuous features, in this distant view, are the old square castle, built at the water's edge, behind which is the smoking chimney of a steam factory and bakery for army biscuits; a sufficient number of minarets or turrets of mosques; a few large warehouses, and many low dwelling-houses forming the insignificant streets. The fortifications of Widdin consist, on the land side, of two concentric lines of works. The outer one, which incloses the whole town, is formed of a simple parapet of earth, having a command of nine feet, a thickness of twelve, and ditches nine feet deep. This parapet is flanked by eleven redoubts, placed from five to six hundred yards apart, and intended to be armed with six guns each. The two extreme redoubts, known as Fort Jeldis and Fort Adjab, which rest upon the Danube, are stronger than the others, and have revetted escarpments. The inner enclosure is of a more formidable trace, consisting of seven bastioned fronts with revetted escarpments and counterscarps. Between this inner and outer line there is a belt of considerable width, which is only partially built over, and which has frequently, in the absence of an outer girdle of detached forts, served the Turkish armies as an intrenched camp. Of late, it is stated, much energy has been displayed in improving the outer enceinte. It being impossible to construct a regular covered way, owing to the absence of a glacis, which again could not be thrown up by reason of the low command of the parapet, a *chemin-des-ronde* has been cut in the counterscarp to afford additional security against surprise. The powder-magazines have been rendered bomb-proof by heaping up earth upon them, and the terre-pleine of both enceintes has been protected as much as possible against enfilade fire by the construction of traverses. The riverside forts and batteries are very clearly shown in our Artist's sketch, with the outer portion of the town extending far down the river, to the islands on the left-hand side of this view. Towards the right-hand side is seen the powder-magazine, amidst the woods outside the town; three separate camps of Turkish soldiery occupy the hills behind. The distant range of the Balkan mountains, on the eastern frontier of Bulgaria, are beheld shutting out the valley of the Timok and the Servian town of Saichar, which was captured and pillaged by the Turks last year. It is now thought likely enough that a portion of the Russian army will, after all, cross the Danube somewhere above Widdin, by an unopposed passage into Servia, and will then march in a southerly direction to enter Bulgaria, evading Widdin and the other Turkish Danubian fortresses. A very few days will probably either confirm or dissipate this expectation of the approaching campaign.

The reception of the Emperor of Russia in the railway station at Ploesti, where he is ceremonially invited to partake of bread and wine as a most illustrious guest of the Roumanian nation, while three dignified ecclesiastics of the Orthodox Eastern Church bestow on his august person their most solemn religious benediction, is shown in our front page. His Imperial Majesty stands, in military uniform, but with his right hand laid upon his heart in a reverential attitude, while the sword at his side is gently touched by his other hand, as he seems to feel a deep sense of the awfulness of his position, having come to Roumania upon such an errand. The little bald-headed gentleman, with spectacles and moustache, wearing a broad ribbon and cross on his breast, is Mr. Cegelniceanu, the Prime Minister of the Roumanian Principality, who is next to Prince Charles of Hohenzollern, its ruler, chiefly responsible for aiding and abetting this war against Turkey. The Grand Duke Nicholas, brother to the Emperor, and Commander-in-Chief of the Russian army on the Danube, stands close behind his Majesty; the Czarevitch, and another of the Grand Dukes, are present with him; and Prince Gortschakoff, the veteran Russian statesman, Chancellor of the Empire and director of its foreign policy, is the feeble old man in plain civilian dress, with spectacles on nose, who hovers outside the Imperial family circle. We borrow, from the *Daily News* of last Thursday, a portion of a recent letter, in which one of its many clever and popular War Correspondents thus describes the personalities of the Imperial head-quarters at Ploesti:—

"Simplicity itself characterises the habits and doings of the great men of the Russian head-quarters and of the Court now at head-quarters. The Emperor dwells in a pretty seven-roomed villa. (A journalistic friend of mine boasts with truth that he lives next door to the Czar of all the Russias.) General Nepokoitchitzky, the chief of the staff, may be met at any time walking between his own quarters and those occupied by the Grand Duke Commanding-in-Chief, unattended even by an aide-de-camp, and with a great bundle of papers under his arm. Every passer-by may see Prince Gortschakoff sitting out in the open air on the raised doorstep of his house, under the shade of the shrubs growing there in pots, stooping languidly over one of the novels which are said to engross so much of his time. The Grand Duke Nicholas leaves his quarters and walks with his personal staff through the streets to a school-house, the large room of which is used as the head-quarter mess. The other day, while dining in the garden of the Hotel Brofft, I noticed three young staff officers sitting by a little table. The waiter desired to serve them; they wished to dine, but were anxious to do so in one of the pretty bosquets, and would wait till one was vacant, which

was not then the case. They waited some time, and then fell heirs to the bosquet, and, let us hope, enjoyed there Mr. Brofft's excellent cheer. An officer who happened casually to join me pointed out one of the three as the Grand Duke Nicholas the younger, the son of the Commander-in-Chief and the nephew of the Emperor. Having dined, the little party went quietly off to the theatre, none of the house of Brofft being aware who was the distinguished guest. The same afternoon six staff officers walked into the garden of the same hotel and demanded of Müller the accommodation of six bed-chambers for the night. The house was full, but Müller knew three of the officers as previous customers, and told these he would strain a point to provide for them. They accepted the accommodation; the other three went away to find quarters elsewhere. One of them, who was carrying his own hand-bag, was the Archduke Vladimir, and his Imperial Highness ultimately achieved a bed-room on the third floor of the Hotel des Boulevards. It cannot certainly be said of Russian staff officers that they are sycophants.

"While I waited at the Ploesti station there came from the waiting-room to a carriage of a train bound east an old General, somewhat feeble of step, yet of noble stature and soldierly mien. The veteran bore a historic name. It was his grandfather who, himself the commander of an army, headed, standard in hand, the forlorn hope which stormed Ismail in 1790, falling on to the task with the fell war cry, 'Brothers, no quarter to-day, for our bread is scarce!' It was the same grim Suwaroff who dispatched to Empress Katharine the celebrated laconic despatch, 'Mother, Ismail is at your feet!' The father of the veteran Suwaroff of to-day was drowned at a little place called Remnik, in Wallachia, when Kutsoff's army was returning from the siege of Rustchuk. His son, who was but a boy when his father perished, had raised at Remnik a monument to his memory, and when I saw him was starting on a pilgrimage to his father's grave. He holds no command, and is at present with the army as one of the closest personal friends of the Emperor."

The same Artist of this Journal who contributes the sketch of the arrival of Alexander II. at Ploesti, and who proceeded to Kalafat on purpose to get the view of Widdin above described, underwent some days before, on the road near Oltenitza, an interesting little bit of personal experience. He was accompanied by two other Special Correspondents of different newspapers, walking about on the Roumanian banks of the Danube between one Russian guardhouse and another, when they were assailed, in crossing a piece of open ground, by a sharp fire of breechloading rifles from a Turkish post on the opposite side at a distance of not more than 1500 paces. The awkward situation of the party is frankly portrayed in his sketch, which has been thought worthy of putting before our readers, that they may see what risks and perils the unwelcome errands of the press, using no more deadly weapons than pen and pencil, do not shrink from incurring to provide for the entertainment of ladies and gentlemen still living at home in ease; and they will be disposed, we hope, to join with us in thankfulness for the escape of our faithful "Special" from such obvious danger of his life.

On the other side, with the Turkish army in Bulgaria, a well-known "Special" of the *Illustrated London News* has been detained but too long at Rustchuk, endeavouring to procure the needful facilities for going all along the line of defensive military operations. He adds yet two or three more sketches to his previous illustrations of Rustchuk in time of war. The most characteristic incident, though one which we should not have expected, is that of the Mohammedan soldiers carrying boxes of cartridges to be stored in a mosque. Another of his sketches at Rustchuk gives a very good idea of the Turkish artillerymen working a battery (the Haidar Baba Battery) in aid of a Turkish monitor or turreted gun-boat, against the Russian batteries at Giurgevo, on the opposite bank of the Danube. Our Artist succeeded at length, with a great deal of perseverance, in obtaining a personal audience of the Turkish Commander-in-Chief, Abdul Kerim Pasha. This interview took place at Shumla, and is the tent scene which forms the subject of one of our Artist's minor sketches. His Excellency the Commander-in-Chief has our thanks for granting the ordinary permission to our representative, and no further comment is required. The figure of Abdul Kerim Pasha, comfortably seated on a roomy cushioned divan or sofa, and smoking a long cigar, but with staff in hand, ready to start up and walk through his camp, or to make use of the large double field-glass that lies beside him, will be recognised at the first glance. The Turkish officer, Aziz Pasha, who is represented standing, and turning with a courteous bow from the Commander-in-Chief to the English traveller, is evidently performing the act of a personal introduction. There is no lack of courtesy and friendly professions among the higher official personages of Turkey in their dealings with European visitors. The remaining War Illustrations of this week do not stand in need of additional comment. Tuldscha, on the Lower Danube, is a town of the Dobrukscha, nearly opposite the Russian fortress of Ismail, and fifty miles below Galatz; it is not at all likely to be the place for the Russians to attempt a crossing. The great sea-coast fortress of Varna, on the Black Sea, is probably the strongest military position in the Turkish Empire when backed with a superior naval force, but it has been repeatedly described; and our Artist there has shown the Egyptian troops employed in different manners. The shipping of horses for the Asiatic campaign on board the Turkish Government steam-ship Medjidieh, in the Golden Horn of the harbour at Constantinople, was rather a curious sight. Among these horses were some of the finest saddle-horses and carriage-horses, one pair valued at 600 gns., belonging to wealthy Pashas, and put in requisition for the military service. It would be distressing, we fancy, to see the beautiful and high-bred pets of a choice stable yoked to drag an Armenian waggon up the rugged sides of the mountains, between the port of Trebizond and Erzeroum or Kars. But the ways of warfare, in these Eastern lands, are extremely harsh and severe; perhaps there are few men who are really merciful, either to man or beast, in the most peaceful times, though enjoined by their Koran to the practice of that virtue.

There is actually nothing to be reported since last week of the military movements or preparations on the Danube, but many rumours have been current, for a day or two, concerning the Russian intentions to attempt a crossing at one place or another. The Emperor of Russia has received, at Bucharest, a visit from Prince Milan of Servia, who has since returned to Belgrade; and there is some talk now of Servia being allowed to join, at least passively, in the war against Turkey. The Turks in Herzegovina, after relieving their fortress of Nisch, have suffered a terrible defeat at the hands of the Montenegrins, in an endeavour to march southward, across Montenegro, to the Sultan's Albanian territory. It is said that 2000 of the Turkish troops were slain.

In Asia Minor, or rather in Armenia, there have been some actions of considerable importance. On Friday and Saturday of last week near Zeidikan and Delibaba, the Turks were defeated in severe conflicts, witnessed by the English military commissioners, Sir Arnold Kemball and Captain Norman. The Turkish commander, Ahmed Mukhtar Pasha, is thought to be

in a precarious situation. Meantime, the Russian siege of Varna is more closely pressed; the town has been bombarded several days, and an attempt has been made to storm Fort Tahmesap, on the heights commanding the town; but it seems to have met with a repulse. The Sultan goes to Adrianople on Monday next.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Marshal MacMahon has proceeded with his programme promptly. When the Chambers met at Versailles last Saturday the Duc de Broglie read the Marshal's message asking the Senate to assent to an immediate dissolution, and a committee was appointed to consider the matter.

In the Chamber of Deputies the sitting was, as was anticipated, a stormy one. The Marshal's message, which repeated his refusal to be the instrument of Radical doctrines, was followed by a tumultuous debate on the composition of the Cabinet. Amid unceasing uproar, the President of the Interior, M. de Fourtoul, hurled the bitterest invectives at the Republican majority. "All reconciliation," he said, "is impossible. You say we have not your confidence; we reply that you have not ours." One result of the debate is to place the Marshal and M. Thiers more clearly face to face as rival candidates for the Presidency of the Republic. M. de Fourtoul was boasting that the present Ministry sprang from the National Assembly of 1871, "the pacificator of the country and the liberator of the territory." "Voilà le libérateur du territoire" was the unanimous cry of the Left, rising and pointing to M. Thiers, who bowed his white head amid thunders of applause. This is the reply of the Republicans to Marshal MacMahon, when he asks France to return representatives "who will promise to second" him. M. Gambetta wound up the debate, after struggling for two hours in the tribune amid constant shrieking, hissing, and other disturbance. His reference to power being at present in "suspicious hands" roused the angry feeling of the Right to fever heat. M. Paris, the Minister of Public Works, sprang forward to the tribune with a threatening air; forward dashed the Left and the Right; but what seemed an impending fight terminated in confusion, which was allayed by the ushers.

On Monday the storm had somewhat abated. The Duc Decazes, whose retention of the Foreign Portfolio has added much strength to the Government, urged that no change in France's foreign policy had been introduced by the new Ministry. The chief incident of the day was the refusal of the Right to listen to M. Ferry after he had said that to make the Constitution work loyally would suffice. It was only at the urgent request of the Ministry that, after twenty minutes of uproar, he was allowed to finish his speech.

The proceedings in the public sitting of the Senate on Monday possessed no significance.

On behalf of the united groups of the Left, the Comte de Choiseul, at Tuesday's sitting of the Chamber, presented an order of the day ending with a declaration that the Ministry does not possess the confidence of the House, which passed to the order of the day. This was voted by 363 against 153. M. Louis Blanc and M. Léon Renault were among the speakers.

Ministers suffered another defeat on Thursday. The Chamber of Deputies by 354 against 160 rejected the Ministerial request for the immediate discussion of the bill for direct contributions.

The Senate met on Wednesday, but the expected debate on the question of the dissolution did not take place. A report was presented from the bureaux in favour of dissolution, but the discussion thereupon was adjourned.

Marshal MacMahon has declined the decoration the Pope had sent him of Grand Officer of the Order of Pius IX.

Two men have been condemned, one to four and the other to two months' imprisonment, and each to pay a fine of 100*fr.*, for having spoken disparagingly of the Marshal-President.

At the funeral in Paris yesterday week of the late M. Adam, the Republican Senator, a large number of deputies were present, including M. Victor Hugo, M. Louis Blanc, and M. Gambetta. The crowd of spectators was very great, but no demonstration took place. M. Victor Hugo and M. Emmanuel Arago said a few words over the grave.

ITALY.

The Senate, having approved of the Budgets of the Departments of Justice, Marine, Commerce, Public Works, and Instruction, has adjourned.

Pilgrims from Canada, Brazil, and the Argentine Republic were received yesterday week at the Vatican by the Pope. The Canadians presented the Pope with a mitre studded with gems and a purse of 100,000*fr.* Several deputations were received by his Holiness on Saturday.

The police have succeeded in arresting three individuals who, on April 4, assaulted and robbed Captain Edward Walter, an Englishman. The prisoners have confessed their guilt.

HOLLAND.

On Wednesday the funeral of the late Queen took place. Among the flowers placed upon the coffin was a wreath of white roses sent by Queen Victoria. There was a very large number of spectators. The King and his son were much affected when the coffin was lowered into the grave.

PORTUGAL.

A Royal proclamation was issued at Lisbon on Saturday declaring the neutrality of Portugal in the present war.

GERMANY.

The Emperor William left Berlin for Ems on Friday evening, the 15th inst. Before going he drove to Potsdam, and lunched with the Duchess of Edinburgh. A dinner party was given that night by the Crown Prince and Princess in honour of the Duchess, who left for St. Petersburg the next evening.

A monument in marble is being erected in the Thiergarten of Berlin to the memory of Queen Louise, the consort of Frederick William III.

The English Government has appointed a naval attaché for Eastern Europe, assigning Berlin as his ordinary residence.

The election of a member of the German Parliament for the fifth district of Berlin has resulted in the return of Herr Zimmermann (Progressist) by 6246 votes. His opponent, Herr Kopell, a Social Democrat, obtained 3217 votes.

GREECE.

Military preparations are being actively pushed forward, in accordance with the policy of the Government, which was explained in the sitting of the Chamber of Deputies on Tuesday by the Minister of Justice. The Cabinet concurs with the King respecting the necessity of expediting the national armaments.

AMERICA.

The United States troops engaged in suppressing the Indian rising in the Idaho territory have had an engagement with the Indians, in which six soldiers and one of the chiefs were killed. The Indians were reported to be massacring the white settlers, and the Government had been asked to send more troops.

THE CAPE COLONIES.

Special advices from the Transvaal announce that the

Queen's birthday was celebrated throughout the country with much enthusiasm. Sir Theophilus Shepstone has been sworn in as Administrator.

The Cape Parliament was opened on May 25 by Sir Bartle Frere, whose speech on the occasion was occupied with matters of internal interest. The Ministry have submitted their minutes on Lord Carnarvon's Permissive Bill. They are in favour of the Union under one Legislature rather than by confederation.

AUSTRALIA.

The Agent-General for South Australia, Sir Arthur Blyth, has received the following telegram, dated Adelaide, June 18:—"Parliament opened on May 31. Session excellent. Arrived, Ailie, all well, with 463 emigrants."

The death of Mr. John Fairfax, proprietor of the *Sydney Morning Herald*, is announced.

Mlle. Ethelka Gerster gave a representation at Berlin on Saturday last for the benefit of the poor. One of the largest amounts ever obtained in the German capital was the result.

The name of Mr. William Calder Marshall, R.A., has been added to the Royal Commission appointed to represent British and colonial exhibitors at the Paris International Exhibition.

The Maltese people should be flush of small change. The annual report on the Mint shows that in the year 1876 there were coined 162,000 pieces of bronze money of the nominal value of one third of a farthing each. They were coined for Malta, where they are legally current.

The *Gazette* notifies the appointments of Sir Anthony Muegrave to be Captain-General and Governor-in-Chief of the Island of Jamaica and its dependencies; and of Surgeon-Major Samuel Rowe to be Governor and Commander-in-Chief of the West African Settlements.

M. Henri de Tourville, who was sent from this country to Austria on an extradition warrant, was brought up for trial on Monday at the Court House of Botzen, a small manufacturing town in the Tyrol, on the charge of having murdered his wife Madeleine, who was an Englishwoman. He has been before the English police courts on the same charge.

The international conference at Berne upon the question of resuming the works in the St. Gothard Tunnel has fixed the sum required to complete the undertaking at 49,000,000*fr.*, of which they propose that Germany should contribute 10,000,000*fr.*, Italy 10,000,000*fr.*, Switzerland 8,000,000*fr.*, and the company 12,000,000*fr.* Some illustrations of the St. Gothard Railway Tunnel works are given at page 597, and the following page contains an article on the subject.

Professor Nordenskjöld's great expedition, for which a vessel has already been chartered at the price of 150,000 crowns, is to leave Gothenburg in June, 1878. It is to circumnavigate the whole of Asia through the Polar Sea, the Behring Straits, along the east and south coast of Asia, and to return to Europe through the Red Sea and the Suez Canal, in the autumn of 1879. King Oscar has contributed 50,000 crowns towards the expedition. The principal expense of the expedition will be borne by Mr. Dickson, a merchant of Gothenburg.

Mr. David Gill, F.R.A.S., accompanied by his wife, started yesterday week, in the mail steam-ship *Balmoral Castle*, from Dartmouth, for Ascension Isle, for the purpose of observing the approaching opposition of the planet Mars. He takes with him a large number of instruments, specially made for the purpose, in addition to the large heliometer constructed by Messrs. Cooke and Son, of York, for Lord Lindsay, who has generously lent the instrument for his use. Out of their somewhat slender means the Council of the Royal Astronomical Society have granted £500 towards the expenses.

The greater part of St. John's, New Brunswick, has been destroyed by a conflagration which broke out at two o'clock on Wednesday afternoon at York Point. The fire, being fanned by a strong north-westerly wind, swept over the business portion of the city, from King-street south and east to the water's edge, together with the shipping at the docks. The buildings destroyed include the Custom House, the Victoria and Royal Hotels, the Academy of Music, all the banks except one, the public schools, Trinity and St. Andrew's Churches, the Methodist chapel, the City Hall, and all the newspaper and telegraph offices. All the wholesale and nearly all the retail houses and several ships have also been burned. Five men and two children are reported killed.

A Bradford paper merchant named Hartley and a man named Hardacre, his clerk, have been fined in large sums—amounting in the aggregate to more than £2000—for importing smuggled tobacco from Hamburg. In default of payment, they have been ordered to be imprisoned during her Majesty's pleasure.

The Right Hon. W. H. Tighe has handed £2000 to the Representative Body of the Irish Church, to be invested on behalf of the needy and deserving clergymen of the diocese of Ossory, according to the judgment of the Bishop. Mrs. Roe, the widow of the late Mr. George Roe, an eminent merchant, has also bequeathed £3000 to the Church. The entire bequests of this lady amounted to over £22,000.

In a breach-of-promise case heard in Dublin on Wednesday a verdict of £200 was given against Mrs. Mulligan, lately Verschoyle, the widow of a Captain in the Army. The lady was possessed of £600 a year and a handsome residence near Dublin, named Roebuck Hall. The plaintiff was a butcher named Knowles, to whom she had engaged herself after a casual meeting on a steamer between Dublin and Liverpool. She, however, married her present husband, a dealer in publications and a Post Office clerk.

It is but recently that events on the Danube have made us realise the power of the torpedo; and now our confidence is still further shaken by serious doubts as to the capacity of our naval architects. The *Inflexible*, which was supposed to be our best type of a man-of-war, is said to be likely to repeat the disaster of the *Captain* should either of her unarmoured ends be shot away. Such is Mr. Reed's opinion; but the naval constructors of the Admiralty assure us that they retain their confidence in the ship's stability.

A thanksgiving service for the improvements recently effected in Harold's-cross church, Dublin, and in connection with the completion of the memorial to the late lamented Colonel Meadows Taylor, of Indian and literary celebrity, was held last week. The memorial consists of four magnificent stained-glass windows by Mayer and Co., of Munich and London, and a beautiful organ. A mural tablet has the following inscription:—"This tablet, together with four memorial windows and a choir organ, are erected as a slight expression of the very great regard felt for the late Colonel Meadows Taylor, C.S.I., of Old Court, Harold's Cross, by those who loved and admired him. He was an accomplished scholar, a gifted author, an able administrator, a gentle ruler, a valiant soldier, a faithful friend. He died at Mentone, May 13, 1876, in the sixty-seventh year of his age."

The Extra Supplement.

"A SPANISH FRUIT-SELLER."

This picture, by the French artist, P. A. Cot, was exhibited in the Salon des Beaux Arts at Paris; and our Engraving is copied from one of Messrs. Goupil and Co.'s photographs, by their permission. Every traveller in Spain has seen fine examples of robust female beauty among the class of persons usually employed in this kind of out-door trade, in the streets of Madrid and Seville and other cities of that kingdom. Many writers have expended a good deal of emphatic language in praise of the natural advantages of womanhood in the undegenerate part of the ancient races inhabiting those sunny regions of Southern Europe. Their black eyes and copious hair, their superb glances, their complexion, limbs, and gestures have been commended to the admiration of the connoisseur in physical charms of humanity; and the painter has been sent, again and again, to seek his models beyond either the Alps or the Pyrenees, if he would appeal successfully to certain accepted standards of taste. This picture is, perhaps, as likely to meet with approval as most of the others representing subjects of that class, and it will, therefore, please some of our readers enough to justify its reproduction for our Extra Supplement.

NATIONAL SPORTS.

The death of Admiral Rous, which occurred at about half-past ten o'clock on Tuesday night, will occasion the greatest grief among all classes of racing men; and even those who have no sympathy with our great "national sport" must ever regard with reverence the memory of him who has for so many years taken the leading part in all matters connected with the turf. His little faults, his somewhat dictatorial manner, and his occasionally headstrong letters, are forgotten, and we can only remember his devotion to, and his untiring labours for, the best and highest interests of racing, and his long life of unblemished honour, which so nobly proved—the proverb to the contrary notwithstanding—that a man may touch pitch and yet be undefiled. It is needless to say much of his long series of triumphs as a handicapper, are they not written in every volume of the "Racing Calendar" for many a long year past! and if he was, perhaps, somewhat easily hoodwinked as to the merits of a horse that had been pulled once or twice for his especial benefit, it was only one more proof of the noble nature of the man, who found it so hard to believe that a series of dirty actions could be performed for the sake of getting off a few pounds in a City and Suburban or a Cesarewitch. It was in 1821 that the Admiral, then a Lieutenant, became possessed of his first racehorse, a mare called *Maotis*, with whom he won two or three matches. Then followed *Souvenir* and *The Crutch*, the latter of whom won no less than eleven out of thirteen matches; and the successes of *Earwig*, *Liners*, *Squirrel*, *Nicholas*, *Fox*, *Lady Eleanor*, &c., in the same line of business gave ample testimony to the Admiral's wonderful proficiency, even at that early period, in the art of "putting them together." In 1838 he was elected a steward of the Jockey Club, and in 1840 became confederate with the Duke of Bedford. For some years past the harlequin jacket has rarely been seen in public, though on a few occasions *Ferdinand* has donned it for a match, in which he has seldom indeed proved second best. Admiral Rous's "Handbook on the Laws of Racing" is the standard work in all turf disputes; and no man ever gave more complete satisfaction as an arbitrator, his decisions, even when unofficial, being generally accepted as final. He was scarcely radical enough as a reformer to please everyone; but it must be remembered that the members of the Jockey Club are greatly divided in opinion, and a dictatorship, like that assumed by Lord George Bentinck, would not be tolerated for a moment in these days. We have no hesitation in saying that we do not think a second Admiral Rous can be found, and, though his mantle may be worn more or less worthily, we feel sure that each succeeding year will only prove more and more fully that "none but himself can be his parallel." Some further particulars of Admiral Rous will be found in our Obituary column.

A continuance of the splendid weather with which we have been favoured of late rendered the success of the Cup day at Ascot an assured fact, and we never remember to have seen so many people present as on last Thursday week. The Royal party, for once in a way, were a little late, and the usual state procession up the course did not take place until some minutes after the time fixed for the first race. The meeting of Springfield and Rob Roy over the Old Mile excited considerable interest, as the distance was further than Mr. Houldsworth's magnificent colt generally travels, and it was thought that Rob Roy might be enabled to cut him down. However, contrary to general expectation, Springfield at once dashed to the front, and, coming along at a good pace, had Rob Roy in hopeless trouble a long way from home, and won with ridiculous ease. As there are so many valuable prizes to be won over short courses, Mr. Houldsworth is doubtless wise to confine his colt to "sprinting;" but from the style in which he invariably finishes, as well as from his stout breeding, we feel sure that Springfield would not be out of place in cup races. The New Stakes fell to Bellicent, by *Cremorne*—*Lynette*, one of the only three two-year-olds by Mr. Savile's promising young sire; and then came the Cup, for which a field of six was made up by the unexpected appearance of the Duke of Hamilton's pair, *Wild Tommy* and *Sugarloaf*. The former has, unfortunately, turned roarer; and as *Cosmasie* was out of her course, and controversy out of form, the race was, in reality, a mere match between *Petrarch* and *Skylark*. The former, who never looked better in his life, was intrusted to the handling of Cannon, as *Custance* was wanted for *Wild Tommy*; and, though he showed a little temper at the Hotel turn, and made a slight attempt to bolt to the stables, he ran kindly enough afterwards, and defeated *Skylark* with great ease by four lengths. He has thus more than confirmed his victory in the St. Leger, and, as he is evidently a thorough stayer, will not prove a dear purchase to Lord Londale, even at such a long price as £10,000. *Placida* came out for the third time during the week in a Triennial on the Friday, and made a fearful exhibition of Touchet; indeed, she beat him so much more easily than Rob Roy did over the same distance, that we are inclined to think that the Oaks form is superior to the Derby; and it is much to be regretted that Mr. Pulteney's beautiful filly is not engaged in the Leger. As *Petrarch* is by no means an everyday horse, Lord Londale very wisely withdrew him from the Alexandra Plate; and Lord Falmouth was equally merciful to *Skylark*, who had already run two severe races during the week. With these two cut of the way, Coltness was backed against the field. *Bersaglier* was also greatly fancied; but, though he made all the running until reaching the distance, he had not an effort left when Coltness challenged, and was defeated by eight lengths. *Skylark* has twice this season beaten Coltness very easily, so the result of this race still further enhances the merits of *Petrarch's* victory in the Gold Cup.

Respect for the memory of Admiral Rous induced many of

the leading patrons of the turf to absent themselves from the Windsor meeting on Tuesday and Wednesday last; but the attendance of the general public was larger than usual, and capital fields contested most of the events. The only race which needs comment was the Royal Cup, in which *Ecosais* succeeded in giving Lollypop no less than 18 lb. and a head beating. It is thus clear that Springfield is about 28 lb. superior to Lollypop, a smart colt of his own age, a fact which seems almost incredible: and we are forced to believe that even Prince Charlie himself was not superior to Mr. Houldsworth's wonder.

The effects of the repeated successes of backers at Ascot were plainly perceptible in the immense attendance round Mr. Tattersall's rostrum at the Cobham sale last Saturday; and the shareholders in the company must be more than satisfied with the result of the afternoon's work. Fifty-four lots realized 20,200 *gs.*, or an average of 374 *gs.* each, so we are scarcely likely to hear any more of unallotted shares. The crack of the sale proved to be a colt by *Cambuscan*—*Vesta* (1750 *gs.*). He was one of the four that Mr. Bell purchased in Germany at, we believe, 200 *gs.* apiece, and, as the other three swelled the total of the foreigners to 3870 *gs.*, or an average of 967 *gs.*, no stronger proof of the fine judgment of the manager of the stud could well have been given. Of the English bred lots, a filly by *Blair Athol* from *Armada*, the dam of *Bella*, made 1100 *gs.*; a colt by *Adventurer*—*Fairy Queen*, 1400 *gs.*; a filly by *Adventurer*—*Kate Dayrell*, 1050 *gs.*; a colt by *Hermit* from *Colimba*, the dam of *Glenalmond*, *Claremont*, &c., 780 *gs.*; and a colt by *Hermit*—*Southern Cross*, 800 *gs.* Mr. Coombe's eight, which were sold prior to the Cobham lot, averaged 493 *gs.*, the own brother to Rob Roy naturally coming at the head of the list, as he was knocked down to the Duke of Hamilton, who, we understand, bought for Mr. Mackenzie, for 1550 *gs.* A magnificent colt by *Macaroni*—*Madame Strauss* was sold among some miscellaneous lots, and fetched 1200 *gs.*

As is customary prior to the Inter-University match, the Oxford and Cambridge teams have been playing some trial matches. Oxford defeated Middlesex by nine wickets, thanks chiefly to the fine batting of Messrs. F. M. Buckland (104) and A. D. Greene (not out, 93). At the same time Cambridge beat Surrey by five wickets, Mr. D. J. Steel (158) making a splendid score; while, on the other side, Jupp (38 and 52), Humphrey (51), and Messrs. G. N. Wyatt (57) and W. Lindsay (20 and 50), also batted exceedingly well. This week the "Light Blues" were not so fortunate, as the M.C.C. and Ground beat them by six wickets, in spite of the good scores made by Messrs. Patterson (50 and 45) and A. P. Lucas (95). On the other hand, Wild (not out, 104) and Messrs. T. S. Pearson (58 and 57) and W. H. Hadow (not out, 43), did most of the work. Turning to the county matches pure and simple, we find that Notts has beaten Kent by 239 runs, A. Shrewsbury (29 and 58) and W. Barnes (not out, 109) scoring largely for the winners. After a very exciting game, Kent succumbed to Derbyshire by one wicket; and Surrey secured a most unexpected victory over Yorkshire by 66 runs. In the absence of Pooley, Mr. W. Abbott has of late been tried as wicket-keeper with the most satisfactory results. In the first innings of Yorkshire he got rid of Lockwood, Ulyett, Emmett, and Blackburne, and will doubtless prove a great acquisition to the county.

The second summer meeting of the London Athletic Club takes place at Stamford-bridge to-day and Monday next.

Henley Regatta began on Thursday; but we must reserve our account of the various contests until next week.

THE VOLUNTEERS.

The council of the National Rifle Association have altered the days of shooting in the ensuing meeting on Wimbledon-common for the Donagall Cup and the National Snider Trophy, the latter being fired for on the 14th, and the former on the 18th. It is also announced that the first stage of the Queen's Prize will be fired on July 10, 11, and 12, and the St. George's on July 13.

Nearly 10,000 of the metropolitan volunteers were under arms last Saturday, undergoing their annual official inspections or taking part in the brigade field-days ordered by the Government.

Colonel A. C. Robertson, C.B., inspected the 5th Lancashire Rifle Volunteer Corps, one of the crack regiments of the county, last Saturday, in Sefton Park; and, at the close of the proceedings, addressed Colonel Tinley, commanding the brigade, as follows:—"It gives me the utmost pleasure to report upon the steady, good drill of your regiment. I particularly wish to praise the men for their great steadiness. The manoeuvres have been done with great precision and accuracy, the lines having been accurately dressed, and the marching was very good indeed. As for the last manoeuvre (the new formation of attack) it was quite perfect; the way in which you brought up your men and reinforced them being very creditable indeed. I shall make a most favourable report. Colonel Tinley, I am gratified to see such a strong muster, and you are to be congratulated upon the excellent state of the battalion."

The general meeting of the members of the National Artillery Association took place on Tuesday in the lecture-hall of the United Service Institution, Colonel Harcourt presiding. The report showed that the attendance of officers and men at the last encampment at Shoeburyness was within a detachment of the number which attended in the previous year. The discipline and conduct of all ranks were everything that could be desired. The financial statement presented with the report was highly satisfactory, the balance carried to the credit of the association being £207. With respect to the meeting of 1877, it had been decided that the camp should open on Aug. 4 for the First Division, and on Aug. 11 for the Second Division, subject to the usual regulations.

Field-Marshal the Duke of Cambridge will review and inspect the City of London Rifle Volunteer Brigade, of which he is hon. Colonel, in Hyde Park, this (Saturday) afternoon.

Captain Crombie, of the Aberdeenshire Volunteers, has received from the Queen a handsome cup (specially designed and manufactured by Messrs. Elkington and Co.), to be competed for at the Wapinechaw, to be held at Aberdeen in the beginning of July.

Major Geraghty has been installed a Military Knight on the Lower Foundation, Windsor Castle.

The committee appointed to consider the question of lay representation in the Wesleyan Conference have, in drawing up a scheme, expressed their deep conviction that the interests of the Connection require that the scheme, when revised, should be brought into operation next year.

Admiral Collinson, K.C.B., Deputy Master of the Trinity House, with an official party, and accompanied by Professor Tyndall, visited the Cotton Powder Works, Oare, near Faversham, last Saturday, for the purpose of watching experiments with cotton-powder cartridges as signals for use at sea.

THE WAR: WIDDIN AND THE DANUBE, FROM KALAFAT

TCHED ON JUNE 5, BY ONE OF OUR SPECIAL ARTISTS.

PARLIAMENT.

LORDS.

The Earl of Derby, yesterday week, answering a question of Lord Stanley of Alderley, and some observations thereupon by Lord Houghton, the Marquis of Ripon, and Lord Waverley, said it was not a part of the duty of her Majesty's Government to complain to Russia of her treatment of members of the United Greek Church. As for the despatch of Lord Granville on the subject, that had not been laid upon the table simply because nobody had asked for it before. An equally judicious reply was given by the Marquis of Salisbury to the Duke of Argyll's anxious query as to whether the Government were about to change their Indian policy, and were going to begin by forcing a British Resident on the Ameer of Afghanistan. The Secretary of State for India deprecated the talkativeness of the Indian officials, and assured the noble Duke that there was not the slightest intention of adopting a policy of aggression in India, or of deviating in any way from our amicable relations with the Ameer of Afghanistan. Lord Lawrence, nevertheless, thought it incumbent upon him to protest against our reverting to the annexation policy of old in India, and to deliver a warning that a war against Afghanistan would be an obstinate and expensive one. The Earl of Northbrook having spoken in the same strain, the Marquis of Salisbury rose again to reassure their Lordships as to the peaceful nature of our rule in India.

On Monday the Government suffered defeat upon the vital point in the Burials Question. The first subject of discussion was the Archbishop of York's new clause to the effect that clergymen should not be liable to a penalty for refusing to perform the burial service if scandal and offence would be occasioned at the use of such service. This clause found favour with the Primate, who bade the House fancy the position of a clergyman being obliged by law to express words of sure and certain hope over a man who had reeled out of a public-house in a hopeless state of intoxication, and had died in a ditch—said, too, in the face of the people who had pulled him out of the ditch. So far from being appalled by the sensational picture the Archbishop of Canterbury had conjured up with the ability of a practised tract-writer, the Duke of Richmond, the Lord Chancellor, and Lord Beaconsfield opposed the proposed clause as mischievous; and, though the Earl of Harrowby and Lord Selborne declared for it, the clause was rejected by 146 votes to 89. A new clause to enable a landowner to give land for a burial-ground was adopted on the motion of the Duke of Richmond. Then followed the Earl of Harrowby's important clause, the gist of which is contained in the first sentence:—

When the relative or friend having charge of the funeral of a person dying in any parish, or having had a right of interment in any parish, shall signify in writing to the incumbent of such parish, or to the curate in charge of the same, that it is his desire that the burial of the said person shall take place without the burial service of the Church of England, the said relative or person shall thereupon be at liberty to inter the deceased with such Christian and orderly religious services at the grave as he may think fit, or without any religious service; provided that all regulations as to the position and making of the grave which would be in force in the case of a person interred with the service of the Church of England shall be in force as to such interment.

The noble Earl urged that this would be accepted as a graceful concession by Dissenters, and as a practical settlement of the vexed question. But the Duke of Richmond argued that, if the clause were to be accepted, the Church would be the only body unable to set apart a burial-ground for its own members. Why should the Nonconformists have every liberty of conscience, and Church people none? Was it just that Nonconformists should be granted this concession when they had not been called upon to pay either for upholding church or churchyard since the abolition of church rates? Answering this point, Earl Granville, whilst supporting the clause, said he would, in the event of its being adopted, willingly sanction a measure calling upon Dissenters to pay towards the maintenance of the graveyards. Earl Nelson then spoke against, and the Marquis of Bristol and Lord Dynevor for, the clause, the result of the division on which was received with loud cheers on the Opposition side of the House. The numbers were:—

For the clause, contents	137
Against, not contents	111

On the motion of the Duke of Richmond, further consideration of the bill was adjourned to Monday next; and various measures were then advanced a stage.

Their Lordships rewarded themselves for the length of Monday's sitting by disposing of all their business on Tuesday in half an hour, the time being mainly occupied in a conversation on the income of the See of Sodor and Man, with regard to which the Earl of Powis betrayed some anxiety, but had to ret. contented with a retort courteous from Earl Beauchamp.

The Prisons Bill was read the first time on Thursday. The Duke of Richmond withdrew the Government Burials Bill, stating that the new principle introduced into it at the instance of Lord Harrowby could not be reconciled with the original intentions of the measure. He, however, assured their Lordships that the subject would be carefully and attentively considered by the Government during the approaching recess. Lord Granville expressed his regret at the announcement just made that a question upon which so decided an opinion had been expressed should be thrown over to another Session. Lord Coleridge moved the second reading of the Married Women's Property Act (1870) Amendment Bill. After some discussion, in the course of which the Lord Chancellor, Lord Selborne, and Lord Stanley of Alderley expressed strong objections to the measure, Lord Coleridge assented to its withdrawal and the order for the second reading being discharged.

COMMONS.

Not to be seduced by the brilliancy of the weather into an adjournment to Ascot, some hon. members were to be found faithful to their trust yesterday week, bravely bearing up against the boredom of prosy speakers and the melting effect of their over-heated Chamber. Scotland and Ireland held possession of the floor, and accents alternately harsh and mellifluous filled the House. A bill bearing the title of Roads and Bridges (Scotland) may not, on the face of it, appear of engrossing interest. Yet such a bill, having for one of its objects the substitution of an assessed rate for tolls ten years hence, monopolised the attention of Scotch—we beg pardon, Scottish—members the whole of the Friday afternoon, the upshot being that it was read the second time. Mellow tones and livelier matter followed when Mr. Meldrum moved his resolution claiming a household franchise for Irish boroughs similar to that which exists in England. The hon. member found a seconder in Mr. Gray, and supporters in one or two English Liberals; but, though the unctuous voice of Mr. Butt was lifted in earnest appeal for the granting of this measure of equal justice to Ireland, the Attorney-General for the Emerald Isle and Sir M. H. Beach both opposed the motion on behalf of the Government, arguing that the question could not be considered apart from the redistribution of seats, and that it would, therefore, be better for the House not to fetter itself by the adoption of an abstract resolution. Thereupon a division took place, and the motion was negatived by 259 to 165.

Naval matters occupied the greatest share of attention on Monday, when general sympathy was felt for Mr. Ward Hunt, whose weak condition forcibly suggested that, if it be permissible to lapse into Dribinian phraseology, torpedoes and the gout had so knocked his hull about that "early home to tea" would have been the best prescription for the stricken First Lord of the Admiralty. Yet Mr. Ward Hunt bravely kept to his guns, so to speak, and resolutely stood even after the Marquis of Hartington had, with characteristic courtesy and consideration, moved that the right hon. gentleman should be heard from his seat. The earlier part of the sitting was varied by some announcements regarding the Irish Sunday Closing Bill, which having received the approval of a Select Committee, now appears to have before it the ordeal of running the gauntlet of unfriendly critics, or of being damned with faint praise by the Ministry. Thus, with studied coolness, the Chancellor of the Exchequer said Wednesday, the 27th inst., and possibly another day, might be given to Mr. Smyth for the consideration of his bill; but Sir Stafford Northcote could not assist the hon. member by facilitating the discussion of his threatened motion, declaring it inexpedient to allow the question to remain unsettled another year. The Secretary for Ireland subsequently succeeded in getting the bill recommitted to the Select Committee for the reconsideration of two new clauses added by them. Later still, Sir Wilfrid Lawson protested against the Chancellor of the Exchequer's appropriation of the Wednesday fixed for the discussion of the Permissive Bill, and persisted that he would not give way in the matter unless the Government promised their cordial support to the Irish Sunday Closing Bill. Sir Stafford Northcote thought the arrangement suggested by him a fair one; but the Marquis of Hartington neatly adopted the language used by the Chancellor of the Exchequer to Sir H. D. Wolff on the evening that Mr. Gladstone's Resolutions were introduced, and advised Sir Wilfrid Lawson to take time to reconsider his decision. One question of peculiar interest had reference to Hobart Pasha. A query by Mr. Mundella as to whether the Admiral retained his rank and pay as a British officer elicited from Mr. A. Egerton the statement that Hobart Pasha's name had been struck off the list of the British Navy. Mr. Ward Hunt came off victorious in his first engagement. Though pitifully weak and evidently enduring much pain, the First Lord of the Admiralty could not help rising to stoutly oppose Mr. Shaw Lefevre's motion that, in the opinion of the House, the abolition of limited competition for the appointments of cadets to the Navy had been injurious to the interests of the public service. A division placed Mr. Shaw Lefevre in a minority of 41. In the course of a conversation respecting the grievances of the Royal Marines, set afoot by Admiral Egerton, Captain Pim said he believed it was owing to the conduct of the marines on the occasion of the mutiny on board the *Alexandra* that the ship was saved. But the information received by Mr. Ward Hunt did not confirm this statement. A passage of arms occurred between Captain Pim and Mr. Ward Hunt whilst Dr. Lyon Playfair's indictment of the Commanders of the late Arctic Expedition was under discussion. Dr. Lyon Playfair especially blamed Captain Sir George Nares for not having provided the sledge parties with a supply of lime-juice as a preventive against scurvy. Captain Pim persisted that Sir George Nares had disobeyed orders in not acting in this matter on the recommendation of the Medical Director-General. "Sir George Nares did not disobey orders," Mr. Ward Hunt maintained. "I beg the right hon. gentleman's pardon. I beg to say that Captain Nares did disobey orders," reiterated Captain Pim. But the First Lord of the Admiralty showed, to the general satisfaction of the House, that these were far too severe and sweeping terms to apply to the gallant Commander of the Arctic Expedition. Then came the tug of war in Committee on the Naval Estimates. The vote of £1,341,078 for dockyards was under discussion, and Mr. Ward Hunt had made a few introductory remarks. Mr. Goschen seized the opportunity to ask for an answer to a grave statement in the *Times* that, should H.M.S. *Indefatigable* be deprived in action of her unarmoured ends, the central battery would sink. The First Lord of the Admiralty was so far prepared to defend the principle upon which H.M.S. *Indefatigable* was built that he assured the House that her stability had been practically proved by means of a model, and that he had no hesitation in asking the Committee to sanction the construction of other ships of the same class. Referring to torpedoes, the right hon. gentleman added that the subject had received the most careful attention of the Admiralty, and no country had so many ships supplied with torpedoes as we had. Harking back to H.M.S. *Indefatigable*, Mr. E. J. Reed brought his constructive skill to bear upon the devoted vessel, and roundly stated, in reply to a challenge from Mr. Seely, that in his opinion H.M.S. *Indefatigable* would unfailingly capsize if she should ever come to be attacked by shell fire at her unarmoured ends. Put to the crucial test of a division, the vote was carried, however, by 231 against 14 votes. In spite of some good-humoured opposition from Major O'Gorman, the following votes were also agreed to:—£1,207,300 for naval stores and £1,042,000 for steam machinery and ships built by contract. Amid cheers, the Oxford and Cambridge Bill was thereafter read the third time.

On Tuesday Mr. O. Morgan gave notice of his intention to move his annual resolution respecting burials on July 17, in the event of the Government measure being withdrawn; and Mr. E. J. Reed gave warning of a series of questions concerning the stability of H.M.S. *Indefatigable* for Monday next. Replying to Mr. Dillwyn, Mr. Bourke said it was not true that the Porte had refused the request of Mr. Layard to permit the neutralisation of the Suez Canal, for the reason that no such request was made by Mr. Layard. The Prisons Bill having passed the Scylla of Committee, had to endure the Charybdis of adverse criticism on the third reading. Mr. Rylands moved that the bill be read the third time that day three months. Mr. P. A. Taylor seconded the motion, and the debate was continued by Sir W. Barttelot, Mr. Hibbert, Mr. Newdegate, Mr. Dodson, Mr. Cross, and others; but Mr. Rylands eventually was magnanimous enough to withdraw his amendment, and the bill was then read the third time and passed, amid cheers. There ensued a desultory conversation on the Irish Supreme Court of Judicature Bill. What depths were reached may be realised when it is mentioned that Mr. Biggar and Mr. Parnell were the principal speakers.

Wednesday afternoon was devoted to the discussion of Colonel Chaplin's bill for lessening the nuisance caused by locomotives on the highways; but the hon. and gallant member withdrew his bill on the understanding that the matter would be dealt with by the Government. Sir C. O'Loughlin then withdrew the Irish Agricultural Holdings Bill; a discussion was commenced and adjourned on Mr. S. Crawford's Irish Landlord and Tenant Act Amendment Bill; the Marriage Preliminaries Bill and Prisons Expenses Bill, both for Scotland, were respectively read the second time and passed through Committee; and Sir Wilfrid Lawson gave up June 27 to the Irish Sunday Closing Bill debate.

On Thursday the Under-Secretary of the Admiralty informed Mr. Anderson, in answer to his inquiry, that H.M.S. *Ridgeman*, on March 30, captured eight slaves on board the *Rokeby*, and subsequently twelve slaves on board the *Koira*, British

steamers, in the Red Sea; but the evidence was not deemed strong enough to prosecute the commanders or owners. On the motion for going into Committee on the East Indian loan, Lord G. Hamilton made the Indian financial statement. He said in the year 1875-6 the surplus (apart from Public Works extraordinary expenditure) was estimated at £506,000, but in 1876-7 it was estimated at £144,000 only, the reduction being in a great measure due to the depreciation of silver. In the latter year there was an extraordinary increase in the receipts from the guaranteed railroads, which were estimated at £8,557,000, but which produced £10,317,000. The result was that the guaranteed interest had been reduced from £1,260,000 to £420,000. There was a large increase in the export of wheat, which had risen from 320,000 cwt. in 1872-3 to 4,839,000 cwt. in 1876-7. The expenditure for that year was £53,078,000, and the revenue £51,220,000. In the former was included £1,991,000 for the famine fund. In the year 1877-8 the estimated revenue was £52,192,000, being an increase of £971,000 on the previous year; and the estimated expenditure, including the famine fund, was £53,141,000. The net loss from the famine for the two years was £5,250,000. There had been a considerable increase under the heads of inland revenue, customs, &c.; and the total expenditure for the year, including public works extraordinary, had been £64,000 less than in the preceding year. It was proposed to extend the decentralisation system introduced by Lord Mayo. The ordinary revenue of the year was sufficient to meet the ordinary expenditure—the real drawback being the large expenditure required to meet the three famines, which amounted to upwards of £11,000,000. In conclusion, the noble Lord asked for power to raise a loan of five millions—two millions and a half by way of Treasury bills, and the other two millions and a half to be added to the debt. A debate ensued, which occupied the remainder of the night.

METROPOLITAN NEWS.

The Duke of Devonshire has subscribed 100 guineas to the George Moore Memorial Fund.

The Corporation have granted 300 guineas to the building fund of the Metropolitan Free Hospital.

Lord Hartington has accepted the invitation of the Cobden Club to preside at the annual dinner of the club.

At a crowded meeting of the Royal Historical Society on the 14th inst. Dr. and Mrs. Schliemann received their diplomas as honorary Fellows of that society.

We are requested to state that at the Royal Caledonian Asylum Festival last week the total amount of subscriptions received was £1600.

The following gentlemen have been elected Benchers of the Hon. Society of the Inner Temple:—Mr. W. F. Robinson, Q.C., of the Chancery Bar; Mr. L. W. Cave, Q.C., of the North-Eastern Circuit; and Mr. J. W. Mellor, Q.C., of the Midland Circuit.

The Rev. Isaac Taylor read a paper on the History of Alphabets before the Victoria (Philosophical) Institute on Monday evening at the Rooms of the Society of Arts. The paper was illustrated by numerous diagrams, and was followed by an archaeological discussion.

Lord Carnarvon has received a deputation representing the Eastern Telegraph Company, and, in reply to their representations, acknowledged that the question of a complete telegraphic communication with South Africa was of great interest, and intimated that it would receive the further consideration of her Majesty's Government.

The anniversary general meeting of the Soldiers' Daughters' Home, Hampstead, was held on Wednesday in the grounds of the Home, on Rosslyn-hill, Hampstead. The annual report, read by Mr. C. R. Low, the secretary, stated that the progress of the Home up to the close of the official year, Feb. 28, was, on the whole, satisfactory.

The second meet of the Coaching Club for the season was held on Thursday morning in Hyde Park, when thirty-three coaches assembled, and most of them drove down to the Horse Show at the Alexandra Palace. In the absence of the Badminton coach, the lead was taken by Lord Carington, vice-president of the club.

The foundation-stone of St. James's Presbyterian Church, Wood-green, was laid on Wednesday by the Lord Mayor, who was accompanied by the Lady Mayoress, Mr. Alderman and Sheriff Hadley, Mr. Sheriff East, and many friends. At the close of the ceremony the company proceeded to the Masonic Hall, in which a bazaar in aid of the building fund of the church was opened by the Lady Mayoress.

The fifth annual horse show at the Alexandra Palace began on Tuesday, when prizes amounting to £1000 were competed for. In honour of a visit by General Grant a special performance of American national airs was introduced into the concert. The horse show continues through the week, prizes for jumping being given daily. A variety of entertainments take place inside the palace every evening.

A meeting was held on Tuesday at the Mansion House—presided over by Sir Garnet Wolseley—in support of the Portsmouth Soldiers' Institute. Miss Robinson, who has greatly interested herself in the welfare of the nation's soldiers and sailors, addressed the meeting, and read a letter from Florence Nightingale, in which the temptations which beset the soldier at Portsmouth—the chief port of embarkation and disembarkation—were forcibly pointed out.

The weekly return of metropolitan pauperism shows that the total number of paupers at the end of last week (the second week of June) was 79,596, of whom 36,601 were in workhouses and 42,995 received outdoor relief. Compared with the corresponding week of last year these figures show an increase of 502, but a decrease compared with 1875 and 1874 of 5760 and 15,440 respectively. The number of vagrants relieved on the last day of the week was 687, of whom 464 were men, 177 women, and 46 children under sixteen.

There were 2273 births and 1315 deaths registered in London last week. Allowing for increase of population, the births were 41 and the deaths 2 below the average numbers in the corresponding week of the last ten years. The deaths included 55 from smallpox, 61 from measles, 14 from scarlet fever, 7 from diphtheria, 38 from whooping-cough, 16 from different forms of fever, and 27 from diarrhoea; thus to the seven principal diseases of the zymotic class 215 deaths were referred, against 236 and 220 in the two preceding weeks. The deaths referred to diseases of the respiratory organs last week were 199, showing a further marked decline from recent weekly numbers, but exceeded the corrected average weekly number by 13. The lowest night temperature was 48° deg. on Saturday, and the highest day temperature in the shade 83° 7° deg. on Monday. The duration of registered sunshine in the week was 68° 9 hours, out of the 115° 5 hours that the sun was above the horizon.

ROYAL ACADEMY EXHIBITION.

[SEVENTH AND LAST NOTICE.]

Mr. T. C. Robertson, in the "Wall of Wailing—Jerusalem" (572), has approached a subject of very solemn import, and which has been treated more than once by distinguished foreign artists. In the Royal Academy picture a little too much is made of the wall, while not quite as much stress as is perhaps desirable is laid on the wailing Hebrews; still, as a careful and conscientious study, painted with much breadth, Mr. Robertson's picture deserves warm praise. Mr. T. Ethofer may be saluted as one of the most intelligent of the numerous French, German, and Italian artists who during the last four or five years have been such constant and, as a rule, welcome contributors to the walls of Burlington House; but we confess that we should like Mr. Ethofer's clever, dashing, sunny "Scene in Rome" (623) very much better were it not so literal a copy of the subjects, the style, and the treatment of Mr. Heilbuth. Imitation, within reasonable limits, is not by any means a practice to be rigidly deprecated in artists who have yet their way to make; but when imitation trenches on the verge of actual simulation it becomes reprehensible. Mr. D. W. Wynfield has made in "Gold" (654) a very effective picture from the incident of the discovery of the precious metal in the colony of Victoria by Chapman, the shepherd, in 1848. Mr. G. Smith's "Prayer of Faith" (655) is an example of the pictorial-pathetic in which, for a wonder, the pathos is not overstrained; and there is much lively grouping and vivacious effect in Mr. G. Earl's "Coming South: Perth Station, 1876" (922). Mr. N. Chevalier's "Opening of the International Exhibition, Vienna, 1873" (923), is a large picture of the conventionally "official" type—crowded with figures, excellent in proportions, smoothly, brightly, and effectively painted, but not possessing much purport or significance from an æsthetic point of view. We notice with peculiar satisfaction the admirable portrait by Mr. J. Edgar Williams, of the Rev. John Russell, M.A., Rector of Swimbridge, North Devon (500). Apart from its genuine artistic merit, this portrait will gratify a large number of the friends of a reverend gentleman universally beloved, and who, at past eighty years of age, is still able to participate in invigorating field sports. A very remarkable work indeed is M. F. Philippoteaux's "The Battle of the Alma, Oct. 27, 1854" (937). It is a most favourable example of the admired French artist, so well known for his rendering of "Waterloo," a picture exhibited in the year in which Miss Thompson appeared at the Academy with "Quatre Bras." In "The Battle of the Alma" M. Philippoteaux depicts the Brigade of Guards, under General Bentinck, and the Highland Brigade, commanded by Sir Colin Campbell, forming the First Division, under H.R.H. the Duke of Cambridge, advancing to the support of the Light Division in the attack on the Kourgan Hills battery. We will not undertake to say that the scenery painted by the skilful Frenchman closely resembles a Crimean landscape; still less will we pledge ourselves to the animated scene delineated on this canvas being at all like the Battle of the Alma. No famous conflict recorded in history did ever, possibly, exactly resemble the idea which painters were subsequently led to form concerning it; and Napoleon I. might have been very much astonished had he lived to gaze upon the pictorial commemoration of his campaigns by Horace Vernet, Raffet, and Hippolyte Bellangé. The sincerest praise which can be awarded to M. Philippoteaux is that his picture has the rational semblance of a battle which is being fought in right earnest, that the composition is admirable, that there is not too much smoke, and that a vast amount of individual expression of the most moving kind has been preserved among the armed masses delineated. Mr. John Brett's splendid seascape, "Mount's Bay" (946), is a wondrous transcript of natural beauty, glowing with amethyst, with lapis-lazuli, and with opalescent tints; but it aims in over-literalness and lacks repose. Mr. Sidney R. Percy's "On the Mawddach Marshes, North Wales" (951), is a delightful sample of rusticity, freshly and sympathetically painted; and much taste and feeling are shown in Mr. Edgar Barclay's "Women at a Well, Venice" (976). Mr. H. Wallis does not manifest all his wonted power in "Louis XI. and Cardinal Balue" (987), albeit the scene is one abounding in materials for such a facile and such a dramatic pencil as Mr. Wallis's. There is plenty of good drawing, colouring, and finish in the work; but the two principal personages, the King and the Cardinal, cannot certainly be regarded as successful specimens of the artist's power of representing inexorable, sardonic, cynical cruelty on the one hand, and hopeless misery and despair on the other. A superb effect has been obtained by Mr. Joseph Farquharson in "When Snow the Pasture Sheets" (1017); and the aspect of a tempest-beaten cornfield has been very powerfully rendered by Mr. W. Small in "After the Storm" (1022). Mr. Jerry Barrett is, as usual, vigorous and painstaking in "The Blind Flower-Girl of Pompeii bringing the Message of Glaucus to Ione" (1025); and there is much delicacy in Mr. W. Maclaren's "La Palombella" (1042).

In the section of water colours the Royal Academy Exhibition of 1877 will leave very pleasant remembrances. It is true that no works of surpassing excellence are displayed in this department; but there are, on the other hand, a large number of water-colour drawings showing a considerable degree of merit. The ladies are very prominent indeed in the galleries devoted to *aquarelle*; and, as we cannot mention every "exhibit" in detail, we will—in order to show that the Academicians cannot be accused this year of a lack of gallantry—enumerate just thirty-seven ladies whose productions are displayed in one gallery alone (the Eighth) at Burlington House. They are by Mesdames and Misses Backhouse, Surtees, Elizabeth Guinness, Stillman, A. Lukis Guérin, Pfeiffer, Louise Rayner, Emily Whympier, B. Patmore, Alice Squire, Emma Cooper, Blanche MacArthur, Ellen Clacy, Edith Knapping, Helen Angell, Elizabeth Folkard, E. J. Corrie, Alicia Shellshair, Julia Pocock, Anne Grose, Marion Walker, Edith Martineau, M. Walker, Catherine Sparkes, Charlotte Palmer, H. Thornycroft, Kate Greenaway, Marian Edwards, C. J. Atkins, Eleanor Wood, Constance Phillot, M. A. Hull, Mary Martin, Llewelyn, Jennie Moore, Constance Philip, and Anne Jenkins. If to this list of fair professors of the water-colour art there be added the bright and much more numerous band of ladies who paint in oil, it will be obvious that denial of a place on the walls of the Academy Exhibition cannot be accounted among "Woman's Wrongs" in the forty-first year of the Victorian era. Misogynists may grumble a little at the decided preference shown by the Council and the Hanging Committee for the ladies; but that they are so strongly represented at Burlington House should be a matter of rejoicing to the impartial critic both on artistic and on more broadly social grounds. The more lady exhibitors, it may emphatically be said, the better. There will be so many poverty-stricken governesses the less. If we might venture to cull a few of the most prominent flowers from this very vivid parterre in the Eighth Gallery, we might instance Miss Emily Whympier's "Carnations" (661), Miss Alice Squire's beautiful study of "Hetty Sorrel" (664), Miss Helen Angell's "Azaleas" (633);

and Mrs. A. Lukis Guérin's exquisitely handled "Cloisonné Enamel and Flowers" (697). Miss B. Patmore's "Lichen, Bark and Blossom" (663), also calls for favourable mention. Turning to the gentlemen water-colour painters, we find many good qualities in Mr. J. Fulleyton's "The Pantheon, Rome" (674), and in Mr. Harry Hine's excellent view of "St. Alban's Abbey, Herts, from the West" (679). Mr. W. F. Stock's "Spectre Ship" (704) is a finely executed work, especially rich in colour; and Mr. E. Phéné Spiers contributes a careful drawing of "Notre Dame, Poitiers, France" (742). Superbly magisterial is Mr. Carl Werner's "Interior of the Castle of Ravello, near Amalfi" (751); and there is praiseworthy conscientiousness of drawing and treatment in Miss Catherine A. Sparkes's "Romola Pleading with Savonarola for the Life of Bernardo del Nero" (747). The lamented W. E. Frost, R.A., will awaken mournful memories in his "Studies for a Portrait of Allegro" (804). Extremely picturesque and true to nature is M. Giuseppe Ferrari's "Street in Tunis" (889); and there is great beauty of effect in "San Geminiano: Moonrise, from the Citadel," by Mr. R. Holmes. In "Entrance to the Port of Harwich" (760), and "High Light, North Shields," Mr. William R. Beverly manifests all the delicacy of conception, the luminosity of effect, the breadth of execution, and the wealth of colour, of which he is so accomplished a master.

Mr. F. Leighton's "Athlete Struggling with a Python" is a work of which, to a certain extent, it may be said that, although replete with obviously noble qualities, it is scarcely yet ripe for definitive criticism. The character of an important work in sculpture is, properly speaking, not local, but cosmopolitan, for the reason that the highest form of sculpture—that which confines itself to the representation of the human form, draped or undraped—is based essentially on ancient Greek canons; and modern sculpture, in its highest aspect, should thus be of no "school" conventionally speaking, save the school of Phidias and Praxiteles. Thus it becomes clear that the judgments of foreign as well as English critics should be consulted, collated, and compared, before a general consensus of opinion can be possible in respect to Mr. Leighton's remarkable production. It is not enough that a statue should find acceptance in the country alone to which its sculptor belongs. To attain the foremost rank in the Glyptotheca it must be accepted by the whole world; and this universal recognition has been accorded to such works as Danneker's "Ariadne," as Kiss's "Amazon," as Canova's "Dancing Girl," as Thorwaldsen's "Graces," as Gibson's "Venus," and as Pradier's "Bather." Thus Mr. Leighton's plastic renown will take no harm if he waits awhile ere an exhaustive and final judgment be pronounced on his "Athlete." In the interim opinion cannot be divided as to the skillfulness of his modelling and the great knowledge of anatomy displayed, but without the slightest ostentation, in this work.

We have already cursorily alluded to the two admirable "exhibits" in sculpture by Lord Ronald Gower, "La Garde meurt et ne se rend pas" (1508) and "Marie Antoinette Leaving the Prison of the Conciergerie on the Day of Her Execution" (1539). The former, a lifesized figure in bronze, at once attracts notice from the highly dramatic nature of the attitude and the skill with which the figure of the dying soldier clasping his musket is composed. Equally good in facial expression and general rendering, this statue must likewise command attention and eulogy for the scrupulous historic fidelity of its costumes and accessories and the astonishing elaboration bestowed on the minutest details, down to the die on a regimental button and the sewing of a knapsack-strap in the uniform and accoutrements of this heroic "Vieux de la Vieille." The figure of Marie Antoinette, likewise lifesized and in marble, is remarkable for the intensity of expression thrown into the countenance of the unhappy Queen. Plastic art could scarcely go farther than it has gone in Lord Ronald Gower's hands in representing the acme of mental anguish tempered and ennobled by sublime resignation.

Turning to the remaining contributions to the Sculpture Galleries of the Royal Academy, we find indeed a paucity of grand, or even of exceptionally ambitious, works; but, on the other hand, we notice a large number of productions in marble and terra-cotta full of spirit and intelligence. Mr. Robert Jackson shows these qualities in a very bright degree in a marble bust of that very able manager and much regretted gentleman the late Mr. H. L. Bateman, of the Lyceum Theatre (1402). Mr. H. Weekes, R.A., has a very striking bust of "Sir Moses Montefiore, Bart., F.R.S.," and Mr. H. H. Armstead, A.R.A., a beautiful and touching portrait-tablet in marble (1448), to be erected, in memory of the late Frederick Walker, A.R.A., in Cookham church. A very fine bust is that by Mr. J. Durham, A.R.A., of "A. J. Waterlow, Esq." (1427). Mr. Thomas Brock's bronze statuette of "A Snake-Charmer" (1459) is excellently modelled; and Mr. T. Woolner, R.A., must be sincerely congratulated on the breadth and vigour displayed in his memorial of "Edwin Field" (1462), to be placed in the New Law Courts. Mr. J. Durham has also a charming statuette in bronze of "A Grotto-Boy: Only Once a Year" (1464). The sitting figure in terra-cotta of a French peasant woman nursing her child, "Boulonnaise allaitant son Enfant" (1465), by M. J. Dalou, has already won golden opinions from all sorts of people, and it is only necessary to record its continued and deserved popularity. There is good intent, but not much more, in M. Bernhard Sax's "Faun Dancing with a Bacchante" (1470); and Mr. E. R. Mullins has a very pretty statuette called "The Wounded Paw" (1487). Miss Charlotte Dubray shows much decision of handling in a terra-cotta portrait of "Professor Birkbeck" (1502), and equal grace and fancy in "La Coquette" (1513). Finally, we must call attention to Mr. George Tinworth's "Football Scrimmage" (1491). The subject, although abstractedly undignified, is substantially and, after a sort, heroic; and Mr. Tinworth, already well known for his admirable little alti-relievi in terra-cotta of sacred subjects, has striven very meritoriously in this vigorous group to model a group of human figures on an extended scale and in entire relief. The limbs of all the personages in the "Scrimmage" are preposterously long, and the attitudes are, as a rule, overstrained and uncouth; but there is a vast amount of cleverness in the composition, and when the expert modeller has bestowed a great deal more time in the study of anatomy he may hope to touch successfully much loftier themes than he has here approached.

MR. FRANK DILLON'S JAPANESE DRAWINGS.

In a series of one hundred admirably executed water-colour drawings now exhibiting at Messrs. Agnew's Old Gallery, in Waterloo-place, Mr. Frank Dillon has illustrated, with an amount of appreciation and a copiousness of detail hitherto unprecedented in the graphic presentations of the "England of the East," the manners, customs, architecture, rural and maritime scenery of Japan. Mr. Dillon's drawings were made during a Japanese tour undertaken in the years 1875-6; and they certainly convey a most picturesque idea of the physical condition and the peculiar flora of a most interesting country. It has been pointed out that the remarkable changes and vicissitudes through which Japan has

passed within the last few years are gradually altering the aspect of the country; while the frequency of fires in the principal cities affords constant opportunities for the erection of buildings European in style and consequently devoid of national character. Mr. Dillon therefore may be accepted as a faithful chronicler, not of the European civilisation which is so rapidly coming in, but of the Oriental civilisation which is more rapidly passing away. The chief charm in these very clever drawings lies in their extreme naturalness and in their total freedom from affectation or that technical trickery to which for the sake of producing an adventitious pictorial effect artists too frequently resort. Whether Mr. Dillon is depicting a "Kuge," or noble of the Mikado's Court; a Buddhist monastery; a Kioto passenger-boat lying by after bad weather; a rainy day at the village of Osaka; a study of cherry-blossoms at Kasawaki; a lotus pool in the month of August; a Japanese lady's boudoir, or the state bed-chamber in the Mikado's palace, with its bamboo blinds, its bamboo flooring, and its gorgeous panelling of crimson lacquer, covered with quaint paintings—we recognise throughout the same truthful, honest spirit, and the same absence of pictorial pretensions. The studies of flowers and shrubs are especially interesting; and the entire exhibition is not only most interesting as an artistic display, but valuable as a scrupulously faithful transcript of Japan as it is, but as it may not continue to be much longer.

At a General Assembly held at the Royal Academy, Burlington House, on Monday evening, Mr. H. W. B. Davis, A.R.A., was elected an Academician, and Mr. J. B. Burgess and Mr. P. R. Morris were chosen Associates.

THEATRES.

The only novelty of the week is a burlesque by Mr. Robert Reece, founded on "The Courier of Lyons," and called "The Lion's Tail, and the Naughty Boy who wagged it." The subject proved to be intractable, and the author's meaning can scarcely be guessed; nevertheless, what fun could be extorted from the text of the drama, and the circumstances attending its original production, was evoked by the magic of the extravagant spirit that guides the pen of the travesty-writer. Mr. Lighton sustains the dual character of the good and naughty boy with spirit and discrimination, and the piece was respectably cast throughout. It was preceded by Mr. Boucicault's play of "After Dark," capably well acted.

A new and interpolated version of the same celebrated drama was produced at the Princess's on Saturday last, and throughout efficiently performed. The music-hall scene is helped out with a variety entertainment given in a magnificent edifice suitable for the introduction of a carnival ball after the fashion of the Parisian Grand Opera, and manned with music-hall performers from the Canterbury and other similar establishments of more recent celebrity. Among these unfashionable worthies we have, for instance, Mr. J. W. Rowley with the song of "The Donkey-Cart," and Miss Kate Abrahams with the skipping-rope dance. To these may be added a vocalist who caricatures Mr. Sims Reeves, singing "Come into the Garden, Maud;" the American song and dance artist, Miss Kate Seymour; and Mr. Mackney, who does every possible thing as a singer, dancer, and player. The piece itself is represented by Miss Rose Coghlan as Eliza, Miss Kate Pattison as Rose Egerton, Mr. W. Terriss as Sir George Medhurst, Mr. Herbert Jenner as Gordon Chumley, Mr. Howard Russell as Charles Billingham, Mr. H. Jackson as Dicey Morris, and Mr. James Fernandez as Old Tom. The scenes of Blackfriars Bridge by night and the Railway Tunnel are as striking as ever. A new overture by Mr. W. C. Levy includes an arrangement of popular street tunes, and will prove, in its degree, an attraction.

The French plays attracted a numerous and fashionable audience on Monday, and consisted of three one-act pieces better calculated to please a French than an English gathering of pleasure-seekers. Madame Celine Chaumont was indeed charming as Julie in M. Henri Meilhac's "L'Autographe," and Toto, in the same author's sprightly "Toto Chez Tata," written in conjunction with M. Halévy. Her singing, also, in "Les Leçons d'Anglais" and "La Première Feuille" was not without the fascination of a style singularly natural and unaffected. These comedies were preceded by that of "Le Bouquet," also the production of Messrs. Meilhac and Halévy. There is a close uniformity of treatment in these three little dramas, which are distinguished for refinement and elegance, but require more action and incident. Nevertheless, the applause was frequent, and nearly always justified by the merit of the performance.

Agreeably to a promise made some months ago, Mr. Irving gave a complimentary reading before the Provost, the Dean, and other members of the Dublin University, on Monday afternoon, in the Examination Hall, Trinity College. The hall was filled, and Mr. Irving met with a most cordial reception. He recited with great effect the first scene of the first act of "Richard III.," a chapter from "David Copperfield," and the "Dream of Eugene Aram." Mr. Irving afterwards dined in the College Hall.

THE SEA OF ARAL.

The view shown in our Engraving is one of a series contributed by a Russian artist who resided and travelled six years in Central Asia. The great salt-water lakes of that region, the Caspian and the Aral, both commonly spoken of as seas, are a singular feature in its physical geography. They are depressed much below the level of the ocean; and the Caspian is 350 ft. lower than even the Black Sea. The Aral is more than 100 ft. above the Caspian, and it is conjectured, probably enough, that the former had once an outlet flowing into the latter. The dimensions of the Aral are about 290 miles from north to south, and from 130 miles to 250 miles from east to west; its depth is not great, and it is full of sandbanks and marshy islands. Two important rivers—the Syr Daria, anciently named the Jaxartes, from the east, and the Amoo Daria, formerly known as the Oxus, from the south—discharge themselves into this inland sea, where their water is carried off by evaporation or by absorption underground. Around its shores lie the extensive plains of Tartary and the remote provinces of Khiva, Bokhara, and Khokand, lately annexed by the Russian Empire, which has subdued most of the Turcoman hordes. The political destinies of Central Asia have been made the theme of much speculation; but it is only as an impressive landscape that we here view the Sea of Aral, which is sometimes almost sublime in its peculiar aspect of lonely sequestration.

It has been resolved to invite General Grant to a municipal banquet at Birmingham.

At the Norfolk Agricultural Show on Wednesday at Diss the Prince of Wales took three prizes for Southdowns, and Mr. Coleman, M.P., fifteen first prizes for Southdowns and Norfolk polled cattle.

THE SEA OF ARAL AT SUNSET.

CARRYING SHELLS AT VARNA.

CURIOUS WILLS.

In looking through some of the wills proved towards the end of the reign of Henry VII., one finds them all marked by the same characteristics. They generally commence by a bequest, committal or recommendation of the soul to God, "to our Lady Saint Mary, virgin, his moder," and to all the holy company or saints of heaven; then legacies to churches and for religious purposes, next to friars, priors and prioresses, abbesses, "Convents," lazar houses, spitals, for the relieving and redeeming of poor prisoners, the marrying of poor maidens, doles to poor persons, and to guilds, fellowships, crafts, and mysteries of various trades; afterwards complimentary gifts to executors, friends, servants, and the general distribution to the relatives. The chief difference is in the things and amounts bequeathed and the conditions attached. All this shows that human nature was much the same in the year 1500 as it is in 1877, always remembering the difference in the nature and the value of their possessions; the religious orders, houses, convents, spitals, and lazar houses, very well representing the religious and charitable societies of the present day. Very few wills of that time were without some bequests for the good of the testators' souls, their wives' souls, and all Christian souls, and for religious and charitable purposes; in this respect they bear favourable contrast with the wills of the present day, a much larger proportion of which are without anything of the kind.

There are, however, one or two peculiarities about the wills at the commencement of the sixteenth century which should be noticed. One is that the testators usually executed two documents; the one termed a testament related exclusively to his personal estate; and the other, which was called the will, dealt only with his houses and lands. Another peculiarity is that persons were usually appointed to look after the executors and to see that the will was performed, who were called overseers, and sometimes supervisors. We do not know what their particular duties were further than what the name implies, but possibly they audited the executors' accounts on winding up the trusts of the estate.

The gifts to the Church usually begin first in the shape of a sort of settlement of accounts with it, thus—"for my tythes and offerings or oblations forgotten or negligently withheld, if any soo bee in discharging of my conscience." Then follow gifts to altars and other Church purposes; frequently lamps, candlesticks, or vestments are given, but some are of a more singular character.

For instance, Richard Coteler, of "Muche Brikell, in the countie of Buks," by his will, dated December, 1505, bequeaths "to the high awter (altar) of our Lady in the paryshe church aforesaid in Brikell 2 bushells of malte. Also I bequeeth to every awter in the paryshe aforesaid 4 bushells of malte. Also I bequeeth to the Rood light in the said church 4 bushells of malte."

Malt seems to have been a not uncommon subject of bequest; thus, Thomas Wates, of Wursted, whose will is dated Aug. 12, 1506, bequeaths "to eche of the gyldes, the Trinitie gilde, oure Lady's gyld, Saint James gild, in the said towne of Wursted, a quarter of malte and 4 bushells of whete, and to the gyld of Saint Thomas Martyr, in the said towne, 3s. & 4d." This Thomas Wates appears to have been a cloth manufacturer, as he gives to his wife "my lomys and the warpe that is therein, and all warpe and stoffe that is unwoven." The same testator gives certain real estate to his four sons successively, with what the lawyers call a gift over, "if it fortune my son to be a religious man or decesse," and there are other gifts to his younger sons, if it fortune his eldest son "to lyve and to be a worldly man and not religious."

Henry Pyhenham, of London, gentleman, by his will dated November, 1505, bequeaths "to Maister William Edwards, parson of the said church, my hors for my mortuary, yf it please him to take it, or els the best other thing of my goods that he will chese for the same mortuary." He also wills "that my best gowne shal be solde by myn executor underwritten, and the money comyng of the same sale I will shal be applyed about the payment of my funeral expenses."

John Turvyll, of Newhall, in the county of Leicester, "Squyer," bequeaths his "body to be buried in the Chauncell of the church of Thurstleton, afore the ymage of Saint Savioure, and my best beeste to my principall, as the custom is there." Probably this refers to the custom of some manor of which he held copyhold property. "And I bequeith 10 mrc of money (10 marks, equal to £6 13s. 4d.), to be bestowed upon a tombe of alabastre or of marbyll. Also, I bequeith to William, my son and heire apparent, a bason and an ewer of silver, warnyng and charging him, on my blessing, and as he will answer afore God at the day of dome, that he shall bequeith them after his decesse to his son and heire apparent, and so under this manner and condicon, the forsaide basyn and ewer of silver to go from heire to heire while the world endureth." We wonder whether the solemn charge of the testator has had its desired effect, and kept the silver basin and ewer in his family as heirlooms. Squire Turvyll also makes a bequest to every tenant-at-will to him at Thurstleton, Normanston, Turvyll, and Craft, of "4d. a plough, and to every freeholder and cotyar of the same townes, 4d."

The will, dated in 1506, of Robert Jakes, whom we take to have been a farmer, of Wellesborough, Leicestershire, will serve as a sort of an agricultural illustration. He gives to

his son Thomas "a plough, a grete harowe and two small harowes;" to "everiche of my servants a lambe, and to everye one of my godchildren a lambe; to my daughter Jane Waryng an ambling mare of candell colour with a fole;" to two other daughters an ambling foal each; and to each of the "super-visours" named in the will a horse. We can give no clue to the colour of the mare given to Jane Waryng; "candell" is an unknown tint to us. The farming interest did not forget the claims of the Church and the clergy. One of the legacies in this will under this head is as follows:—"Also I bequeith to Sir John my preest 6s. 8d." Priests are frequently designated "Sir;" for instance, in the will of Barnard Symonds, dated Sept. 23, 1508, "of Boston, merchant, of the Staple, at Calice," we find this bequest, "I tm to Sir John Dent, my gostely fader, to pray for my soule, a russet gown furred with foxe," and in another will we note, "I bequeith to Sir Thomas Mylle a surples of lawne."

Leonard Henney, whose will bears date Oct. 17, 1505, is described therein as a citizen and grocer of London, but appears to have also done a little business as a pawnbroker, for he mentions "a gold ryng with a wreeth, the which lieth to me to pledge, 2s.;" and a gown, "which lieth to me to pledge for 10s.;" and which are to be redelivered to their respective owners on payment of the amounts owing thereon. Another extract from his will may prove interesting, "I bequeith to John Helderly "a newe shirte and a dowblet, and a paire of hosyn, such as my wife shall think best for him. Item—I bequeith and will that my wife shal frely geve to my cousyn Robert his chambre and his burd (board) from the Feste of the Nativitie of our Lorde next to come unto the Feste of Este, next after that, therefor paying nothing, neither for himself nor for his woman servant."

WILLIAM J. VIAN, Secretary.

JOHN RAPHAEL, Esquire, deceased.

Pursuant to an Act of Parliament made and passed in the 22nd and 23rd years of the reign of her present Majesty, chapter 36, intitled "An Act to further amend the law of Property and to relieve Trustees," Notice is hereby given that all creditors and other persons having any claims or demands against the Estate of John Raphael, formerly of 55, Lancaster-gate, but late of Hampstead, in the county of Middlesex, Esquire, deceased, who died on the 8th day of April, 1877 (and whose will was duly proved in the Principal Registry of the Probate Division of her Majesty's High Court of Justice on the 18th day of April, 1877, by E. L. Raphael, nephew of the deceased, S. H. Taylor and E. L. Smith, the executors named in the said will), are hereby required to send particulars in writing of such claims or demands to us, the undersigned, the Solicitors for the said Executors, at our office, No. 25, Throgmorton-street, in the city of London, on or before the 10th day of August, 1877, after which day the said Executors will proceed to distribute the assets of the said Testator among the parties entitled thereto, having regard only to the debts, claims, and demands of which the said Executors shall have then received notice; and that the said Executors will not be liable for the assets or any part thereof so distributed to any person or persons of whose debt, claim, or demand they shall not have then received notice.

Done this 14th day of June, 1877.
TRAVERS SMITH and BRAITHWAITE,
25, Throgmorton-street, London, Solicitors for the said Executors.

PRESENTING THE FREEDOM OF THE CITY OF LONDON TO GENERAL U. S. GRANT AT GUILDHALL.

INVESTITURE OF THE NEW BISHOP OF ST. ALBANS BY THE ARCHBISHOP OF CANTERBURY IN ST. ALBANS ABBEY.

GENERAL GRANT AT GUILDHALL.

The ceremony of presenting the freedom of the city of London to General Ulysses Grant, late President of the United States, was performed yesterday week at Guildhall. It took place in the Library, where more than eight hundred persons assembled, including many ladies, by the invitation of the municipal authorities, to witness these proceedings. The Lord Mayor, Sheriffs, Aldermen, Recorder, Chamberlain, and other officers of the City Corporation were present to receive their honoured American visitor. The United States Minister, Mr. E. Pierrepont, the Right Hon. Sir Stafford Northcote (Chancellor of the Exchequer), and several members of Parliament were among the company. General Grant was accompanied by his son, a boy of fifteen. He was escorted by four Aldermen to a seat at the Lord Mayor's left hand; and the Chamberlain, Mr. Benjamin Scott, addressed him in a very appropriate and interesting speech, dwelling first on the ties of kindred, and of common interests and sympathies, between our own nation and the citizens of the American Republic. The exploits of General Grant as a soldier, who struck the blow that put an end to the Civil War and restored the Federal Union, were briefly touched upon; and reference was made to his political administration, during two terms of office, as tending to heal the wounds of his country, and to preserve its Constitution. The address of the Common Council of London, or the resolution passed by that body to admit General Grant to the freedom of the City, with the formal certificate of his admission, is to be inclosed in a gold casket made by Mr. J. W. Benson, of Ludgate-hill. This casket will be engraved, on one side with a view of the Capitol at Washington, and on the other side a view of the entrance to Guildhall; at the ends are two figures of America and the City of London, holding their respective armorial shields. But, as the casket was not yet ready, the Chamberlain only handed to General Grant an illuminated copy of the document recording this high compliment to his public character, and to the nation of which he is an eminent representative. General Grant, who was very heartily cheered, made a short speech in acknowledgment of the honour done to him and to his country; "and I am glad that this is so," he observed, "because I want to see the happiest relations existing, not only between the United States and Great Britain, but also between the United States and all other nations." Although a soldier, he was never fond of war, and hoped all future differences would be settled amicably, as they happily were in a recent instance. He then subscribed his name to the roll of honorary freemen. The Lord Mayor and Lady Mayoress afterwards entertained General Grant and the American Minister, with a large company of guests, at a luncheon in the great hall.

On leaving the City that afternoon, about four o'clock, General Grant and Mrs. Grant, with their son, Mr. Jesse Grant, accompanied by the Lord Mayor and Lady Mayoress and other personages connected with the City, drove out to the Crystal Palace. They were received by Mr. Thomas Hughes, Chairman of the Crystal Palace Company, Mr. Bicknell, Deputy Chairman, and other directors, with Major Flood Page, secretary and manager. A concert was performed by the Crystal Palace orchestra and choir, and solo singers, the orchestra assisted by the band of the Scots Fusilier Guards. The American national anthem, "Hail, Columbia," the Centennial Festival Exhibition March, and a "Peace Overture" dedicated to General Grant, were included in the selection of music. The Crystal Palace Directors entertained him and the whole party in the New Dining-Rooms; and the health of General Grant, and that of Mr. Pierrepont, were drunk as after-dinner toasts. There was an exhibition of fireworks later in the evening. On Tuesday General Grant, with the Lord Mayor and Sheriffs, went to the Alexandra Palace, where a special programme of entertainments had been arranged. The Royal Italian Opera also gave, yesterday evening, a special performance for his gratification. In a letter to his friend Mr. Childs, of Philadelphia, General Grant expresses his pleasure at the reception he has met with in England.

THE BISHOPRIC OF ST. ALBANS.

The ceremony of the investiture and enthronement of the first Bishop, Dr. Thomas Legh Cloughton, in the newly-created Diocesan See of St. Albans, including the counties of Hertford and Essex, was noticed by us last week. It took place on the Tuesday in the ancient Abbey of St. Albans, which has now become a Cathedral Church. There was first a procession from the Townhall to the Abbey, comprising the Mayors of Harwich, Colchester, and Hertford, with the Town Clerks and mace-bearers of these boroughs; the Mayor, Aldermen, and Town Council, and Town Clerk of St. Albans; the clergy of the diocese, wearing surplices, hoods, stoles, with academic caps; the Rural Deans, the honorary Canons, the Archdeacons, the Bishop's secretaries and officers, the Bishop of St. Albans, and the Bishop's Chaplains. The procession was met at the west door of the Abbey by the Archbishop of Canterbury, the clergy of the Abbey, churchwardens, sidesmen, and choir, who headed the procession up the nave, Mr. Booth playing a processional march on the organ. The Archdeacon installant (Dr. Grant), acting for the Archdeacon of Canterbury, conducted the Bishop to the communion-table. The Archbishop was also conducted to his seat. After the "Te Deum" her Majesty's letters patent founding the see were read by the Principal Registrar of the Province of Canterbury (Mr. Hassard), who also read the Archbishop's mandate to his Vicar-General. The usual oaths were administered to the Bishop, who was then formally accepted and invested by the Archbishop. Dr. Cloughton having taken the oath of fidelity to the Church and promised to defend its "rights, liberties, and dignities," was conducted to the episcopal throne by Dr. Grant, by whom he was installed and enthroned "into the chair episcopal of the Cathedral Church," and inducted into the "real, actual, and corporal possession of the Bishopric of St. Albans, and of all its rights, dignities, honours, privileges, and appurtenances whatsoever." During the service the anthem by Kent, "Now, therefore, our God, we thank Thee," was sung by the choir. The Archbishop then preached a sermon from Ezekiel's vision of the dry bones. Alluding to the present building as the first seat of British martyrdom, he referred to the efforts made to restore it to its former magnificence. A revival had now set in not only in the restoration of the buildings used for the glory of God among us, but also in some doctrines which should be kept in their place, and not exalted unduly. The new diocese, his Grace added, had been formed after much self-denial and difficulty, and was necessary to meet the religious wants of an increasing population. The sermon was followed by a celebration of the holy communion, with a very large number of communicants. The offertory amounted to nearly £500. After the religious services the Mayor gave a luncheon to some 200 guests, among whom were the Archbishop of Canterbury and Mrs. Tait, the Bishop of St. Albans, the Hon. Mrs. and Miss Cloughton, Earl Brownlow, the Earl and Countess of Dudley and party, the Earl of Verulam, the Earl of Essex, Lord and Lady Selborne, several members of Parliament connected with Herts and Essex, Sir Antonio Brady, and Baron and Baroness Dimsdale.

MUSIC.

ROYAL ITALIAN OPERA.

One of the special events of the season took place here on Saturday, when "Il Vascello Fantasma" was produced, being an Italian version of Wagner's "Der Fliegende Holländer." We have already dwelt in detail on the characteristics of the work when first produced in England during Mr. George Wood's temporary management of Her Majesty's Opera at Drury-Lane Theatre in 1870—the second of the two years of the coalition of Mr. Gye and Mr. Mapleson in the direction of the Royal Italian Opera—and again in October last, when produced, in English, by Mr. Carl Rosa at the Lyceum Theatre. It may suffice now, therefore, to remind readers that the work was originally brought out at Dresden in 1843, having followed "Rienzi" and preceded "Tannhäuser" and "Lohengrin," and the following operas in which Wagner has more and more departed from musical form and construction.

The dramatic power, the romanticism, and the contrasted tone of the music assigned to the different characters in the work now referred to were again conspicuous in Saturday's performance, a prominent feature in which was the Senta of Mdlle. Albani, admirable for vocal charm and brilliancy, and for the poetic sentiment infused into the representation of the character. In the legendary ballad in the second act, and in the following duet, the expression of infatuated enthusiasm on the excited imagination of the young girl, who has bewailed the doom of the Dutchman, with whom she is now confronted, and for whose rescue she determines to sacrifice herself, was admirably realised; Mdlle. Albani's performance in the next and closing act having been of an equally high order.

M. Maurel, as the Dutch captain, sang and acted with great effect. His appearance was highly picturesque, and his declamation very artistic, especially in his opening soliloquy, when landing from his vessel, in the duet with Senta, and in the music in which the Dutchman expresses his remorse, and his determination to prevent the heroic girl from joining her fate to his.

Signor Bagagliolo sang well the music of Dalando, the Norwegian captain, as did Signor Carpi that of Erik, Senta's accepted and afterwards rejected lover. The incidental passages for Mary, Senta's attendant, were efficiently rendered by Mdlle. Ghiotti, as was the song of the Pilot by Signor Rosario.

The choruses were generally well given—the beautiful "Spinning Song," for female voices, however, having been far too noisy. The fine band of the establishment was heard to special advantage in the overture and the elaborate orchestral accompaniments. The scenery and stage effects were excellent, especially the representation of the approach and anchoring of the Dutch vessel in the first act, and its destruction at the close of the opera. The principal singers were several times called forward, as was also Signor Vianesi, the conductor, at the end of the performance.

The opera was repeated on Tuesday; for Thursday "Il Trovatore" was announced, and for Friday—the occasion of the visit of General Grant—"La Figlia del Reggimento," preceded by the American national air, "The Star-Spangled Banner," the solo passages sung by Mdlle. Albani. This (Saturday) evening "Aida" is to be repeated.

Next week (on Saturday) the Duke of Saxe-Coburg Gotha's opera, "Santa Chiara," is to be produced. The season of this establishment is to close on July 21.

HER MAJESTY'S THEATRE.

The revival of "Otello" on Thursday week included two special features of the cast of the opera as given at Her Majesty's Opera (Drury-Lane Theatre) in 1870—under the one season of Mr. George Wood's leasehold—the Desdemona of Madame Christine Nilsson and the Iago of M. Faure. To these important performances was added the reappearance of Signor Tamberlik, after an interval of several years. The Otello of this gentleman had previously been a specialty in the opera as revived at the Covent-Garden establishment in 1864. First notice is due to the great artist who returns to us with little perceptible diminution of vocal power, while still possessing that grand style and fine declamation for which he was before so remarkable. In the duet where Iago inflames Othello's jealousy, and in the final scene in which the Moor vacillates between his love for Desdemona and his thirst for revenge, Signor Tamberlik's performance was as grand as ever. In the duet the audience were positively electrified by the singer's production of the high O sharp in the chest voice—a feat rarely accomplished by tenors—with a purity and volume of tone that were scarcely exceeded by the same singer in former years. The passage "L'ira d'avverso fato" was encored with enthusiasm and repeated with no diminution of power.

The poetic grace and refinement and the vocal brilliancy of Madame Nilsson's performance as Desdemona were as admirably displayed as heretofore, especially in the "Willow song" and the following prayer—intense grief and despair having been finely realised in the concluding scene with her infuriated husband. M. Faure's Iago is the same combination of dramatic and vocal merit as formerly; and Signor Carion (a recent debutant) greatly improved his position by his very effective singing as Roderigo. Mdlle. Robiati, as Emilia, contributed to the general efficiency of the cast. "Otello" was repeated on Monday; on Tuesday "Les Huguenots" was given, with the effective performances of Mdlle. Salla as Valentina and Herr Wachtel as Raoul—it having been the lady's first appearance in the character. The specialty of this week will be the first appearance of Mdlle. Gerster as Amina, in "La Sonnambula," this (Saturday) evening.

THE TRIENNIAL HANDEL FESTIVAL.

This event was virtually inaugurated yesterday (Friday) with what is called a "grand public rehearsal;" but has, in reality, little of the semblance of a rehearsal, from the thorough preparation ensured by a long course of preliminary practice. Yesterday's programme comprised portions from those of each of the three days' performances of next week, including extracts from "The Messiah" (with which oratorio the festival opens on Monday); from the pieces to be given on the "selection" day (Wednesday), and from "Israel in Egypt," with which the festival is to conclude on Friday.

The arrangements are on the same grand scale as heretofore. The choruses are rendered by the Metropolitan Handel Festival choir (including the choristers of the Sacred Harmonic Society), reinforced by large additions from provincial sources. To balance this enormous body of vocal tone there is an orchestra of proportionate force, every division of which is enhanced beyond the usual dimensions; M. Salnton being, as before, the principal first violin.

The solo singers are Madame Adelina Patti (who sang at the festival of 1865), Mdlle. Albani (who appears for the first time at a Handel Festival), Mesdames Lemmens-Sherrington, Edith Wynne, and Patey, Mrs. Suter, Mr. E. Lloyd, Mr. Cummings, Mr. V. Rigby, Mr. Santley, Herr Henschel, and Signor Foli.

The trumpet solo of Mr. T. Harper will be an incidental feature, particularly in "The Messiah," and in the obligato to the air "Let the bright seraphim," to be sung by Mdlle. Albani on Wednesday (the selection day).

Mr. Best (of Liverpool) is the solo organist, being named for the second of Handel's organ concertos on the day just specified; and Mr. Willing presides at the instrument as accompanist.

Of the proceedings of Friday, Monday, and Wednesday we must speak in our next notice. Meantime we may glance at the antecedents of these festivals.

This will be the eighth celebration—the sixth held triennially—at the Crystal Palace, the first having taken place in 1857 as an experiment. This consisted of three days' performance, comprising the oratorios "The Messiah," "Judas Maccabæus," and "Israel in Egypt." Another festival followed in 1859, when "The Messiah" was given on the first day and "Israel in Egypt" on the third; the intermediate Wednesday having been devoted to a selection from various works by Handel—a scheme that has been judiciously followed at the subsequent celebrations.

The Sacred Harmonic Society has been and still is the basis in the musical arrangements of the festivals; and its conductor, Sir Michael Costa, was heretofore and continues to be the presiding power by which the vast army of executants is swayed and controlled into unanimous action.

Sir Julius Benedict's annual concert—which took place at the Floral Hall on Monday afternoon—attracted the usual full and brilliant attendance. The fine singing of Madame Adelina Patti, Mdlle. Albani, and many other eminent artists of the Royal Italian Opera company, was heard in pieces of various styles, all more or less familiar. Those of Sir J. Benedict's composition were "The bird that came in Spring," sung by Madame Patti, and the fine finale of his sacred cantata, "Saint Cecilia," for soprano solo, with chorus of angels for female voices. In this Mdlle. Albani was the soloist. Each piece was encored, as were the other performances of both singers. Sir J. Benedict and Mr. Charles Hallé played Mozarts' fine duet for two pianofortes, "Hommage à Handel," and Madame Norman-Néruda's finished violin playing was heard in a sonata by Corelli.

M. Ganz's *Matinée Musicale* was given at Dudley House on Tuesday, with an interesting selection, including his own pianoforte playing and performances by other well-known artists, both vocal and instrumental.

The concert of Signor Gustave Garcia, the well-known professor of singing, attracted a crowded audience to St. James's Hall on Tuesday evening. The programme comprised a first and third part, consisting of miscellaneous selections—contributed to by several eminent vocalists and instrumentalists—between which portions Herr Hofmann's cantata, "The Legend of Melusine," was performed; the choruses by an excellent choir of about 250 voices. The music of the principal character, Melusine, was very well sung by Miss Lisa Walton, a pupil of Signor Garcia. The young lady possesses a voice of agreeable and sympathetic quality, her intonation is good, and her style refined. She was much applauded in the romanza, and was also highly effective in the duet with Count Raimund. The music of this character was very well rendered by Signor Frederici, subordinate parts having been efficiently filled by Madame Garcia and Mr. O. E. Tinney. The cantata was given with accompaniment of two pianos (Messrs. T. Jones and Thomas) and harmonium (Mr. Marlois).

Mr. John Thomas, the skilful harpist, gave a harp concert at St. James's Hall on Thursday afternoon, when a band of harps and some well-known vocalists contributed to a varied programme. At the same time, the annual concert of Signor Ardit, the eminent conductor, took place at Dudley House, Park-lane, with a programme of strong interest, both vocal and instrumental. Mr. Richard Blagrove gave a concertina concert the same evening at the Royal Academy of Music. Yesterday (Friday) afternoon Mr. Charles Gardner (pianist) was to give his twelfth annual concert at Willis's Rooms, introducing a new trio of his composition, for piano, concertina, and violoncello.

Another orchestral concert was given by the students of the Royal Academy of Music, at St. James's Hall, on Wednesday evening.

OBITUARY OF EMINENT PERSONS.

THE GRAND DUKE OF HESSE-DARMSTADT.

Louis III., Grand Duke of Hesse-Darmstadt, K.G., died at Darmstadt on the 19th inst., aged seventy-one. He married in 1833 Princess Mathilde of Bavaria, by whom he had no issue, and who died in 1862. A few days before his death he caused it to be announced to his family that he had been married for the last nine years to Frau von Hochsteten. Prince Christian of Schleswig-Holstein, accompanied by Colonel Gardner, was sent to Darmstadt by the Queen to attend his funeral, which took place on the 19th. He is succeeded by his nephew, Prince Louis of Hesse, K.G., who is married to Princess Alice, second daughter of Queen Victoria. The Landgraviate of Hesse-Darmstadt was erected into a Grand Duchy by Napoleon I. in 1806, when the Landgrave Louis VII. assumed the title of "Louis I., Grand Duke." The reigning Sovereign is the great-grandson of the Prince in question. He is a Lieutenant-General in the Prussian army, and Colonel of various Russian, Prussian, and Hessian regiments.

LORD JUSTICE MELLISH.

The Right Hon. Sir George Mellish, Lord Justice of Appeal, P.O., D.O.L., died on the 15th inst., at his residence, in Lowndes-square. He was second son of the late Very Rev. Edward Mellish, Dean of Hereford, by Jane, his wife, eldest daughter and coheir of the Very Rev. William Leigh, of Rushall Hall, in the county of Stafford; was educated at Eton, and at University College, Oxford; practised as a special pleader from 1840 to 1848; was called to the Bar at the Inner Temple in the latter year, and became a Queen's Counsel in 1861. He went the Northern Circuit, and acquired a very high reputation for learning and ability. His practice was extensive in cases both of law and equity; and in 1870, a vacancy occurring in the Court of Appeal, he was appointed Lord Justice, in succession to Sir G. Giffard. At the same time he received the honour of knighthood, and was sworn of the Privy Council. His life was a strange mixture of suffering and labour. From his earliest childhood he was tortured with severe gouty pains, but his powerful and clear intellect enabled him to perform zealously the duties of an arduous profession. Lord Justice James addressed the Bar in the Court of Appeal last Saturday morning on the loss which the Court and the profession had sustained by the death of Lord Justice Mellish; and Mr. Glasse, on behalf of the Bar, expressed their sympathy with the observations of the learned Judge.—A portrait of Lord Justice Mellish was given in the Number of this Paper for Nov. 5, 1870.

LADY STIRLING-MAXWELL.

Caroline Elizabeth Sarah, Lady Stirling-Maxwell, generally known as the Hon. Mrs. Norton, the distinguished poetess and novelist, died on the 15th inst. at 10, Upper Grosvenor-street. Her Ladyship, second daughter of Thomas Sheridan, Esq., and granddaughter of the Right Hon. Richard Brinsley Sheridan

inherited a large share of the genius of the Sheridans, and very early in life displayed her poetic taste and ability. In 1829 appeared from her pen "The Sorrows of Rosalie," and amongst her numerous productions, both in prose and verse, may be mentioned "The Undying One," a poem, published in 1831; "Wife and Woman's Reward," 1835; "Stuart of Dunleath," 1851; "The Lady of La Garaye," 1861; "Lost and Saved," 1863; and "Old Sir Douglas," 1868. She was married, first, July 30, 1827, to the Hon. George Chapple Norton, Recorder of Guildford, afterwards for many years magistrate at the Lambeth Police Court (who died Feb. 24, 1875), and by him was mother of Thomas Brinsley, present Lord Grantley. The Hon. Mrs. Norton was married, secondly, in March, 1876 (she was his second wife), to Sir William Stirling-Maxwell, Bart., K.T., of Pollok, Renfrewshire, M.P., Lord Rector of the University of Edinburgh. Of Mrs. Norton's sisters, the elder, Helen Selina, married, first, the late Lord Dufferin, and, secondly, the Earl of Gifford, and the younger, Jane Georgina, Edward Adolphus, Duke of Somerset, K.G.—A Portrait of Lady Stirling-Maxwell will appear in our next issue.

MISS CARPENTER.

Miss Mary Carpenter, who was well known for the active part she has taken in the reformatory movement and in the promotion of ragged schools and of female education, died on the 15th inst. She was the daughter of the late Rev. Dr. Lant Carpenter, of Bristol, and sister of Dr. W. B. Carpenter, the eminent physiologist, and was born in 1807. She had published several works on the best methods of dealing with youthful criminals and on various other philanthropic and educational subjects. She read many papers before the Social Science Association, and paid four visits to India for the purpose of promoting female education and prison reform in that country. Her last visit was made in 1875-6; and only last month a Parliamentary paper was issued containing two letters which Miss Carpenter had written to Lord Salisbury, at his Lordship's desire, giving her views upon the questions of female education and prison discipline in India. In Bristol Miss Carpenter will be greatly missed. She established and superintended the Red Lodge Reformatory, where she died, as well as the Industrial School for Girls and Day Feeding Schools. With every mark of respect, the remains of Miss Carpenter were interred on Tuesday morning in Arnos Vale Cemetery. The hearse was followed by about twenty mourning and private coaches, including those of the Mayor and High Sheriff. The boys and girls of the Kingswood Reformatory, Red Lodge Reformatory, and Park-row Industrial Schools joined in the procession. The officiating minister was the Rev. A. N. Blatchford, of Lewin's Mead Unitarian Chapel.

ADMIRAL ROUS.

Admiral the Hon. Henry John Rous died on the 19th inst. This veteran sportsman was the second son of the late Earl of Stradbroke, and was born in January, 1795, so that he has passed away in his eighty-third year. In 1808 he entered the Navy, and served as a midshipman in the expedition to Flushing. He afterwards was appointed to the Bacchante, under Sir W. Hoste, and received a medal for bravery in various boat actions and land expeditions. In 1823 he was made Captain, and, in command of the Rainbow, served on the Indian and New Holland stations between 1825 and 1829. Some years afterwards he performed a feat of seamanship of which he was justly proud. While in command of the Pique she struck on a reef of rocks on the Labrador coast, and was much damaged. Captain Rous, however, brought her across the Atlantic with a sprung foremast, and without a keel, forefoot, or rudder, though the ship was making 23 in. of water an hour. This feat has often been cited as an instance of the resources and skill, to say nothing of the courage, of seamen of the old school. In 1841 Admiral Rous was returned for Westminster in the Conservative interest, but was rejected in 1846. Notwithstanding his defeat, Sir Robert Peel appointed him a Lord of the Admiralty. It was as a sportsman, however, and not as a politician, or even as a sailor, that Admiral Rous will best be remembered. For close upon forty years he may be said to have been almost supreme as an authority upon the turf; and it was a supremacy marked by the most perfect fairness and good sense. He has been a steward of the Jockey Club almost uninterruptedly, we believe, since 1838; and his work on "The Laws and Practice of Horse Racing" procured for him the title of the "Blackstone of the Turf." Few men have been more prominent in London society, and few will be more missed.—We hope to be able to give a Portrait of Admiral Rous next week.

LIEUTENANT-GENERAL SIR H. JAMES.

Lieutenant-General Sir Henry James, R.E., F.R.S., died on the 15th inst., at Southampton, aged seventy-four. He was the fifth son of John James, Esq., of Truro, by Jane, his wife, daughter of John Hoeken, Esq., of Carney, Cornwall; and, having been educated at the Royal Military Academy, Woolwich, entered the Royal Engineers in 1825, and attained the rank of Lieutenant-General in 1874. He was employed as Director-General of the Geological Survey of Ireland, 1844 to 1846, and of the Admiralty Works at Portsmouth from 1846 to 1852, and from 1854 to 1874 was Director of the Geological Survey of Great Britain and Ireland. He received the honour of knighthood in 1860. Sir Henry married, in 1845, Emma, daughter of the late Major-General Matson, R.E.

The following deaths have also been announced:—

Admiral George Dobson, on the 13th inst., at 32, Pulteney-street, Bath, aged eighty-one.

Major-General Angelo Edward Osborn, late of the Bengal Staff Corps, on the 16th inst., at the age of forty-nine.

Lieutenant-Colonel Henry Auriol Prinsep, on the 15th inst., at Aix-les-Bains, in his forty-seventh year.

The Rev. Thomas Baker, Rector of Hartlebury, and Hon. Canon of Worcester, on the 7th inst., aged seventy-eight.

George O. Sedgwick, Esq., Commander of the Rajah of Cochin, on the 11th inst., at Penge, Surrey, aged fifty-one.

Lieutenant-Colonel John Linton, of Stirlings, Hunts, J.P. and D.L., formerly of the 6th Inniskilling Dragoons, and one of the survivors of Waterloo, on the 10th inst.

Henriana Matilda, Mrs. Leigh, widow of the Rev. Thomas Gerard Leigh, and daughter of the late Lord Henry Murray, on the 29th ult., at Shirdington Lodge, near Cheltenham.

William Henry Whitehead, Esq., of 7, South-square, Gray's Inn, late Chief Registrar in Bankruptcy, at Castle Mona, Isle of Man, on the 11th inst.

Dr. Henry Wilson, of 2, Merrion-square, Dublin, Professor of Ophthalmic Surgery to the Royal College of Surgeons, Dublin; Examiner in Ophthalmic Surgery in the University School of Medicine, and Surgeon Oculist to St. Mark's Hospital in that city, on the 14th inst., in his fortieth year. Dr. Wilson had, by his skill and ability, raised himself to a position of eminence in the special branch of the medical profession to which he had devoted himself.

Henry Robert Boucherett, of Willingham and Stallingborough, in the county of Lincoln, J.P. and D.L., High Sheriff in 1866, representative of an ancient family of French origin long settled at Willingham.

Lieutenant-Colonel Henry Philipps, of The Manor House, Sprouton, near Ipswich, J.P. and D.L., formerly Captain 3rd Light Dragoons, on the 12th inst., aged seventy-one. Colonel Philipps was fourth son of the late Rev. John Philipps, of Lower Eaton, in the county of Hereford, by Anne, his wife, daughter of Charles Pye, Esq., of Wadley, Berkshire.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

T. J. J. (Belper).—We can recommend Cook's "Synopsis of the Openings" and Wormald's "Chess Openings," both of which can be obtained through any bookseller. We do not know the prices of these or any other chess books.

M. P. (Lisbon).—We will consider your suggestion.

L. A. N. (Bath).—Problems in two and three moves are unquestionably most acceptable to our subscribers; but we are much mistaken if the elegant position given below does not gratify all of them.

DOLLY (Liverpool).—In Problem No. 1737 the answer to 1. Q to K 5th is 1. P takes R. J. T. (Eton College).—The conception embodied in your problem is good; but there is a second solution, commencing 1. Kt to Q 2nd.

A LITTLE BOY.—No notice was taken of your proposed solution of No. 1737 because it was erroneous. All correct solutions are duly acknowledged.

J. K. (Ologue).—Thanks for the programme of the chess meeting in your city. A batch of the games will be very acceptable.

J. B. G. (Lima).—In position No. 1, White should win by force; in No. 2, Black with the move draws easily by the move he adopted—K to K sq. The problem shall be examined.

A. M. (Moscow).—We are greatly obliged for the trouble you have taken. Can you inform us if the game between M. H. and Herr D. has been published?

H. R. (Brompton).—Haseltine's "Brevity and Brilliance" cannot be obtained in this country. Your best course is to apply to the author, Campton Village, New Hampshire, U.S.

THO. (St. Albans).—The best authority on the rules and regulations for playing chess is Beaumont's "Handbook," published by Bohn, Covent-garden, London. A player can easily when neither King nor Rook has been moved and when in the movement the King is not played over or to any square attacked by an adverse piece.

CORRECT SOLUTIONS OF PROBLEM No. 173: received from R. Bumbelow, J. M. Pamplona, J. O. Skinner, and Red Ink.

CORRECT SOLUTIONS OF PROBLEM No. 1737 received from L. A. N. E. L. G. R. H. Brooks, W. N. Payne, R. L. (Chichester), D. O. B. W. F. Payne, R. Bumbelow, and J. O. Skinner.

CORRECT SOLUTIONS OF PROBLEM No. 1738 received from M. B. S. A. Billew, P. S. Shewale, Triton, R. Broughhead, Simplex, Only Jones, J. William, W. Alston, Leonora and Leon, S. Western, Queen of O'Connell, J. S. W. Nelson, H. T. King, E. W. Orley, T. Edgar, H. Stanfield, R. W. Robson, G. Fosbrooke, N. Cosell, E. Amende, Mechanic, J. Wootton, Paul's B. Oct, Harro Ian, L. Burnett, G. Reves, J. Lyndford, T. W. Hope, W. bin Gray, O. B. more, Americaine, Long Stop, S. Threlt, N. Brock, F. G. V. St. W. M. J. L. T. Black Knight, C. S. Adams, F. Wharton, R. Schofield, B. B. Boone, W. S. B. Cant, W. Leeson, Woolwich Chess Club, R. H. Brooks, Hereward, O. B. Granville, G. W. Stevens, Maggie Irwin, E. P. Villiamy, East Marden, Johanna, G. H. V. E. H. V. P. Dennis, Copeland, H. M. Frideaux, Red Ink, A. W. od, Thomas Isaac, Highway Institute, M. H. Moorhouse, B. Levy, Dolly, Arthur Middleton, J. de Huneyra, R. Bumbelow, J. O. Skinner, T. West, The Firm, Mac, Leander, Mariana of Bruges, and Emile Fran.

SOLUTION OF PROBLEM No. 1737.
WHITE. BLACK.
1. Q to Q 8th Any move 2. Kt, B, or Q mates accordingly.

PROBLEM No. 1740.

By W. T. PIERCE.

BLACK.

WHITE.

White to play, and mate in four moves.

CHESS IN RUSSIA.

A pair of lively Games played a few weeks ago in Moscow between M. HELLWIG and Mr. ATLMER MAUDE.—(Evans's Gambit.)

WHITE (Mr. M.) BLACK (M. H.)
1. P to K 4th P to K 4th
2. Kt to K B 3rd Kt to Q B 3rd
3. B to B 4th B to B 4th
4. P to Q Kt 4th B takes P
5. P to B 3rd B to B 4th
6. P to Q 4th P takes P
7. Castles P takes P
8. Q to Kt 3rd Q to B 3rd
9. P to K 5th Q to Kt 3rd
10. Kt takes P K Kt to K 2nd
11. Kt to K 2nd P to Kt 4th
12. B to Q 3rd Q to K 3rd
13. Q to Kt 2nd Kt to Kt 3rd
14. Kt to B 4th Kt takes Kt
15. B takes Kt
Down to this point the opening has been played in strict accordance with the latest lights upon the Compromised Defence.
16. P to Q B 3rd
All the authorities pronounce 16. P to K B 3rd to be the best move at this juncture.
16. Kt to Kt 5th
16. B to K 4th is worthy of examination.

Between the same Players.—(Muzio Gambit.)

WHITE (Mr. M.) BLACK (M. H.)
1. P to K 4th P to K 4th
2. P to K B 4th P takes P
3. Kt to K B 3rd P to Kt 4th
4. B to B 4th P to Kt 5th
5. Castles P takes Kt
The radical defects of the Muzio Gambit are rather intensified than otherwise by this second sacrifice.
6. K takes B
7. Q takes P Q to B 3rd

CHESS INTELLIGENCE.

A chess festival in honour of the famous German master, Herr Andersen, will be held at Leipzig from July 15 to 20 next. Arrangements have been completed for a grand tournament of first-rate players; and on July 18 a testimonial from the chessplayers of Germany will be presented to the guest of the occasion. Herr Andersen's public career has shed lustre upon German chess, and it is fittingly recognised in the honours his compatriots now design to confer upon him.

The Bermudez Chess Club engaged in two matches last week, and carried the victory in both. Against the International Bermudez scored six to three and the Dublin Chess Club was defeated by seven to one.

WILLS AND BEQUESTS.

The will and codicil, dated Nov. 28, 1876, and March 6, 1877, of Mr. James Graham, late of No. 11, Cornwall-terrace, Regent's Park, who died on the 17th ult., were proved on the 7th inst. by David Kennedy Porter, Alexander Frederick Stewart, and John Thomas Agnew Patrick, the executors, the personal estate being sworn under £250,000. The testator gives to his executors, who shall prove his will and act in the execution of the trusts of his estate, £1000 each; to the said Mr. D. K. Porter his residence, with the furniture, plate, pictures, household effects, horses, and carriages; upon trust for his brother, David Graham, for life, £30,000 Three per Cent stock; a like sum of stock is also given upon trust for his sisters, Mary Ann Graham, Anne Cheesman, and Charlotte Thomas, in equal parts, for their lives, and subsequently the whole for the children of the said Mrs. Cheesman (except his nephew, Robert Suckling Cheesman) and the only son of the said R. S. Cheesman by his first marriage; for distribution to the persons named in a sealed paper £5000, free of legacy duty; upon trust for such schools, hospitals, institutions for the relief of the poor, and generally for such charitable or benevolent institutions in the island of St. Vincent as his executors shall determine, £10,000; and there are legacies to his servants, according to the length of their service. Such part of the residue of the personalty as is by law applicable to charitable purposes the testator gives to and amongst such schools, hospitals, and charitable and benevolent institutions in London or the suburbs, and in such proportion and manner, as his executors in their absolute discretion shall think fit. The rest of his personal estate not applicable by law to charitable purposes, and all his real estate, he leaves to his grand-nephew, the only son of his nephew, Robert Suckling Cheesman, by his first marriage.

The will, dated May 15, 1868, of Mr. Edwin Louis Samuel, formerly of Liverpool, and late of No. 9, Kensington-gore, and of No. 60, Old Broad-street, banker, who died on March 28 last, has been proved by Mrs. Clara Samuel, the widow, Samuel Montagu, the brother, and Edward Wilson Yates, the surviving executors, the personal estate being sworn under £200,000. The testator bequeaths to his wife his horses and carriages and £5000; to his said brother, £2000; to his brother-in-law, Mr. Yates, £1000; to the Hebrew congregation at Liverpool, £200; to the Liverpool Blind Asylum, £100; to the board of guardians of the Jewish poor in London, £200; and, after giving some other legacies, he leaves one half of the income of the rest of his property, real and personal, to his wife for life, for the maintenance of herself and children, to be reduced in the event of her marrying again, and subject thereto the residue of all his property is to be held upon trust for his children in equal shares.

The will, dated Feb. 26, 1877, of Mr. Henry Spicer, late of New Bridge-street, and of the Highlands, Putney-heath, who died on April 4 last, was proved on the 5th inst. by Mrs. Sarah Spicer, the widow, and Henry Spicer and Edward Spicer, the sons, the acting executors, the personal estate being sworn under £140,000. The testator leaves to his wife £1000, his household furniture, plate, pictures, and effects, and his residence absolutely, and for life the rents of certain property and the dividends of £25,000; to his acting executors, £50 each; to his brothers and sisters, and to his friends, the Rev. Henry Allon, D.D., and Thomas Bamford, £100 each; to each of his seven sons, Henry, Edward, Alfred, Robert, Arthur, Herbert, and Walter, £15,000; to each of his daughters, Sarah and Julia, £9000; and there are some properties specifically given to his said daughters and his son Henry. The residue he leaves to all his children in equal shares.

The will, with one codicil, dated May 7, 1875, and March 27, 1877, of Mr. George Giles, late of The Maples, Bonchurch, Isle of Wight, civil engineer, who died on April 9 last, was proved on the 25th ult. by Mrs. Elizabeth Meadows Giles, the widow, John Lankester, Thomas Smith Rowe, M.D., and Henry Bailey Rowan, the executors, the personal estate being sworn under £55,000. The testator gives to his executors £100 each; to his wife his furniture, plate, pictures, and effects, £500, and a piece of freehold ground, absolutely, and the rest of his property for life. On her death the portions of each of his three daughters are to be made up to £10,000; and the remainder of his property is to be divided equally between his six sons.

The will and five codicils (dated respectively June 21, 1865; June 30, 1869; Oct. 20, 1871; April 24, 1874; Oct. 13, 1875; and Dec. 19, 1876) of Mr. George James, formerly of Melbourne, Australia, and late of Ridgeway, Southampton, who died on Jan. 18 last, were proved on the 26th ult. by Jabus Stanley James and George James, the son, the executors, the personal estate being sworn under £45,000. The devise and bequests relate entirely to testator's wife and children.

The will, dated Jan. 10, 1877, of Mr. Charles Edward Cawley, late M.P. for the borough of Salford, of the Heath, Kersal, Salford, Lancashire, who died on April 2 last, was proved in London on the 8th inst. by James Chapman, Richard Heaton Smith, and René James Tahourdin, the executors, the personal estate being sworn under £25,000. There are several legacies. To his wife, Mrs. Harriet Cawley, the testator gives the policy on his life, with the bonuses, his residence, with the furniture and effects, and £650 per annum for life; and the rest of his property to his daughter.

The Earl of Aberdeen has agreed to accept the office of president of the forthcoming Social Science Congress, to be held in Aberdeen; and Lord Young, one of the Judges of the Court of Session, has consented to preside over the education department of the meeting.

The annual meeting of the Royal Association in Aid of the Deaf and Dumb was held in the lecture-hall of the association, Oxford-street, on the 15th inst.—Sir John Kennaway, M.P., presiding. Mr. S. Smith, the secretary, read the report, which was conveyed by finger-language to those deaf mutes who were among the audience. The committee rejoiced to say that this year the income had increased. Last year the association had a difficulty in meeting its liabilities, and had to thank "A Suffolk Rector" for £150, Lady Burdett-Coutts for £100, and Lord Overstone for £50; and these sums removed the difficulty and enabled the association to continue its work, without which the adult deaf and dumb would be deprived of the means of effective public religious instruction. Acknowledgment was made of the services rendered to the deaf and dumb community by the London School Board, who had established classes in four different parts of London, and near to the schools. The association had provided homes, by voluntary contributions, where the children who lived at a great distance from the school could be boarded during the week-days.—A meeting was held on Monday at the Mansion House for the purpose of promoting the establishment of a training college for teachers of the deaf under the German system, which communicates language by what is termed lip-reading. After some observations by the Bishop of Gloucester and Bristol, who presided, resolutions were passed in furtherance of the object of the meeting. It was stated that an offer of £1000 had been made on condition that £4000 would be raised by the 1st of next month.

S K E T C H E S O F T H E W A R .

TULDSCHA, ON THE DANUBE.

THE VLADYKAVKAZ ROAD, IN THE RUSSIAN CAUCASUS.

THE ST. GOTHARD RAILWAY TUNNEL WORKS.

THE ST. GOTHARD TUNNEL.

In the very centre of that stupendous barrier of mountain ranges, called the Alps, which shuts off Italy from Switzerland, and from Savoy and the Austrian Tyrol on each hand, stretching to the Gulf of Genoa and to the Adriatic, a gigantic engineering work is about to be recommenced. The construction of the St. Gothard railway tunnel is not less important, we consider, than that of the Mont Cenis Tunnel, connecting Savoy and France with Piedmont and the western and central provinces of the Italian kingdom. It will afford more direct and independent communication, not only between Germany and Italy, but also between England and Italy; while Switzerland, Belgium, and the whole of Central and Northern Europe will obtain immediate access to the Mediterranean and to its ports for trade with the Levant. We observe, therefore, with satisfaction, that an International Conference, lately held to debate upon the means of raising sufficient capital, by joint contributions from several countries interested in the project, has agreed upon a fair division of its cost. Our illustrations of the works that lately underwent a temporary suspension, from obstacles of a pecuniary kind, were prepared some time ago from a series of photographs which an official gentleman had sent us, accompanied by his own description of the subject. The following is a translation of his account of it:—

"Between the Simplon, to the west, and the Lukmanier and Splügen, in the Grisons, to the east of it, rises the St. Gothard clump of mountains, the elevation of which is above the line of perpetual snow. It contains the sources of the Rhine and the Rhone, as well as of the Reuss and the Tessin or Ticino; but the two last-named rivers occupy, respectively, the northern and the southern valley, on the Swiss and the Italian side of the St. Gothard; the former pursuing its course to the Lake of the Four Cantons, the latter flowing down into Lake Maggiore.

"The proposed tunnel through the St. Gothard will be of the length of fifteen kilometres, which is about nine miles and one third of a mile. Its north entrance is situated below the village of Goschenen, a dreary hamlet in the Canton of Uri, which was only, during a few summer weeks, enlivened by the visits of foreign tourists on their way to see the Furka Glacier, or taking the St. Gothard Pass for their route to Italy. Before the commencement of the tunnel works, Goschenen consisted of about sixty dilapidated houses, irregularly stuck against the rocks, or huge blocks of granite, and moraines of a receding glacier, at the foot of the mountain, below the bridge over the Reuss. It has been changed into a scene of bustle and activity; within three years past a new town has been created, for the accommodation of two thousand labouring men; there are comfortable hotels, a post office and telegraph, and the visitor may enjoy musical entertainments or dancing, or the reading of his newspaper, as in any fashionable place of resort in the Alps. But the sights and sounds of strenuous toil are continually present. The detonation of a mine exploded in the bowels of the rock, or the shrill whistle, rattle, and rumble of a locomotive engine, the cries of Piedmontese labourers, or their songs, perhaps Garibaldi's Hymn, when coming back in the evening, after a day's hard work, remind us that this is no mere place of holiday recreation or of repose for invalids. The first sight of the great work is gained in leaving the village, just below the commencement of the steep side path up the narrow Schöllenen defile. Here is the dark archway that marks the north entrance to the tunnel, and here, on the river bank, are the buildings, the lines of railroad or tramroad, the waggons and trucks, the blocks of stone and tubes or beams of iron, and various parts of machinery, to be adjusted by the workmen. (We give an illustration of the north end of the tunnel at Goschenen, and one likewise of the south end, which is at the village of Airola, in the canton of Ticino, on the Italian side of the mountain.)

"An inspection of the St. Gothard line of railway, from Lucerne, at the upper end of the Lake of the Four Cantons, to Goschenen, and thence by the tunnel to Airola, shows what great difficulties it has had to encounter. The Lake of the Four Cantons (the Vierwaldstättersee) is 1430 ft. above the level of the sea, while Goschenen is 3630 ft.; so that there is a difference of 2200 ft., which incline has to be overcome by the steepest possible gradients; and from Airola to the Lago Maggiore there is a very steep descent. Without reckoning the nine miles of the great tunnel, there are other tunnels, having an aggregate length of sixteen or seventeen miles, in different portions of the railway. The entire length of the line, from Lucerne to the Italian frontier, traversing the Swiss cantons of Lucerne, Zug, Schwytz, Uri, and Ticino, is about 163 miles. It appears, from the chief engineer Helweg's report to the Federal Council of Switzerland, that the cost of laying the line, which was at first estimated at 187 millions of francs, cannot be less than 289 millions. The contractor, M. Louis Favre, has sublet the contract for boring the great tunnel, without the internal casing of masonry, at the rate of 2800 francs the longitudinal metre, for the 15,000 metres of its total length. Add to this cost of boring and excavating ten or twelve million francs for the masonry, and we get a sum of from fifty-two to fifty-five million francs for the cased tunnel; but to this we must add eight or nine millions for the finishing and for laying down the permanent way, as well as for plans and surveys, engineering superintendence, and management of the works, bringing up the entire cost of the St. Gothard tunnel to sixty-two or sixty-five millions of francs. It is a large sum, equivalent to some two millions and a half pounds sterling; yet very much less than the actual cost of two great recent works of a similar nature. The tunnel through the Col de Fréjus, commonly known as the Mont Cenis Tunnel, which is 12,233 metres long, cost about 75,000,000 fr., and the Hoosac tunnel in Massachusetts, with a length of 7634 metres, cost more than 6000 fr. the metre. The vast progress of mechanical science and skill in late years has been nowhere proved more remarkably than in such undertakings as these. The old implements of excavation, pickaxe, chisel, and mallet, were superseded in the Mont Cenis tunnel by a new instrument, the perforator, which attacks the hardest rock-surface by percussion; and a newly applied motive-force, that of compressed air, which had previously been little understood, was there brought into action. These two special inventions of machinery are now indispensable for the work of such tunnels as the Mont Cenis, the St. Gothard, or the projected British Channel submarine tunnel. Improvements have been made in their details, and their organism has been perfected. But their original type has been preserved. The condensed air, when it passes from the cylinder in which it suffers compression, is transmitted by cast-iron tubes, of a diameter varying in different cases, to those places in the excavation where its power is needed for attacking the face of the rock. It is there used for setting in motion the perforators that strike the rock, and which pierce in it the holes for inserting the charges of dynamite. These charges are exploded, and the fragments or mass of stone thus detached from the rock are then carried away and deposited outside the tunnel. The perforating machine has been sheltered during the explosion, in a siding made in the rock, at such a distance as not to receive any damage. It is now again brought forward in front of the rock to be cut

through; the conduit of compressed air is re-attached to its motive-power apparatus, and fresh holes are bored to serve for another blasting operation. Such is the work of excavation, very simple in principle, but complex and minute in its various details.

"Outside the entrance to the St. Gothard tunnel we meet with the air-compressing apparatus, which is fitted up on the Colladon system. Twenty-three cylinders, at each end of the tunnel, at Goschenen and at Airola, are worked to compress 1200 cubic metres of air (1596 cubic yards) to a density eight times that of the atmosphere. The air-condensers are set in motion by water-power, which is applied by six Girard turbines, the water being supplied by canals; it flows down through the Val de Schöllenen to Goschenen, but on the south side it is drawn from the Tremola and the Ticino, by a system of locks and reservoirs. The precipitous clefts in the rocks are frequently crossed by the water-pipes, suspended at a giddy height, or supported by a light wooden bridge, which is seen at the place where the Ticino conduit passes over the Albinaasca, to supply the turbines that work the air-condensing apparatus at Airola. [This is shown in one of our illustrations.]

"An army of nearly two thousand workmen, miners, smiths, carpenters, and engineers, is employed constantly at each of the two ends of the tunnel, to perform this vast undertaking. It is a scene of great activity when they are all working there. At the sheds for repairing the machines there lie a great number of perforators, all blunted or bent in their hard service, pieces of their carriages, and other parts of the boring apparatus; behind these are the forges, with their blazing fires, where the points and edges of the augers and the chisels are sharpened and re-tempered; not far off is heard the dull thumping beat of the huge hammer, plied by an engine of sufficient power; in the distance, among heaps of earth and stone fetched out of the mountain, stand the powder-magazines and factories of dynamite cartridges for blasting the rock. We observe also the cantines or refreshment-booths, the rows of lodging-houses, the hospital, the carpenters' and wheelwrights' workshops; and we have to step over the air-tubes and water-pipes, extending from the outside far into the tunnel. Overhead, at the tunnel's mouth, is fixed the ventilating apparatus to purify the air of the interior, so often fouled by the mining explosions.

"The St. Gothard tunnel, like others designed for the accommodation of a large traffic, is made to admit two lines of railway. Its dimensions, in a diametrical section, are nearly eight metres wide and seven metres high, making an opening of between forty and fifty metres square. The excavation of this space in the perpendicular face of the rock is divided into several different sections. These are penetrated simultaneously by an adequate number of piercing implements, each mounted on a solid iron frame, with screws and levers by which it can be set at the required height, to strike directly forward or obliquely, as may be found expedient. The largest carriage or frame, used in the principal level cutting, is about four metres long, and stands one metre and a half in height, carrying six perforators of the MacKean sort; those used at the north end are of the Ferroux pattern. Each of these movable machines is tended by three men, who are occupied with its transportation, and with the replacing, fixing, and using of the perforators upon it, or the pouring of water into the holes that are bored, to facilitate their work. A tender follows the engine, with a supply of water to be injected for this purpose.

"The number and depth of the holes to be bored, and the amount of work to be done by the perforators, must depend on the nature of the rock, and the position of its strata, being more or less favourable to its removal by blasting. The greatest difficulty is found in first opening the smaller top section of the tunnel's diameter, and picking out the solid rock in that part, while all the substance of the adjacent sections is still intact. In the granite rock at Goschenen, to lay open a space of six or seven metres square, it was needful that from twenty-two to twenty-six holes should be bored in its face; whereas twelve holes were sufficient for the schistose gneiss found in other portions. The granite, which extends here from the Finster-arhorn, has a lateral thickness of 2000 metres, intersecting the axis of the St. Gothard tunnel. The depth of the holes bored varies from 80 centimetres, in the schists, crystalline, micaceous, or talcose, to 1 metre 20 centimetres, its maximum depth in the granitic rocks. The dose of dynamite used for blasting is about one kilogramme in each of these holes. The whole daily consumption of that explosive compound, at both ends of the tunnel, is more than 500 kilogrammes. Instantly after firing the charge in these holes the mass of stone and other substance detached by it is carried away in trucks or waggons, drawn by a condensed-air locomotive, to be deposited outside the tunnel. The quantity so brought out is about 400 cubic metres in twenty-four hours. Each wagon conveys at one time an average load of one cubic metre. Besides the number of waggons so employed, fifty others are in constant requisition for transporting fresh supplies of boring chisels and other implements, and bricks for the internal masonry of the tunnel arch.

"The combined, or rather consecutive, processes of boring, blasting, and removing the substance detached from the interior of the mountain are together called making a poste, or stage, in the progress of the work. Each stage is supposed, in general, to advance the work of opening the tunnel from one metre to one metre twenty centimetres in length. In a good easy piece of rock, suitable for boring and blasting, three or four stages can be accomplished in the day, making progress to the extent of from 3m. 50c. to 4m. 50c. At this rate, working equally at both ends of the tunnel, its construction would advance from seven to nine metres daily, if not hindered by unfavourable circumstances. Unfortunately, there are frequent hindrances and inevitable causes of delay. Violent inbursts of water, in jets as large as the thickness of a man's arm, spouting from the rock with enormous force, have overturned the machines, dispersed or nearly drowned the labourers, and flooded the levels. Compact blocks of crystallised granite, two or three yards thick, have resisted the perforators, breaking the tools, dislocating the machinery, and have scarcely yielded to the force of dynamite. In another place, there is a loose, soft, clayey stratum, which hardly bears the stroke of the boring apparatus, and needs timber props to keep it from falling in and burying all at once. The hard rock, the crumbling earth, and the irruption of water, have successively threatened to stop this great work; but its safe accomplishment is only a question of time.

"The St. Gothard tunnel was begun at Airola, its south entrance, in September, 1872, and at Goschenen, the north end, in November of the same year. It had been excavated, to the length of more than eight kilometres, adding together the lengths done at both ends, in April, 1876, when a length of 6858 metres still remained to be excavated. There was a considerable difference, however, in the conditions of this task at the north and at the south end. The excavation from Goschenen was scarcely ever interrupted, as the rock was solid, not requiring any props, and with no serious discharge of water; but there were very great difficulties in the excavation from Airola. The discharge or infiltration of water increased

from the amount of 42 litres in a second, at which it was estimated in May, 1873, in the talcose and granular micaceous of that locality, to about 200 litres a second (forty-four gallons) in December of that year. The face of the rock directly attacked by the perforators alone yielded 40 litres of water in every second of time. In January, 1874, the whole amount continually pouring forth was at the rate of from 230 to 250 litres per second; and this frightful state of things continued throughout the year. By degrees, however, the rock seemed to become drier; but the works were still flooded, and many laborious hours and days were lost in attempting to cope with the influx of waters, to clear away the stuff they washed down, and to support the roof and sides of the tunnel. The timber scaffolding erected for this last-named purpose may yet be seen, in passing through the miles of tunnel already opened by the workmen. But the St. Gothard as well as the Mont Cenis tunnel will before very long, we may hope, be made a convenient passage for the railway trains, conveying passengers and merchandise from the busy and wealthy countries of Europe to the north of Italy, and thence onward to the Levant, the Suez Canal, and the Indian Ocean."

THE ROAD TO VLADYKAVKAZ.

We are indebted to Commander J. Buchan Telfer, R.N., author of an interesting narrative of his travels in "The Crimea and Trans-Caucasia," which has been noticed, for the view of a roadside scene in the Caucasus, presented among our illustrations. The Russian town of Vladykavkaz, nearly a hundred and fifty miles north of Tiflis, stands midway between the Black Sea and the Caspian, from each of which it is distant above two hundred miles. Its name is compounded of the Russian word "vladyet," meaning "to hold," and "Kavkazom," which is the Russian name of the Caucasus; as this place was formerly esteemed an important frontier stronghold against the wild tribes of that mountain range. It was founded by Prince Potemkin, in 1785, on the site of an Ossety village. The population of the town is about 15,000, and it has fair broad streets, planted with trees, a Governor's mansion, several white churches with green roofs and domes, a bazaar, a fireman's watch-tower, an hospital, and a public garden, but not one decent inn. Its position is between the Ossety and the Kabardah native districts, to the south and to the north respectively, with the Swanny to the west, and the Tschentchen tribes and Daghesten to the east, so that it is a central point for dealing with those Caucasian populations. A railway from Rostoff has lately been completed to Vladykavkaz, placing it in connection with Kharkoff, Orel, Toula, and Moscow. The nearest ports of the Caspian, with Astrakhan on its northern shores, and Bakou, for Georgia, in communication with them by steamer, are not difficult of access. The scenery of the Terek Valley, in this neighbourhood, is of a romantic character, as it appears in our illustration.

MUSICAL PUBLICATIONS.

Concerto for Harp and Flute (with orchestral accompaniments) by Mozart. Lamborn Cook. This is the work of whose fine performance, at a recent concert of the Philharmonic Society, we have already spoken—the soloists on that occasion having been Mr. John Thomas and Mr. Oluf Svendsen. The concerto had remained in manuscript, and almost unknown, for many years, and its publication will be welcome to many. The orchestral features of the score have been skilfully arranged for the pianoforte by Mr. J. Thomas, who has supplied effective cadenzas.

Letters from Bayreuth, by Joseph Bennett. Novello, Ewer, and Co. We have here, in a collected shape, the articles written by the special correspondent of the *Daily Telegraph* on last year's production of Richard Wagner's series of operas founded on "Der Ring des Nibelungen." The Letters are far above the average of newspaper notices, being, in fact, thoughtful and exhaustive essays, descriptive and critical, on Wagner's innovative principles and theories, and the vexed question of whether or not he has realised them in his latest works. The question is discussed powerfully but temperately, and although some of the conclusions and inferences may not be acceptable to the uncompromising partisans of the composer, they will probably find wide acceptance in other directions. An appendix contains some four brightly-written articles, with picturesque descriptions of "The City of the Masters," "The Birthplace of Mozart," "Three Famous Graves," and "A Supper with Wagner."

The subscription ball in aid of the funds of the Hospital for Diseases of the Throat, Golden-square, which took place at Willis's Rooms, under very distinguished patronage, on Monday night, was a great success.—The British Hospital Ball took place at Willis's Rooms on Tuesday, under the special patronage of Princess Christian, upwards of 620 guests being present.

An action in the Common Pleas is remarkable for its result—a verdict for the plaintiff and for the defendant. Farmer Older's pony-gig came into collision with Mr. Gay's cart near Hammersmith in October; the pony was killed, the horse permanently lamed, and both vehicles were damaged. Each party claimed damages from the other, and the jury found for each as against the other. The Judge refused to give costs on either side.

An intimation has been forwarded to the authorities of the Westminster Hospital, Broad Sanctuary, from the Queen expressing the approval of her Majesty of the extensive scheme of reparation and improvement now in progress, and also of her kind intention to subscribe to the fund. The response made by the principal City companies and the public generally to the appeal that recently appeared from the president (the Duke of Westminster) has already relieved the house-committees to the extent of nearly £3000 of the cost of the works, which will amount to about £12,000.

It is notified in the *Gazette* that the Albert Medal of the second class has been conferred on Sub-Lieutenant Robert James Montgomerie, of H.M.S. *Immortalité*, for his gallant endeavours to save the life of a seaman who fell overboard on April 5 last. The brave deed occurred when the sea was rough, and in a latitude abounding with sharks, and had not Mr. Montgomerie been a powerful swimmer he might have lost his own life.—Here is another instance of bravery, with added fertility of resource, which is our pleasant duty to record. An award of £3, out of a special fund at Bow-street police station, has been given to Police-constable Holdbrook, 319 X, on the recommendation of Mr. H. Eccles, superintendent of police, Paddington, for his bravery in saving the life of a young woman who had thrown herself into the canal. Although unable to swim, he borrowed the reins of a cab horse standing near, and allowed himself to be lowered into the water, 7 ft. in depth, and was thus towed along by another constable till he reached the sinking body of the woman, and was able to rescue her, although very nearly drowned himself. The officer was recommended as a fitting person to receive one of the medals of the Humane Society. Nor is he quite unfit to receive the Albert Medal.

NOTICE.—CLEOPATRA TOILET SERVICES.—Messrs. OETZMANN and CO. have now COMPLETED ARRANGEMENTS at the Works, affording GREATLY INCREASED FACILITIES for PRODUCING this SPECIALITY, and hope to keep pace with the demand which they have hitherto been unable to do. Customers can now be supplied with any of the colours direct from stock.—OETZMANN and CO., Complete House Furnishers, 67 to 79, Hampstead-road. Descriptive Price-List post free.

FURNISH THROUGHOUT.

OETZMANN & CO.,

67, 69, 71, 73, 77 & 79,

HAMPSTEAD-ROAD,

NEAR TOTTENHAM-COURT-ROAD.

FURNISH THROUGHOUT.—OETZMANN and CO., 67, 69, 71, 73, 77 and 79, Hampstead-road, near Tottenham-court-road. Cabinet Factory, Albion Works, Christie-street; Bedding Factory, Eagle-place, London, N.W. Carpets, Furniture, Bedding, Drapery, Furnishings, Ironmongery, China, Glass, Pictures, Bronzes, Clocks, &c., and every other requisite for completely furnishing a house throughout. OETZMANN and CO. are enabled to offer special advantages to Country Customers in delivery of Goods by their own large PATENTED VANS, and fixing in position by competent persons. Descriptive Catalogue, the best Furnishing Guide extant, post-free.

THE SANDRINGHAM EASY-CHAIR, full size, upholstered very soft and comfortable, suitable for any room, price 25s.; Lady's ditto, smaller size, 21s.; also the Sandringham Couch, upholstered very soft and comfortable, price 25s. Every one about to furnish should see these marvels of excellence and economy. Packed free and dispatched same day on receipt of order per post.

DRAWING-ROOM SUITES.—OETZMANN and CO., Elegant Drawing-Room Suite, richly carved Italian Walnut Wood, upholstered very soft and comfortable, in best Rep., consisting of a Couch, two Easy-Chairs, and six Chairs, price 150s.; ditto, very handsome design, upholstered in rich, elegant, made and finished in superior style, 200s.; ditto, very elegant design, richly upholstered in finest Rep., and finished in the best possible manner, 350s.; also a variety of other Drawing-Room Suits, in black and gold, Early English, and other designs.—OETZMANN and CO.

LINOLEUM.—OETZMANN and CO. LINOLEUM.—Warm, soft, carpet-like in appearance, and very durable. All the new PRIZE DESIGNS are now in stock. A visit of inspection solicited. Prices 1s. 6d. to 12s. 6d. usually charged for this favourite floor-covering.—OETZMANN and CO.

TURKEY CARPETS.—CLEARANCE SALE.—OETZMANN and CO.—A quantity of Turkey, Indian, Persian, Jubbulpore, Messia, Agram, Farahan, Khorasan, Serabend, Kousa, Ghilzies, and Kelim Carpets and Rugs, at prices ranging from 10s. 6d. to 80s. A detailed Price-List, with sizes and descriptions, sent post-free, on application. A quantity of Indian Rugs, 12s. 6d. each, some very handsome ditto, at 25s. to 40s.—OETZMANN and CO.

EVERYONE SHOULD SEE the large, handsome AXMINSTER HEARTH RUGS that OETZMANN and CO. are now selling at 1s. 11d. each; usual price 15s. 6d. An immense variety of Designs and Colours to suit every pattern and design in Carpets. A visit of inspection solicited.

MADRID STRIPED CURTAINS, all Wool, 3 yards long by 48 inches wide, 10s. per pair; 54 inches, 12s. 6d.; 4 yards, 20s.; best Worsted Damask Curtains, in green, crimson, or any self colour, plaited top, bordered all round with best embroidered silk lace, 3 yards long by 48 inches wide, 25s. per pair; 54 inches, 30s.; 4 yards, 35s.; best Rep. ditto, 3 yards by 54 inches wide, 42s.; 4 yards, 50s.; 4 yards, 55s. 6d. Forwarded same day on receipt of order. One trial will ensure recommendation. No common damasks or rep. used, sold, or advised. Descriptive Lists post-free.—OETZMANN and CO.

ELECTRO-PLATE. CUTLERY.
ELECTRO-PLATE. CUTLERY.
ELECTRO-PLATE. CUTLERY.

FURNISHING IRONMONGERY DEPARTMENT.—Strong Bronzed Fenders from 1s. 6d. each; superior ditto, 2s. 6d.; handsome Drawing-room Fenders, steel top, 4s. 6d.; ditto, with polished steel mouldings, new design, 12s. 6d.; fire-irons, from 1s. 6d. per set; handsome oval Tea Trays, 2s. 11d. per set of three, 12s. 6d. and 30 inches; handsome ditto, chess pattern, gilt and enamelled, 7s. 6d. per set; elegant ditto, 12s. 6d., reduced from 21s.—OETZMANN and CO.

EXHIBITION PATTERN COAL VASE.—OETZMANN and CO.'s new Special Designs for the Season, much admired, handsomely japanned, and richly burnished gold ornamentation, with oval handles, strong lining, a great convenience and saving in wear. Price complete, 21s.—OETZMANN and CO.

CLEOPATRA TOILET SERVICE.—OETZMANN and CO.'s New Special Design, a beautiful Grecian shape, meets the great desideratum of art-manufacture—viz., the shape best adapted for purposes of use required, combined with the most artistic design and decoration. Prices from 10s. 6d. per set. Descriptive Price-List post-free.

OETZMANN and CO., COMPLETE HOUSE FURNISHERS, 67, 69, 71, 73, 77 and 79, Hampstead-road (three minutes' walk from Tottenham-court-road and Tottenham Station, Metropolitan Railway). Lowest prices consistent with guaranteed quality. Orders for carpets, large or small, receive prompt and faithful attention in the selection. Close at seven, and on Saturdays at Four o'clock. Descriptive Catalogue post-free.—OETZMANN and CO.

GLENFIELD

THE

QUEEN'S

LAUNDRY

SAYS "IT'S STARCH

IS THE BEST

STARCH.

TAYLOR'S WHITE FULLER'S EARTH is the only reliable and thoroughly harmless Skin Powder. Recommended by the most eminent dermatologists, and prepared by an experienced chemist. It is the best dusting powder for the face, and is used in the highest quality of the Princess of Wales, the Duchess of Edinburgh, the Duchess of Teck, and most of the aristocracy. Recommended by the Faculty. Post-free, and 10 or 20 stamps. The eminent Physician Dr. Bouch says: "I feel it much to be highly recommended it." Prepared only by JOHN TAYLOR, Chemist, 13, Baker-street, London, W.

URGENT MOURNING.
"ON RECEIPT OF LETTER or TELEGRAM."
MOURNING GOODS will be forwarded to all parts of England, on approval—no matter the distance—with an excellent fitting wrapper (if required), without extra charge.
PETER ROBINSON, 204, 206, 208, 210, Regent-street, London.

INEXPENSIVE MOURNING, as well as the Richest Qualities, can be supplied by **PETER ROBINSON**, upon the most advantageous terms, to Families. The Court and Family Mourning Warehouse, 204, 206, 208, 210, Regent-street, London.

BLACK SILKS.—HAND-SPUN.
PURE DYE BLACK ITALIAN SILKS.
A NEW FINISH, TO AVOID GREASING.
At 5s. 11d., 6s. 6d., 7s. 10d., 7s. 11d., 10s. 6d.
Patterns free.

PETER ROBINSON, of Regent-street.

BLACK SILKS.
A Large Consignment from a Lyons Manufacturer, the best makes, will be sold considerably under value.
370 pieces at 6s. 6d.; formerly 8s. 6d.
320 pieces at 5s. 11d.; formerly 7s. 11d.
Also the following, which are remarkably good value:
2s. 11d.; formerly 3s. 9d.
3s. 6d.; formerly 4s. 6d.
4s. 6d.; formerly 5s. 6d.
5s. 6d.; formerly 6s. 6d.
6s. 6d.; formerly 7s. 6d.
Patterns free.

AS PETER ROBINSON'S, of REGENT-STREET.

FOR YOUNG LADIES.
PRETTY GRISAILLE SILKS, 2s. 6d., 2s. 9d., 3s. 6d.
PETER ROBINSON'S, of REGENT-STREET.

FOR YOUNG LADIES.
COSTUMES, beautifully Cut and finished, in the new Grisaille Silks, at 4s. 6d. and 4s. 11d.
5 yards for 12s. 6d.
AS PETER ROBINSON'S, of REGENT-STREET.

A BLACK SILK COSTUME, MADE OF RICH LYONS SILK, for 5s.; formerly 6s. 6d.; for 7s.; formerly 8s. 6d.; for 10s.; formerly 12s. 6d.
Perfectly made.
Exquisitely cut and trimmed by French Artists. Photographs and patterns of the silk free.
Address—**PETER ROBINSON, of REGENT-STREET, No. 204 to 210.**

NEW MANTLES AND MILLINERY. Beautiful Novelties are now being shown at **PETER ROBINSON'S, of REGENT-STREET.**

FOR TWO GUINEAS and up to FIVE GUINEAS. FASHIONABLE COSTUMES IN BLACK MATERIALS; also Polonaises and Princess Dr. dresses.
AS PETER ROBINSON'S, COURT AND GENERAL MOURNING WAREHOUSE.

EVENING DRESSES. BALL DRESSES. BLACK NET, New Styles, Elegantly made, 20s. 6d. TABLATEL, Novelties, in White, Black, &c., 1 guinea. TULLE, Condition-keeping Tulle, 60s. 6d. Sketches free. Full material given for Bodice.
PETER ROBINSON, of REGENT-STREET, Nos. 204 to 210.

PURCHASE OF THE ENTIRE STOCK of the Celebrated **MAISON GAGELIN, 84, RUE DE RICHELIEU** (for many years known as the leading house for Paris Fashioners).
MESSRS. SWAN and EDGAR beg to announce that, in consequence of the decease of M. (de) J. B. Swan, they have purchased the entire stock of the above well-known firm at an enormous discount, amounting to 75 per cent. equal to a reduction of 10s. 6d. per £1 from the original price. The stock is now on sale, and comprises an extensive variety of all the latest fashions, including the celebrated **WHITE AND GOLD COURT TRAIN**, made for the Exhibition at a cost of 25,000s.
The Stock will be marked at prices lower than any hitherto known for Goods of such excellence.
Detailed Circular and Particulars of Materials post-free on application.
9, 10, 11, Piccadilly; and 39 to 51, Regent-street, W.

A CONSIGNMENT OF MANY THOUSANDS OF POUNDS WORTH OF BLACK SILKS. LADIES who may require Per-an or Taffeta BLACK SILKS are respectfully solicited to inspect a Consignment of many thousands of pounds' worth just purchased in Lyons by Messrs. Swan and Edgar, and which they can confidently offer at a price cheaper than they have ever known during an experience of nearly fifty years. It is the produce of two of the best makers of Black Silks, Messrs. Bonnet et Cie, and Messrs. Jaubert, of Lyons.
The Silks are warranted to wear well, and will not "turn grey." The lowest price per yard is 3s. 6d. worth 4s. 6d.; the highest 6s. 9d., worth 8s. 6d. Messrs. Swan and Edgar express their sincere conviction that their customers will be pleased with their remarkable value in choice of a silk at a fixed price, they will honour them with their confidence and trust to their selection. On application, patterns will be sent gratis.

DR. DE JONGH'S (KNIGHT OF THE LEGION OF HONOUR, KNIGHT OF THE ORDER OF LEOPOLD OF BELGIUM) LIGHT-BROWN COD-LIVER OIL. Proved by twenty-five years' medical experience to be THE PUREST. THE MOST PALATABLE. THE MOST EASILY DIGESTED. THE MOST RAPIDLY EFFICACIOUS.

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL. THE ONLY KIND which produces the full curative effects in CONSUMPTION AND DISEASES OF THE CHEST, THROAT AFFECTIONS, GENERAL DEBILITY, AND WASTING DISEASES OF CHILDREN.

SELECT MEDICAL OPINIONS.
DR. SINCLAIR COGHILL, Physician Royal National Hospital for Consumption, Ventnor.
"I have convinced myself that in Tubercular and the various forms of Strumous Disease, DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL possesses greater therapeutic efficacy than any other Cod-Liver Oil with which I am acquainted. DR. DE JONGH'S OIL is now the only Cod-Liver Oil used in the Royal National Hospital for Consumption and Diseases of the Chest."

LENNOX BROWNE, Esq., F.R.C.S.E., Senior Surgeon Central London and Earl's Hospital.
"The action of Dr. de Jongh's Light-Brown Cod-Liver Oil has proved, in my own experience, particularly valuable, not only in those diseases for which it was originally employed, but also in many cases of weakness of the ringing and speaking voice, dependent on Bronchial or Laryngeal Irritation, and in all forms of Strumous Enlargement of Glands, and Discharge from the Ear."

DR. GILL, Consulting Physician Royal Asylum of St. Anne's Society.
"Professor Trousseau remarks: 'Cod-Liver Oil constitutes at the same time a food and an agent of stimulation perfectly suited to the organism when it is more or less deteriorated. Before I noticed these observations by so eminent an authority as Trousseau, I had been led to a similar belief by a considerable number of cases in which I had had an opportunity of watching the good effects of DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL.'"

DR. SAUNDERS, C.B., late Deputy Inspector-General Army Hospitals, Superintendent London Medical Mission.
"I have used Dr. de Jongh's Light-Brown Cod-Liver Oil extensively among the sick poor of St. Giles's, and consider it a valuable remedy, especially in the wasting diseases of children."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in capsules, in elegant Half-Pints, 7s. 6d.; 4s. 6d.; Quarts, 2s.; by all respectable Chemists and Druggists throughout the world.
Sole Concessors,
ANBAR, HARFORD, and CO., 77, STRAND, LONDON.

MRS. S. A. ALLEN'S WORLD'S HAIR RESTORER.

IT CANNOT FAIL TO RESTORE GREY HAIR TO ITS YOUTHFUL COLOUR, GLOSS, AND BEAUTY. WHEN THE HAIR TURNS GREY, LOSSES ITS LUSTRE, AND FALLS OUT, IT SIMPLY REQUIRES NOURISHMENT. MRS. S. A. ALLEN'S WORLD'S HAIR RESTORER, BY ITS GENTLE TONIC ACTION, STRENGTHENS AND INVIGORATES THE HAIR, AND BY THE OPERATION OF NATURAL CAUSES GREY OR WHITE HAIR IS QUICKLY RESTORED TO ITS YOUTHFUL COLOUR, GLOSS AND BEAUTY. IT WILL STOP ITS FALLING, AND INDUCE A HEALTHY AND MOST LUXURIOUS GROWTH. USE NO OTHER PREPARATION WITH IT. NOT EVEN OIL OR POMADE, OR ZYLO-BALSAMUM.

CAUTION!!—The Genuine only in Pink Wrappers.

Sold by all Chemists, Perfumers, and Dealers in Toilet Articles.

GOLDEN STAR BAY-LEAF WATER.

Triple distilled from the fresh leaves of the Bay Tree (Myrica Ascri). For the Toilet, Nursery, and Bath.

A few drops on a sponge or towel moistened with water, and the face and hands bathed with it, is very beneficial to the skin, removing all roughness. Most highly recommended to apply after shaving. A small quantity in the bath gives a delightful aroma, and it has most remarkable cleansing properties. Particularly adapted to the bathing of infants and young children. Most grateful to invalids and all who suffer from headache, from mental labour or fatigue. Buy only the genuine Golden Star Bay-Leaf Water sold in three sizes Toilet Bottles, 2s. 6d., 4s., 6s., by Chemists and Perfumers, or on receipt of stamps from the Wholesale Depot, 14 and 116, Southampton-row, London.

FLORILINE.—For the Teeth and Breath. Is the best Liquid Dentifrice in the world; it thoroughly cleanses partially-decayed teeth from all parasites or living "animalcules," leaving them pearly white, imparting a delightful fragrance to the breath. Price 2s. 6d. per Bottle. The Fragrant Floriline removes instantly all odours arising from a foul stomach or tobacco smoke, being partly composed of honey, sugar, and extracts of sweet herbs and plants. It is perfectly harmless and delicious and airy. Prepared by HENRY C. GALLUP, 483, Oxford-street, London. Retailers everywhere.

VALUABLE DISCOVERY for the HAIR. If your hair is turning grey, or white, or falling off, use "The Mexican Hair Restorer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots where the glands are not decayed. Ask any Chemist for "The Mexican Hair Restorer," price 2s. Prepared by HENRY C. GALLUP, 483, Oxford-street, London.

LONG, Short, and Weak Sight treated by the action of use of TINTED SPECTACLE LENSES, which impart an immediate sense of coolness and relief, as essential to defective vision. Persons who are suffering in the country, S. and B. SOLOMON, 9, Albemarle-street, Piccadilly.

ROWLAND'S KALYDOR cools and refreshes the face, hands, and arms of ladies, and all exposed to the hot sun and dust. It eradicates Itch, Eruptions, eruptions, &c., and allays the pain and irritation caused by

MOSQUITOE BITES and Knot Stings. It produces a beautiful, delicate, and clear complexion. Price 6s. 6d. and 8s. 6d. per bottle. Sold by chemists and perfumers. Great care must be taken to avert Rowland's Kalydor.

WRIGHT'S COAL-TAR SOAP ("SAPO CARBONI DETERGENTI"). Antiseptic, Disinfectant, Disinfectant. The most beautiful, agreeable and refreshing TOILET SOAP in the world. By its daily use, freedom from infectious diseases is secured; the complexion improved, pimples, blotches, and roughness removed; and the skin made clear, smooth, and lustrous.
"In our hands it has proved most effective in skin diseases."—The Lancet.
"It is the only true antiseptic soap."—British Medical Journal. In Tablets, 6s. and 1s. each, of all chemists.
W. V. WRIGHT and CO., South-walk-street, London.

LAMPLOUGH'S PYRETO SALINE. Have it in your houses and use no other. This alone is the true Antidote in Fevers, Eruptive Affections, Sea or Bilious sickness, having peculiar and exclusive merits. For the protection of the public against fraudulent imitations I have applied for and again obtained a perpetual injunction, with costs, against the defendant. Observe the genuine has my Name and Trade Mark on a Half Coloured Wrapper.—112, Holborn-hill, London.

HOLLOWAY'S PILLS and OINTMENT. The Pills purify the blood, correct all disorders of the Liver, stomach, kidneys, and bowels. The Ointment is unrivalled in the cure of bad legs, old wounds, gout, and Rheumatism.

23, IRONMONGER-LANE, LONDON (THE OLD HOUSE).

J. and G. JOHNSTON, as Merchants, were the first House in England to advertise CORN FLOUR for the English and Export Markets. They are not now responsible for the quality of any Corn Flour but that which bears their own name.

FOR PUDDINGS, CUSTARDS, BLANC-MANGE, CAKES; TO THICKEN SOUPS, SAUCES, BEEF TEA;
FOR ALL THE USES OF THE BEST ARROWROOT, AND WITH MILK FOR CHILDREN'S FOOD,

JOHNSTON'S

DELICIOUS WITH STEWED FRUIT.

CORN FLOUR

IS THE BEST.

DELICIOUS WITH STEWED FRUIT.

IT IS NOT RICE FLOUR; IT IS PREPARED AT GREAT EXPENSE SOLELY FROM MAIZE INDIAN-CORN.

"Quite free from adulteration."—*The Lancet*. "Decidedly superior."—*The Lancet*.

It is rich in heat-giving and flesh-forming properties; milk contains the constituents of bone and muscle, and the two in combination afford the most perfect and complete nourishment, closely resembling in nutritive value ordinary beef and bread, and in a form the most palatable and digestible, and therefore especially suitable for Children, and Mothers whilst nursing.

The emphatic and voluntarily declared opinion of *The Lancet* (Nov. 13, 1875), is that JOHNSTON'S CORN FLOUR is "quite free from adulteration" and "decidedly superior." The same article on JOHNSTON'S CORN FLOUR states that CORN FLOUR "itself has become a necessity."

The following are EXTRACTS from the EVIDENCE taken by the COMMITTEE of the HOUSE of COMMONS on the ADULTERATION OF FOOD ACT, returned to the House on July 3, 1874:—

CHARLES A. CAMERON, M.D., Professor of Political Medicine in the Royal College of Surgeons, Ireland; Analyst for Dublin, Limerick, Waterford, Kilkenny, Galway, and Sixteen Irish Counties. Examined.

Answer to Question 4652:—"I know that all starches, such as arrowroot, sago, and tapioca, are generally prescribed by physicians, and very largely for children. I think I could produce to-morrow, by telegraphing to Dublin, a fat little girl of four years old, who has been nearly altogether brought up on Corn Flour."

Answer to Question 4655:—"I am speaking now as a physician; and I think that a great number of children who could easily digest a delicately prepared Corn Flour could not eat a lump of wheaten flour made into dough, or cooked in any form, or even rice flour."

Answer to Question 4656:—"All my children—and I have six of them—have used a large quantity of Corn Flour."

Question 4820:—"Would you state that it (Corn Flour) was a flesh-forming nutriment in a very minimum degree?" Answer: "No; I consider that it would form a very large portion of flesh."

AUGUSTUS VOELCKER, Ph.D., F.R.S., Chemist of the Royal Agricultural Society. Examined.

Question 5664:—"We have had evidence that some kinds of arrowroot will command a wholesale price of two shillings per pound; in your opinion, is there more nutriment in a pound of some of those Corn Flours which you can get at about one fourth the price?" Answer: "No. The two shillings is quite a fancy price for a fancy article, but . . . Corn Flour is just as nutritious as the more expensive arrowroots."

Question 5826:—"With regard to Corn Flour, you believe that the Corn Flour, if mixed with milk, may be beneficial to children?" Answer: "I know that it is."

Question 5554:—"We will take the case of Corn Flour; there is an abstraction there which has been represented to this Committee as being very prejudicial. Is that your opinion?" Answer: "No; decidedly not. Corn Flour is used as an article of food for Infants and for grown-up people too, in the shape of blanc-mange and puddings, and such like things."

Question 5555:—"Generally in conjunction with milk, is it not?" Answer: "Yes; in conjunction with milk. Nobody in his senses would think of Corn Flour or any of those preparations by themselves."

ARTHUR HILL HASSALL, M.D., M.R.C.P.L. Examined.

Answer to Question 6210:—"Arrowroots, including the Corn Flours . . . are very valuable articles of diet, especially taken in the way in which they are very ordinarily consumed."

The following is the Report of the Committee:—"The attention of your Committee has been called to the article known as Corn Flour, in reference to which important evidence as to its purity and its useful dietetic qualities has been given by some eminent medical and chemical authorities, which, however, is denied by one witness. Your Committee are fully convinced that the manufacture is quite legitimate, and that, like Arrowroot, Sago, and other starch foods, Corn Flour is perfectly wholesome, but that it should not in any case be given to infants without a considerable admixture of milk."

"I have examined JOHNSTON'S CORN FLOUR, and find it perfectly pure and most excellent in quality. When boiled with milk it affords complete nourishment for Children and persons of weak digestion."

CHAS. A. CAMERON, M.D., F.R.C.S.I.,
Professor of Chemistry, Royal College
of Surgeons, Dublin.

JOHNSTON'S CORN FLOUR, being perfectly pure, is not liable to ferment, and keeps sweet in any climate for years.

To be obtained in all Parts of the World by Order through Grocers, &c. For Export it is Packed Specially with Great Care.

ALSO

JOHNSTON'S OATMEAL CAKES, OR FARLS.

They are rich in Gluten, or that which goes to the formation of bone and muscle, and greatly appreciated by those who require a plain nutritious food. Sold only in Tins, ONE SHILLING EACH.

ALSO

JOHNSTON'S SCOTCH OATMEAL,

Superior quality, warranted free from adulteration. Packets, $\frac{1}{4}$ lb. and 1 lb., with plain directions for making Porridge, Brose, and Gruel; also in 14 lb. bags. To be obtained by order from all Grocers, &c.

THE PRINCESS OF WALES PRESENTING THE PRIZES TO THE BOYS ON BOARD THE TRAINING-SHIP WARSPITE, AT WOOLWICH.

100

THE COURT.

The Queen, accompanied by Princess Beatrice, arrived at Windsor Castle at nine o'clock a.m. yesterday week from Balmoral Castle. The Earl of Beaconsfield had an audience of her Majesty. Prince and Princess Christian visited the Queen. Prince Leopold arrived at the castle, and left the next day for London.

Her Majesty, Princess Beatrice, and the Prince of Leiningen attended Divine service on Sunday in the private chapel of the castle. The Prince dined with her Majesty.

The Emperor and Empress of Brazil visited the Queen on Monday. Prince Leopold accompanied their Majesties from London. Colonel L. Gardiner, Equerry in Waiting, met the Emperor and Empress at the railway station in Windsor, and attended them to the castle. The Queen, accompanied by Prince and Princess Christian (who came to the castle to meet the Emperor and Empress), and Princess Beatrice, attended by the ladies and gentlemen in waiting, received their Majesties at the entrance to the castle. The band of the Grenadier Guards, conducted by Mr. Dan Godfrey, played in the quadrangle during luncheon. After luncheon the Emperor and Empress took leave of the Queen, and before their return to London visited St. George's Chapel and the Albert Memorial Chapel, and drove in the Great Park. Prince Leopold accompanied their Imperial Majesties to the railway station. The Earl and Countess of Antrim and Major-General H. and the Hon. Mrs. Ponsonby dined with her Majesty.

The Prince and Princess of Wales visited the Queen on Tuesday, and remained to luncheon. The Duchess of Wellington, the Earl and Countess of Derby, his Excellency the American Minister and Mrs. Pierpont, General and Mrs. Grant, Mr. Jesse Grant, and the United States Consul-General (General Badeau), arrived at the castle in the afternoon. Her Majesty's dinner party included Prince and Princess Christian, Princess Beatrice, Prince Leopold, the Duchess of Wellington, the Duchess of Roxburghe, the Secretary of State for Foreign Affairs and the Countess of Derby, his Excellency the American Minister and Mrs. Pierpont, General and Mrs. Grant, Mr. Jesse Grant, Lord Elphinstone, and Lieutenant-General Sir T. M. Biddulph. The band of the Grenadier Guards, conducted by Mr. Dan Godfrey, played in the quadrangle during dinner, and her Majesty's private band played in the drawing-room after dinner. General Badeau was presented to the Queen in the evening.

Prince Leopold left the castle on Wednesday for London. Princess Christian and the Grand Duke of Mecklenburg-Strelitz visited the Queen, and remained to luncheon.

Her Majesty, with Princess Beatrice, has taken daily out-of-door exercise.

Her Majesty has presented £50 to Mr. Compton, the comedian, who is hopelessly ill.

The Duchess of Roxburghe has succeeded the Countess of Erroll as Lady in Waiting; the Hon. Emily Cathcart has arrived as Maid of Honour in Waiting; and the Hon. Evelyn Paget has succeeded the Hon. Mary Pitt as Maid of Honour in Waiting. Lord Elphinstone and Colonel the Hon. Charles Lindsay are the Lord and Groom in Waiting; Colonel L. Gardiner has succeeded Colonel the Hon. H. Byng as Equerry in Waiting; and Colonel Du Plat has arrived as Equerry in Waiting.

STATE BALL.

By command of the Queen, a state ball was given yesterday week at Buckingham Palace. The Emperor and Empress of Brazil were present. The Prince and Princess of Wales arrived at the palace from Marlborough House, attended by their suite and escorted by a detachment of the 2nd Life Guards. Princess Louise and the Marquis of Lorne, the Grand Duke of Mecklenburg-Strelitz, the Duke of Cambridge, the Duchess of Teck, and Prince Christian were present; and Prince Edward of Saxe-Weimar and the Countess of Dornberg and the Count and Countess Gleichen were invited to the ball. Dancing commenced upon the entry of the Prince and Princess of Wales with the Imperial and Royal personages into the saloon at a quarter before eleven o'clock. The Princess of Wales wore a dress of silver brocade, trimmed in silver embroidery, over a jupe of white poulx de soie, covered in clouds of silver tulle, bordered with deep volant of the same costly embroidery, and studded with bouquets of fleur de trèfle and Marguerites de Champs. Head-dress—a tiara of diamonds; ornaments—pearls and diamonds; orders—Victoria and Albert, Catherine of Russia, and the Danish family orders. Nearly 2000 invitations were issued. Coote and Tinney's band was in attendance, conducted by Mr. Coote.

STATE CONCERT.

By command of the Queen, a state concert was given on Wednesday evening at Buckingham Palace. The Emperor and Empress of Brazil were present. The Prince and Princess of Wales arrived at the palace from Marlborough House, escorted by a detachment of the Royal Horse Guards. Prince and Princess Christian, Princess Louise and the Marquis of Lorne, Prince Leopold, the Duke of Cambridge, and the Duke and Duchess of Teck were present. Prince Leiningen, Prince Edward of Saxe-Weimar and the Countess of Dornberg, the Maharajah Dhulep Sing and the Maharane, and Count and Countess Gleichen were invited to the concert. The Prince and Princess of Wales, accompanied by the Imperial and Royal personages, entered the saloon at a quarter before eleven o'clock, when the concert commenced. The Princess of Wales wore a dress of black brocade, ornamented with Brussels lace and bouquets of pomegranates; head-dress, a tiara of diamonds; ornaments, pearls and diamonds; orders, Victoria and Albert, Catherine of Russia, and the Danish family order. The artistes were Mesdames Christine Nilsson and Scalchi, Mlle. Albani, Miss Robertson, Signori Tamberlik, Fancelli, and Rota, Herr Henckel, Herr L. Strauss, and Mr. John Thomas. Conductor, Mr. W. G. Cousins. The band and chorus, consisting of 160 performers, were selected from the Italian Operas, the Philharmonic and Sacred Harmonic Societies, together with her Majesty's private band. Nearly 2000 persons were invited.

THE PRINCE AND PRINCESS OF WALES.

The Prince, accompanied by the Duke of Cambridge and Prince Christian, was present at the funeral of the late Admiral Rous at Kensal-green Cemetery on Saturday last. The Princess was present at Mr. Charles Hallé's pianoforte recital at St. James's Hall. The Prince presided at the annual dinner of the Brethren and Corporation of the Trinity House, Tower-hill. On Monday the Prince, President of the Royal Commission, presided over a meeting of the Finance Committee of her Majesty's Commissioners at Marlborough House. The Princess, with her three daughters, visited the Duchess of Cambridge at St. James's Palace. In the evening the Prince and Princess were present at a ball given by the Earl and Countess of Dudley, at their residence in Park-lane. Their Royal Highnesses visited the Queen on Tuesday. The Princess was afterwards present at a concert at Dudley House, Park-lane. The Prince presided at a meeting of the council of his Royal Highness held at the office of the Duchy of Cornwall, Buckingham-gate. Sir Dighton M. Probyn, took the oath on his appointment as a member of the council. The Prince presided at a dinner of the officers of

the Norfolk (Prince of Wales) Artillery Militia at the Ship, Greenwich. Their Royal Highnesses were present at a ball given by the Duchess of Westminster at Grosvenor House. Prince Leopold visited the Prince and Princess on Wednesday, and remained to luncheon. The Princess visited the bazaar in aid of the funds of the All Saints' Convalescent Hospital, held at the Royal Horticultural Gardens. The Prince was present at a garden party given by the Duke and Duchess of Argyll at Argyll Lodge, Campden-hill. Their Royal Highnesses visited the Duchess of Cambridge at St. James's Palace.

THE EMPEROR AND EMPRESS OF BRAZIL.

The Emperor of Brazil visited St. Paul's Cathedral and the British Museum on Thursday week, and also a private studio in Charlotte-street, Portland-place; and after luncheon accompanied the Empress on a visit to Lady Holland, at Holland House, Kensington. On the previous evening his Majesty attended the conversazione given by the President of the Royal College of Physicians at the college, Pall-mall East.

Yesterday week the Emperor passed two hours at the South Kensington Museum, after which he breakfasted incognito at the Criterion, Regent-circus. His Majesty subsequently visited the Royal Academy, Dr. Schliemann in Keppel-street, the Grosvenor Gallery in Bond-street, and Mr. Boehm's studio in Fulham-road. Their Majesties were present at the state ball at Buckingham Palace.

On Saturday last the Emperor again visited the South Kensington Museum, also the Indian Museum, returning to Claridge's Hotel at ten o'clock to breakfast with the Empress; after which he paid a visit to Mr. W. Crooke's house in Mornington-road, and then to Young and Co.'s foundry in Eccleston-street, Pimlico, to inspect the equestrian statue of the Prince of Wales, by Mr. J. E. Boehm, now being cast in bronze at that establishment for Bombay. His Majesty afterwards inspected Miss Thompson's pictures in New Bond-street, the Byron Memorial Exhibition at the Albert Hall, the Earl of Dudley's picture-gallery at Dudley House, the Duke of Westminster's collection of paintings at Grosvenor House, and the Soane Museum in Lincoln's-inn-fields.

On Sunday the Emperor visited the Tower of London, and afterwards, accompanied by the Empress, attended mass at the French chapel in Little George-street, Portman-square, returning to Claridge's to breakfast. Their Majesties left town for Brighton by the 10.45 ordinary train in order to visit the Aquarium, returning by special train in the evening.

On Monday the Emperor passed three hours at the Bethnal-green Museum, after which he breakfasted incognito at Crosby Hall, Bishopsgate-street, in which historic place he was much interested. The Emperor and Empress went to Windsor Castle and lunched with the Queen, returning to Claridge's to dinner, and in the evening went to Her Majesty's Theatre, and subsequently to the Royal Caledonian fancy-dress ball.

On Tuesday the Emperor left Claridge's at six o'clock for New Gardens, to visit Sir Joseph Hooker, remaining until eight o'clock, when he returned to Paddington and travelled thence to Slough, returning to Claridge's at two o'clock to luncheon, after which he paid a long visit to Lady Holland, at Holland House. The Empress visited the South Kensington and the Indian Museums, the King-street bazaar, and Madame Tussaud's exhibition. The Emperor received a deputation from the Anthropological Institute, who presented him with the diploma of honorary membership, in the presence of the Brazilian Minister and Baroness de Penedo and the members of the Legation. His Majesty having accepted the honorary fellowship of the Royal Historical Society, the council waited upon him by request at Claridge's and presented the society's diploma. In compliance with the wish of the council, the Empress allowed her name to be enrolled as a member. In the evening the Emperor attended the meeting of the Anthropological Institute in St. Martin's-place, and afterwards went to Dr. Siemens's residence at Bayswater.

On Wednesday morning his Majesty drove to the site of old Tyburn Gate; afterwards to the Holborn Viaduct, where he alighted and inspected the statues; thence he drove to Smithfield new Meat and Poultry Market; then visited the Temple and Temple Bar. His Majesty, after paying several private visits to studios, went to the Doré Gallery, in Bond-street; the Danish Gallery; and the Dudley Gallery, at the Egyptian Hall, Piccadilly. The Emperor and Empress left town by a special train at 2.20 for Sevenoaks to attend a garden party given by Mr. Spottiswoode, F.R.S., returning to Claridge's to dinner; after which the Emperor went to the Vaudeville Theatre, and subsequently accompanied the Empress to the state concert at Buckingham Palace.

A large number of Royal and distinguished personages have been received by their Majesties at Claridge's Hotel.

GENERAL AND MRS. GRANT.

General and Mrs. Grant and Mr. Jesse R. Grant arrived last week at General Badeau's residence in Beaufort-gardens for the remainder of their stay in England. The General and Mrs. Grant were entertained at a banquet given by his Excellency the United States Minister and Mrs. Pierpont, at their residence in Cavendish-square, on Thursday week. Mrs. Grant and Mrs. Pierpont were the only ladies at the banquet. The Prince of Wales was present. The General and Mrs. Grant, with their host and hostess and most of the guests, afterwards went to the Duchess of Westminster's concert at Grosvenor House, where they met Prince Leopold and the Duchess of Teck. Yesterday week General and Mrs. Grant, with their son, were present at Mrs. Hicks's afternoon party, which was given in their honour at Claridge's Hotel, at which the principal members of society assembled. On Monday the General and Mrs. Grant paid a visit to Mr. and Mrs. James McHenry, at Oak Lodge, Kensington, to meet a small party. In the evening they went to Covent Garden opera. On Tuesday General and Mrs. Grant and their son paid a visit to the Queen at Windsor Castle and dined with her Majesty. During the visit the General received the following telegram from Governor Hartranft, of Pennsylvania, the Commander of the Grand Army of the Republic, an association numbering a million of men, and composed exclusively of those who fought in the national armies during the war of the rebellion:—"Your comrades in national encampment assembled in Providence, Rhode Island, send heartiest greeting to their old commander, and desire through England's Queen to thank England for Grant's reception." On Wednesday General and Mrs. Grant, with their son, were present at the state concert at Buckingham Palace. General Grant was entertained on Thursday by the Mayor of Liverpool at a grand banquet at the Townhall.

Princess Louise of Lorne, accompanied by the Marquis of Lorne, laid the foundation-stone of new buildings to be erected as an addition to the National Industrial Home for Crippled Boys, Wright's-lane, Kensington, on Tuesday.

Prince Leopold last Saturday laid the foundation-stone of an addition to the Church of St. Mark, Hamilton terrace, of which Canon Duckworth is the Vicar.

The Grand Duke of Mecklenburg-Strelitz left St. James's Palace on Wednesday for the Continent on his return to Strelitz.

The Duke of Cambridge on Tuesday reviewed the army corps which has been formed at Aldershot.

RUSTENBURG, IN THE TRANSVAAL.

Far in the interior of South Africa lies the sequestered village of Rustenburg. Nature seems to have lavished her choicest gifts on this spot. It is blessed with a delightful climate, and lies at the foot of the fine range of the Maghaliessberg mountains, watered by the purest crystal streams. The spacious and fertile plain is surrounded, in the far distance, by other ranges of stately mountains and hills. With due cultivation, the coffee-tree, sugar-cane, and cotton-plant, also the different cereals, would grow here in abundance. But this is not all. The earth has also its hidden treasures, which only await the toil of the miner to reward him with plenty of coal, iron, copper, cobalt, plumbago, lead, and last, but most tempting, gold—all within a radius of fifty miles from the village of Rustenburg.

Rustenburg is the centre of a large district, inhabited mostly by the old "voortrekkers," or pioneer Boers, who left the Cape Colony in search of enlarged pastures. Many conflicts with the native tribes awaited them; but after a long journey, through a vast tract of country inhabited by Kafir tribes, they rested on this favoured plain, and called the place Rustenburg, or the Town of Rest.

The recent events which have caused the fall of the late Transvaal Republic are known to the readers of our Journal. It will suffice here to remark that a land equal in extent to that of France has become part of the British Empire. The proclamation for its political annexation was read at Pretoria on April 12 by Sir T. Shepstone, with a few supporters who were present. There were many surmises that the Dutch Boers, especially the "doppers," would rise against it; but not a single act of violence was attempted. To Rustenburg, however, belongs the honour of first hoisting the British flag officially in the Transvaal. When the news of the annexation arrived, on April 14, the inhabitants turned out; the venerable Landrost or magistrate, with a promptitude which did him honour, gave the word, and the flag was hoisted amidst general acclamations, the local band playing "God Save the Queen." This act was the more significant as the magistrate, Mr. Van Staden, was the oldest public servant of the late Republic, and was identified with its earliest history. Much credit is due to him for the tact and kindly feeling which prompted him to pacify and conciliate the Boers in a district that was most antagonistic to British rule. It is no small thing for him to remember that his endeavours have tended to repress bitter animosities towards England amongst those with whom he has so much influence. Of course some opposition was shown by the extreme party. A formal protest was made by the late President, Mr. Burgers; and Mr. Paul Kruger has been deputed to visit England on the subject, accompanied by the Attorney-General of the late "South African Republic." Mr. Paul Kruger is a representative man of a large class in the Transvaal, and his projected visit to England may be productive of beneficial results, as he will have an opportunity of getting his false impressions removed and forming a better idea of the justice of England and her earnestness in the cause of civilisation. This was the effect in the neighbouring Republic of the Orange Free State from the late visit to Europe of its President, Mr. Brand.

A fine future is now open for the Transvaal, abounding as it does with natural riches. It offers great inducements as an outlet for superabundant population. A good geological and trigonometrical survey, with a judicious system of railway communication, will surely develop great fields of wealth. Let us repeat once more, however, that to Rustenburg belongs the honour of leading the van of British progress by its warm support of Sir T. Shepstone's mission, which is calculated to raise a country hitherto struggling with difficulty to prosperity and happiness.

The forty-third anniversary meeting of the Statistical Society was held on Tuesday at the society's rooms—the retiring president, Mr. James Heywood, in the chair. The report is highly satisfactory. The number of Fellows was 811 on Dec. 31, 1876, since which period eighty new Fellows have been elected. The Howard medal of 1876, with £20 added, was awarded to Dr. J. C. Steele, medical superintendent of Guy's Hospital, for his essay "On the Mortality of Hospitals, General and Special, in the United Kingdom in times Past and Present." The Howard medal for the present year will be awarded in November next, the subject being "On the Condition and Management, Past and Present, of the Work-houses and similar Pauper Institutions in England and Wales, and their Effect on the Health, Intelligence, and Morals of the Inmates." The subject of the essay for the Howard medal of 1878 is "The Effects of Health and Disease on Military and Naval Operations." It has been decided by the council to grant £20 to the writer who gains the medal. The new president is Mr. George Shaw Lefevre, M.P.

Lord Shaftesbury presided at a meeting held on Monday afternoon at St. George's Hall on behalf of the London School of Medicine for Women. Mr. Stansfeld, M.P., the hon. treasurer, stated that the authorities of the Royal Free Hospital were willing to afford the necessary opportunities for hospital instruction to the students of the institution. Two thousand five hundred pounds would be wanted to defray the cost of attendance at the hospital, and a similar amount would be required to meet the annual difference between the expenses of the school and the fees of the students. Mr. Fawcett, M.P., moved a resolution expressing the satisfaction of the meeting at the progress made by the school, and thanking Mr. Russell Gurney, Mr. Cowper-Temple, and other members of Parliament for their assistance to the movement for the medical education of women. Mrs. Westlake seconded the resolution, which was carried, and Mr. Cowper-Temple, Lady Anna Gore-Langton, and Mrs. Garrett-Anderson also addressed the meeting. It was announced that half the sum mentioned by Mr. Stansfeld had been subscribed.

A meeting of the Victoria Turf Club was held on Tuesday, when it was agreed that a subscription should be opened for a memorial to the late Admiral Rous, and in a very short time upwards of £300 was subscribed. This sum it is intended to devote to the purchase of a life-boat to be stationed on the coast of Suffolk, the county in which the late Admiral was born.—At a special meeting of the committee of the Civil Service Life-Boat Fund, held at the General Post Office on Tuesday, and presided over by Mr. Haines, of the House of Lords, it was decided to buy a new life-boat, to be named the "Civil Service, No. 3," and Mr. Charles Dibdin, F.R.G.S., the hon. secretary to the fund, was authorised to hand over to the National Life-Boat Institution the sum of £180 for that purpose. The "Civil Service, No. 3," is to be placed at Portpatrick, on the Scotch coast, where a life-boat station is sorely needed. This is the third life-boat which the officers of her Majesty's Civil Service have presented in the last few years to the National Institution. The other two, the "Civil Service," stationed at Wexford, and the "Charles Dibdin," at Tyne-mouth, both of which are fully supported by the fund at an annual cost of £100, have attended many wrecks and been the means of saving several vessels and 101 lives.

H.M.S. WARSPITE, THE MARINE SOCIETY'S TRAINING-SHIP AT WOOLWICH.
VISITED BY THE PRINCE AND PRINCESS OF WALES.

RUSTENBURG, THE FIRST TOWN IN THE TRANSVAAL WHERE THE BRITISH FLAG WAS HOISTED.

THE WAR: RUSSIAN TROOPS MARCHING PAST THE EMPEROR ALEXANDER II. AND THE GRAND DUKE NICHOLAS AT PLOESTI.
FROM A SKETCH BY ONE OF OUR SPECIAL ARTISTS.

THE WAR.

The Danube is passed, at length, by the enormous military forces of Russia, assembled under the eye of the Emperor Alexander II. The left wing of the Russian Army first crossed the Danube and occupied the northern part of the Dobruddcha, which is the district comprised between the northward bend of the Lower Danube, from near Hirsova, having Braila and Galatz on its left bank, and the coast of the Black Sea. The Turkish forces have prepared to resist the invaders' southward march upon the line of Trajan's Wall and the railway across that narrow part of the Dobruddcha from Tchernavoda to Kustendje. It cannot be doubted, however, that the Russians will in a few days compel Abdul Kerim Pasha to draw his forces together, and to oppose their march through Bulgaria upon the road which leads from Sistova, Nicopolis, and Rustchuk, to the Balkan mountains. The Grand Duke Nicholas, with the central division of his army, has actually crossed the Danube at Sistova and Nicopolis, and will presently lay siege to Rustchuk, if not to Shumla, or will, at least, endeavour to cut off their communications. The Russians are likely, also, to pass the river at several other places higher up, as their main front and right wing extends about two hundred miles above Rustchuk, the centre of the Turkish line of defences, which has a total length of nearly four hundred miles along the Bulgarian frontier. The principal Russian and Turkish batteries and fortresses opposite to each other—namely, those of Rustchuk and Giurgevo respectively in the centre, and those of Widdin and Kalafat at the most westerly point of the confronting lines—have been keeping up this week a violent exchange of artillery fire, by which the town of Rustchuk more especially has suffered great damage.

We refer to our Map of the Lower Danube and the Dobruddcha, in this week's Supplement, which shows where and how the Russians got across that river last Saturday morning. It will be seen that they crossed just below the town of Galatz, and advanced directly southward through the marshes, on the east side of the broad and shallow lakes in the Dobruddcha, to Matchin, or Machin, where there is a canal, or a navigable branch of the Danube. At the same time, another detachment of the Russian forces crossed the Danube at the entrance to that canal, a short distance below the Roumanian town of Braila. Having intrenched and fortified the best positions they could find in this district, they next moved up to Hirsova, which is now occupied in force by the Russians; and they have also drawn close to Tuldscha and the Sulina mouth of the river, if not actually taken possession there. It is reported that the Turks have left Tuldscha.

It was on Saturday morning at daybreak that the Riazan and Riak regiments, commanded by Major-General Iuhoff, crossed the Danube at Galatz in boats, and secured a position at the village of Zatoca, rising above the level of the surrounding marsh, which is still covered by water. The village is two miles south of the main channel of the river. After this force secured a footing, the bridge, which had been lying in readiness along the Galatz shore of the river, was swung into position, and reinforcements poured across to strengthen the pioneer battalions at Zatoca. A large number of rafts, which had been constructed in the River Sereth, above Galatz, were hastily moved over to Zatoca, and a temporary bridge was constructed across the deeper portions of the marsh lying between Zatoca and the mainland, which at this place rises several hundred feet above the level of the river. These heights were held by about 3000 Turks, and the Russians, reinforced to about 8000 men, at once commenced an attack upon the Turkish position. After an engagement lasting six hours they carried the heights, the Turks falling back to Matchin, which they also gave up later in the day. The Turks are said to have suffered heavily in the struggle for the possession of the heights. They were evidently taken by surprise by the ingenious and unexpected use of the rafts and boats in crossing the flats, which they supposed were impassable, on account of their being covered with water.

It appears that the Russians a fortnight ago began the construction of a raft bridge from Braila to the swampy island of Ghetchet. The heavy batteries lining the left shore between Braila and Galatz were supported by a *levee-de-pont* on the Ghetchet bank, which is separated from Matchin by a comparatively narrow branch of the river. The road from the southern bank of the main river Danube to the northern bank of the narrow branch lies between the Ghetchet swamp and the Matchin branch, from which the narrow branch proceeds to the Lake of Gavan. This road was protected by the batteries of Matchin and Kamonska. Notwithstanding such advantages of position, the Turks did nothing to prevent the Russians crossing near Braila. An explanation of their indifference has been offered. There are persons who say that, Abdul Kerim having some time ago all but evacuated the Northern Dobruddcha, destroyed the railway from Kustendje to Tchernavoda, and constructed a line of defence south of that railway, along the ancient Roman wall, he prefers detaining the enemy south of the Danube, in a region always unhealthy, and now doubly so from the excessive heat of summer. Looking at the apathy, however, with which the war has been hitherto conducted by the Turks, it may be doubted whether the new line of defence is occupied in sufficient strength to stop the rush of Russian flying columns. The Russians had prepared, it is said, to cross the Danube at Widdin, Rahovo, Sistova, Oltenitza, and Rasova, as well as Braila. Seeing that the bridge at Braila had been building several days without any interference on the part of the Turks, it would almost appear as if the ease with which the Russians were allowed to cross was not due to negligence, but to design.

We learn, by a telegram from Bucharest on Thursday last, that the Grand Duke Nicholas, with the Eighth Russian Army Corps, on Wednesday morning at daybreak, crossed the Danube near Simnitza, which is just opposite Sistova, about thirty miles above Rustchuk; the Turks were driven from their positions. They have also abandoned Nicopolis to the Russians.

The Turks are reported to be preparing to concentrate their forces on the Lower Danube and the fortresses forming the quadrilateral of Rustchuk, Silistria, Shumla, and Varna, leaving the Widdin force isolated.

Heavy firing is going on every day between Kalafat and Widdin, the Roumanians being engaged in an attempt to prevent the erection of Turkish batteries higher up the river and more nearly opposite the Kalafat positions. The old Castle at Widdin is much damaged, and also the steam flour mill which supplied the Turkish troops with material for bread. The residence of the British Consul at Rustchuk has been severely damaged by the Russian batteries at Giurgevo.

In Asia, on the road between Kars and Erzeroum, and likewise in the siege of Kars and of Batoum, now closely pressed by the Russians, there has been sanguinary fighting this week. The battles of the 21st and 22nd, in the Soghanli Pass and at Delibaba, were obstinately contested, but only a wing of each army was actually engaged. The result seems to have been undecided, as the Turks still hold a very strong position at Zewin, and another conflict is expected. Both sides claim the victory in recent encounters. Some Russian attacks

on the fortifications of Kars seem to have been repulsed, and the same at Batoum. It is impossible to know the exact truth.

The text of two despatches which have been exchanged between our own Cabinet and that of Russia has been published. In the first, Lord Derby announces that the British Government is determined to give no assistance to Turkey while Turkish interests alone are involved. It is equally determined, however, to defend certain interests, and foremost among them is the necessity of keeping open the Suez Canal. An attack on Egypt it certainly would not regard with unconcern, nor would it see Constantinople pass into other hands with indifference. It would object to any alteration in the regulations respecting the navigation of the Bosphorus and Dardanelles; and there might be interests on the Persian Gulf which it would feel a duty to protect. In reply, Prince Gortschakoff says that the Russian Government will not interfere in any way with the Suez Canal, nor attack Egypt, although it might carry the war into that country as forming part of Turkey. The acquisition of Constantinople, it is again declared, is excluded from the views of the Czar, and the future of the city is a question of common interest to be settled by a general understanding. The question of the Straits should be settled in like manner. With regard to the other British interests which might be affected, Russia will not extend the war beyond what is required for the object with which the undertook hostilities—viz., the amelioration of the condition of the Christians under Turkish rule. In conclusion, Prince Gortschakoff says that there is nothing in the views which have been exchanged between the two Governments which cannot be reconciled, so as to maintain their amicable relations and the peace of Europe.

Our Special Artists, both on the Russian and on the Turkish side, have continued to supply us with a variety of Sketches of the War on the Danube. There is little that could be added to Mr. Sala's entertaining commentary on the Turkish War Sketches, in our Supplement of this week; but with reference to that of the Circassians returning from a predatory raid across the Danube, opposite Nicopolis, we have to say a word of explanation. This Sketch, which forms the subject of our two-page Engraving, shows the boats towing behind them a large number of horned cattle, taken by force of arms from the pastures of the Roumanian shore. The oxen are tied with ropes fastened to their horns, or round their heads and necks, to a longer and stouter cable, which is attached to the stern of the boat; each boat taking in tow about fifty animals, which are arranged in pairs along the tow-ropes. The poor beasts are driven into the water, and forced to swim a distance of half a mile, or perhaps more, in which they often get entangled by the ropes, and many are drowned. Out of four hundred, in one instance, we learn from our Artist's letter, only 183 arrived safely at the opposite bank. The other Illustrations do not require any particular remark.

FOREIGN AND COLONIAL NEWS.

FRANCE.

An end has come to the struggle between Marshal MacMahon and the Chamber of Deputies. After a debate which was twice adjourned, the Senate gave its adhesion yesterday week to the proposition for a dissolution of the Lower House by a vote of 149 to 130, and the Chamber was dissolved on Monday. M. Grévy, the President, having thanked the Deputies for their kindly feeling towards him, read the Marshal's decree, which stated that the elections will take place within three months. The members of the Left separated with cries of "Vive la République!" while the Right cried "Vive la France!" A few cries of "Vive la paix!" were heard.

Meetings of the Left and the Bonapartists have been held to arrange plans for the coming elections. The united fractions of the Left resolved that no candidate should be opposed who voted for the order of the day censuring the present Ministry. The Bonapartists have resolved not to oppose any candidate who divided against the vote of censure, or those whose returns have been quashed and who have not been re-elected.

M. Gambetta was the principal speaker at a banquet at Versailles on Sunday, and commented at length on the present position of France, contending that the will of the country had been openly scouted, and expressing his firm conviction that Republicans would be sent to the next Assembly in increased numbers. M. Gambetta concluded his speech by proposing the health of M. Thiers, the liberator of the territory, and the enlightened guide of France.

The Tribunal of Paris has confirmed the sentence condemning M. Bonnet Duvardier, the President of the Municipal Council, to a fine and fifteen months' imprisonment for having made use of language insulting to Marshal MacMahon. The sentences on the other persons accused were also confirmed.

The editor of the newspaper *Le Phare* has been sentenced by the tribunal of Nice to a fine and a term of imprisonment for having published a letter of M. Naquet, the Radical deputy.

ITALY.

The celebration of the Pope's jubilee is considered to be closed. The aggregate value of the offerings he has received is estimated on good authority, we are told, at 14,000,000*fr.* His Holiness held a secret Consistory yesterday week, and created three new Cardinals, Monsignor Michailovics, Archbishop of Agram; Monsignor Kustcher, Archbishop of Vienna; and Monsignor Parocchi, Archbishop of Bologna. His Holiness also promoted Monsignor Agostini to the Patriarchate of Venice, nominated two Bishops, and translated five others, by which he provided for the archiepiscopal sees of Seville, Valencia, and Ferrara, the Italian bishoprics of Lecco and Ugento, and the Spanish of Jaen.

In the allocution delivered by the Pope on Friday Pius IX. thanked the Catholic world for its pious commemoration of his Episcopal Jubilee and for the precious gifts with which it had accompanied its congratulations. The faithful had declared by these manifestations that their common father should be subjected to no Power, but should preside over the Church in dignity and freedom.

The Pope held a Consistory on Monday, at which he presented hats to several cardinals. The ceremony of opening the mouths of the new cardinals was performed, and the rings were presented and their various titles bestowed upon them. Afterwards the Pope appointed several Archbishops and Bishops, among whom were Dr. Fink, as Bishop of Kansas; Dr. Clarey, as Archbishop of Auckland; and Dr. Maccabe, at present Vicar-General of Dublin, as Bishop of Gadara, *in partibus infidelium*. Dr. Gibbons was nominated as the successor of Dr. Bayley, at present Archbishop of Baltimore.

BELGIUM.

The Senate on Wednesday unanimously passed a bill granting a supplementary credit to the Minister of War for continuing the construction of forts on the Lower Scheldt.

AUSTRO-HUNGARY.

Herr Tisza, Minister-President of the Lower House of the Hungarian Diet, stated in Tuesday's sitting that at the last Cabinet Council the Government had decided neither to occupy

foreign territory nor to mobilise the army; but, at the same time, the monarchy would not suffer a foreign Power to take possession of neighbouring territory. The debate ended on Wednesday in the adoption of a vote of confidence in the Ministerial policy.

GREECE.

The new Military Organisation Law has been read the third time and passed in the Chamber of Deputies.

AMERICA.

The President, accompanied by the members of his Cabinet, visited Boston on Tuesday, where he met with a grand reception. He was welcomed by Governor Rice and the Corporation of the city. The visitors were escorted through the streets by a long military procession. Thousands of spectators lined the route and cheered the President enthusiastically. President Hayes was heartily greeted on Wednesday by the alumni of the Harvard University on the occasion of his receiving the honorary degree of LL.D. He dined with the Mayor of Boston in the evening, and, in a speech thanking his hosts, said that he did not regard the welcome he had received merely as a personal compliment. The citizens of Boston, by their reception, had manifested their love of union and peace and the equal rights of all. At a concert given in his honour, attended by 8000 persons, the President was received with great enthusiasm.

The *Times*' correspondent at Philadelphia reports that General Ord, commanding on the Rio Grande border, has had an interview with General Trevino, commanding the Mexicans there, and that a good understanding between them is being reached regarding the suppression of marauding by the joint action of their troops on both sides of the river if necessary.

The intelligence from Washington regarding the Indian war continues bad. The troops who were dispatched in pursuit of the Idaho Indians were repulsed on the 17th inst., with the loss of a captain and twenty-seven men killed. The governor of the territory telegraphs that a disastrous Indian war has begun, and asks that assistance may be sent immediately. The Government has in consequence given orders that arms and ammunition shall be issued to the militia in Idaho. Reinforcements are also being rapidly dispatched.

A large part of the business portion of the town of Marblehead, in Massachusetts, was burned on Monday.

Eleven Molly Maguire Trade Unionists, convicted of murder, have been hanged in the State of Pennsylvania—six at Pottsville, four at Manchunck, and one at Wilkesbarre.

CANADA.

Reports upon the condition of the crops in Canada, published at Toronto on Wednesday, state that hay is below the average. The winter wheat is generally excellent, and a crop above the average is expected. Spring wheat is hardly so favourable, and the crop will be smaller than the May season. Oats also will yield a short crop. Peas promise finely, and potatoes are doing well.

INDIA.

The Calcutta correspondent of the *Times* telegraphed on Sunday that there is little news from the famine districts. The monsoon appears to have fairly set in throughout Bombay and Madras. Agricultural operations are beginning, and prospects generally are described as promising. Mr. Whitley Stokes, the new Legal Member of Council, delivered his maiden speech the other day, the subject being "The Codification of Law." It is stated that Sir William Merewether, Commissioner of Scinde, who was lately appointed a member of the Secretary of State's Council, will enter on his office at once, and that his successor to Scinde will only be appointed temporarily. This is thought to indicate that the plans for uniting the Punjab and Scinde, or constituting the entire western frontier into a separate Government, are being seriously considered. It is reported that the new dignity of Councillor of the Empress, which was created at the Delhi assemblage, is not to be a purely honorary title, but that a meeting of councillors is to be held at Simla in the autumn for the purpose of discussing certain important fiscal and administrative questions regarding the native States, and that Maharajahs Scindia and Holkar and the Maharajahs of Rewah and Jeypure will attend.

AUSTRALIA.

A telegram from Melbourne, dated the 26th inst., states that the Parliament of Victoria has been opened by the Governor, who, in his speech on the occasion, recommended the grant of a subsidy for a line of steamers between Melbourne and England via the Cape. His Excellency also announced a reduction of taxation, but stated that the Government would propose the imposition of a land tax, in order to discourage excessive individual holdings.

The Government has signified its intention of adopting the proposals of Sir William Jervois for the defence of Australia.

Sir Arthur Blyth, K.C.M.G., the Agent-General in England for South Australia, has received a telegram from Adelaide ordering him to dispatch an extra emigrant-ship in the month of August, so as to arrive in time for the harvest.

The German ironclad squadron left Malta for Port Said on Tuesday morning.

A telegram from Cologne states that in a field near that city the Colorado potato beetle has been discovered in every stage of development.

The Empire of Brazil and the several colonies belonging to Portugal will be admitted on July 1 into the General Postal Union; and the rates of postage now chargeable on correspondence addressed to those countries will be reduced.

It has been decided by the International African Commission at Brussels that an expedition shall leave Zanzibar in the direction of Lake Tanganyika. The King of the Belgians has been re-elected President of the Commission.

The shock of an earthquake was felt in the district between Aix-la-Chapelle and Cologne at about nine a.m. on Sunday. The movement was from south-west to north-east, and lasted from three to fifteen seconds. At Herzogenrath ceilings and walls were injured, and some chimneys fell.

There is news from West Africa that Kooino, the King of Dahomey's head man at Whydah, had been taken to Abomey to be executed. It was he who flogged and insulted Mr. Turnbull; and the King, holding him to be the cause of the fine being levied and the port blockaded, resolved to behead him.

Galvani says that Baron Edmond de Rothschild has bought the magnificent domain of Henmieres, in the Seine-et-Marne, for 1,550,000*fr.*, which, with cost of transfer, &c., will be increased to 1,800,000*fr.* The property formerly belonged to M. Moins, and is well stocked with game.

The Queen has approved the following appointments:—Colonel Sir W. F. D. Jervois, R.E., K.C.M.G., C.B., Governor of the Straits Settlements, to be Governor of South Australia; Sir W. C. F. Robinson, K.C.M.G., Governor of Western Australia, to be Governor of the Straits Settlements; Major-General Sir Harry St. George Ord, R.E., K.C.M.G., C.B., to be Governor of Western Australia.

THE CHURCH.

PREFEMENTS AND APPOINTMENTS.

Atkins, Stephen Hastings, to be Rector of Hatford, Berks.
 Andrews, W., Rector of Easton; Honorary Canon in Peterborough Cathedral.
 Avelin, George; Vicar of Glynde, Sussex.
 Brookings, S. A. E. E.; Vicar of St. Simon's, Leeds.
 De Cottelegon, Charles Prescott; Vicar of St. Paul's, Highmore-street, Oxon.
 Downham, Isaac; Incumbent of St. John's, Baxenden.
 Fisher, Cecil; Prebendary of Lincoln Cathedral.
 Holmes, W.; Chaplain of Whitechapel Union.
 Mercer, Jerome J.; Rector of Kemerton, Tewkesbury.
 Norris, Philip; Rector of Buckland, Gloucestershire.
 Rushton, J. A.; Incumbent of All Saints', Blackburn.—*Continued.*

Lord Derby has appointed the Rev. D. S. Govett, M.A., to be Consular Chaplain at Marseilles.

Silsden parish church was reopened on Wednesday, after having undergone complete restoration.

The meeting of Convocation for the province of York has been formally prorogued to Saturday, July 14; and the Southern Convocation stands adjourned till Tuesday.

A Welsh church was opened on Tuesday in Oswestry by the Bishop of St. Asaph. Amongst the principal subscribers to the building are the Earl of Powis, Sir Watkin Wynn, the Bishop of the diocese, and the Vicar of Oswestry.

The *London Gazette* states that, in consideration of a benefaction of £1000, the Ecclesiastical Commissioners have granted a like sum of £1000 towards defraying the cost of providing a parsonage for the vicarage of Much Birch, Herefordshire.

The Bishop of Peterborough on the 21st inst. consecrated the Church of St. Saviour, which has been erected in a rapidly-increasing neighbourhood, at the sole cost of the Rev. F. G. Burnaby. The cost of the church is £11,500, and with the incumbent's house and the endowment the gift of the rev. donor will amount to about £30,000.

Mr. J. D. Chambers, M.A., Recorder of Salisbury, was on Tuesday elected president of the Association for Promoting the Unity of Christendom by bringing about a union between the Eastern and Western Churches, in the room of Lord Eliot, who has resigned that office. It was unanimously resolved that the association should continue on its old basis.

The Archbishop of Canterbury has addressed a letter to his clergy, calling upon them during the current year to make collections in aid of the Canterbury Diocesan Education Society in every parish. The board has distributed during thirty-seven years no less than £37,650, upwards of £19,000 having been spent in building and enlarging schools. Every portion of the diocese has participated in the fund.

The Winchester Diocesan Conference was opened on Tuesday with an address from the Bishop on the principal topics affecting the Church. As to Ritualism, he urged that the recent judgment should be cordially accepted, and that there should not be any more prosecutions, for he was sure they rather increase Ritualism than stamp it out. A debate on "The Priest in Absolution" arose on Wednesday, in the course of a discussion on penitentiary work, when Canon Wilberforce, with a view to obtain some advice from the Bishop, moved a resolution condemning the use of the book. The Bishop pointed out that while the Church recognised confession in certain cases, it did not encourage the habitual practice or make it obligatory even before communion, and nothing could be more undesirable than that young clergymen should be allowed to exercise such a function. The Bishops, he added, had refused to license any confessors in the Church, and it would be extremely dangerous to set a number of young priests to be constantly looking into the morbid anatomy of the human mind. The motion was carried, as was also another resolution declaring that habitual confession was not consistent with the doctrine and discipline of the Church.

THE UNIVERSITIES AND PUBLIC SCHOOLS.

OXFORD.

The following elections have been made at Worcester:—To an Eton Scholarship—Mr. S. J. Daltry, from Marlborough College. Proxime accesserunt—Mr. H. R. Woolrich, from Rossall School; Mr. G. M. A. Hewett, from Bromsgrove School. To a Cooke's Scholarship—Mr. G. F. Walker, from Bromsgrove School. To Exhibitions—Mr. H. R. Woolrich, from Rossall School; Mr. L. H. Winton, unattached student; Mr. D. F. Heywood, from Christ's Hospital; Mr. C. Price, of King Edward's School, Birmingham; Mr. A. G. Thistleton, of Buxtonhead School.

At St. John's the following elections have been announced:—To Classical Scholarships—Mr. A. W. Pollard, of King's College School; and Mr. E. A. Housman, of Bromsgrove School. To a Natural Science Scholarship—Mr. M. J. Jackson, of University College, London.

The Mathematical Moderators in the first public examination have issued the following award of honours:—

Class I. J. W. Botsford, University; A. Dilke, Worcester; A. L. Felkin, Magdalen; L. W. Jones, Merton; W. E. Martyn, Christ Church; H. Mellish, Balliol; B. Newport, Jesus; H. B. Reichel, Balliol; E. W. Symons, University; T. R. Terry, Hertford; H. R. Webbe, New College.

Class II. A. J. Anderson, Magdalen; T. Bentham, Queen's; H. D. Ellis, New College; G. Grundy, Merton; G. B. Hughes, Worcester; W. H. Lewin, University; W. Roberts, Jesus; C. H. Sargent, New College; J. W. Tibbs, Keble; J. Turner, Corpus Christi.

Class III. J. R. P. Bartrum, Balliol; A. C. E. Blomfield, St. John's; F. L. Butler, St. John's; T. O. H. Horsman, Exeter; H. Pooley, Keble; H. H. Robinson, Magdalen.

CAMBRIDGE.

The Harness prize, given once in three years to such undergraduate or graduate who shall compose the best essay upon some subject connected with Shakespearean literature, has been adjudged to Henry Paine Stokes, B.A., Corpus Christi.

The following have been elected to foundation scholarships at St. John's:—G. C. Allen, Boyce, Brownbill, Carlisle, Houghton, Lattimer, R. H. Marsh, Mummery, Pinsent, Reynolds, Willan, Dougan, Gunston, F. C. Hill.

The Senate of the University of London has decided against the policy of delay which was proposed by the opponents of medical degrees for women, by a majority of 16 against 11.

The distribution of prizes to the students of University College took place yesterday week in the theatre of the institution—Sir George Young, Bart., presiding. The prizes awarded, some of them subject to the award of the council, included the Joseph Hume Scholarship in jurisprudence, to Eliza Owen, of London (£20, tenable for three years); the Andrews Entrance Prizes, £20 each, W. S. Meyer, Wolf Defries, and D. S. Maccoll; the Andrews prizes, second year's students, first prize, £50, F. J. R. Hendy; second prize, £10, R. B. Yandley. First year's students:—First prize, £20, W. S. Meyer, T. H. Edmunds, D. S. Maccoll, and W. D. Ridley. A number of prizes were delivered in other departments. Among the prizetakers were some young ladies, whose success was hailed with vociferous applause.

Mr. F. T. Marsh, a blind gentleman, passed the B.A. examination in the University of Durham. He was educated in the College for Blind Sons of Gentlemen, Worcester.

Mr. S. B. Guest Williams, of Exeter College, Oxford, has been appointed Second Master of Durham Grammar School, in the place of the Rev. Benjamin Charles Catlin, who was recently appointed to the vicarage of Northallerton.

The Duke of Cambridge, as President of King's College Hospital, distributed the prizes on Wednesday afternoon to the students in the medical department of the college.

Wednesday was "Speech Day" and Prize Day at Haileybury, and the announcement that the new chapel of the college would be opened and consecrated by the Bishop of St. Albans drew together a distinguished body of visitors. The list of honours obtained during the past year includes four First Classes at Oxford, two First Classes and the Chancellor's Medal for English Verse at Cambridge, besides sundry open scholarships at both Universities and admissions by competition to the Academy at Woolwich and the College at Cooper's-hill.

Mr. Hardy has consented to lay the first stone of a large school building, providing accommodation for eighty students, and to preside at the distribution of prizes at the Oxford Military College, on July 21. This institution was started about twelve years ago for the purpose of giving a University education to the sons of officers and others, and to prepare them for the military examination at a reasonable expense.

The annual distribution of prizes was made at the College, Cheltenham, yesterday week, the Earl of Redesdale, Major-General Sir Garnet Wolseley, and all the local members of the college council being among the large audience who were gathered in the classical school-room. A large list of honours gained since June, 1876, by old and present Cheltonians was read by the Principal, the Rev. Herbert Kynaston, M.A.

The following have been elected to scholarships at Rugby:—Classical—Couchman, Mr. Waterfield's; Terry, Mr. Brown-ing's; Cartmell, Mr. Waterfield's; Cubitt, Rugby School, lately from Mr. Vecqueray's; Smith, home teaching. Mathematical—Pearce, Mr. Nunn's; Rumney, Mr. Vecqueray's. French—Dawson, Mr. Vecqueray's. Natural Science—Acton, Mr. Phipps.

At Wellington College, the following have been elected to junior scholarships:—Peel, Benson Scholar, Mr. O. Waterfield, East Sheen; Hallward, Barham House, St. Leonard's-on-Sea; Pollock, Durand Scholar, Mr. R. Chigwell, Dover; Otley, Wellington College; Mitchell-Innes, Wellington College; Eden, Wellington College; Douglas, Rev. J. H. Palmer, Eastbourne. Accesserunt—Craddock, Wellington College. J. Cairns, Wellington College; Medley, Mr. J. P. Seaver, Brighton.

There was an annual gathering of parents and friends at Bruce Castle School, Tottenham, last Saturday. The proceedings were rendered specially interesting by the presence of the retiring Head Master, Dr. Birkbeck Hill, under whom the school has been so long and so successfully managed, and of the new Head Master, the Rev. W. Almack, M.A. Within the last six months the school has gained two first and one second class at Oxford, and one first class at Cambridge.

The annual gathering of Whitelands students took place at the college on the 22nd inst. A goodly number of former students and friends and the 127 present students, with the governors, &c., assembled at St. Luke's, Chelsea, at twelve. About 400 sat down to an excellent luncheon in a spacious tent on the college lawn. It is worthy of remark that the cooking had all been done by the students, under the supervision of the lady superintendent, Mrs. Newton, and Miss Martin. There were several members of the council and friends of the college present.

Lord F. Cavendish, M.P., distributed the prizes gained in the third session by students in the Yorkshire College of Science last Saturday. His Lordship said the college was in a very satisfactory state, and a site had been purchased for a future permanent college. There had also been a wide extension of the curriculum by including in it both ancient and modern classical literature.

The Rev. R. A. Ram, M.A., Croydon, a clergyman of the Church of England, has been elected master of the new grammar school at Holbeach.

At the annual meeting of the Midland Branch of the British Medical Association, held on Tuesday at Birmingham, a resolution was passed in favour of the introduction of the provident dispensary scheme in co-operation with charity organisation.

The twenty-fifth annual summer show of the Brighton and Sussex Horticultural Society was opened on Wednesday at the Pavilion. About £175 was offered in prizes; and a 10-guinea cup presented by Mr. James Ashbury, M.P., offered for the best twelve varieties of stove and greenhouse plants, was awarded to Messrs. Balchin and Nell, of Brighton, for a very fine set of plants. This firm took eight other first prizes.

In celebration of the return of Mr. T. Brassey, M.P., Mrs. Brassey, and family, from their voyage round the world, a banquet was given on Wednesday night in the pavilion of the pier at Hastings. About 300 ladies and gentlemen sat down—the Mayor, Mr. Alderman Gansden, presiding. Sir U. J. Kay-Shuttleworth, Bart., M.P., and Lady Kay-Shuttleworth were among the assemblage. In responding to the toast of the evening Mr. Brassey gave some interesting particulars of his voyage, and spoke highly of British enterprise and prestige.

The originality, labour, and ingenuity displayed by the authors of some of the communications submitted to the Institution of Civil Engineers during the past session have led the council to make the following awards:—Watt medals and Telford premiums to Mr. W. W. Beaumont, for "The Fracture of Railway Tires;" Mr. W. C. Unwin, B.Sc., for "The Resistance of Boiler Flues to Collapse;" Telford premiums to Mr. R. Souttar, for "Street Tramways;" Mr. I. J. Mann, for "The Testing of Portland Cement;" Mr. W. Anderson, for "Experiments and Observations on the Emission of Heat by Hot-Water Pipes;" Mr. J. B. Redman, for "The River Thames;" Mr. H. Robinson, for "The Transmission of Power to Distances;" Mr. A. McDonald, for "The Repairs and Renewals of Locomotives;" Mr. R. H. Brunton, for "The Japan Lights;" and the Manby premium to Mr. C. N. Bazalgette, barrister-at-law, for "The Sewage Question." Some of the papers read at the supplemental meetings exclusively by students of the institution have likewise been similarly acknowledged—thus, a Millar scholarship has been given to Mr. P. R. Allen, for "Machine Tools;" while Millar prizes have been awarded in each of the following cases:—Mr. A. C. Hutzig, for "Submarine Foundations;" Mr. C. G. Smith, for "The South Reserve Floating Landing-Stage and Piers at Birkenhead;" Mr. R. J. G. Read, for his "Comparison of the Merits of Wrought-Iron Plate and Trussed Girders for Single-Span Railway Bridges;" Mr. N. Watts, for "Mechanical Puddling in the Manufacture of Iron;" Mr. W. J. Chalk, for his paper "On Waves, and on Structures Designed to Resist their Force;" and Mr. C. Mackay, for his paper on "Engineering Explosives."

NATIONAL SPORTS.

The racing of the past few days may be dismissed very briefly, as nothing of any importance has taken place. The attendance of holiday-makers at Hampton was as large as usual, and on the first day F. Archer once more carried all before him, winning no less than five out of the seven races in which he took part. There was the usual enormous muster on the Town Moor at Newcastle on Wednesday last to witness the running for the Northumberland Plate. At the fall of the flag, Muscatel (6st 8lb.) was decidedly the popular favourite; and she made all the running until about a quarter of a mile from home, when she was beaten. At the distance, Glendale (7st 13lb.) held a lead of a couple of lengths, and appeared to be winning easily; but Hampton (8st 12lb.) crept up inch by inch, and secured the race by a short head in the very last stride. The performance of the top weight was a remarkably good one, and must be very galling to those who have supported him on previous occasions, when he has been remorselessly scratched at the eleventh hour.

In spite of the abuse which has constantly been heaped upon it, and which has been to a great extent deserved by Majesty's stud at Hampton Court has continued to supply a fair average of winners; and this year the fifteen youngsters were sent up in so much better condition than usual that prices rose in a wonderful way, and a capital paying average of 310 gs. was obtained. This was made, too, without the help of any sensational youngster, as a filly by Blair Athol—Miss Evelyn (800 gs.), and a daughter of St. Albans and Lady of the Manor (600 gs.) stood at the head of the list. We fear that Old Trumpeter's day is nearly over, as he had only one representative, and the first of the Prince Charlie's do not appear to have created a favourable impression.

It would be contrary to all precedent if Henley Regatta were brought off in perfectly fine weather; still, some heavy showers on the Thursday afternoon did not give so much cause for grumbling as usual, and the Friday was quite fine. Last year the Thames R.C. took a strong lead in aquatic matters, but the defeats they experienced seem to have roused the members of the London R.C. to redoubled exertions, and on this occasion they once more carried all before them, securing the Grand Challenge, Thames Challenge, and Stewards' Challenge Cups, the last mentioned for the seventh year in succession. The Thames men were second in each event, and Eyre and Hastie of that club defeated Smith and Playford of the L.R.C. for the Silver Goblets; but the race was an unsatisfactory one, as each pair fouled the bank, and the latter were so long in getting clear again that they relinquished the contest without further effort. F. L. Playford, the amateur champion sculler, devoted himself solely to rowing; and T. C. Edwards-Moss, the president of the Oxford University B.C., had an easy victory in the Diamond Sculls, for which there was an unusually large entry. Jesus College, Cambridge, won both the Ladies' Challenge Plate and the Visitors' Challenge Cup. It was an excellent plan to bring off the Maidenhead and Marlow Regatta on the day following Henley, as, naturally enough, the entries were more numerous than usual, and some capital racing was witnessed. The London Eight did not appear for the Grand Challenge Cup, in which the Thames R.C. beat the Kingston R.C. after a hard struggle. These positions were reversed in the race for Senior Fours; and Eyre and Hastie again won the Pairs.

Of course, the great event of the week has been the annual cricket-match between Oxford and Cambridge, and fully 30,000 were present at Lord's on Monday and Tuesday last. Up to the last, the latter team were strong favourites, even though they had not done so well in the trial-matches as their rivals, and never was there a more complete upset of the public fancy. Though they were undoubtedly a fine batting team, only one of the Cambridge men—A. P. Lucas—played up to his form, their bowling was weak, and their fielding very poor, though an honourable exception must be made in the case of the Hon. E. Lytton, who kept wicket in splendid style. On the other side, F. M. Buckland gave a grand exhibition of batting, and, as he took no less than seven wickets, at an expense of only fifty-two runs, Oxford has to thank him for a hollow victory by ten wickets. We append the full score:—

A very interesting match was played between North and South last week. At the close of the first innings the latter team appeared to have the game in hand; but, at their second attempt they were disposed of very quickly, and only won by one wicket. Mr. W. G. Grace (54) and Jupp (not out, 73) did most of the scoring for the victors; and, on the other side, Ulyett (50), Shrewsbury (44), and Osroff (68) chiefly distinguished themselves. Kent has beaten Lancashire by five wickets; and Notts has defeated Yorkshire by 22 runs, the victory being due in a great measure to the fine batting of Shrewsbury (62).

The Leamington and Midland Counties Archery Meet took place on Wednesday and Thursday, in the Jephson Gardens, Leamington. The prizes amounted to upwards of £100.

A generous rivalry is going on between the Crystal Palace authorities and those of the Alexandra Palace. This week the Hordel Festival at the former place holds, of course, paramount sway; but on the other days there are rose shows and plays by day and fireworks at night. The Alexandra holds its own bravely, and is managed with much spirit. A horse show, at which valuable prizes were given, drew crowds there last week; and among the attractions this week are operas, dramas, and equestrian performances, winding up with a rose show to-day and fireworks in the evening, by the celebrated M. Ruggieri. Great energy is also shown by the managers of the Royal Aquarium, Westminster, at which there has been this week, besides the customary attractions, an exhibition of cats and ladies' pet dogs—more than £150 being given away in prizes—cups and money.

THE WAR: CIRCASSIANS AND BASHI-BAZOUKS RETURNING FROM
FROM A SKETCH BY ONE OF OUR

RAID ON THE ENEMY'S SHORE AT NICOPOLIS.
BY THE ARTISTS.

PARLIAMENT. LORDS.

Whitebait dinners and garden parties being in their golden time, and the weather rather warm for legislation, it is to be wondered at that the minds of noble Lords strayed whither they themselves will hasten in less than two months hence? Anyway, when the Scottish Game Laws Amendment Bill was before the House, Lord Rosebery had no difficulty in excluding moors and mountains from the operation of the measure. Only from the point of view pictured in Mr. Sambourne's humorous *Punch* illustration of a Greenwich feast of reason and of soul could noble Lords have been interested in formally adding the third time and passing the Oyster and Mussel Fisheries (Order Confirmation) and the Fisheries (Oyster, Rabbits, and Lobsters) Bills at the convenient hour of six.

What may, perhaps, be called a grave matter occupied their lordships' attention on Monday. First, Lord Dorchester took to the cudgels for his friend Colonel Wellesley, and elicited from Lord Derby the assurance that he had called the Russian ambassador's attention to the unfriendly reception Colonel Wellesley, the British military attaché at St. Petersburg, had met with from the Grand Duke Nicholas at the seat of war, and had received an answer indicating that "this unpleasantness will be terminated in a friendly and satisfactory manner." Then ensued a series of plaintive remonstrances on the part of the Primate, Lord Denman, the Earl of Harrowby, Earl Grey, Earl Granville, and Viscount Cardwell against the action of the Government in dropping their Burials Bill on the adoption of the Earl of Harrowby's clause throwing churchyards open to dissenters, the Ministry finding defenders in Lord Redesdale and the Duke of Richmond, the latter of whom urged that the amendment had so altered the whole scheme of the bill that the Government were justified in withdrawing it, with the view of considering the question. Earl Nelson then mildly complained of some venial sins of omission which he alleged the Ecclesiastical Commissioners had committed, and the Earl of Hinchinbrook justified the course they had pursued, the Pier and Harbour Orders Confirmation (Nos. 1 and 2) Bills were read the second time; as were the Metropolitan Commons (Provisional Order) Bill and the Reservoirs Bill; and the Elementary Education (Provisional Orders Confirmation) Bill passed through Committee.

On Tuesday their Lordships sat little more than half an hour, the time being occupied in quickly advancing one or two measures a stage, and in the delivery of a brief speech by the Lord Chancellor for the enlightenment of the Earl of Oaslow as to the changes which had taken place in holding the Surrey assizes.

On Thursday the Royal assent was given by commission to the following bills, agreed upon by both Houses of Parliament:—Law of Evidence Amendment, Public Libraries Act (Ireland) Amendment, Removal of Wrecks, Quarter Sessions (Boroughs), Settled Estates, Marriages Legalisation, St. Peter's, Almondbury, and a number of other bills. The Lords Commissioners were the Lord Chancellor, the Earl of Bradford, and Lord Selborne. The Prisons Bill, after some discussion, was read the second time.

COMMONS.

Figures rarely have a charm for hon. members save when the genius and eloquence of Mr. Gladstone surround them with educative glamour. The introduction of the Indian Budget summarised in our last Number) by Lord George Hamilton on Thursday week, was no exception to this rule. The House was in a melting mood, and, dissolving into units, was well-nigh counted out whilst Mr. Laing was prosing on Indian finance. Nor did Mr. Fawcett's lecture on the political economy of India conciliate hon. members who have an instinctive aversion to the self-sufficient style of oratory practised by the hon. member for Hackney. Scant interest—no scant interest by far—was taken in the Indian Budget; and Mr. W. H. Smith succeeded in getting the £5,000,000 loan to the Indian Government almost for the asking. There was little that calls for remark in the remainder of the sitting, except that in Committee on the Irish Public Loans Bill Mr. Biggar virtually assumed the dictatorship in making the following concession to Mr. W. H. Smith, who was anxious to press the bill on even in the small hours of the morning:—"Well, Mr. Raikes," said Mr. Biggar, amid laughter, "I'll give him five minutes more."

The Supreme Court of Judicature Bill for Ireland made little progress in Committee yesterday week (clauses 1 to 5 only were agreed to, the preamble having been postponed), mainly owing to the intervention of Mr. Biggar with a fruitless motion to report progress in order that the Irish County Courts Bill should be considered first. Later in the sitting the latter bill was read the second time, the Royal Irish Constabulary Bill passed through Committee, one or two other measures were advanced a stage; and the evening sitting lasted but a short time, the House being counted out on the motion of Mr. Biggar.

On Monday the Chancellor of the Exchequer (so far from asking for the two or five millions for contingencies in the East, which vote had been foreshadowed by some of the journals which support the Ministerial policy) returned the following pacific reply to a question put by Mr. Gourley respecting the action of Russia and Turkey with regard to the Suez Canal:—

The Porte assents to the views of her Majesty's Government relating to the free passage of the canal for all neutral vessels. As regards hostilities in the canal and at its approaches, the Porte states that, as the Canal is part of the Ottoman Empire, and has never been declared neutral, it cannot permit access to it of an enemy's ships, and the Porte has taken measures to protect the two entrances from the approach of such ships; and that the Porte reserves its rights and prerogatives as to territorial powers. It will be seen from the papers that have been laid before Parliament that the Russian Government have decided that they will not include Egypt within the range of their belligerent operations, and that they will neither blockade, interfere with, nor in any way menace the navigation of the Suez Canal. Under these circumstances, her Majesty's Government do not feel it necessary to take any measures for the protection of the canal, inasmuch as they rely on the undertaking of the Russian Government that it shall not be interfered with.

The reported narrow escape of Sir Arthur Kemball from capture by Cossacks at Delibaba led to a question on the matter being put by Mr. Laing, who was informed by Mr. Bourke that the Government had received no news on the subject, and that Sir Arthur Kemball was simply following the operations of the Turkish army in order to report thereupon. So much anxiety exists in the public mind as to the stability of H.M.S. Inflexible that Mr. Ashbury may be held to have had good grounds for inquiring whether a Select Committee would be appointed to settle the question. But Mr. Egerton answered that no such Committee was necessary, inasmuch as the Admiralty were satisfied as to the stability of the Inflexible, of which hon. members could judge for themselves by studying the floating model of the ship placed for their convenience at the Admiralty. Thereupon Mr. E. J. Reed (who is of opinion that the Inflexible would certainly capsize if she should lose her unarmoured ends in action) said the Admiralty model had been seen by him, and it did not fairly represent the dangerous condition of the vessel. On going into Supply, Colonel Jervis called attention to an Indian question which proved of far greater interest to the House than the

Indian Budget did. The hon. and gallant member made himself the advocate of the officers of the Royal Artillery and Royal Engineers in India who had been promoted from the rank of captain to that of major, but who had not received the Indian allowance for that rank as well as British pay. He moved that the papers on the subject should be referred to a Select Committee; he found an earnest seconder in Colonel North; and he made out so good a case that, albeit Lord George Hamilton, with characteristic coolness, and Mr. Gathorne Hardy, with characteristic volubility, opposed the motion, the hon. and gallant member's motion was carried by 145 against 93 votes. Sir George Campbell having scolded hon. members for their partiality for personal questions, and having divided the House again on Colonel Jervis's motion, it was sanctioned this time by 104 against 56 votes. Mr. J. Holms was less fortunate. The hon. member for Hackney moved—

That, having regard to the fact that men of the first-class army reserve, when called out last autumn, appeared in a larger proportion than any other branch of her Majesty's forces, this House is of opinion that it would be expedient to allow at least five thousand men now in barracks, who are over thirty years of age and have had ten years' service, to retire into that reserve.

Mr. Holms supported his motion in an able speech, but the resolution was opposed by Mr. Hardy, and negatived by 207 to 46 votes; other military questions were briefly touched upon ere the one vote of £49,200 for Divine service was agreed to. The rest of the sitting was occupied with passing certain measures through various stages.

Ireland, Scotland, and the Church monopolised most of the time on Tuesday. When Mr. Whalley had discharged his duty by asking questions as to "The Confessional Unmasked," the "Holy Cross" Society, and the "European Nations" interested in the Suez Canal, and had been duly answered thereon, a few other questions were ventilated, and the House then gave itself up to an afternoon of Milesian eloquence, and made such progress with the Irish Supreme Court of Judicature Bill that, after a couple of divisions, clause 12 was reached. In the evening Colonel Alexander made himself the champion of those who have suffered by the Treasury's appropriation of the late William Paterson's estate, valued at £40,000, and moved:—

That, in the opinion of this House, it is inexpedient for the Treasury to depart without previous notice from the immemorial custom of Scotland, and, for the first time, to appropriate the estate of an intestate bastard, when there are blood relations who, if he had been legitimate, would have been his next of kin according to the law of Scotland.

Mr. W. H. Smith, the Solicitor-General, and the Chancellor of the Exchequer offered strong arguments against the hon. and gallant member's resolution, which was rejected by 197 against 135 votes. Mr. Leatham then introduced his motion against Church patronage in a pungent speech:—

That, in view of the prevalence of simoniacal evasions of the law and other scandals and abuses in connection with the exercise and the disposal of private patronage in the Church of England, remedial measures of a more stringent character than any recently introduced into this House are urgently required.

Mr. Leatham, however, could not withstand the appeal of Mr. Cross, backed as it was by an "admirable and important speech;" so Mr. Leatham withdrew his motion in favour of Mr. Hardcastle's amendment—"That it is desirable to adopt measures for preventing simoniacal evasion of the law and checking abuses in the sale of livings in private patronage," which was agreed to without a division.

The Irish Sunday Closing Bill was under discussion all Wednesday afternoon, the Chancellor of the Exchequer having moved the postponement of the six orders that stood before it. Sir J. McKenna (who deemed his Summary Jurisdiction Bill for Ireland of more importance) and several Irish members antagonistic to the restrictive measure strongly objected to Sir Stafford Northcote's motion, which was agreed to, however, by 99 against 23 votes. Mr. R. Smyth contented himself with simply making the formal motion necessary for taking the Sunday Closing Bill into consideration. In a long speech, Mr. Murphy then moved that it was inexpedient to extend the provisions of the bill to the whole of Ireland. Prominent among the speeches made against the measure was the address of Mr. Roebuck, who thought the bill would promote secret drunkenness, and who maintained that the rational way to promote temperance was to provide the people with museums and places for innocent amusement on Sundays. On the other hand, Mr. O'Connor Power was in favour of the bill, as it was supported by every class in Ireland. But the O'Donoghue and other Irish members spoke emphatically against the Sunday Closing Bill, the debate on which was adjourned on the motion of Mr. Downing.

The business paper of the House on Thursday presented no less than thirty-two orders of the day and twenty-five notices of interrogation, besides notices of motion—a formidable list of subjects still waiting to be dealt with at this very advanced period of the Session. Comparatively few of the matters, however, submitted for consideration were worthy of special notice. The Chancellor of the Exchequer, replying to Mr. D. Jenkins, said that the attention of the Government had been called to the lighting of the African coast of the Red Sea near Cape Guardafui. Communications had been made with the Khedive of Egypt on the subject, and he (the Chancellor) hoped that in a short time arrangements would be made for the purpose. Responding to an inquiry from Lord Claude Hamilton, Mr. G. Hardy said that his attention had been called to a pamphlet purporting to have been written by Lieutenant-Colonel Dawkins, containing grave charges against the Duke of Cambridge. He had addressed a letter to Colonel Dawkins requesting to know whether he admitted the authorship, but had not yet received a reply. Until he did so he did not think that he would be justified in taking the step suggested in the question of advising her Majesty to dispense with that officer's services. Interrogated by Mr. Mark Stewart, Lord Sandon stated that the Privy Council had communicated with the Foreign Office with respect to the reported appearance of the Colorado beetle in Germany. They were informed that it had appeared in a field near Cologne. That field was burnt with sawdust and petroleum; but since then one of the beetles was seen on the wing. Some time ago the Privy Council desired the Commissioners of Customs to give directions that all potatoes coming from America should be carefully inspected, and the stalks with the earth attached and all loose straw carefully burnt. Mr. Bourke, interpellated by Serjeant Simon, said that the Foreign Office had no reports of the rumoured ill-treatment of the Jews in Roumania since the publication of the report from the Consul-General at Jassy, dated April 15, in which he stated that two Jews were executed by the police at Jassy. One of them was a Russian subject. Upon representation being made to the Russian Consul, redress was promised by the authorities. No account of any outrages at Darabina had reached the Foreign Office, but the Consul-General at Bucharest had been ordered to institute inquiries; and if the report of such outrages were correct, the Government would make a representation to the Roumanian authorities. The Chancellor of the Exchequer, in reply to an inquiry from Mr. Hammond, said he was afraid that it would be impossible for the Government to proceed with the

Maritime Contracts Bill this Session. The order for the second reading of the bill was subsequently discharged. Mr. Sampson Lloyd called attention to the system of compelling private individuals to undertake the collection of income tax, inhabited house duty, and land tax, and moved that the practice was unjust and inexpedient. Mr. Muntz having seconded the motion, the Chancellor of the Exchequer admitted the inconvenience of the present practice, and stated that more than once proposals had been made that the collection should be given to the officers of the Inland Revenue; but the reception with which they were met discouraged their adoption. He was, however, prepared to make such a change as would meet the difficulty. It had been intended to deal with the question in the Valuation Bill, but the opportunity had not as yet presented itself. The motion, after some discussion, was negatived without a division. A considerable debate ensued upon a question originated by Mr. Lowe, who called attention to the tenure under which the Indian Judges held their offices, during her Majesty's pleasure, and contended that the power of the Crown to remove Judges of the High Court of India ought only to be exercised on the same principle as that under which the Judges of England held it—namely, during good behaviour. The Civil Service Estimates, in Committee of Supply, concluded the chief business of the night.

METROPOLITAN NEWS.

Dr. Allchin has been appointed a physician to the Westminster Hospital in the place of Dr. Basham, resigned.

Mr. Alderman Nottage and Mr. Alderman Staples have been elected Sheriffs of London and Middlesex for the ensuing year.

The University College Hospital has received £1000 from Major Dennis Moriarty, of Plymouth, in aid of its funds.

The Twickenham Horticultural and Cottage Garden Society's Show will be held at Strawberry Hill on Tuesday next.

Mr. Albert Grant's house at Kensington is announced for sale next Friday, July 6.

Lady Burdett-Coutts has sent £200 to the Stafford House committee, with an expression of sympathy for the suffering soldiers in the Turkish army.

The closing of Serjeants' Inn was celebrated on the 21st inst. by a conversation, to which a large number of ladies and gentlemen accepted the invitation of Mr. Serjeant Cox.

The annual presentation of prizes to the girls educated at the Grey Coat School, Westminster, took place in the school-room yesterday week. The Earl of Shaftesbury presided.

Lady Manners, yesterday week, at Fishmongers' Hall, distributed the prizes obtained in the recent exhibition held under the auspices of the Shipwrights' Company.

At a wardmote for the ward of Cheap held on Tuesday afternoon the Lord Mayor declared Sir John Bennett duly elected, in the place of Mr. Alderman Allen, his competitor, Mr. Weddell, having withdrawn from the scrutiny.

The Lord Mayor presided yesterday week over the annual meeting of the Princess Louise's Home and National Society for the Protection of Young Girls, at Woodhouse. His Lordship was accompanied by the Lady Mayoress and her sister.

The anniversary of the Royal Albert Orphan Asylum was celebrated on Tuesday evening at the City Terminus Hotel, under the presidency of the Marquis of Hertford, who was supported by the Lord Mayor and the Sheriffs of London and Middlesex. The subscriptions amounted to £1271.

A deputation representing the Irish National Teachers' Organisation waited on the Chancellor of the Exchequer last Saturday and urged upon him the advisability of providing something in the way of a pension to the teachers in Ireland, either directly or by a system of deferred annuities. Sir Stafford Northcote promised due consideration to the matter.

Judgment was given in the Queen's Bench Division last Saturday in the action brought by Mr. Lynam Thomas, the well-known artillery, to recover damages against the Government for their adoption of his invention without compensating him for it. A jury had returned a verdict in his favour, but this was now set aside.

A bazaar has been held this week in the conservatory of the Royal Horticultural Gardens, for the benefit of the All Saints' Convalescent Home, Eastbourne. The stallkeepers were the Duchess of Westminster, the Duchess of Manchester, Maria Marchioness of Ailesbury, the Marchioness of Ormonde, and several other ladies of rank.

The first annual meeting of the International Association for the Total Suppression of Vivisection was held on the 21st inst. at Willis's Rooms, under the presidency of Sir Henry Drummond Wolff, M.P. Resolutions were adopted in favour of an agitation for the total abolition of vivisection, and thanking Mr. Holt for the service he had rendered in pressing the subject upon the attention of the Legislature.

The Lord Mayor and Lady Mayoress gave a ball at the Mansion House on the 21st inst. in honour of the Mayors of the United Kingdom. The Mayors and Mayoresses of 123 cities and towns in the kingdom were present, headed by the Lord Mayor and the Lady Mayoress of York and the Mayor and Mayoress of Manchester. The town clerks of seventy-eight boroughs were also among the guests.

The third annual public dinner in connection with the Royal Albert Orphan Asylum took place on Wednesday, at the City Terminus Hotel, Cannon-street—the Marquis of Hereford presiding. Subscriptions to the amount of £1271, including £25 from the chairman and £10 10s. from the Lord Mayor, were announced.—Some particulars of other orphanages will be found at page 622.

By the steam-ship Antenor, which arrived in the Victoria Docks on Tuesday, the Zoological Society received a valuable consignment of animals, presented to them by Sir Harry St. George Ord, K.C.B., lately Governor of the Straits Settlements. Among these is a fine specimen of the black leopard, which fills up a vacant space in the series of the large carnivora now lodged in the lion-house.

At the annual meeting of the supporters of the North-Eastern Hospital for Children, held on Tuesday morning at the Cannon-street Hotel—Mr. J. G. Barclay in the chair—a special appeal was made for sufficient funds to extend the in-patients' department, the accommodation at present at the command of the hospital authorities being far too limited adequately to meet the demand made upon it.

Reuben Williams and James Andrew Cameron were indicted at the Central Criminal Court on Tuesday for conspiring to obtain 30s. by fraud and false pretences, by selling the prosecutor, as "a fine singing bird," a common sparrow painted in imitation of a bullfinch. They were found guilty, and, previous convictions having been proved against them, the Recorder sentenced Cameron to six and Williams to three months' hard labour.

A meeting of shareholders of the Direct United States Cable Company (Limited) was held on Tuesday—Mr. Pender, M.P., in the chair—when it was resolved to wind up the company and merge its business with that of the Anglo-American Company. The resolution was contested by some shareholders, and a poll was taken, which showed that the proportion in favour of the amalgamation was as nine to one.

The weekly return of metropolitan pauperism shows that the total number of paupers at the end of last week (the third week of June) was 78,738, of whom 36,304 were in workhouses, and 42,434 received out-door relief. Compared with the corresponding weeks in 1876, 1875, and 1874, these figures show a decrease of 258, 6495, and 15,674 respectively. The number of vagrants relieved on the last day of the week was 639, of whom 443 were men, 160 women, and 36 children.

A block of buildings erected by the Metropolitan Artisans and Labourers' Dwellings Association, adjoining Battersea Park, was opened by the Earl of Beaconsfield last Saturday. At the conclusion of a speech of some length on the subject of the steps taken by the Government with the object of aiding the carrying out of such undertakings, he announced that her Majesty takes a deep interest in this movement for improving the dwellings of the people, and had commanded him to express her wish that her name may be associated with this institution, and that in future these buildings may be called the Victoria Dwellings for Artisans.

A large and influential meeting was held on Wednesday last at the Mansion House, under the presidency of the Lord Mayor, to advocate and organise the establishment in London and its suburbs of hospitals for the middle classes—i.e., hospitals to pay their own expenses. The speakers included Mr. John Walter, M.P., Canon Miller, Monseigneur Capel, Sir Rutherford Alcock, K.C.B., Mr. Clifford Wigram, Mr. Jonathan Hutchinson, F.R.C.S., and others; and the favourable way in which the resolutions were received indicated that the movement has excited much sympathy among the upper and middle classes of society. The Duke of Northumberland, the Lord Mayor, and many others have joined the provisional committee of management, and all communications on the subject addressed to the Mansion House will receive immediate attention.

A return has been issued of the number of public statues within the Metropolitan Police district which have been transferred to the charge of the Commissioners of Works and Public Buildings under the provisions of 17 and 18 Vic., cap. 33, sec. 7, or erected under section 2 since the passing of that Act, with the description of the places where such statues have been placed, and the date when they were so transferred. They are as follows:—Richard Cœur de Lion, Old Palace-yard, 1851; Sir James M'Grigor, Chelsea Hospital grounds, 1865; Sir John Franklin, Carlton-terrace-gardens, 1866; Lord Herbert of Lea, Pall-mall, 1868; the Guards' Memorial, Waterloo-place, 1873; the Earl of Derby, Parliament-square, 1874; Viscount Palmerston, Parliament-square, 1877; Sir Robert Peel, Parliament-square, 1877. The statues of Dr. Jenner, now in Kensington-gardens, and of Major-General Havelock, in Trafalgar-square, have for some years been maintained by the Commissioners of Works, although the forms of the Act 17 and 18 Vic., cap. 33, have not in the case of these statues been complied with.

There were 2270 births and 1271 deaths registered in London last week. Allowing for increase of population, the births were 11, and the deaths 76, below the average numbers in the corresponding week of the last ten years. The fatal cases of smallpox, which in the six preceding weeks had slowly but steadily declined from 78 to 55, further decreased to 41 (a lower number than in any week since the beginning of November last), of which 19 were certified as unvaccinated and 13 as vaccinated; in the remaining 12 cases the medical certificates did not contain any information relating to vaccination. The number of smallpox patients in the Metropolitan Asylum Hospitals, which had steadily declined from 984 to 796 during the four preceding weeks, had further declined to 726 last Saturday. The deaths referred to diseases of the respiratory organs were but 166 last week, and were 18 below the corrected weekly average. There were 42 deaths from measles, 14 from scarlet fever, 7 from diphtheria, 35 from whooping-cough, 22 from different forms of fever, and 46 from diarrhoea.

GREAT FIRE AT ST. JOHN, NEW BRUNSWICK.

A great disaster has befallen the British colonial city of St. John, the capital of New Brunswick, which must be distinguished from St. John's, Newfoundland. It is situated at the mouth of the river St. John, in the Bay of Fundy, shielded from the open Atlantic by the peninsula of Nova Scotia. We give a view of the city and harbour, which has an advantageous position both for maritime and inland trade. It is connected, by the Intercolonial Railway, with the harbour of Halifax, in Nova Scotia, and with Montreal and the Grand Trunk Railway of Canada, on the other hand; while it enjoys also an immediate communication by railway with the New England States of the Union. The calamity which has befallen St. John is a great fire, on Wednesday week, by which nearly half the town has been destroyed, and all its business houses and shops, and the dwellings of between 15,000 and 18,000 people. The fire began at half-past two in the afternoon, at M'Laughlin's boiler factory, in the suburb of Portland. It spread rapidly, favoured by a strong north-west wind, over the lumber-yards and wooden buildings, and thence extended to the business quarters of the town, the wharves and shipping. The principal streets burnt are Prince William, Princess, Duke, Dock, Market-square, King Water, German, Canterbury, King-square, Leinster, Charlotte, Orange, Sydney, Carmarthen, Wentworth, and Pitt streets. Among the buildings destroyed are the Custom House, the Post Office, Academy for Music, the Dramatic Lyceum, the Victoria and Royal Hotels, the New Brunswick, Montreal, Maritime, and Nova Scotia banks, the Savings Bank, the Victoria school, Grammar school, Trinity, St. Andrew's, German-street, Methodist Centenary, and other churches; every newspaper and telegraph office, the City Hall, the police office, and the Water Commissioners' office. There is only one bank saved, the British North American. Every wholesale store is burnt, and nearly all the retail stores. The amount of property destroyed is reckoned at fifteen million dollars, or three millions sterling, of which about one third is covered by insurance. Many thousands of people are suddenly rendered homeless and destitute; about a dozen lives were lost in the fire. The chief cities of Canada and the United States have promptly sent aid to the sufferers, both in gifts of money and of food and clothing; the Legislature of the Canadian Dominion has also voted a relief grant. A subscription has been opened by the Lord Mayor of London, at the Mansion House, for this benevolent purpose, and many handsome donations have been received.

The polling for Dungarvan took place last Saturday, when Mr. O'Donnell, the Home-Rule candidate, received 137 votes, against 119 given to Mr. Henry Matthews.

THE TRIENNIAL HANDEL FESTIVAL.

This has, of course, been the special musical event of the week. The celebration which closed yesterday (Friday), as we have already stated, was the eighth that has been held at the Crystal Palace, six of these having been triennial, the two earliest meetings having taken place in 1857 and 1859. We gave last week a notice of the antecedents of those festivals and details of the arrangements for the occasion now referred to, and may therefore now restrict ourselves to passing comments on the performances, beginning with the "grand public rehearsal" of yesterday (Friday) week, which, although so entitled, had little, if any, of the effect of a rehearsal, from the thorough preparation ensured by the executants' long previous practice of and familiarity with the music, and from there having been no occasion for those stoppages and recommencements which are frequently prevailing features at rehearsals.

The pieces rehearsed on Friday week were taken from each of the programmes of the following Monday, Wednesday, and Friday, and such was the efficiency of the executants that there was no instance of stoppage, such as usually characterises a rehearsal.

As at the previous Crystal Palace festivals, the first performance day, on Monday, was devoted to "The Messiah," contrary to the usage prevailing at most of our provincial festivals, where Handel's "Christian" oratorio is generally reserved for the close. Quite as grand a climax, however, in a musical sense, is obtained by the Crystal Palace programme, which terminates with the composer's "Jewish" oratorio, a work containing some of his sublimest choral writing.

The first appearance of Mdlle. Albani at a Handel Festival was a prominent feature in Monday's performance. This excellent artist produced a very marked impression by the exquisite quality of her voice, the refinement of her style, and her earnest expression, as displayed in the airs "Rejoice greatly," "Come unto Him," and "How beautiful are the feet." The other soprano air, "I know that my Redeemer liveth," was expressively rendered by Madame Edith Wynne; Madame Patey gave the contralto airs, "But who may abide," "O, thou that tellest" (with chorus), "He shall feed His flock," and "He was despised," with great effect. The opening recitative, "Comfort ye," and air, "Every valley," were artistically rendered by Mr. Cummings; the other tenor solos having been assigned to Mr. Vernon Rigby, who was most successful in the air "Thou shalt break them." Herr Henschel's good voice and style were heard to advantage in the recitative, "For behold," and air, "The people that walked in darkness;" and Mr. Santley declaimed with great success the airs "Why do the nations" and "The trumpet shall sound," the latter with Mr. T. Harper's skilful trumpet obligato. The chorus-singing was generally excellent—"For unto us" and "Hallelujah" having been, as usual, the special effects in this respect. The oratorio was preceded by the National Anthem.

Wednesday's programme was as follows:—

PART I.			
Overture..	Occasional Oratorio.
Coronation Anthem	..	The king shall rejoice.	..
Recitative..	Mr. Vernon Rigby	"Thy will, my friends	..
Air..	..	(Call forth thy powers	Judas Maccabæus
..	..	How willing my paternal	..
..	Mr. Santley	love	Samson.
Chorus..	..	Sing, O ye heavens	Belshazzar.
Recitative..	..	Return, O God of hosts	..
Air..	Madame Patey	To dust his glory	..
Chorus..	..	Honour and arms	Samson.
Air..	Signor Foll.	Let the bright seraphim	..
..	Madame Adeline	Let their celestial concert	..
Chorus..	(Trumpet Obligato, Mr. T. Harper.)
Overture..
Air (and Chorus)..	Mdlle. Albani	Tyrants would in impious	Athaliah.
..	..	songs	..
Air..	Madame Patey	In the battle	Deborah.
..	(Organ Obligato, Mr. Willing.)
Recitative..	Mr. Edward Lloyd	"Thy will, six times	..
..	..	Glory to God	Joshua.
..	Mr. Edward Lloyd
PART II.			
Concerto for the Organ and Orchestra (No. 2, in B flat.)
Air..	Mr. Edward Lloyd	Love in her eyes	..
..	Mdlle. Albani	Heart, thou seest	..
..	..	Galatea, dry thy tears	..
Chorus..	..	Næc alio bosco	Egip.
Air..	Mr. Santley	Tyrant now no more	Hercules.
Chorus..	..	O let eternal honours	Judas Maccabæus
Recitative..	Madame Adeline	From mighty kings	..
Air..
March..
Air (and Chorus)..	Mr. Vernon Rigby	The trumpet's loud	Dryden's Ode.
..	..	clangour	..
Air (and Chorus)..	Madame Lemmens	As from the power	..
Chorus..	..	The dead shall live	Orlando.
Air..	Signor Foll.	Sorge infesta	..
Trio and Chorus..	..	See, the Conquering hero	Joshua.

The specialty of the day was the second appearance of Madame Adeline Patti at a Handel Festival, the first occasion having been in 1865. In each of the solos assigned to her the great prima donna displayed her rare qualities of voice and style with triumphant success, having been enthusiastically applauded in each of her solos, and encored in the second, the fine trumpet-playing of Mr. T. Harper in the obligato having been a valuable feature—the obligato to Madame Patey's air having also been skilfully played. Most of the other vocal pieces, as well as the singers, are so well known as to render specific comment unnecessary. It will be observed that the first part of the selection consisted of sacred music, and the second portion almost entirely of secular pieces. The numbers distinguished by an asterisk had not been given at any of the previous festivals, but are mostly familiar from performances elsewhere. The anthem, although less generally known than that beginning "Zadoc the priest," is fully as fine a composition. It and the other choral music of the day was excellently rendered; and that the vocal solos were worthily given may be inferred from the names of the singers.

The organ concerto was one of the most popular of the several works of the kind produced and performed by Handel. It was executed by Mr. Beat (with amplifications and an elaborate cadenza) with that skilful manipulation for which the eminent organist of St. George's Hall, Liverpool, has long been renowned. The orchestral pieces were finely played, the march with which the "Occasional" overture ends having had to be repeated.

The rare energy and the practised skill of Sir Michael Costa were powerful aids to the success of the Festival.

Of the performance of "Israel in Egypt" yesterday (Friday), the concluding day, we must speak next week.

THEATRES.

Signs of the approaching end of the dramatic season increase. Mr. Hare, for instance, announces the last week of the Court. The Royalty opened on Monday, under the management of Mr. Sleight, for the purpose of employing the pupils of the School of Dramatic Art in a series of performances. On Monday Mr. Gilbert's mythological comedy of "Pygmalion and Galatea" was presented, followed on Tuesday by "Cyril's Success," and on Wednesday by "Checkmate." The remainder of the week has been devoted to "The Wife's Secret," "Meg's Diversion," and "Love's Sacrifice." The company have already been seen in these pieces at Ripon House, and it is to be hoped that they have since received all the success they

merit. We have also to record the performance of "The Bell-Ringer of Notre Dame; or, Esmeralda the Gipsy," at the Park, which has for some time been favourably accepted by the habitués of this suburban theatre. The bill has been lately strengthened by the production of a Surrey drama, entitled "The Message from the Sea," founded on Charles Dickens's Christmas story. The audience awarded it a warm reception. Miss Blackwood, in the part of Mog, the inn servant, was greatly successful. On Saturday she appeared as the lost Em'ly, in the drama of that name, and to-night will act in another popular character for her benefit. The house will then close until next September.

At the Folly the extravaganza of "Robinson Crusoe" was revived last Saturday. Miss Lydia Thompson again assumes the character of the famous hero, and again wins the unanimous suffrage of a delighted audience. The cast in other respects, too, resembles the original. Mr. Lionel Brough retains the part of John Cocks, alias King Jim, and Mr. Philip Day that of Will Atkins, the bold private. Mr. Forrester is still the Prime Minister of the Queen of Nymony-Nyums; now represented, however, by Miss Harriet Coveney. Miss Marie William substitutes Miss Topsy Venn as Gig, the co-swain, and plays with vigour. The necessary alterations, nevertheless, that have been made do not in the least impair the general effect. The burlesque is preceded by the revival of Mr. Craven's drama of "Miriam's Crime," Miss Rachel Sanger supporting the rôle of the heroine admirably, and the general cast being thoroughly adequate for the entire representation.

THE VOLUNTEERS.

As usual in the last few weeks before the Wimbledon meeting, every Saturday afternoon sees the turn out of many thousands of the metropolitan volunteers, either to take part in their annual official inspections or to drill in preparation for that event. Last Saturday there were eight inspections in London and its immediate neighbourhood, the principal of which, mainly from the fact that the Commander-in-Chief was the inspecting officer, was that of the London Rifle Brigade. The regiment, in ten good companies and two companies of cadets, the whole being under the command of Lieutenant-Colonel Hayter, M.P., paraded at the foot of the Duke of York's Column, from which they marched to Hyde Park, where they were formed in line upon the Guards' ground, in a space kept by a detachment of police under Inspector Nightingale. At the close of the inspection the Duke of Cambridge complimented the men on the soldierly care they seemed to take of their arms and accoutrements, as well as on their efficiency in drill.

In another part of Hyde Park, the Queen's (Westminster), under the command of the Duke of Westminster, passed a satisfactory inspection before Colonel Fletcher, C.M.G., of the Scots Guards. There were twelve companies of twenty-eight files, the total strength being nearly 800 of all ranks.

The St. George's, of whom 477 paraded, in six companies, commanded by Lieutenant-Colonel Lindsay, were inspected by Colonel Fitzroy, in the grounds of Lambeth Palace.

Colonel Gordon, the Commanding Royal Engineer of the Home District, inspected the 1st Middlesex Engineers in a field adjoining the Battersea Foundry. The corps had 520 of all ranks on parade, in six companies, Lieutenant-Colonel Ransome commanding.

The 1st Surrey Artillery, in ten batteries, under Major Burls, underwent the first portion of their inspection at the hands of Colonel Waller, R.A., in Battersea Park.

The 4th Administrative Battalion Surrey were inspected in Southwark Park by Colonel Lane Fox, commanding the 48th sub-district; the 1st Administrative Battalion Tower Hamlets undergoing the same ordeal in West Ham Park at the hands of Lord Abinger, of the Scots Guards; while the Civil Service Rifles concluded their week's camping out by being inspected at Wimbledon.

The drill competition of the 37th Middlesex the same evening was of a rather novel character, being a contest of the right against the left half battalion of the corps. Each half battalion was restricted to four companies of twenty file, and a very keen competition in battalion and light infantry movements ensued, the orders being given by Major Richards from a prepared list, besides which each Captain had to drill the wing to which his company belonged. At the end of a three hours' competition the judges awarded priority to the right half battalion.

Last week the Inns of Court were inspected, in the Temple Gardens, by Lord Abinger; and the 1st Surrey, at their headquarters, by Colonel Hyde Page. In both cases the inspecting officers expressed themselves satisfied with the drill.

At the West of Scotland Rifle meeting at Edinburgh during the past week the bronze medals of the National Rifle Association were won as follows:—Edinburgh, Private Lillie; Midlothian, Quartermaster Paterson; Peebles, Lieut. Blackwood.

At the battalion competition of the Bloomsbury, the challenge cup was again secured by Private Heathcote.

The annual prize meeting of No. 3 (Captain Wilson's) company of the 9th (West) Middlesex was held on the 20th, at Wormwood-scrubbs, when a number of prizes were competed for, the principal winners being Lieutenant Bell, Sergeant Wright, Captain Wilson, and Corporal Edmonds. Corporal Schroder, Sergeant Wright, Private Pennymore, and Colour-Sergeant Sapsford also took prizes. The company challenge badge was won by Corporal Edmonds.

A match took place on Tuesday week at Wimbledon between the 7th Surrey and 49th Middlesex, twelve men a side, the scores being—7th Surrey, 782; 49th Middlesex, 694.

Major-General Stephenson has addressed to the Adjutant-General of the Forces a report on the last Easter Monday volunteer review. The manoeuvres were upon the whole conducted to his satisfaction, and he remarked a general improvement in the volunteers, but their progress is only slow.

The *Dublin Mail* says the Lord Lieutenant of Ireland has given a prize to be competed for at the annual meeting of the Irish Rifle Association at Dundalk.

The Govan Tramways, Glasgow, were on Wednesday opened with steam power.

An open competition for forty-six boy clerkships in the lower division of the Civil Service will be held in London, Edinburgh, and Dublin on July 19 and 20.

Mr. Stanford, of Charing-cross, has begun the publication of a series of sheets which will form a map of the theatre of war in Europe on a large scale.

A new illustrated monthly publication, entitled *Industrial Art* (Hardwicke and Bogue), filling a gap in our art-literature, will appear on July 1.

The Duke of Devonshire opened a fine-art exhibition at Derby on Wednesday. The Mayor, Corporation, and public bodies proceeded through the town to the building.

ST. JOHN, NEW BRUNSWICK, PARTLY DESTROYED LAST WEEK BY FIRE.

OUR PORTRAITS.

SIR THEOPHILUS SHEPSTONE, K.C.M.G., OF NATAL.

We give this week the portraits of the late Admiral Rous, the veteran sportsman and highest authority upon racing matters; Lady Stirling-Maxwell, better known as the Hon. Mrs. Norton, the well-known authoress, who died on the 15th inst.; Sir Theophilus Shepstone, of South Africa, who has undertaken the administration of the new Transvaal Province for her Majesty's Government; and the late Mr. Fletcher Harper, of the eminent firm of "Harper and Brothers," publishers and newspaper proprietors at New York. The memoirs of Lady Stirling-Maxwell and Admiral Rous were given in our last publication.

Sir Theophilus Shepstone, K.C.M.G., of Natal, was knighted last year for his services to the Colonial Government. He has long been esteemed one of the ablest and most trustworthy public servants in that South African province. He was Secretary for Native Affairs under the first Government of Sir Benjamin Pine, about twenty years ago, and proposed to Sir George Grey, who visited the province as High Commissioner in 1855, a scheme for drawing off part of the increasing Zulu population into the unoccupied territory south-west of Natal, offering himself to take charge of them. His proposal was not accepted; and the deplorable conflict of 1873, in Sir Benjamin Pine's second term of government, causing much painful discussion, in which Bishop Colenso took a very prominent part (Langalibalele is a name that will be remembered awhile), has led to a complete change in the Constitution of Natal. The measures of Sir Garnet Wolseley and Sir Henry Bulwer, during the last two years, with the entire policy approved by Lord Carnarvon and agreed to by the Natal Legislature, for dealing with the native population, were in a great degree owing to Sir Theophilus Shepstone's good advice. They have provided for the fixed residence of European civil magistrates, with special courts of justice, at the native district locations, affording better security for loyal and peaceable behaviour, and lessening the power of native chiefs. The Zulus and other Kaffirs in Natal are

THE LATE LADY STIRLING MAXWELL (HON. MRS. NORTON).

THE QUEEN'S NEW BARGE FOR VIRGINIA WATER.

THE LATE MR. FLETCHER HARPER, OF NEW YORK.

more than ten times the number of the European settlers, and are still increasing with alarming rapidity, so that the state of affairs there is the very reverse of what it is in New Zealand. Sir Theophilus Shepstone has continued, or has resumed more than once, his tenure of office in Natal as Secretary for Native Affairs; but he was lately called upon to intervene for the salvation of the neighbouring Dutch Republic of Transvaal, which had rashly provoked a Kaffir war, and found itself in danger of being utterly destroyed by its too powerful enemy. After succeeding, by the use of his well-earned influence with the natives, in persuading Secocoeni, the Kaffir chief, to spare the Transvaal, he was instructed by the British Government to warn the Dutchmen that their only chance of future safety would lie in the annexation of Transvaal to her Majesty's South African Dominion. This important revolution has been effected without any real opposition; and Sir Theophilus Shepstone, late Special Commissioner to the Transvaal Republic, has been charged with its re-organisation and provisional government, subject to the higher authority of Sir Bartle Frere, now Governor of the Cape Colony.

The late Mr. Fletcher Harper, of New York, was the youngest of four brothers, James Harper, John Harper, Joseph Wesley, and Fletcher, who have carried on business together, more than thirty years, with remarkable popularity and commercial success. Their father was a carpenter, farmer, and storekeeper at Middle Village, Long Island. The two elder brothers were apprenticed to the trade of printer, and started in 1817 upon their own account; their two younger brothers were apprenticed to them, and were afterwards taken into partnership. The house of "Harper and Brothers" is one of the largest concerns of its kind in the world. Its monthly literary magazine, its weekly illustrated paper, and its cheap reprints of all the most popular English books, supply a vast multitude of American readers with a great variety of entertainment. All four brothers, we understand, have left sons now in the firm, by whom its business is carried on as before.

THE LATE ADMIRAL ROUS.

NEW MUSIC.

SPECIAL NOTICE.
PIANOFORTES FOR HIRE.REBUILDING OF WARE-ROOMS,
Nos 49 and 50, NEW BOND-STREET, W.

MESSRS. CHAPPELL and CO. beg to inform their Clients and the Public that they will shortly commence REBUILDING the whole of the above PREMISES, and, in order to make room during the temporary diminution of space, they now offer Pianofortes, Harmoniums, and Organs on Hire at greatly reduced rates per annum.

Pianinos, from	5 guineas per year.
Cott. & Pianos, from	8 " "
Grandes from	12 " "
Harmoniums, from	15 " "

50, New Bond-street.

CLEARANCE SALE of PIANOFORTES.

REBUILDING of PREMISES.

Messrs. CHAPPELL and CO. beg to announce that they will shortly commence rebuilding part of their Show-Rooms, Nos. 49 & 50, New Bond-street. Now offer to the Public a large Stock of Pianofortes, New and Secondhand, at greatly reduced prices.

BROADWOOD, CHAPPELL,
COLLARD, ROSENKRANZ,
LIPP, 50, New Bond-street.

CLEARANCE SALE of HARMONIUMS

and ORGANS.
Messrs. CHAPPELL and CO., for reasons above stated, now offer their large Stock of Alexandre Organ-Harmoniums, American Organ-Harmoniums, and Pipe Organs, at an immense Reduction for Cash, for Annual Hire, or on

THE THREE YEARS' SYSTEM of HIRE.

PIANOFORTES of every description by all

the most celebrated makers from Two Guineas a Quarter.

SECONDHAND HARMONIUMS.

Three Guineas and Upwards.

No. 50, NEW BOND-STREET.

CHAPPELL'S ENGLISH 20-GUINEA or

SCHOOL-ROOM PIANOFORTE, with Check Action, in Canadian Walnut or Mahogany. This instrument combines good quality of tone and excellence of workmanship. Capable of enduring hard practice without going out of order. In Solid Oak or White Ash, 22 ga.; Rosewood or Walnut Case, 27 ga.

CHAPPELL and CO.'S ORIENTAL

MODEL PIANOFORTE, Iron Frame, Trichord throughout, Check Action, Seven Octaves, Solid Walnut Case, FIFTY-FIVE GUINEAS; or in Solid Mahogany or Black Walnut Case, and Check Action, FORTY-THREE GUINEAS; with Plain Action, THIRTY EIGHT GUINEAS.
Made expressly to withstand the heat and moisture of extreme climates. Every part that is glued is also secured with screws. The felt on the hammers, &c., is fastened with pins. The back and the silk frame are lined with perforated zinc to keep out damp and insects; and every precaution taken that has been suggested by persons who have had many years' experience in the care of musical instruments in India and China.
Testimonials of the durability of these instruments can be seen at 50, New Bond-street.

The price includes—1. Packing-cases of tin and wood; 2. A suitable tuning hammer or key; 3. A tuning fork; 4. Some additional strings; 5. A Book on Tuning and Preserving the Instrument; 6. And the Carriage to the Docks.
Show-Rooms, 50, New Bond-street.
Factory, Chalk Farm-road.

CHAPPELL and CO.'S MIGNON

IRON GRANDS, with Transverse-String Bass, 25 ga. to 25 ga. The smallest Horizontal Piano made; length only 5 ft. 6 in.

L'HARPE EOLIENNE, ORGUE DE

SALON, with eighteen stops, fourteen half sets of reeds, percussive action, double expression, pneumatic action, &c., of the finest workmanship. This model has been commended highly by all persons who have tried it. Price 150 ga.
CHAPPELL and CO., 50, New Bond-street.

CHAPPELL and CO.'S ALEXANDRE

ORGANS. The best imitation of real pipe organs yet produced. From 20 ga. to 120 ga. A number of these instruments returned from hire to be sold at greatly reduced prices for cash. Full descriptive Catalogue free by post.
CHAPPELL and CO., 50, New Bond-street.

SKETCHES ON BOARD THE TRAINING-SHIP WARSPITE, AT WOOLWICH, DURING THE VISIT OF THE PRINCE AND PRINCESS OF WALES.

ROYAL VISIT TO THE WARSPITE TRAINING-SHIP.

On Thursday week, as mentioned in our last, the Prince and Princess of Wales, with their sons Prince Albert Victor and Prince George, went down the Thames to Woolwich, to open the new training-ship of the Marine Society, and to present the prizes won by the boys. The Warspite is an old line-of-battle ship, a two-decker, once called the Conqueror, which has been fitted up to replace the former Warspite, destroyed by fire two or three years ago. She lies off Charlton Pier, at the west end of Woolwich Dockyard. The Prince and Princess, with their own two boys, left Whitehall Stairs soon after noon in a fast boat of the London Steam-Boat Company, preceded by the Thames Conservancy boat. Lady Suffield, the Marquis of Hamilton, Lord Colville of Culross, Captain the Hon. Carr Glyn, R.N., Major Russell, and the Rev. J. Dalton were in attendance. Admiral Sir R. Collinson, Deputy-Master of the Trinity House; Admiral Sir F. Nicholson, Deputy-Chairman of the Thames Conservancy Board; and Captain Pelly, R.N., Chairman of the Steam-Boat Company, accompanied the Royal party. The steamer Victoria followed as an escort. The shipping in the pool and the Trinity launches at Blackwall were gay with flags; and from Greenwich and other places on shore cheers were raised as the Royal party came near, in their brief voyage to Woolwich.

At one o'clock the field-pieces of a battery of artillery, which had taken up its position on the Kentish bank of the Thames to the east of the Warspite, announced that the Prince's boat was in sight. The boys had already manned the bulwarks in honour of the arrival of a number of visitors on the special steamer of the Society, the Duke of Connaught; they now swarmed up the rigging and stood out upon the yards, while a band in the dockyard played the National Anthem and the shore artillery thundered a salute. A guard of honour of the boys, with drawn cutlasses, and their blue flag of the Society of Arts, won by competition in drill, were arrayed on the gangway. The Prince and Princess as they stepped on deck were received by the President of the Society, the Earl of Romney, with Lady Romney, and the members of the committee. The Prince wore his uniform as honorary Captain of the Royal Naval Reserve, with the broad band of the Garter and other decorations; his sons were dressed as Naval Cadets. The officers of the Army and Navy in his suite and the many distinguished Naval visitors were in full uniform. The Princess wore a black and lavender striped silk costume, with violets of two different shades over her bonnet, and a bunch of violets on her breast. A fleet of steamers with flags flying had gathered round the vessel, and the dockyard was thronged with ladies and other spectators, who occupied seats on the timber strewn about. It became a cloudy day later on, but at that moment the sun was shining on the smart young sailors of the Warspite, who looked, in their clean white and blue uniforms, as if the change from London streets to a training-ship had done them good.

Their Royal Highnesses were conducted to the raised poop and looked on at the exercises of the boys. At the sound of the trumpet, followed by the shrill whistle of the boatswain, the lads ran aft with the halyards to make sail. They shortened and furled sail at the command of Captain Phipps, and then marched round the ship, 230 strong, to the music of their own drum and fife band playing "The British Grenadier." Their big black dog Neptune ran in front, led by a negro boy, who had been found destitute about the docks and sent to the Marine Society for shelter and instruction. After this there was play with single-stick, and then the boys gathered aft, and while three of them held the flags drooping forward the rest sang the late Admiral Davies's hymn, "In darkness and in danger, on life's rough troubled sea." The prize winners were afterwards called up by Lieut. Sadler, R.N., the secretary, and received their gifts, books of travel and adventure, knives, and warm monkey-jackets for winter, from the gracious hands of the Princess of Wales. When the distribution was over, all the boys came up to the quarterdeck and were addressed by the Prince of Wales, in a few words of good advice and kindly encouragement. Their Royal Highnesses were presently entertained, with a large party, at luncheon on the main deck—the Earl of Romney in the chair. His Lordship, in proposing the health of the Prince and Princess of Wales, alluded to the fact that their sons were to receive a naval training in the Britannia. The Prince of Wales, in acknowledging the toast, commended the Marine Society for the good work it had done since its establishment a hundred and twenty years ago, and observed that there would be room for a hundred more boys in this large vessel, and more money would be required, for which he asked subscriptions and donations. He remarked that the noble chairman was the fifth Lord Romney who had been President of the Marine Society. Among the subscriptions announced were those of the Queen and the Prince of Wales, a hundred guineas each. The Fishmongers' and the Grocers' Companies gave £100 each; and Dr. Siemens and Mr. Jackson contributed the same amount. After inspecting the 'tween-decks and expressing great satisfaction with the ordinary arrangements and the special arrangements for the day, their Royal Highnesses returned to town as they had come, in their steam-boat, ornamented with palms and flowers. As the Warspite was left, at a little after half-past three, the lads stood upon the gunwale and on the yards, and sang "God Bless the Prince of Wales," the voices of those on the yards striking the ear as a sort of echo which came after the song of the boys below. Cheers were given at the clove, which were caught up by the people congregated on the boats and wharves around, and the cannon fired a parting salute.

Yesterday week Lord Sandon delivered the prizes to the boys of the training-ship Conway, in the Mersey; and Mr. T. Brassey, M.P., distributed prizes to the cadets on board the training-ship Worcester, which is stationed off Greenhithe. Among these prizes was the gold medal granted by her Majesty.

Mr. Shaw Lefevre is to be the new president of the Statistical Society.

The Town Council of St. Albans have adopted a petition to the Queen praying that letters patent may be granted for raising their town to the dignity of a city.—Cardinal Manning laid the foundation-stone of a new Roman Catholic church yesterday week at St. Albans, in honour of the protomartyr of Britain. It is intended to erect, in connection with the new church, a seminary, with a view to the education of the children of Roman Catholic parents.

The Cobden statue, which is to be unveiled by Mr. Bright on Wednesday, July 25, has been erected in the Bradford Exchange. From its position, at the lower end of the room, the statue, which is of white marble, forms a very conspicuous object. It stands on a polished granite pedestal, in the centre of which are carved in gilt letters the word "Cobden," and around it, in a circle, "Free Trade," "Peace and Goodwill among Nations." At the back of the pedestal is an inscription, also in gilt letters, stating that the statue is the gift of the late Mr. G. H. Booth, a citizen of the United States.

THE WAR.

LEAVES FROM OUR ARTISTS' SKETCH-BOOKS.

The scenes and sketches of Turkish military life, from the pencils of our Special Artists both on the Danube and in Asia Minor, which are submitted this week to the readers of the *Illustrated London News*, will awaken, I venture to think, not only well-deserved attention owing to the graphic merit displayed in the drawings, but a deeper interest arising from the crisis into which the condition of the Turkish army seems to be passing. That interest will be quickened by the touching letter just addressed to the *Times* by William Howard Russell, while the renowned Correspondent of that journal before Sebastopol, with reference to the dire sufferings of the Ottoman troops now confronting the Russians in Armenia. No impartial observer who has studied the Eastern Question *in situ* can deny, abstractedly for or against either of the contending parties as he may be, that the Turk, as a soldier, is one of the bravest of the brave. His natural valour is enhanced by the precepts of his creed. The Koran dwells repeatedly on the doctrine that it is necessary to pass through groves of sabres and javelins ere Paradise is reached; thus the Moslem warrior fights all the more desperately because he unfeignedly believes that, in combating for Islam, he is obeying the distinct behests of the Prophet, and that if he is slain he will go direct to Heaven. The Russian soldier, of whom very few people have a good word to say, is imbued on his part with an analogous fortitude of superstitious belief. To him the Czar Alexander stands in lieu of Mahomet. St. Basil, St. Sergius, St. Nicholas, and St. Alexander Nevski are to him as Abu-bekhr, Omar, Osman, and Ali are to the Moslem; and the Muscovite private, although he may care little about Stamboul, has an indistinct idea in his benighted head that the safety of Jerusalem is menaced, and that he is a kind of Crusader. This gives fanaticism to his courage; and similar fanaticism is one of the most valuable adjuncts to the fighting qualities of the Osmanli; still, were Turks and Moscovs matched with perfect equality, and if the regimental officers, the drill and the material of war of the former were as good as those of the latter, I cannot help thinking that, soldier for soldier, the Osmanli would have the advantage over the Slav. The Russian soldier is content to live on the coarsest food; but an abundance of some kind of victual he must have, or his physical and moral stamina will alike rapidly become deteriorated. He is far from abstemious in the way of potables, and will greedily drink every kind of liquor that comes in his way; and, finally, his habits are not nearly so cleanly as those of his Moslem foe. For the rest, both Turkish and Russian soldiers are equally stubborn in front of the foe, and amenable to discipline in camp; only the Russian is capably and the Turk infamously officered regimentally; while the Russian field service, so far as concerns the medical staff and the commissariat, is admirably and the Turkish wretchedly organised.

Dr. Russell's summary of the state of the Turkish troops in Armenia is brief but harrowing. Their sufferings, he learns from a friend at Erzeroum, are intense. There are very few doctors. There are no ambulances or field hospitals. After a recent engagement the wounded were carried seventy miles, with undressed wounds, on baggage-carts and the backs of mules, ere they could find medical succour. The Red Cross Society is said to be doing nothing for Asia Minor (at Rustchuk, on the Danube, by-the-way, the Russians are accused of bombarding the ambulances of the Red Crescent); and one day, near Erzeroum, after a battle, 700 wounded men lay groaning, without a field hospital. Regimental hospitals there are none. *The Russians have ambulances in the rear of their skirmishers*; but these conveniences the Turkish army in Asia Minor wholly lack. After this I apprehend that those who sympathise, I will not say politically, either with Russians or with Turks, but with Suffering Humanity itself, will take Dr. W. H. Russell's simple and grievous narrative to heart; that they will remember that the Stafford House Turkish Soldiers Relief Committee is still sitting, and that the excellent Lady Strangford has made a fresh appeal for funds—this time to succour and nurse, not the victims of Turkish atrocities in Bulgaria, but the wounded Turkish soldiers themselves. For my part, if even a Bashli-Bazouk gets his skull cleft by a sabre cut or his leg smashed by a shell, I conceive that he has as strong a right as anyone else can have to be tenderly and mercifully treated. When he becomes a patient he ceases to be a Bashli-Bazouk. Lady Strangford is anxious to send English nurses out to the Danube; and she eloquently combats the erroneous notion that sick Turks are not amenable to the ministrations of female attendants. They are more amenable to feminine influence, more patient under suffering, and more grateful for kindness, says the devoted Viscountess Strangford, than the soldiers of other races; and it is to be hoped that in a future batch of sketches sent home from the East by the adventurous gentlemen who represent the *Illustrated London News* there will be found drawings of trained English nurses bending over the pallets, not only of wounded Pashas, Kaimakams, Bimbashis, Unbashis, and Yuzbashis, but of the humblest Nizams, Redifs, and Zaptiehs.

Fortunately there is another side to the medal and a far brighter one. The volunteers for the army in Asia Minor portrayed by the artist seem but little exercised in their minds by thoughts of potential wounds, camp maladies, a defective commissariat, or miserable hospital accommodation. The Crescent and the Lone Star shine very brightly indeed on the volunteers' banner; they have dervishes and holy men in green turbans to keep them company; newboys board the steamer which is to convey the troops to Batoum or to Trebizond and (strange revolution in Oriental manners!) importune the departing warriors to buy the latest editions of the *Stamboul*, printed in French, and the *Basiret*, which is in Turkish; while, here and there, the presence of a *yashmak* and a *ferikije*, together with a pair of black eyes looming between the walls of muslin, suggest the presence of some adventurous Turkish woman, who, disdaining the etiquette which even on board a steamer condemns her sex to the "harem" part of the deck, has dared to venture into the unknown regions of the fore-castle, and "snatches a fearful joy" in bidding farewell to her husband or her brother. "The girl I left behind me!" It is the most popular and the most miserable of melodies; and it sounds as mournfully as a crack Lancer regiment marches out of an English garrison town as when a motley horde of Bashli-Bazouks swarm out of Stamboul and settle like bees on board the Bosphorus steamer which is to take them, if for service in Asia, to Trebizond or Batoum, if bound for Bulgaria, to Varna or Bourgas.

And behold these same Bashli-Bazouks being enlisted (see sketch) by much tootling of Mussulman flutes and much thumping of Mussulman drums. Literally a Bashli-Bazouk means a crack-brained fellow—one of whom a Scotchman would say that he has "a bee in his bonnet." Virtually he is an irregular soldier, receiving only nominal pay, and permitted to look for compensation for his military services in such unconsidered trifles in the way of cattle, sheep, poultry, and grain-stuffs as he may be fortunate enough to pick up in the enemy's country, or, for the matter of that, in anybody else's country. The Bashli-Bazouk is not particular. He does not understand

Russian, but he is instinctively of old Field Marshal Suworof's opinion, that "Booty is a holy thing;" and, could the Bashli-Bazouk come to London (a consummation most devoutly *not* to be wished for), and, ascending to the summit of St. Paul's, behold the British metropolis spreading far around him, he might well exclaim, paraphrasing Blucher's remark under similar circumstances, "Mashallah! what a city for to sack." The B.-B. is not a bad hand at fighting; but he is a much more accomplished proficient in plundering; and it is a fact, which unaccountably has escaped the notice of ornithologists, that Chanticleer ceases intuitively to crow, that hens and chickens give over their clucking, and that geese gobble and ducks quack no more directly it is known that the B.-B.'s are in the neighbourhood of a farmhouse. On the whole, the modern Turkish guerilla is a very picturesque reproduction of that famous Highland Cateran of the eighteenth century, of whom it is recorded in a contemporary ballad on the battle of Sheriffmuir that

Rob Roy he stood watch
On a hill for to catch
The booty for aught that I saw, man;
For he ne'er advanced
From the place where he stanced
Till nae mair was to do there at a', man.

It was, doubtless, with a full appreciation of the cattle-lifting capacity of the B.-B.'s that the Turkish commanders at Rustchuk, although winking at the predatory incursions of the irregulars on the Roumanian side of the Danube, caused the captured oxen and sheep to be carefully collected in the Konak, or market square of Rustchuk (see sketch), and strictly guarded by regular soldiers.

In another sketch, the Vali or Governor-General of Rustchuk is taking his departure from the railway station; and a crowd of military and civil officials, including a Greek Bishop, or at least an Archimandrite (the old gentleman in the porringer-shaped head-dress), have come to bid his Excellency a temporary farewell. The salaams on either side are numerous and punctually returned by the superior to the inferior, who gives the first salutation by uttering the words, "*Salam aleikum*." He then bends down as if to touch or take up the dust with his right hand, which he then conveys to his lips, and ultimately to his forehead. The movement is thus *à trois temps*; but it may be made one of four by conveying the imaginary handful of dust to the region of the heart ere it reaches the lips. A very obsequious visitor will make a gesture as though to snatch the skirt of the superior's garment and kiss it; and if he has a petition to present, or if he wishes to deprecate the wrath of a great man, he very frequently goes through the actual process of osculation. The answer to "*Salam Aleikum*" is "*Aleikum Salam*," and the salute and its return should be as nearly as possible concurrent. This politeness, among strict Osmanlis, is interchanged only with Mohammedans. A mere nod of the head is deemed to be quite good enough for a Giaour. Young Turkish gentlemen, however, who have been educated in Western Europe, pride themselves on the impartiality of their politeness, and salaam to Moslems and to Christians alike. It should, moreover, never be forgotten that the manifestations of respect shown by the lowly to the exalted Turk are rendered solely to his official rank, and have no reference to his social status. Caste distinctions are, in fact, all but wholly ignored in Turkey. Outside the sacred precincts of the Seraglio and the charmed circle of the Imperial family every Osmanli is, socially, as good as his master. The water-carrier, the itinerant cake-vender, the papouche-seller, the barber of to-day, may be the Effendi, the Bey, or the Pasha of to-morrow. There are no "snobs" in Turkey; there are no stuck-up classes; and, deplorably bad as is the Ottoman administration, it is totally devoid of what in British bureaucratic parlance is termed "red tape." I am reminded of this pleasing truth when I look on the extremely vivacious and picturesque drawing representing a group of Turks "waiting for an audience of Hobart Pasha (see sketch). I never "waited" myself for an audience with that gallant blockade-runner, because I could meet Hobart as often as I wished in the clubs and at the dinner-tables of Pera; but often and often have I cooled my heels in the ante-chambers of the Ministerial *bureau* of the Seraskierat or at the Sublime Porte in Stamboul, or have formed one of a heterogeneous crowd waiting to be ushered into the presence of this or that Pasha or Effendi. There is always a gathering of Turkish women of all ranks, in *yashmaks*, *feridjas*, and trousers, strolling about the corridors or sitting on the floor by the thresholds of the doors; but, what other mission they may have had, beyond that of waiting to see the men folk wait, I could never discover. If, again, I might venture to tender a morsel of advice to the European stranger who has a letter of introduction to a Turkish functionary, I would counsel him not to wait too long in the great man's outer rooms. There will be no fear of his being repulsed from them, as Johnson was from Chesterfield's, since, were he to wait in a Turkish Government office until the Greek Kalends, no Turk would suggest the propriety of turning him out; but the chances are ten to one that the Zaptieh, or the Cavass, to whom he has given his name, has forgotten all about it, or, in sheer laziness, has neglected to fulfil his errand. The best thing therefore that the visitor from Frangistan can do is (if he can read Turkish) to try and decipher the name of the particular department of which he is in search among the inscriptions placed above the portals of each room. If he cannot read the Arabic-Persian character, let him boldly draw aside the curtain which screens the entrance to the bureau, march in, and cry with a resolute voice, "Camberwell Pasha," "Pegwell Bey," "Ealing Effendi," as the case may be. When he has adopted this course in perhaps twenty-seven barely-furnished rooms, crowded with bearded gentlemen in black frock-coats and red fezzes, he will probably find the particular minister or functionary of whom he is in quest. There is no fear of anybody rebuking him for infringing the rules of bureaucratic etiquette. There do not seem, in the first place, to be any rules susceptible of infringement. While he is wandering about, the draperies which veil the portals will be lifted over and over again, and all sorts and conditions of people will, unannounced and unbidden, enter the presence chamber. While he is having his audience of the Pasha or the Effendi (whom he will very probably find occupied, if it be lunch time, in munching bread and cucumbers, or nibbling fried fish, or "supping" *yasurt*, or sour milk). Sellers of cake and fruit, boys bearing trays with coffee and pipes, and even beggars asking alms, will lounge in and out; and it is only when a sultor grows too importunate that the Great Man will desire some subordinate to box the impertinent supplicant's ears or to take him by the shoulders and turn him out of the room. No one loses his temper at these summary proceedings; and Turkey is one of the few countries in the world in which it is not esteemed a dire degradation to be kicked down stairs.

Returning to our friend the Turkish soldier, you will find his idiosyncrasies still further dwelt upon in the spirited sketch representing a military wrestling-match (see sketch), and in the drawing (which could be expanded, so well composed is it, into a very effective picture) of the interior of the

THE WAR: PART OF THE LOWER DANUBE, WHERE THE RUSSIAN TROOPS HAVE
CROSSED INTO THE DOBRUDSCHA.

workshop of a Turkish blacksmith and armourer (see Sketch), whither a number of Osmanli soldiers have come to sharpen their swords. It is under these circumstances that the eyes of the Moslem gleam with a strangely ferocious sheen, and that he wears his least lovable aspect. He appears, to my thinking, to much more advantage in the little vignette of "Old and Young Turkey" (see Sketch), when, marching, armed *cap-a-pis*, down one of the jagged lanes of Rustchuk, he halts at the open door of an "everything" shop to chuck a plump little Moslem boy under the chin. When in a good humour, the Turk is very fond of little children. When he is in a bad temper—when, like the "Chourineur" in Eugène Sue's romance, he "sees red," he is apt to spit babies upon bayonets and to indulge in other diversions of an indescribably fiendish nature. He has learned, however, to treat his prisoners of war with some humanity; and no rough usage need, I should think, be feared by the poor wounded Russian (an officer, apparently, for they have mounted him on the horse of a Turkish officer who is being brought into Rustchuk (see Sketch). Similar attentions are, obviously, not paid to the group of Bulgarian prisoners (see Sketch), who, under a strong guard of regulars, are being made to sweep the streets. The martial Turk is getting, too, some smattering of education. It has been pointed out that, on board the steamers, the newsboys pester him with the *Stamboul* and the *Bassiret*. In another vignette you see a petty officer reading an official telegram (possibly recording a Russian defeat of the most tremendous official nature) to the sailors of the fleet at Constantinople. Yet more Turkish sailors (very brave, intelligent, patient fellows they are) have been sketched at Varna (see Sketch), close to which important station on the Bulgarian shore of the Black Sea large bodies of Egyptian troops have lately been hard at work in the construction of batteries (see Sketch). The Egyptian soldier is only a fellow in a fez and a tightly-fitting tunic. He is not much of a fighting man, but his capacity for hard labour is immense. Before he was "conscripted" into the Khedive's army he had toiled from his childhood upwards like a slave: so digging and delving are no novelties to him.

A most interesting budget of sketches from the seat of war is rendered complete by the large cartoon entitled "The War: Biting Circassians in an Hotel at Nicopolis" (observe the smashed gas-lamps, so eloquently suggestive of the thousand years of peace having come to an end, and of the thousand years of war, more or less, having commenced); and Riza Bey watching, through our Artist's telescope, the Circassian raid across the Danube; and of Circassians embarking on the river at Nicopolis to achieve this self-same raid.

GEORGE AUGUSTUS SALA.

The widow of the late Mr. George Dawson has received a gift of rather over 2000 guineas, mainly subscribed by members of the congregation of the Church of the Saviour, Birmingham, of which Mr. Dawson was pastor.

The annual meeting of the Swedenborg Society was held at the society's house, 36, Bloomsbury-street, last week. The Rev. Dr. Bayley, of Kensington, occupied the chair. The report of the committee states that 4888 volumes of the "True Christian Religion," and 4755 volumes of the "Apocalypse Revealed," have been presented gratuitously to ministers and students, and 369 volumes of the latter work to editors of the press, from the time the offer of these works was first made up to May 30. The sales of the same works for the year are 465 volumes of the former and 633 volumes of the latter. Of the general publications of the society 3319 volumes have been sold, and 3151 presented, making a total of 6470 volumes issued during the year.

EDUCATION.

The report of the Committee of Council on Education in England and Wales for 1876-7 states the schools in England and Wales visited by the inspectors for the purpose of annual grants, which provided in 1869 for 1,765,944 scholars, or for 8.34 per cent of the whole population, were in 1876 sufficient for 3,426,318 scholars, or 14.13 per cent of the estimated population. There has thus been an addition of room, in aided schools, for 1,660,374 children in seven years. The average attendance in aided schools (day and night) has risen from 1,225,764 in 1870 to 2,034,431 in 1876. There were in 1876 2,943,774 names of day scholars on the registers of inspected day schools (of whom 2,412,211 were present each day of inspection), and this is the number of children, out of at least four millions and a half for whom elementary schools are required, who received more or less of efficient instruction in such schools during the past year. Of the day scholars on the registers 1,041,219 were below and 1,902,555 above seven years of age. With regard to the supply of teachers, the report states that there were on Dec. 31, 1869, 12,842 pupil teachers, 1236 assistant teachers, and 13,027 certificated teachers at work in schools under inspection. These numbers, by Dec. 31, 1876, had risen to 30,626 pupil teachers, 2921 assistant, and 23,328 certificated teachers; while the pupil teachers in the first of the five years of their service have increased from 3392 in 1869 to 6876 in 1876. School boards have been established in 123 out of 223 boroughs in England and Wales, with a total population of 5,543,956; and in 1867 out of 2346 parishes, with a total population of 4,018,888. Including London, the total population under school boards is 12,829,381. By April 1, 1877, by-laws for enforcing the attendance of children at school had been sanctioned in accordance with the terms of the Act of 1870, on the application of the school boards of—London, with a population of 3,266,987; 109 municipal boroughs, 5,453,724; 612 civil parishes, 2,500,652; total, 11,221,363. Compulsory attendance at school, under by-laws, is, it is stated, now the law for 50 per cent of the whole population of England and Wales, and for about 84 per cent of the whole borough population.

The report of the Committee of Council on Education in Scotland states that 2817 elementary day schools in Scotland were inspected in 1876, and provided accommodation, in 3051 departments, for 456,428 scholars. The average daily attendance in these schools amounted to 329,083, so that each department, while providing accommodation for 149 scholars, had an average attendance of only 107. There were on Dec. 31, 1868, 2859 pupil teachers and 2406 certificated teachers at work in schools under inspection. These numbers by Dec. 31, 1876, had risen to 4475 pupil teachers and 4261 certificated teachers, while the pupil teachers in the first of the five years of their service have increased from 639 in 1869 to 853 in 1876.

The Charity Commissioners have issued a scheme under which they propose to devote to the advancement of education in Leeds £700 of surplus income from the foundations known as the Leeds Poor's Estate, and managed by the Charitable Uses Committee. Out of this sum it is proposed to create about forty scholarships, with a view to connect the elementary schools of Leeds with the Grammar School, and an exhibition of £50 per annum available for one of the Universities.

A new railway station at York was opened on Monday; and the new line between Manchester and Liverpool was opened on Tuesday to its full extent.

Taunton having received a charter of incorporation for the third time, the Town Council met on Tuesday for the election of six Aldermen and a Mayor. Mr. Myer Jacobs, who took an active part in procuring the charter, was elected Mayor.

MUSIC.

HER MAJESTY'S THEATRE.

Mdlle. Etelka Gerster made her first appearance in England on Saturday, as Amina in "La Sonnambula," and achieved a great and deserved success. Much as had been previously said of her vocal powers and accomplishments, rumour had not exaggerated the facts. Her voice is a genuine soprano, both brilliant and sympathetic in quality, and possessing a rare command of the extreme high notes of the register. Her intonation is truthful, her phrasing very artistic, her scale passages excellent, her shake close and even, and her staccato neat and certain. Her delivery of Amina's opening cavatina, "Come per me sereno," at once seemed to presage the result. The impression thus made was confirmed by Mdlle. Gerster's singing in the duets with Elvino, "Prendi l'anello" and "Son geloso," and was heightened by her admirable performance in the bed-room and sleep-walking scenes. Excellent was the delivery of Amina's share of the concerted piece "D'un pensiero," including the singer's close on a sustained E flat in alt—still greater effect having been produced by the pathos infused into the expressive solo, "Ah! non credes," the enthusiastic applause after which necessitated its repetition. The brilliancy and impulse of the bravura singing in the final aria, "Ah! non giunge," completed the triumph of the debutante, who was recalled three times after the first act, and four times at the end of the opera.

Signor Fancelli, as Elvino, sang excellently, especially in the duets with Amina, and in his scene "Tutto è sciolto." Signor Del Puente was a very satisfactory Count Rodolfo; and other characters, Teresa, Lisa, and Alessio, were efficiently filled, respectively, by Madame Lablache, Mdlle. Robiati, and Signor Fallar.

"Martha" was given on the previous Thursday, when Mdlle. Chiomi made her third appearance, and was again favourably received; "Otello" having been performed for the third time this season yesterday (Friday).

The first two performances of this week consisted of repetitions—on Monday of "Les Huguenots," and on Tuesday of "Faust." Mdlle. Gerster was to make her second appearance in England—again as Amina—on Thursday. Yesterday (Friday), "La Figlia del Reggimento" was to be given. The next important specialty will be the performance of "Lohengrin" on Thursday next, for the first time in this theatre.

ROYAL ITALIAN OPERA.

"Martha" was given yesterday (Friday) week, on the occasion of the visit of General Grant, with no novelty in the cast, the opera having been preceded by the American national air "The Star-spangled Banner," the solo passages sung by Mdlle. Albani.

For Tuesday "Don Pasquale" was announced, with Mdlle. Marimon as Norina; for Thursday "La Traviata," with Madame Adelina Patti as Violetta, for the first time this season; for Friday "Faust," and to-night (Saturday) "Santa Chiara," an opera composed by the Duke of Saxe-Coburg Gotha, is to be produced.

The performances of the first two days of the Handel Festival at the Crystal Palace, "The Messiah," on Monday, and the miscellaneous selection on Wednesday, are noticed in another part of the Paper.

The last concert but one of the sixty-fifth season of the Philharmonic Society took place on Monday evening, when the orchestral pieces were Mr. Arthur Sullivan's overture, "In Memoriam;" that by Weber, entitled "The Ruler of the Spirits;" and Beethoven's "Pastoral Symphony." The same composer's violin concerto and Mendelssohn's first concerto for pianoforte were finely played, respectively, by M. Leopold Auer and Mr. Jaell. Vocal solos were contributed by Madame Lemmens-Sherrington.

Mr. Charles Hallé closed his series of pianoforte recitals, at St. James's Hall on Saturday afternoon, with the eighth concert of the season. His programme was of strong and varied interest, having comprised Brahms's pianoforte quintet in F minor, Beethoven's pianoforte trio in B flat (op. 97), and Schumann's solo piece, "Carnaval;" besides Beethoven's romance in F, for violin, finely played by Madame Norman-Néruda. In addition to this lady, Mr. Hallé's coadjutors were M.M. L. Ries, Straus, and Franz Néruda.

A grand performance of Haydn's "Creation" was given on Saturday afternoon at the Royal Albert Hall, directed by Mr. William Carter, whose excellent choir rendered the choral portions, in association with a full band. The solo vocalists were Miss Anna Williams, Mr. Sims Reeves, Mr. Hollins, and Signor Foll.

On Thursday that excellent pianist Mdlle. Mehlig, and the eminent vocalist Mdlle. Löwe, gave their matinee musicale, simultaneously with which the well-known harpist Mr. F. Chatterton was giving his recital at St. James's Hall. On Thursday evening the last concert of the season of Mr. Henry Leslie's choir took place in the same building. The performances were for the director's benefit, and included a varied selection of sacred and secular music, solo and choral.

Those highly-skilled artists, Mdlle. Pommereul (violinist) and M. Breitner (pianist), gave a concert on Thursday evening, at the Royal Academy of Music.

Mdlle. Titiens has so far recovered as to permit of her removal to Worthing.

Dr. W. C. Bennett's "Songs for Sailors" are being set by Mr. J. L. Hatton, the well-known ballad composer.

Dr. Buck has resigned his post as organist of Norwich Cathedral, with which he has been connected for seventy years as a chorister, master of choristers, and organist. The Chapter have granted him a retiring pension of £125 per annum.

The Société des Compositeurs de Musique has issued at Paris the scheme of its competition for prizes for the current year. The first prize of 500f. is offered by the Minister of Fine Arts for a quintet for stringed instruments, written either for two violins, viola, and two violoncellos; or for two violins, two violas, and one violoncello; or for two violins, tenor, violoncello, and double bass. The second prize of the same value is given by the well-known pianoforte manufacturers, Pleyel-Wolff, for a sonata for two pianos. The third prize of 300f. is for an organ work in the form of a fantasia with a fugue. The fourth prize is for a work for five voices in the madrigal form, and the words selected by the association are those of an old rondel of the fifteenth century. By the rules of the competition it is only open to French composers, and manuscripts (which must neither have been performed nor published) can be sent in up to the close of the present year.

Herr Rubinstein has received at the hands of the President of the French Republic the cross of the Legion of Honour. Herr Rubinstein played before the Marshal at the Elysée, and has now gone to Russia. France had already recognised the merits of the great pianist by electing him as a corresponding member of the Academy of Fine Arts.

Mr. Henry Cotton, Q.C., has been appointed to be a Lord Justice of Appeal, in the room of the late Sir George Mellish.

THE CAXTON CELEBRATION.

The four hundredth anniversary of the introduction of printing into England by William Caxton is celebrated this year, with a special exhibition of "antiquities and curiosities connected with the art of printing." The exhibition is opened to-day, in the western galleries of the late International Exhibition Buildings, situated in Queen's-road, South Kensington, behind the Royal Albert Hall. The profits of this exhibition are to be given to the funds of the excellent Printers' Pension, Almshouse, and Orphan Asylum Corporation. The assistance of many of the leading printers and publishers, engravers, paper manufacturers, and type-founders has been given upon this occasion; and some of the private owners of most valuable libraries, as well as the trustees and directors of public institutions, have contributed the loan of unique objects from their several collections. We shall be able next week to describe the exhibition more particularly, with the other proceedings of the Caxton Memorial Celebration. In the mean time our readers will, perhaps, find it interesting to look at the illustrations of Caxton's life and work, and of the early stages of his art, which are presented in this Number. A brief review of the historical and biographical facts connected with this subject will not be out of place, though it is already sufficiently familiar to most persons of ordinary knowledge.

The invention of printing with movable metal types is generally admitted to be due to three Germans, John Gutenberg, John Fust, and Peter Schoeffer, dwelling at Mentz, in the middle of the fifteenth century. Peter Schoeffer, moreover, seems to have invented the casting of types in a mould instead of cutting them out in the shape of alphabetical letters. A Dutch citizen of Haarlem, named Laurence Coster, had some years before, it seems about 1430, printed a few books with rude wooden types, or stamps, which were probably known to Gutenberg. The year 1455 is the date assigned by contemporary testimony to the commencement of printing at Mentz. In the next twenty years the new art seems to have spread to Cologne and other cities of the Rhine. William Caxton, an English merchant and steward or secretary to the Duchess of Burgundy, with the help of Colard Mansion, set up a printing press at Bruges in 1471. He came home to England, as is supposed, in 1476; and the first book printed in England, though not the first English book that he printed, was produced in 1477. Caxton's dwelling and printing-office, in a house known by the sign of the Red Pale, at the Almonry then attached to Westminster Abbey, can no longer be seen; but the site is pretty well ascertained. It was at the entrance to what is now Tothill-street, very near the front of the Royal Aquarium. There he lived and laboured diligently till his death, in 1491, when he was buried in St. Margaret's Church. Some of the incidents and circumstances of his career, as a man of business, literary scholar and author, and printer and publisher, may here be mentioned.

The birth-place of William Caxton was somewhere in the Weald of Kent, and his father is said to have been a yeoman or small farmer. We do not know the date of his birth. He was sent to London in his boyhood, and was apprenticed to Robert Large, a mercer, in the Old Jewry, an Alderman of the City, and some time Lord Mayor. Upon the death of Mr. Large, in 1441, Caxton went to the Netherlands, where he seems to have been employed as agent for the Mercers' Company of London. He subsequently became head of the establishment in Flanders of the English Merchant Venturers' Company, and occupied an official residence at Bruges. In 1464 he was appointed by the English Government, jointly with Richard Whitehill, to negotiate a commercial treaty with the Duke of Burgundy, then ruler of the Netherlands. After the marriage, in 1468, of Princess Margaret, our King Edward IV's sister, to Charles the Bold, Duke of Burgundy, her countryman, William Caxton, found employment at her Court. He had the advantage of a personal acquaintance with the accomplished Anthony

Wydevil, Lord Rivers and Scales, brother to the Queen of England, and this seems to have led to Caxton's literary occupations. As a good French scholar, though ignorant of Latin, he could peruse many works hitherto unknown to common people in England. There were many versions in French, of stories compiled from the ancient classic poets by monkish Latin writers, and many romantic legends and chronicles of the Middle Ages, besides quaint treatises of philosophy and devotion. Caxton undertook the translation of some of these books from the French into the English language, at the request of Lord Rivers and the Duchess Margaret. He found the demand for copies of his books was greater than he could supply by the slow toil of manuscript; and he therefore furnished Colard Mansion with the requisite capital for procuring a set of printing types and a printing press. It is not known exactly where and how Colard Mansion learnt the art of printing; but there is some evidence that Caxton himself learnt it at Cologne in 1471. Colard Mansion was a professional calligrapher or copyist of books, and was more likely to have suggested to Caxton the use of the new art of printing, than Caxton to have shown it to him. There were, however, at that time in the Netherlands and in Rhenish Germany, not a few servants or pupils of the Ments printing establishment, from whom knowledge and practice might easily be acquired.

The personal industry of Caxton, apart from superintending the printers in his office, and managing the sale, or delivery to subscribers, of the books he published, was mainly applied to literary work, as translator and editor. He began with the pleasant task of putting into English the French writings of a clerical friend of his, Raoul le Fevre, priest and chaplain to the late Duke of Burgundy. The "Recuyell," that is to say, "Recueil," or Summary, "of the Histories of Troy," is a prose narrative of the wars and adventures of those ancient Greek heroes, with whom modern readers of Homer, especially since Dr. Schliemann's discoveries at Mycenae, are perhaps somewhat better acquainted. It was printed and published at Bruges, and was soon followed by the printing of a Latin public oration delivered there by the Right Rev. Dr. John

Russell, Bishop of Lincoln, at the ceremony of proclaiming the Duke and Duchess of Burgundy. "The Game and Play of the Chess," a treatise of moral and political offices or duties, and the gradation of social ranks, founded on the places and "moves" respectively assigned to different pieces on the chess-board, was Caxton's next publication. This book, like that of the histories of Troy, was translated by him into English from the French of Raoul le Fevre, who had translated it from an Italian or Latin book. The "Life of Jason," and one or two other publications, were issued at Bruges, from the printing-press of Caxton and Colard Mansion, before Caxton's return to England. It appears certain, however, that the first book he actually printed here was "The Dictes and Sayings of Philosophers," translated out of French into English by his noble friend and patron, Lord Rivers. This work, which had previously been translated from the Latin into French by Jehan de Thionville, is a collection of anecdotes of the wise maxims and witty retorts of many ancient worthies, Zedekiah, Homer, Solon, Pythagoras, Diogenes, Socrates, Plato, Aristotle, Ptolemy, Alexander, Seneca, Galen, and Pope Gregory the Great. The first edition was printed in seventy-five leaves, with twenty-nine lines of unequal length to each folio page. It is stated, in a notice at the end of the volume, to have been finished "on the xviii. day of the moneth of Novembre, and the seven-teenth yere of the reign of Kyng Edwrd. the IV." The title bears date, "Enprynted by me, William Caxton, at Westminster, the yere of our Lord m.cccc.lxxvii." It is the quatercentenary celebration of this production which is kept at South Kensington to-day. Caxton printed two other books for Lord Rivers, "The Moral Proverbs of Christina of Pisa," and a treatise of devotion called "The Cordial." He went on, after Lord Rivers's

FACSIMILE OF A PAGE OF THE FIRST BOOK PRINTED IN ENGLISH BY CAXTON,
"THE RECUEILL OF THE HISTORIES OF TROYE," 1471.

ONE OF THE LAST WOODCUTS PRINTED BY CAXTON,
FROM THE PRAYER-BOOK CALLED "THE FIFTEEN OES."

death on the scaffold at Pontefract, editing and publishing many good books on his own account. We may enumerate the essays of Cicero on Friendship and Old Age; the history of the Crusade and Conquest of Jerusalem conducted by Godfrey of Boulogne; the Polychronicon, a book of general history, to which Caxton added two chapters of his own writing; the Canterbury Tales of Chaucer, and the poems of John Gower and John Lydgate; the Fables of Æsop, the "Metamorphoses" of Ovid, Sir Thomas Malory's history of King Arthur and his Knights of the Round Table; the "Consolations of Philosophy," by Boethius; the "Golden Legend" and "Lives of the Saints," the "Pilgrimage of the Soul," and other religious works; and "The Knight of the Tower," being a father's advice to his daughters upon their conduct and manners. We know little of Caxton's private life, but he seems to have had no wife or children during the time of his later residence in England; his aged father, and his mother or aunt, Maud Caxton, are thought to have lived with him at Westminster. He was succeeded in business there, as a printer, by the famous Wynken de Worde, a native of Lorraine, who had been Caxton's assistant.

We are indebted to Mr. William Blades, the learned author of the standard biography of Caxton, in two quarto volumes, which was published some fifteen years ago, for the opportunity of using several illustrations of this interesting subject. The old house in the Almonry at Westminster, reputed to be that which was occupied by Caxton, but probably one of later erection on the site, has disappeared long ago. A drawing by Shephard, in the collection of Mr. J. E. Gardner, is copied for our Engraving by his permission. St. Margaret's Church, near the north door of Westminster Abbey, is now in a state demanding the aid of a public subscription, to which the Rev. Canon Farrar has lately appealed, for the cost of its repairs and restoration. The memorial tablet above Caxton's grave was erected in 1820 by the Roxburgh Club. From the illustrations of early English printing, contained in the volumes of Mr. Blades, we borrow the facsimile of a page of the first edition of the

NEW BOOKS.

Statistics, as a rule, are not interesting; and they are not, as a rule, to be altogether trusted; and yet, though statistics stand out very prominently, both as a substantive portion of the work and as a basis for argument, in *The Care and Cure of the Insane*, by J. Mortimer Granville, M.D., F.R.S. (Hardwicke and Bogue), the two volumes so entitled are unusually full of interest. And that interest is enhanced rather than diminished by the fact that there is now sitting a Special Commission on the Lunacy Laws. As for the contents of Dr. Granville's book, they comprise the "reports of the Lunacy Commission on Lunatic Asylums, 1875-6-7, for Middlesex, the city of London, and Surrey;" together with "a digest of the principal records extant, and a statistical review of the work of each asylum, from the date of its opening to the end of 1875." The reports are very voluminous, being full of the minutest details; and, when it is added that the notes, comments, and suggestions are multitudinous, it will be readily believed that the reader of the two volumes has a hard task to accomplish. It is a case, however, in which the game will probably be considered to be quite worth the candle, at any rate by those—and they are unfortunately many in number—to whom lunacy and the questions connected with it are matters of painful personal interest and of grievous importance. The inquiry instituted by the Lunacy Commission had a threefold object: first, "to ascertain the general character and efficiency of the provisions made for the insane in asylums, and the conditions of their daily life;" secondly, "to discover the measures, and, as far as may be possible, to formulate the system of treatment adopted for the cure of remediable, or recent, and the relief of incurable, or chronic, cases;" thirdly, "to collect and collate statistics of cases occurring within the last ten years at the asylums visited, with a view to estimate the results." And the asylums visited and reported upon in the two volumes are:—The Surrey County Lunatic Asylum, at Brookwood; the Middlesex County Lunatic Asylum, at Hanwell; the Middlesex County Lunatic Asylum, at Colney Hatch; the Surrey County Lunatic Asylum, at Wandsworth; the City of London Lunatic Asylum, at Stone, Dartford, Kent; the Metropolitan Asylums for Imbeciles, at Caterham, Leavesden, and Hampstead; the Hospitals of Bethlem and St. Luke; Camberwell House, Bethnal House, Hoxton House, Peckham House, and Grove Hall, Bow, the last group being described as "metropolitan licensed houses receiving pauper patients." Upon each of these places a report is made on an elaborate scale; and the reports are followed by a retrospective analysis of certain results for the ten years between 1865 and 1874, by notes upon "the asylum question," by observations both special and miscellaneous, and by some remarks upon the conclusion to which the reports and the observations tend. All this is finished off with a very instructive appendix and a very copious index. What the ordinary reader will be most anxious to know is, no doubt, the nature of the conclusions to which the author has been constrained by the inquiry to arrive, and they, or the chief of

them, may be stated in a few words. He professes to have learnt from his investigations two principal lessons, of which the first is "that the existing method of dealing with lunatics is chiefly notable for its negative advantages. It is free from the objections which public opinion urged, on grounds of humanity, against the restraint system, but it has few positive excellences of its own; and of those few, scarcely one is remedial." The second is "that the method of providing for the insane in asylums at present pursued is faulty. It can never overtake the need for accommodation—if there be a veritable increase in the proportional number of the insane—and it deprives recent cases of the full advantages of treatment. It is, therefore, opposed to the dictates of true economy, and injurious to the welfare of the insane." These conclusions can hardly be deemed satisfactory. Nor is it more satisfactory to find that, as regards the restraint system, we are likely, if the author's hints should be acted upon, to make that sort of progress which is really not uncommon in the affairs of the world, and which consists in going perseveringly, laboriously, and even triumphantly round in a circle. He hints, in fact, that, "the disuse of violent measures of coercion has its drawbacks;" and that, "although the insane generally are spared much grievous and wanton suffering by the abolition of restraints, they have less chance of being cured." It must not be supposed that our author is inclined to go back to the old brutal practice; but he is evidently so very suspicious of the modern system, if carried to an excess of mildness, that his suspicions, if he should implant them in other minds, of a peculiar order, might grow to vast dimensions and produce the old abominable fruit. On the subject of intemperance, in its connection with insanity, he speaks very openly:—"Stimulants are, I am convinced, necessary; and I trust 'craze' in favour of teetotalism, which has apparently, for the nonce, warped so many otherwise sound and calm judgments, will not be introduced into asylum management. Frankly, I do not believe drink plays the part it is popularly alleged to play in the causation of insanity" (vol. ii., p. 172). This it is rather difficult to reconcile with the expressed approbation wherewith he quotes Dr. Sheppard, who, "in his report for 1876," says: "It is painful again to allude to the large part which alcoholic intemperance plays in the production of insanity Thus we have an approximate record of forty per cent of the madness of Middlesex as due to an avoidable cause—and that cause the growing passion for drink" (vol. ii., p. 239). Or does our author consider forty in a hundred a small percentage? Far be it from him; it is more probable that he inadvertently quoted rather too much from Dr. Sheppard, or forgot to set down some explanatory or mitigatory observation.

When a work, especially a biography, is published in several volumes, with a pretty long interval between the respective publications, as in the case of *The Life of Napoleon III.*: by Blanchard Jerrold (Longmans), of which the third volume has lately made its somewhat tardy appearance, it very often happens that the interest has waned, that public events have intervened so as to call off general attention from the past to the present, that the impression which may have been made by the biographer has worn off, and that to recall his style and method and to take up the thread of his narrative from the point at which he broke it off is found to require an effort so tiresome as to be soon abandoned. This is particularly the

case when the subject of the biography has failed to take a very prominent place in the memories of men or to excite their insatiable curiosity. And it is doubtful whether any great potentate and splendid meteor can be compared with Napoleon III., due regard being paid to the immense influence he exercised during the years of his reign, for the neglect into which he has fallen and the lukewarmness with which his personal history is regarded. Thus an excellent biography runs some risk of meeting with a cooler reception than it deserved. And Mr. Jerrold's is in many respects an excellent biography. It is rich in detail, gathered from authentic sources; it is plain and straightforward, and it is sufficiently well written. The author, it is true, cannot—and probably did not try to—conceal his partiality; and if he does not, in point of literary composition, reach a very lofty standard, the reason may be that his subject did not inspire any very lofty thoughts or any very lofty strain. For of that which is really great, as most men count greatness, there is not much to be discovered in the career of Napoleon III. A useful, a sagacious, a courageous ruler he may have been; a powerful and an imposing one he certainly was. He was undoubtedly a staunch friend, and he may have been the best and most judicious of husbands and fathers. He had, no doubt, a dash of chivalry, especially as a young man; and he may have had as much of the qualities which distinguished Alexander the Great as would have enabled him to mount Bucephalus. He could ride a waiting race, as he proved to demonstration, and his patience was almost sublime; but he was not one of those monarchs whose death and memory inspire the thoughts which led the great French orator to commence his funeral oration over a famous King with the touchingly-appropriate expression—"Dieu seul est Grand, mes frères." The biographer's principal themes in this third volume are—the Presidency, the coup-d'état, the establishment of the Empire. It will be seen, therefore, at once, that he concludes, unfortunately, just at the very date which would be most interesting under the present circumstances—on the eve, in fact, of the Crimean War. Still, there will be thousands of readers to pore over the pages devoted to the history, derived from the best sources, of the Countess de Montijo and her lovely daughters, the younger of whom was destined to be Empress of the French. They will be delighted to read the words in which the Emperor condescended to "puff" his wife in the columns of a newspaper; and they will gaze, "as on a thing miraculous," upon the exquisite portrait of the Empress Eugénie which adorns the frontispiece. There will be thousands, also, who will peruse once more, some with pleasure, some with pain, some with surprise, some with doubt, the old story re-told of the coup-d'état, wherein occasion is taken to give the lie direct to certain statements of Mr. Kinglake and others, including Mr. Tennyson's "Victor in Poesy, Victor in Romance," who have made it their business to blacken the character of "Napoleon le Petit." According to the biographer's account, never was a strong measure so absolutely forced upon those who took it, never so cleverly, coolly, quietly, judiciously planned, never so mercifully but thoroughly executed as that which has been very often and by many people regarded as the perfidious and bloody deed of Dec. 2, 1851. Lastly, there will be thousands who will gladly trace once more the course of Prince Louis Napoleon, from the time when he relinquished his staff of English special constable, and, leaving Kensington-common and King-street, St. James's, behind him, took his place, after thirty-three years' exile, as a representative in the National Assembly, to the proud day when, with "a majority of three millions and a half of voters over all his antagonists combined," he was elected President of the Republic, and to the still prouder day when upwards of seven millions of voters out of something more than eight millions gave him absolution for the deed of Dec. 2, 1851. To these many thousands Mr. Jerrold's third volume may be confidently recommended with the assurance that the author has not been sparing of his pains to give them satisfaction, and that they will see Mr. Kinglake gibbeted to their heart's content. How soon the fourth volume may be expected, there is no saying; but, when it does come, it may contain some of that interesting correspondence, it is to be hoped, which is said to have been carried on by Napoleon III. with the lately deceased Queen of the Netherlands.

ORPHANAGES.

The Duchess of Northumberland presided at the annual distribution of "the Lady Peck prizes" at the National Orphan Asylum on the 21st inst. The home, which was founded in 1849 and enlarged in 1868, was completed in 1872. It was established to receive orphan girls without distinction as to religion into a home where they can obtain a plain English education and practical instruction in the kitchen, house, and laundry to fit them for domestic service. The home, which is entirely for girls, is situated on the borders of Ham-common, about two miles from Richmond. It now provides shelter, food, and clothing for 146 girls, who are received from infancy and remain under its roof till they are fifteen years of age.

The one hundred and nineteenth anniversary of the Orphan Working School, which now includes the Alexandra Orphanage, Hornsey-rise, and a convalescent home at Margate, Kent, was celebrated on the same day at the school in Maitland Park, Haverstock-hill. The proceedings began at eleven o'clock, this meeting being followed in the afternoon by a déjeuner. Mr. Morley, M.P., presided at both these gatherings. The greater number of the 535 children (the 412 seniors) now in the united institutions were present at the morning and evening meetings, and went through a searching examination in a most creditable manner. The school was instituted in 1758, and there are now in the senior school 273 boys and 139 girls, and in the junior school (Alexandra Orphanage) 123 children.

Last Saturday the annual distribution of prizes at the British Orphan Asylum, Slough, took place. From statements by the Rev. Joseph Wallis and Mr. Alfred Mackenzie, the secretary, it appeared that three girls and five boys have passed the Cambridge local examinations, and two boys have obtained honours at Cambridge. The examiners spoke in high terms of the general progress of the pupils. The Archbishop of Canterbury, who presided, said an institution could not exist fifty years without many acts of self-denying charity; and they were especially bound to bear in memory what they owed to those who had gone before them, by whose exertions they were enabled to assemble in that commodious building. Formerly the institution was at the other end of London, but transplantation had done no injury to the tree, which flourished more than ever in proximity to the great institution known in English annals for centuries as the greatest public school. The Orphan Asylum was not only nominally under the Queen's patronage, but, being so near her residence, her Majesty was able to take a real and personal interest in the management. He trusted that they would never, in this prosperous country, forget that the widows and orphans were a trust committed to them by their Master. His Grace then distributed the prizes.

FACSIMILE OF A WOODCUT FROM CAXTON'S "ÆSOP."

"Recuyell of the Histories of Troye," and one of the printer's mark used by Caxton. In this the initial letters of his name, "W. C.," are placed with a device of unknown meaning between them, and with the letters "s" and "c," of much smaller size, outside the "W" and the "C," of which no probable interpretation has been offered. There is also a woodcut from Caxton's edition, or his translation, of "The Subtyl Histories and Fables of Esope," printed by him in 1484; it represents four men, the slave Æsop, with his master, and the two wicked fellow-servants, who had stolen the figs, and accused him of the fault. Another woodcut is given representing the Crucifixion, which is taken from one of the last books printed by Caxton, a manual of prayers and devotional exercises, familiarly called "The Fifteen Oes," from its containing fifteen prayers each beginning with the interjection "O!" Almost, if not quite, the latest of Caxton's works seems to have been "The Arte and Crafte to Knowe well to dye," which he translated in the year 1480; it is a tract of thirteen leaves in folio. He had also prepared, it is thought, before his death, "The Proufftable Boke for Mannes Soule, and right comfortable to the Body, and specially in Adversite and Tribulacyon; whiche Boke is called, The Chastyng of Goddes Chyldren." This was published, about 1493, by his successor Wynken de Worde, and is remarkable as being the first English book with a titlepage. We present also, to accompany the illustrations of Caxton's life and works, one of the noble monument erected by the Germans in honour of Gutenberg, Fust, and Schoeffer, in the city where they began to practise the art of printing. The Caxton Memorial Exhibition, we hope, will attract a large number of visitors, for the benefit of the Printers' Pension, Almshouse, and Orphan Asylum, which deserves public support.

The Prince of Wales presided last Saturday evening at the annual banquet of the Corporation of Trinity House, which was attended by Prince Leopold, Prince Christian, General Grant, several members of the Cabinet, and other distinguished persons. Sir Stafford Northcote, in responding to the toast of "Her Majesty's Ministers," referring to the present situation of affairs in Europe, said that the Government fully believed that the interests of England were the interests of Europe and of the world. Their interests were in the maintenance of peace, and he meant by that something more than the mere cessation of hostilities—the maintenance of honour and good faith. Things were in a state of melancholy confusion, but, Sir Stafford Northcote said, "we know sooner or later order must come; and if that order is somewhat different from the old order, if it be satisfactory let us bear our part in the settlement that must come. Let others also bear their parts. This only I will say, that while we ought not to run to meet our troubles half-way, so neither ought we to be neglectful in watching what may be coming. No one can more earnestly deprecate over-haste, no one can be more anxious that necessary precautions should be taken in this matter. I believe the interests of Europe are the same as the interests of this country, and I believe when the day of settlement comes it will be a settlement in which this country will bear an honourable part, and a part worthy of it." Lord Carnarvon proposed the health of "The Guests," coupled with the name of General Grant. The General, who was loudly cheered, briefly replied.

OBITUARY OF EMINENT PERSONS.

VISCOUNT CANTERBURY.

The Right Hon. John Henry Thomas Manners-Sutton, third Viscount Canterbury, G. C. M. G., K.C.B., died on the 24th inst. His Lordship was born May 27, 1814, the second son of the Right Hon. Charles Manners-Sutton, Speaker of the House of Commons, created in 1835 Viscount Canterbury, and was grandson of the Most Rev. Charles Manners-Sutton, Archbishop of Canterbury, the fourth son of Lord George Manners-Sutton, whose father was the third Duke of Rutland. Maternally, the nobleman whose death we record was nephew of another Speaker of the House of Commons, the late Right Hon. J. E. Denison. He was educated at Eton, and Trinity College, Cambridge, and was M.P. for the town of Cambridge, with a short interval, from 1839 to 1847. From 1841 to 1846 he was Under-Secretary of State for the Home Department, from 1853 to 1854 Chairman of Commissioners on Harbour Dues, from 1854 to 1861 Lieutenant-Governor of New Brunswick, from 1864 to 1866 Governor of Trinidad, and from 1866 to 1873 Governor of Victoria. In recognition of his long public services, he received the insignia of K.C.B. in 1866 and of G.C.M.G. in 1873. He succeeded to the Peerage at the death of his elder brother, Nov. 13, 1869, and at the time of his death was Registrar of the Faculty Court. He married, July 5, 1838, Georgiana, daughter of Charles Thompson Esq., of Wingham Hall, Norfolk, and leaves, with other issue, a son and heir, Henry Charles, now Lord Canterbury, who was born July 12, 1839, and married, April 16, 1872, to Amy Rachel, only daughter of the Hon. Frederick Walpole, M.P.

LADY ORMATHWAITE.

The Right Hon. Jane, Baroness Ormathwaite, wife of John, Lord Ormathwaite, died on the 22nd inst. at Warfield Park, Bracknell, Berks. Her Ladyship was born March 21, 1804, the younger daughter of George Harry, Earl of Stamford and Warrington, by Henrietta Charlotte Elizabeth, his wife, daughter of Francis, Lord Eloho, and was married, Nov. 8, 1825, to Sir John Benn-Walsh, Bart., created in 1868 Lord Ormathwaite, by whom she had two sons and two daughters.

MAJOR-GENERAL LE FLEMING.

Major-General George Cumberland Hughes Le Fleming, J.P. and D.L. for Westmorland and J.P. for Cumberland, who died at Rydal Hall, on the 7th inst., was the eldest son of John Cumberland Hughes, by his wife, Elizabeth, daughter of George Edward Stanley, of Ponsonby Hall, Cumberland. He was the lineal descendant of Richard Cumberland, the well-known dramatic writer, and sometime Ambassador to the Court of Spain. He was also descended from Dr. Bentley, the eminent Master of Trinity College, Cambridge. He succeeded to the Rydal estates on the death of his cousin, Lady Le Fleming, relict of Sir Daniel Fleming, sixth Baronet; and, assuming by Royal license the additional name of Le Fleming, thus became the representative of this ancient house. He was twice married, first to Mary, daughter of J. Macpherson, Esq., of Inverness, by whom he had a daughter, now wife of George G. Cunningham, Esq.; and, secondly, to Anne Jane, daughter of the late Major Alexander Rennick, H.E.I.C. service, by whom he leaves two sons and three daughters. He is succeeded in the estates by his eldest son, Stanley Hughes Le Fleming, born in 1855.

MR. LEGH.

George Cornwall Legh, Esq., of High Legh, Cheshire, J.P. and D.L., B.A. Ch. Ch., Oxford, and late Lieutenant-Colonel 2nd Cheshire Militia, died on the 16th inst. He was born in 1804, the elder son of George John Legh, Esq., of High Legh, by Mary, his wife, daughter of John Blackburne, Esq., M.P., of Hale, in the county of Lancaster, and represented in the male line the very ancient family of Legh of Easthall, in High Legh, and by female descent the Oconnealls, Barons of Burford. He served as High Sheriff in 1838, and was returned to Parliament by North Cheshire in 1841. He continued to represent that division, with a brief interval, up to 1868, when he was elected for Mid-Cheshire, for which he sat up to 1873. He married, in 1828, Louisa Charlotte, second daughter of Edward Taylor, Esq., of Bifrons, Kent, and niece of General Sir Herbert Taylor, G.C.B.

The following deaths have also been announced:—

Lieutenant-General W. A. Le Mesurier, on the 20th inst., at Summerlands, Exeter, aged ninety.

The Rev. Charles Porter, M.A., Vicar of Raunds, Northamptonshire, on the 16th inst., in his eighty-first year.

David Macrorie, M.D., of Mount Vernon, near Stroud, late of Liverpool, on the 17th inst., aged ninety.

The Rev. Hugh Allen, D.D., Rector of St. George the Martyr, Southwark, on the 20th inst., in his seventy-first year.

The Rev. William Fry, M.A., Hon. Canon of Peterborough, and hon. sec. to the Leicester Archidiaconal Board of Education, on the 15th inst., aged ninety-five.

Lieutenant-Colonel Henry Auriol Prinsep, H.M. Indian Army, late cantonment magistrate at Agra, on the 15th inst., at Aix-les-Bains, in his forty-seventh year.

Mr. George Cooper, F.R.C.S., the well-known surgeon, on the 23rd inst., in the eighty-sixth year of his age. Mr. Cooper was one of the Middlesex magistrates.

Frederick Mortimer Lewin, Esq., late of The Hollies, Kent, J.P., formerly of the Madras service, on the 17th inst., in the seventy-ninth year of his age.

The Rev. Henry Adams Scrgison Atwood, M.A., F.R.A.S., for thirty-eight years Rector of Ashelworth, Gloucester, on the 22nd inst., aged seventy-seven.

Jane, Lady Spearman, widow of the Right Hon. Sir Alexander Young Spearman, Bart., and daughter of Duncan Campbell, Esq., of Inverar, in the county of Argyll, on the 19th inst., aged seventy-one.

Major-General Angelo Edward Osborne, late Bengal Staff Corps, on the 16th inst., aged forty-nine. He served through the Punjab campaign, including the battles of Chillianwallah and Goojerat, and in the Indian Mutiny, participating in the capture of Lucknow.

Marmaduke Francis Dayrell, Esq., of Shudy Camps, Park, Cambridgeshire, on the 14th inst., at Croydon, aged forty-two. He was representative of an important branch of the very old family of Dayrell, of Lillingston Dayrell, and was descended

immediately from Sir Thomas Dayrell, Knt., of Shudy Camps, a gallant cavalier.

Lady Charlotte Neville Grenville, daughter of George, Earl of Dartmouth, K.G., and widow of the Hon. and Very Rev. George Neville Grenville, Dean of Windsor, and Master of Magdalen College, Cambridge, on the 15th inst., at Boltons Borough, in the eighty-ninth year of her age. Her Ladyship's eldest son, Mr. Ralph Neville Grenville, is M.P. for Mid-Somersetshire.

James Williamson, Colonel Bengal Staff Corps, Commandant 26th Bengal Native Infantry, on the 16th inst., at Meeran Meer, Punjab, aged forty-nine. He entered the Army in 1845, and saw much service; was Major of Brigade to the Punjab irregular force and staff officer under Brigadier-General Chamberlain in 1855; and commanded the 18th Punjab Infantry throughout various operations in India with distinction and gallantry.

CHESS.

TO CORRESPONDENTS.

All communications relating to this department of the Paper should be addressed to the Editor, and have the word "Chess" written on the envelope.

M. CLARK (Kilkee).—In Problem No. 174, after 1. R to Kt 4th, 1. Kt from K 6th to Q 4th, White's answer is 2. Q to Q B 4th—mate. You are very wide of the mark in your proposed solution of No. 175.

H. G. B. (Strand).—The City Chess Club should suit you best. The members meet at Montpelier Hotel, Newgate-street, on Monday, Wednesday, and Friday.

W. F. (Sunderland).—We consider Problem No. 173 to be a composition of unusual merit, notwithstanding the defect in the var a lon. Thanks for the problem.

R. C. M. (York).—Stalemate is a drawn game. Any elementary treatise upon chess—Staunton's "Handbook," for instance—will inform you of the meaning of all such technical terms.

N. S. B. (Sheffield).—In the position described Black should draw the game by playing his K to K square, after which the adverse pawn cannot be promoted.

J. G. (Canterbury).—We shall be pleased to examine the problem, if you will furnish us with the name of the author.

CORRECT SOLUTIONS OF PROBLEM No. 1737 received from D. H. A. Little Boy, M. S. S. S. L. Garnett, Timour, T. Edgar, and J. Mansell.

CORRECT SOLUTIONS OF PROBLEM No. 1738 received from Little J. M. J. D. H. Llansey, H. Stebbing, W. E. Whitehead, Trial, G. T. Reading, B. Lewy, and A. Little Boy.

CORRECT SOLUTIONS OF PROBLEM No. 1739 received from H. B. W. Leeson, G. H. V. E. H. Y. Cant, Hereward, C. E. H. Bee, E. P. Villiamy, L. Burnett, G. Wright, A. MacKenzie, M. Whiteley, T. W. Hope, J. F. Spiers, S. Threlfall, G. Reeve, R. bin Gray, Queen of Connaught, J. Lyndford, F. G. V. N. Br. ca, W. G. Dutton, R. Schottfeld, W. M. N. F. Wharton, P. R. H. B. B. Stone, Triton, J. Wontona, Paul's House, R. T. K. ng, E. Worsley, W. Alston, J. Williams, L. S. R. Black Knight, J. S. W. Leonard, and L. S. W. Western, Am. J. sine, T. R. Y. A. G. R. W. N. al y H., Only Jones, T. Edgar, S. Adams, H. S. M. B. W. Rob on, F. Stansfield, C. R. Emore, St. J. E. N. Hastings, Harrobian, Mechanic, S. B. W. L. C. Simplex, H. Burgher, O. D. Little, G. A. Tippet, Long Step, E. W. S. N. E. D. Robin Roughhead, E. L. G. N. Rumble, H. Stebbing, East Marden, B. H. Brooks, Highway Institute, J. de Honsteyn, and W. Foster.

SOLUTION OF PROBLEM No. 1738.

WHITE. BLACK. WHITE. BLACK.
1. Kt to Q B 5th. Any move. 2. Mate accordingly.

PROBLEM No. 1741.

By JAMES PIERCE, M.A.

BLACK.

WHITE.

White to play, and mate in two moves.

CHESS IN LONDON.

The following interesting Partie was played a few days ago between Messrs. BODEN and HAWITT at the Divan.—(Giuoco Piano.)

WHITE (Mr. H.)	BLACK (Mr. B.)	WHITE (Mr. H.)	BLACK (Mr. B.)
1. P to K 4th	P to K 4th	16. Q to Q 2nd	Q to Q 2nd
2. B to B 4th	Kt to K B 3rd	17. Here we think White should have continued with 16. Kt to K 6th and 17. P to K B 3rd, &c.	
3. Kt to Q B 3rd	B to B 4th	18. P to B 5th	P to B 5th
4. Kt to B 3rd	P to Q 3rd	19. Kt to B 7th (ch)	R takes Kt
5. P to Q 3rd	Kt to B 3rd	20. B takes P	Q to Kt 4th
6. B to K 3rd	B to Kt 3rd	21. Kt to B 2nd	B takes P
7. Castles	B to Kt 6th	22. B to B 2nd	Kt to K 2nd
8. B to Q Kt 5th	Castles	23. Q to K 3rd	P to B 3rd
9. P to K R 3rd		24. P to K 4th	P to Kt 4th

White's last two moves lose a great deal of time.

10. P to K Kt 4th B to R 4th
11. P to K Kt 4th B takes Kt P

The sacrifice of Kt for two Pawns is quite sound here, because, from the position of White's K, Black can play P to K B 4th immediately.

11. P takes Kt	B takes P
12. Kt to Kt 2nd	P to B 4th
13. B to B 4th (ch)	K to R sq
14. R to K R sq	P to K Kt 3rd
15. Kt to K Kt 5th	

A very ingenious conception, and one that, if correctly pursued, should have given White a fine game.

16. P to K R 4th and White resigned.

CHESS INTELLIGENCE.

At Bury St. Edmunds on Thursday last Mr. Blackburne contended sans voir against ten members of the local chess club simultaneously, and in the result came off the victor without losing a game. The blindfold player won eight and drew two games. A match between this well-known player and Herr Zukertort, of Berlin, arrangements for which have been in progress for some months past, was announced to commence on Wednesday last, the 27th inst., for a stake of sixty pounds. The player that first scores seven games, draws not counting, will be declared the winner.

Mr. Potter played eleven games simultaneously at the City Club on the 19th inst., winning nine games and losing two. Messrs. Lord and Harris were the successful pair.

Two important problem competitions in America were brought to a close last week. In the *Lebanon Herald* tourney of two-move problems the first prize was gained by Mr. W. A. Shinkman, of Grand Rapids, Michigan; and the second and third prizes respectively have been awarded to the compositions of the late Mr. Wormald and Mr. C. M. Baxter, of Dundee. In the Centennial Tournament thirteen prizes were offered for competition, and these have been distributed by the judges among the six sets of problems bearing the following mottoes:—"Ideas," "Themes," "Stand and Unfold Yourself," "Second Thoughts," "The Homestretch," and "Labore et Perseverantia." When the names of the successful competitors are published, we believe it will be found that seven of the prizes have been carried off by Mr. S. Loyd for the six problems comprised in the sets "Ideas" and "Themes"—viz., the first and second prizes for the best sets, the first prize for the best two-move problem, and the first for the best three-move problem; the first and second prizes for the best four-move problems, and, finally, the prize for the best problem competing in the tourney.

WILLS AND BEQUESTS.

The will and three codicils (dated April 16, 1872, Oct. 10, 1873, July 11, 1874, and Feb. 8, 1877) of Mr. Julius Calisher, formerly of No. 67, Jermyn-street, St. James's, and late of No. 42, Portland-place, who died on the 1st inst., were proved on the 15th inst. by Mrs. Julia Calisher, the widow, Philip Beyfus, and Algernon Edward Sydney, the executors, the personal estate being sworn under £180,000. The testator bequeaths to his wife his furniture, plate, pictures, household effects, horses and carriages, a pecuniary legacy of £1000 and the income of £50,000 during life or widowhood, to be reduced in the event of her marrying again, and many other legacies, among others £100 each to the West London Synagogue of British Jews, Upper Berkeley-street, Edgware-road; the Jews' Free School, Bell-lane, Spitalfields; the Jews' Orphan School, Mark-street, Goodman's-fields; the Jews' Hospital, Lower Norwood; the Board of Guardians for the Relief of the Jewish Poor, Devonshire-square, Bishopsgate; and the Jewish Society for the Relief of the Aged Needy. The rest of his property testator leaves to his children, and, in default of issue, to his brothers and sisters.

The will and four codicils (dated respectively July 13, 1872, Dec. 9, 1873, and Jan. 23, April 29, and May 2, 1877) of Mr. John Minton Courtauld, late of Bridge House, Bocking, Essex, and of The Gables, Upper Hamilton-terrace, St. John's-wood, who died on the 6th ult., was proved on the 19th inst. by John Warren, Sydney Courtauld, the nephew, Edward Bromley, and Charles Knowlly Grenside, the executors, the personal estate being sworn under £100,000. The testator gives to Miss Elizabeth Courtauld his residence at Bocking for life and £20,000, and there are several other bequests. The residue of his property is left upon various trusts for his daughter Edith.

The will (dated Feb. 1, 1876) of Mr. Edward Shepherd, late of No. 8, Aberdeen Park, Highbury, and of the Wenlock Basin, City-road, who died on April 28 last, was proved on the 1st inst. by Charles Horsley and Benjamin Crosby Lockwood, the executors, the personal estate being sworn under £40,000. The testator gives legacies to his eldest son and other relatives, executors, and others; and the residue of his real and personal estate to all his children, except his eldest son.

The will and codicil (dated Nov. 18, 1873, and Oct. 31, 1876) of Lieutenant-General John William Croghan, late of Balmoral House, Tregunter-road, South Kensington, who died on the 2nd ult., were proved on the 31st ult. by John Allen, Thomas John Croghan, and William Croghan, the nephew, the executors, the personal estate being sworn under £35,000. The testator leaves to his wife, Mrs. Louisa Croghan, £1000, and, subject to some legacies, the remainder of his property for life or widowhood; then some further legacies and annuities to relatives are to take effect, and the residue is to go to his three brothers, Josiah, Thomas, and Edmund.

The will and codicil (dated Oct. 17, 1872, and March 23, 1875) of Admiral Sir Stephen Lushington, G.C.B., late of Thornton-heath, who died on the 28th ult., were proved on the 16th inst. by George Bentinck Lefroy, the acting executor, the personal estate being sworn under £16,000. The testator makes some bequests in favour of his daughters, Agnes and Henrietta, and gives the remainder of his property to his wife absolutely; but, as this lady predeceased her husband, the residue will go to the testator's next of kin, according to the statute for the distribution of intestates' effects.

The will of Mr. Edward Henry Bromage, late of Parade House, Mounmouth, banker, who died on April 10 last, was proved on the 5th inst. by Thomas Perry Bromage, the brother, the sole executor, to whom he leaves all his estate. The personality is sworn under £6000.

ASTRONOMICAL OCCURRENCES IN JULY.

(From the "Illustrated London Almanack.")

The Moon is near Mars on the mornings of the 1st and 2nd, being west of the planet on the 1st and east of him on the 2nd; she is near Saturn also on the morning of the 2nd, the nearest approach being at 6h. a.m.; near Mercury on the 10th, near Venus on the evening of the 12th, and near Jupiter during the night common to the 20th and 21st. During the night hours of the 28th and morning hours of the 29th the Moon is situated to the right of both the planets Saturn and Mars, the distance decreasing as the night advances; and during the night hours of the 29th and morning hours of the 30th she is situated to the left of both these planets, the distance increasing as the night advances; the planet Saturn is the higher of the two planets. Her phases or times of change are:—

Last Quarter on the 3rd at 2 minutes after 9h in the afternoon.
New Moon " 10th " 6 " 10 " afternoon.
First Quarter " 17th " 13 " 1 " afternoon.
Full Moon " 25th " 26 " 7 " morning.

She is nearest the Earth on the morning of the 12th, and furthest from it on the morning of the 27th.

Mercury rises on the 5th at 2h. 43m. a.m., or 1h. 9m. before sunrise, which interval slowly decreases to 57m. on the 10th, to 35m. on the 15th, and to 6m. on the 20th, the planet rising on this day at 4h. 2m. a.m. On the 21st the planet and Sun rise together, and from July 22 to Sept. 27 he rises in daylight. He sets with the Sun on the 17th, at 8h. 16m. p.m. on the 20th, at 8h. 25m. p.m. on the 25th, and at 8h. 26m. p.m., or 37m. after sunset, on the 30th. He is in his ascending node on the 8th, near the Moon on the 10th, in perihelion on the 13th, and in superior conjunction with the Sun on the 20th.

Venus is an evening star, and sets on the 1st at 9h. 18m. p.m., on the 10th at 9h. 14m. p.m., on the 20th at 9h. 4m. p.m., and on the 30th at 8h. 49m. p.m., being one hour after sunset on each of these evenings throughout the month. She is near the Moon on the 12th. She is due south on the 1st at 1h. 9m. p.m., and on the last day at 1h. 39m. p.m.

Mars rises on the 9th at 10h. 46m. p.m., or 2h. 32m. after sunset; on the 19th at 10h. 15m. p.m., or 2h. 10m. after sunset; and on the 29th at 9h. 43m. p.m., or 1h. 53m. after sunset. He is near the Moon on the 1st, near Saturn on the 27th, and again near the Moon on the 29th. He is due south on the 1st at 4h. 20m. a.m., on the 15th at 3h. 43m. a.m., and on the last day at 2h. 52m. a.m.

Jupiter sets on the 1st at 3h. 7m. a.m., or 42m. before sunrise; on the 11th at 2h. 23m. a.m., or 1h. 35m. before sunrise; on the 21st at 1h. 39m. a.m., or 2h. 30m. before sunrise; and on the last day at 0h. 56m. a.m. He is near the Moon on the 21st. He is due south on the 1st at 11h. 8m. p.m., on the 15th at 10h. 6m. p.m., and on the last day at 8h. 57m. p.m.

Saturn rises on the 9th at 10h. 42m. p.m., or 2h. 28m. after sunset; on the 19th at 10h. 2m. p.m., or 1h. 58m. after sunset; on the 29th at 9h. 22m. p.m., or 1h. 33m. after sunset; and he rises on the last day of the month at 9h. 14m. p.m. He is near the Moon on the 2nd, stationary among the stars on the 2nd, and again near the Moon on the 29th. He is due south on the 1st at 4h. 50m. a.m., on the 15th at 3h. 55m. a.m., and on the last day at 2h. 50m. a.m.

Require no attention from servants. May be rented in London, 21, Queen Victoria-street, and 69, Oxford-street; removing from Temple Bar.

KINAHAN'S LL WHISKY.
UNIVERSALLY RECOMMENDED BY THE MEDICAL PROFESSION. A pure old spirit, mild, mellow, delicious, and most wholesome. Dr. Hasall says:—"The samples were soft and mellow to the taste, aromatic, and of the small the whisky is pure, well matured, and of very excellent quality."

SCHWEPPE'S MALVERN SELTZER.
As there are now many spurious imitations of this celebrated Water, consumers are requested to see that every bottle bears labels with Name and Trade-Mark—"A FOUNTAIN."

CARLSBAD MINERAL WATERS.—The best and most efficacious European Remedy against all diseases of the liver, stomach, bowels, spleen, kidneys, and urinary organs, the stones in the bladder, complaints of the prostate, diabetic mellitus, chronic rheumatism, gout, &c. The far-famed natural Carlsbad Mineral Waters, and their products, the Sprudel Salt, the Sprudel soap, and the Sprudel Lozenges, are exported to all regions of the world only by the CARLSBAD MINERAL WATER EXPORTATION.—Lobel Schottlander, Carlsbad (Bohemia), Austria.

AMERICAN CENTENNIAL PRIZE MEDAL.
FRY'S CARACAS COCOA.
Its pure flavour, delicate aroma, and invigorating qualities have established its position as a first-class dietary article.

FRY'S CARACAS COCOA.
"The Caracas Cocoa of such choice quality."—Food, Water, and Air. Dr. Hasall says:—"A most delicious and valuable article."—Standard.

FRY'S EXTRACT OF COCOA,
than which, if properly prepared, there is no nicer or more wholesome preparation of Cocoa."—Food, Water, and Air. Edited by Dr. Hasall.
TENTH INTERNATIONAL MEDAL awarded to J. S. FRY and SON.

EPPS'S COCOA.
GRATEFUL—COMFORTING.
"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast-tables with a delicately flavoured beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.

THE ALBION MILK and SULPHUR SOAP.
It is a happy combination of the articles which act the most beneficially upon the skin, the milk giving smoothness and elegance, the sulphur purifying. By all Chemists and Perfumers in Tablets, 6d. and 1s.—THE ALBION SANITARY SOAP COMPANY, 63, Oxford-street, London.

HEALTHY SKIN. PEARS'S TRANSPARENT SOAP.
PURE, FRAGRANT, and DURABLE.
The best for Toilet, Nursery, or for Shaving.
Invariably used by the PRINCE and PRINCESS OF WALES and CHILDREN.
Sold by Chemists and Perfumers everywhere.

DR. LELIEVRE'S ICELAND MOSS FOULITICE (Patented) is exempt from all the inconveniences inseparable from Potities made with Linseed or Bread. These spoil the linen, bedding, &c., dry up on the edges, rapidly ferment, giving a most unpleasant odour; and no dependence can be placed on the quality of the treatment of the linens. This New Potitice is instantaneous, for it is ready in a few seconds. Sold retail by all Chemists.
Wholesale, HIGGLOT and CO., 24, Southwark-street, London.

LAXORA LOZENGES.
Manufactured with the greatest care and the best ingredients, this preparation will be found the most valuable remedy for Constipation, Habitual Constiveness, Sluggishness of the Stomach, Bile, Headache, and especially useful for Children and Ladies.
It gives immediate relief, and the flavour is agreeable. It does not interfere with any medicine the patient may be taking at the same time.
It is recommended by eminent Physicians for its efficacy and mildness, as it does not purge.

"THE LANCET," June 9, 1877, reports:—"LAXORA LOZENGES.—We have no hesitation in recommending this preparation as a useful, because mild aperient. The Lozenges are exceedingly pleasant to the taste, and will be regarded by children simply as 'sweeties.' It is a great improvement on the preparations which are in common use for the same purpose, and will be really valuable in families."
The Box contains Eight Lozenges. Sold retail at 1s. 14d. per Box.

ANALYTICAL REPORT BY O. R. C. TITCHBORN, Ph.D., F.O.S., M.R.I.A., Chemist to the Apothecaries' Hall of Ireland, &c.
GUYOT'S LAXORA LOZENGES.
"Some considerable popularity has lately been obtained by aperient medicines made up in the form of confectionery. These palatable compounds chiefly emanate from France. The 'Box' par excellence is the 'Frenchie' man and, as a nation, they carry this peculiarity into their medicines. The Laxora Lozenges are of this confectionery class. They are efficacious, and nicely made, and can be safely administered as a mild and agreeable laxative medicine."

"They can be safely recommended."—Medical Press and Circular, April 11, 1877.
Sold by all Chemists and Druggists.
In Boxes, at 1s. 14d., including Government Stamp. Forwarded by post on receipt of 1s. 1d. in stamps.
Wholesale—24, Southwark-street, London, S.E.

BRIDES and BRIDESMAIDS
are invited to inspect at GAPPEN, SON, and CO.'S WAREHOUSE the various Qualities and Designs in Underclothing, Silks, Fancy Dress Materials, Costumes, Millinery, Mantles, Sheetings, Towellings, Table Linens, Blankets, Quilts, and all similar requisites for persons as well as for household use. These Articles are all made up on the premises, and Ladies can select at the counters their Silks, Linens, Lace, Madras Works, Longcloths, and other Fabrics, before they are sent to the various work-rooms. Lists, with prices, on application to Gappen, Son, & Co., Gracechurch-street and Fenchurch-street, London, E.C.

FLORILINE.—For the Teeth and Breath.
Is the best Liquid Dentifrice in the world; it thoroughly cleanses partially-decayed teeth from all parasites or "Irms," "animalcules," leaving them purely white, imparting a delightful fragrance to the breath. Price 2s. 6d. per Bottle. The Fragrant Floriline removes instantly all odours arising from a foul stomach or tobacco smoke, being partly composed of honey, soda, and extracts of sweet herbs and plants. It is perfectly harmless and delicious as cherry. Prepared by HENRY C. GALLUP, 488, Oxford-street, London. Retail everywhere.

VALUABLE DISCOVERY for the HAIR.
If your hair is turning grey, or white, or falling off, use "The Mexican Hair Renewer," for it will positively restore in every case Grey or White Hair to its original colour, without leaving the disagreeable smell of most "Restorers." It makes the hair charmingly beautiful, as well as promoting the growth of the hair on bald spots where the glands are not decayed. Ask any Chemist for the "Mexican Hair Renewer," price 2s. 6d. Prepared by HENRY C. GALLUP, 488, Oxford-street, London.
